

Gilles Ronin

Drawing for interior designers

contents

Introduction	4	Walls and partitions	24	Planning the space	62
Representing An Interior Space	5	Format and scale	25	Converting a space under the eaves	64
Developing your project	5	Floor plan	25	Designing a platform for a bed	64
The progression	5	Layout of a Flat	26	Designing a small flight of steps	65
Variations and transformations	5			Designing a skylight	65
PREPARATION FOR DRAWING	6	PERSPECTIVE	28	A Few Simple Construction Tricks	66
Materials	8	Isometric Projection	30	How to establish equal depths	66
The Line	10	An effect of reduction	31	To divide a wall	66
Graphics, tonal values and colours	10	Drawing Three-dimensional Objects and Furniture	32	How to deal with an irregular-shaped space	66
Figures	11	Designing an office space	34	How do you draw a circle?	67
Proportions	12	A foldaway office on a shelf	34	Perspective or projection view?	67
Constructing a drawing	13	Grouping office furniture	35	Taking Down a Partition Wall	68
		Playing about with space	36	Creating a mezzanine or overhang	69
PLANS AND LAYOUTS	14	Drawing a kitchen	37	The Oblique View	70
Drawing the Plan	16	Swapping around kitchen and bathroom	38	Designing a room by Eye	72
Scales	16	Visualising a kitchen corner	40	Setting the boundaries	72
Conventions and Symbols	18	Creating an open partition	42	Placing the horizon	72
Doors	18	Transforming a flat	44	Placing the horizon in the drawing	73
Windows	18	Creating a dressing room and a bathroom	46	Placing the angles and the line of the ceiling	73
Conventions regarding lines	18	Seeing things in perspective	48	Placing the vanishing point	74
A base line, or contour	18	The vanishing point	48	If the vanishing point is not on the paper	75
A thin line	18	The horizon	50	Different Oblique Views	76
A thin dotted line	18	Moving the vanishing point on the horizon	51	Taking out a partition wall	77
The logic behind the symbols	19	The height of the horizon	52	A View from Above . . .	78
Furniture and equipment	19	The height of the horizon in the drawing	52	...And a High-Angle View	79
Changing Around the Furniture	20	The height of the horizon, people and scale	53	Drawing on the Computer	80
Elevation and Section	22	The view from the front	54	SketchUp	80
Rearranging an area of wall	23	The principles of a frontal view	55	Exploration	80
Design in modules	23	The problem of depth	55	First Steps	80
Making a Layout	24	To draw the depth	56	Making a model for your projects	81
Organisation of the layout	24	Mastering the depth	57		
A team effort	24	To move a partition wall	58	Grids for Isometric Projections	82
A sketch of the ground plan	24	Creating an extension to block off a corner	60	Grids for Frontal Views	84
The dimensions	24			Grids for Oblique Views	86
