Contents

Preface

Authors

1. Introduction to Critical Incident Management
 - The Complex Nature of Critical Incidents and Large-Scale Special Events
 - Managing Chaos, Uncertainty, and Complexity
 - Chaos
 - Uncertainty
 - Complexity
 - The Three-Dimensional Model of Critical Incident Management
 - The Incident Command System
 - The Three Spheres of Critical Incident Management
 - Before, During, and After
 - Incidents versus Events
 - Three Types of Incidents
 - Order, Predictability, and Simplicity
 - References
2. Risk Analysis
 - Risk Mitigation
 - How Do We Determine Risk?
 - How Do We Determine the Consequence Factor?
 - How Do We Determine the Probability Factor?
 - Threats, Hazards, and Vulnerability
 - Passive Vulnerability Assessments versus Active Red Team Assessments
 - Risk Analysis: Threat + Vulnerability × Consequence
 - Mitigation Options
 - Cost–Benefit Analysis and Trade-Offs
 - Catastrophic Errors versus Nuisance Errors
 - References

3. Planning and Organizing at the Operational Level
 - Operational Command for Spontaneous Incidents
 - Why Police Officers Don't Like the Incident Command System
 - Incident Command System: Does One Size Fit All?
 - The Four Cornerstones of Critical Incident Management
 - Communications
 - Collaboration
 - Coordination
 - Command
 - The Stages of a Critical Incident Response
 - The Fundamental Principles for Planning Events
 - Murphy's Law and Contingency Planning
 - Nine Steps of Pre-Event Operations Planning
 - Step 1: Conduct a Threat Assessment
 - Step 2: Meet with Event Organizers and Stakeholders
 - Step 3: Conduct a Site Survey (Vulnerability Assessment)
 - Step 4: Develop a Site Plan
 - Step 5: Develop a Crowd Control Plan
 - Step 6: Determine Necessary Resources
 - Step 7: Develop an Organizational Chart
 - Step 8: Assign Specific Personnel
 - Step 9: Conduct Training and Rehearsals
 - References
4. Planning and Organizing for Tactical Response
 - Command or Control?
 - Specialists and Generalists
 - Mixed Teams
 - The Fundamentals of Tactical Response to Critical Incidents
 - Perimeters
 - Personal Protective Equipment
 - Decontamination Procedures
 - Tactical Response to Non-CBRN Incidents
 - References
5. Strategic Planning—A Systems Approach

Strategy or Tactics?

A Systems Approach to Strategic Planning

Systems, Subsystems, and Meta Systems

Stakeholder Analysis

SWOT (Strengths, Weaknesses, Opportunities, and Threats) Analysis

Risk Analysis

Cost–Benefit Analysis

Types of Strategies

Early Intervention Strategies

Strategic Planning: Before, During, and After

References

6. Organizing and Planning Training Exercises

The Link between Planning and Training

The Importance of Training and Exercising

The Key Components of an Effective Emergency Operations Plan

Integrating the Emergency Operations Plan

The Importance of Top Leadership

Communicating the Emergency Operations Plan

Coordination and Collaboration with Various Stakeholders

Organizing Training Activities

Types of Training

Professional Development

References

7. Learning and Innovation

Creating New Ways for Using Old Ideas

Innovate or Die

Terror as a Business

The Learning Organization

Al Qaeda as a Learning Organization

Innovation and Homeland Security

Improvisation versus Innovation

Soldiers, Artists, Writers, and Magicians

References

8. Planning for Large-Scale Special Events—Putting It All Together

A 31 Point Checklist for Planning Large-Scale Special Events

Identify the Stakeholders

Meet with Event Organizers and Stakeholders

Identify All Related Critical Infrastructure Assets

Conduct a Consequence Assessment of All Identified Critical Infrastructure Assets

Conduct a Threat Assessment

Conduct a Site Survey/Vulnerability Assessment

Conduct an Overall Risk Analysis

Incorporate Best Practices and Lessons Learned

Develop a Site Plan

Designate Command Post Locations

Identify Redundant Staging Areas

Incorporate a Plan to Control Ingress and Egress

Develop an Emergency Evacuation Plan

Develop an Emergency Decontamination Plan

Develop a Mass Casualty Plan

Develop a Crowd Control Plan

Develop a Mass Arrest Plan

Develop a Flight Control Plan

Incorporate the Three Phases of Critical Incident Management (Before, During, and After)

Develop an Organizational Chart

Develop Interdisciplinary and Multiagency Specialized Mixed Teams

Develop an All-Hazards Render Safe Plan

Develop Contingency Tactical Response Plans

Identify and Procure the Necessary Specialized Equipment for Each Mission

Develop a Communications Plan

Develop a Surveillance and Intelligence Gathering/Dissemination Plan

Develop a Unified Information Dissemination Protocol

Develop Response Protocols for Nonevent-Related Incidents Outside the Area of Operations

Develop a Budget

Develop a Training and Rehearsal Schedule

Develop a Timeline

Applying the Lessons of Special Event Planning to Scale
References

Glossary

Appendix I: Steps for Planning a Special Event

Appendix II: Typical Field Force Lineup

Appendix III: Enhanced Mobile Field Force Lineup

Appendix IV: Multiagency Team Assignments

Appendix V: FTAA-Related Training

Appendix VI: Example of a Training Schedule

Appendix VII: Example of a Training Timeline (2003 FTAA)
