Introduction 1
Som Naidu

Part I. Content representation

1. Model facilitated learning 11
Marcelo Milrad, Michael Spector and Pål Davidsen

2. Implicit theories of learning and change: their role in the development of e-learning environments for higher education 25
Peter Goodyear and Chris Jones

3. Designing graphical, interactive simulations to model scientific problem solving 38
Laurie Ruberg and John Baro

4. Optimizing domain knowledge representation with multimedia objects 50
Kinshuk and Ashok Patel

Part II. Activation of learning

5. Using interactive video-based multimedia to scaffold learning in teacher education 64
John Baird

6. Using authentic patient encounters to engage medical students in a problem-based learning curriculum 78
Mike Keppell, Kristine Elliott, Gregor Kennedy, Susan Elliott and Peter Harris

7. **Virtual learning in cultural studies: matching subject content and instructional delivery** 90
Lee Wallace, Annamarie Jagose and Cathy Gunn

8. **Replicating practice complexities—multimedia innovation in social work education** 105
Stuart Evans and Phillip Swain

Part III. Providing socialization support

9. **Technology and second language learning through socialization** 120
Robert Debski

10. **Developing social presence in online course discussions** 136
Karen Swan

11. **Socialization through CMC in differently structured environments** 154
Peter Smith and Elizabeth Stacey

12. **Collaboration and community through simulation/role-play** 166
Karen Murphy and Yakut Gazi

Part IV. Assessment of learning outcomes

13. **Broadening assessment strategies with information technology** 181
Catherine McLoughlin

14. **Applying assessment principles and expanding the focus of assessment to enhance learning online** 195
Alex Radloff and Barbara de la Harpe

15. **The use of online assessment in stimulating a deeper approach to learning** 206
Carol Johnston

16. **Cognitive apprenticeship learning—ensuring far transfer of knowledge through computer-based assessment** 217
Ashok Patel, Kinshuk and David Russell

Part V. Providing feedback

17. **A feedback model and successful e-learning** 232
Yiping Lou, Helena Dedic and Steven Rosenfield

18. Interactivity and feedback as determinants of engagement and meaning in e-learning environments 243
Rod Sims

19. Fundamentals for structuring feedback in an online learning environment 258
Christopher K Morgan

Commentary. On learning and teaching with technology: principles and practices 270
Andrew Higgins
