Edition 4.0

Information Systems for Managers

With Cases

Gabriele Piccoli | Federico Pigni

Prospect Press

Contents

Preface

Foreword

Part I: Foundations

Chapter 1. Information Systems and the Role of General and Functional Managers

What You Will Learn in This Chapter

1.1. Introduction

1.2. General and Functional Managers

1.3. General and Functional Managers versus End Users

1.4. Information Systems Professionals

The Chief Information Officer

The Technical Staff

Analysts and Managerial Staff

IT Consulting

Data Science and Data Scientists

Advanced Analytics Skills and Competencies

1.5. Fundamental IT Trends: The Staying Power of Moore’s Law

Processing Power and Memory Have Increased

Costs of Computing Power Have Declined

Computers Have Become Easier to Use

1.6. Other IT Trends of Managerial Interest

Declining Storage Costs

Ubiquitous Network Access

Ubiquitous Computing and Digital Data Genesis

1.7. How Do These Trends Affect Today’s Managers?

Summary

Study Questions

Glossary

Chapter 2. Information Systems Defined

What You Will Learn in This Chapter
2.1. Introduction
2.2. Information Systems: Definition
IS, Not IT
Information Systems as Sociotechnical Systems
The Four Components of an Information System
Systemic Effects
2.3. Why Do Organizations Build Information Systems?
Successful Information Systems
Information Systems Outcomes
2.4. Information Systems in the Organizational Context
Every Organization Is Unique
Bringing It All Together
2.5. Information Systems and Organizational Change
First-Order Change: Automate
Second-Order Change: Informate
Third-Order Change: Transform
2.6. Implications
Don’t Put the Cart before the Horse
Manage Systemic Effects
Information Systems Are in Flux
2.7. Conclusion
Summary
Study Questions
Glossary

Chapter 3. Organizational Information Systems and Their Impact

What You Will Learn in This Chapter
3.1. Introduction
3.2. Categorizing Systems
Hierarchical Perspective
Functional Perspective
Process Perspective
3.3. Enterprise Systems
Integration

Enterprise Resource Planning
The Advantages of ERP
The Limitations of ERP
Supply Chain Management
Customer Relationship Management
Knowledge Management
3.4. Analytics and Big Data
The Batch Era
The Transaction Era
Business Intelligence Era
Big Data Era
3.5. Computing Architectures and the Cloud
Mainframes and Terminals
Standalone Personal Computing
The Client-Server Model
Cloud Computing
Summary
Study Questions
Glossary

Part II: Competing in the Digital Age

Chapter 4. The Changing Competitive Environment

What You Will Learn in This Chapter
4.1. Introduction
4.2. Network Economics
Networks Are Different: Value in Plentitude
Physical and Virtual Networks
Key Concepts and Vocabulary
Two-Sided Networks
Networks, Marketplaces, and Platforms
Implications for General and Functional Managers
4.3. The Economics of Information
Data and Information

Classic Information Goods
The Economic Characteristics of Information
Implications
Information-Intensive Goods
4.4. Information in Networks
The Richness and Reach Trade-Off
Process Virtualization Theory
Managerial Implications
Obstacles
4.5. A Note about Disruptive Technology
Sustaining Technology
Disruptive Technology
Implications for Managers
What to Do?
Summary
Study Questions
Glossary

Chapter 5. Digital Business

What You Will Learn in This Chapter
5.1. Introduction
5.2. The Internet
5.3. Internet Services
Web 2.0
5.4. The Mobile Platform
5.5. Digital Business Innovation
Digital Business Modeling
The Elements of the Business Model Canvas
Categorizing Digital Business Initiatives
Categorizing Ventures by Transaction Type
Categorizing Ventures by Company Structure
Dominant Business Models for Digital Business
Dominant Revenue Models for Digital Business
5.6. Issues to Consider
Disintermediation

Reintermediation
Market Efficiency
Channel Conflict
Customer and Employee Self-Service
Long-Tail Strategies
Online-to-Offline
Summary
Study Questions
Glossary

Part III: The Strategic Use of Information Systems

Chapter 6. Strategic Information Systems Planning

What You Will Learn in This Chapter
6.1. Introduction
A Word about Strategic and Operational Planning
Strategic Alignment
6.2. Six Decisions Requiring Managerial Involvement
6.3. The Purpose of Strategic Information Systems Planning
Plans Enable Communication
Plans Enable Unity of Purpose
Plans Simplify Decision Making over Time
6.4. The Strategic Information Systems Planning Process
Know Who You Are: Strategic Business Planning
Know Where You Start: Information Systems Assessment
Know Where You Want to Go: Information Systems Vision
Know How You Are Going to Get There: Information Systems Guidelines
Know How Well Equipped You Are to Get There: Information Systems SWOT
From Planning to Action: Proposed Strategic Initiatives
Summary
Study Questions
Glossary

Chapter 7. Value Creation and Strategic Information Systems

What You Will Learn in This Chapter

7.1. Introduction
The Analysis of Added Value
The Benefits of Disciplined Analysis
The Definition of Value
Defining the Components of Value Created
Computing the Total Value Created
Appropriating the Value Created
The Definition of Added Value
Added Value in a Competitive Market
Pricing Considerations
The Relationship between Added Value and Competitive Advantage
How Is Added Value Created?
Two Ways to Create New Value
Some Considerations about the Analysis of Added Value
7.2. Strategic Information Systems
Definition: Strategic Information Systems
IT-Dependent Strategic Initiatives
Summary
Study Questions
Glossary

Chapter 8. Value Creation with Information Systems

What You Will Learn in This Chapter
8.1. Introduction
8.2. Traditional Models of Value Creation with IT
Industry Analysis
Value Chain
Customer Service Life Cycle
Traditional Models, Not “Old” Models
8.3. Specialized Frameworks
Virtual Value Chain
Value Creation with Customer Data
Crafting Data-Driven Strategic Initiatives
8.4. Conclusions
Summary

Study Questions
Glossary

Chapter 9. Appropriating IT-Enabled Value over Time

What You Will Learn in This Chapter
9.1. Introduction
9.2. Not All IT Is Created Equal
High-Speed Internet Access in Hotel Rooms
Business Intelligence at Caesars Entertainment
Tesla and the Strategic Value of Autonomous Driving
The Need for A Priori Analysis
9.3. Appropriating Value over Time: Sustainability Framework
Sustainable Competitive Advantage
Resource-Based View
Response Lag
Four Barriers to Erosion
The Holistic Approach
The Dynamics of Sustainability
9.4. Applying the Framework
Prerequisite Questions
Sustainability Questions
9.5. Making Decisions
Develop the IT-Dependent Strategic Initiative Independently
Develop the IT-Dependent Strategic Initiative as Part of a Consortium
Shelve the IT-Dependent Strategic Initiative
Summary
Study Questions
Glossary

Part IV: Getting IT Done

Chapter 10. Funding Information Systems

What You Will Learn in This Chapter
10.1. Introduction
10.2. Information Systems Governance

Steering Committee
10.3. Funding Information Systems
Chargeback
Allocation
Overhead
10.4. The Budgeting and Project Prioritization Process
Making the Budget
10.5. Funding Information Systems Projects: Making the Business Case
Limitations of the Business Case
Overcoming the Limitations of the Business Case
Individual Project Risk
Portfolio Management
10.6. Outsourcing
Drivers of Outsourcing
The Risks of Outsourcing
Offshoring
Making Optimal Outsourcing Decisions
Summary
Study Questions
Glossary

Chapter 11. Creating Information Systems

What You Will Learn in This Chapter
11.1. Introduction
How Hard Can IT Be?
11.2. Fulfilling Information Processing Needs
Three Approaches
Make versus Buy
Buy and Make
11.3. Build Your Own: Systems Design and Development
Systems Development Life Cycle
Prototyping
Agile Development
Outsourced Development
11.4. Buying Off-the-Shelf Applications

Definition
Build
Implementation
DevOps
11.5. Open Source Development
Open Source: Definition
Advantages and Disadvantages of Open Source Software
11.6. End-User Development
The Benefits of End-User Development
The Risks of End-User Development
Summary
Study Questions
Glossary

Chapter 12. Information System Trends

What You Will Learn in This Chapter
12.1. Introduction
12.2. The Internet of Things
12.3. Wearable Devices
12.4. Digital Data Genesis
Digital Data Streaming
Virtual and Augmented Reality
12.5. Digital Manufacturing
Machine Learning
Deep Learning
A Note about Artificial Intelligence
Blockchain
Summary
Study Questions
Glossary

Chapter 13. Cybersecurity, Privacy, and Ethics

What You Will Learn in This Chapter
13.1. Introduction
13.2. IT Risk Management and Cybersecurity

Why Is Cybersecurity *Not* an IT Problem?
Risk Assessment
Risk Mitigation
The Internal Threat
The External Threat
Mobile and IoT Cybersecurity Threats
Responding to Cybersecurity Threats
Cybersecurity Frameworks
Cybersecurity Responses
Managing Cybersecurity: Overall Guidelines
13.3. Privacy
Privacy Defined
Privacy Risks
Safeguarding Privacy
13.4. Ethics
Ethics: Definition
Information Systems Ethics
Ensuring Ethical Uses of Information Systems
Summary
Study Questions
Glossary

Part V: Cases

Case Study for Chapter 2: Troubleshooting Information Systems at the Royal Hotel
Case Study for Chapter 3: eLoanDocs: Riding the Tide of Technology without Wiping Out
Case Study for Chapter 4: Online Education
Case Study for Chapter 5: Zoorate: Certifying Online Consumer Reviews to Create Value
Case Study for Chapter 6: Outrigger Hotels and Resorts
Case Study for Chapter 7: Upscale Markets: Value Creation in a Mature Industry
Case Study for Chapter 8: TRIPBAM: Leveraging Digital Data Streams to Unleash Savings (A)
Case Study for Chapter 9: TRIPBAM: Leveraging Digital Data Streams to Unleash Savings (B)

Case Study for Chapter 10: IT Planning at ModMeters
Case Study for Chapter 11: Pearson’s SuccessMaker: Putting the Customer First in Transforming Product Development Processes
Case Study for Chapter 13: Targeting Target with a 100 Million Dollar Data Breach

Index
