Ü		Chapter 3:	
		Operations strategy	74
Part One		Introduction	74
DIRECTING THE OPERATION	3	What is strategy and what is operations	
DIRECTING THE OF ERVITOR	3	strategy?	76
Chapter 1:		What is the difference between a 'top-down'	
Operations management	4	and 'bottom-up' view of operations	80
Introduction	4	strategy? What is the difference between a 'market	80
What is operations management?	5	requirements' and an 'operations	
Why is operations management important	3	resources' view of operations strategy?	84
in all types of organization?	8	How can operations strategy form the basis	
What is the input-transformation-output		for operations improvement?	92
process?	13	How can an operations strategy be put together?	00
What is the process hierarchy?	19	The process of operations strategy Summary answers to key questions	98 102
How do operations and processes differ? What do operations managers do?	22 27	Case study: McDonald's: half a century	102
Summary answers to key questions	31	of growth	104
Case study: Design house partnerships at	31	Problems and applications	107
Concept Design Services	33	Selected further reading	108
Problems and applications	36		
Selected further reading	36	Chapter 4:	
Chapter 2:		Product and service innovation	109
Chapter 2:	20	Introduction	109
Operations performance	38	What is product and service innovation?	110
Introduction	38	What is the strategic role of product	
Why is operations performance vital		and service innovation?	114
in any organization?	39	What are the stages of product and	110
How is operations performance judged at a societal level?	41	service innovation? What are the benefits of interactive	119
How is operations performance judged	71	product and service innovation?	130
at a strategic level?	46	Summary answers to key questions	134

Case study: Developing 'Savory Rosti-crisps'		Summary answers to key questions	211
at Dreddo Dan's	136	Case study: The Action Response Applications	
Problems and applications	138	Processing Unit (ARAPU)	212
Selected further reading	139	Problems and applications	214
		Selected further reading	214
Chapter 5:		Cl	
The structure and scope		Chapter 7:	
of operations	140	Layout and flow	216
Introduction	140	Introduction	216
What do we mean by the 'structure'		What is layout and how can it influence	
and 'scope' of operations' supply		performance?	217
networks?	141	What are the basic layout types used	
What configuration should a supply		in operations?	220
network have?	145	How does the appearance of an	
How much capacity should operations		operation affect its performance?	231
plan to have?	149	How should each basic layout type	
Where should operations be located?	154	be designed in detail?	234
How vertically integrated should an		Summary answers to key questions	240
operation's network be?	156	Case study: The event hub	241
How do operations decide what to do		Problems and applications	244
in-house and what to outsource?	161	Selected further reading	244
Summary answers to key questions	164		
Case study: Aarens Electronic	166	Chapter 8:	
Problems and applications	168	Process technology	246
Selected further reading	169	Introduction	
Cumplement to Chanter Fr			246
Supplement to Chapter 5:		What is process technology?	247
Forecasting	170	What do operations managers need to	251
Introduction	170	know about process technology?	251
Forecasting - knowing the options	170	How are process technologies evaluated?	258
In essence forecasting is simple	171	How are process technologies implemented?	264
Approaches to forecasting	172	Summary answers to key questions	271
Selected further reading	178	Case study: Rochem Ltd	272
		Problems and applications	274
		Selected further reading	274
Part Two			
		Charten O.	
DESIGNING THE OPERATION	101	Chapter 9:	
DESIGNING THE OPERATION	181	People in operations	276
Chapter 6:		Introduction	276
Chapter 6:	100	Why are people so important in operations	
Process design	182	management?	277
Introduction	182	How do operations managers contribute	
What is process design?	183	to human resource strategy?	279
What should be the objectives of		How can the operations function be	
process design?	185	organized?	281
How do volume and variety affect		How do we go about designing jobs?	286
process design?	189	How are work times allocated?	300
How are processes designed in detail?	195	Summary answers to key questions	301
		Case study: Grace faces (three) problems	302

Problems and applications Selected further reading	304 305	Supplement to Chapter 11:	
Selectica further reading	303	Analytical queuing models	391
Supplement to Chapter 9:		Introduction	391
Work study	306	Notation	391
Introduction	306	Variability	391 393
Method study in job design	306	Incorporating Little's law Types of queuing system	393
Work measurement in job design	309	Types of queuing system	373
		Chapter 12:	
		Supply chain management	398
Part Three		Introduction	398
DELIVED		What is supply chain management?	399
DELIVER	315	How should supply chains compete?	402
Chapter 10:		How should relationships in supply chains	407
Planning and control	217	be managed?	407
	317	How is the supply side managed? How is the demand side managed?	412 419
Introduction	317	What are the dynamics of supply chains?	423
What is the difference between planning	318	Summary answers to key questions	426
What is the difference between planning and control?	319	Case study: Supplying fast fashion	428
How do supply and demand affect planning	317	Problems and applications	430
and control?	321	Selected further reading	431
What are the activities of planning and control?	327	Chapter 12:	
Summary answers to key questions	345	Chapter 13:	422
Case study: subText Studios Singapore	346	Inventory management	432
Problems and applications	348 349	Introduction	432
Selected further reading	347	What is inventory?	434
Chapter 11:		Why should there be any inventory? How much to order? The volume decision	437 442
Capacity management	350	When to place an order? The timing decision	452
Introduction	350	How can inventory be controlled?	458
		Summary answers to key questions	463
What is capacity management? How are demand and capacity	351	Case study: supplies4medics.com	465
measured?	354	Problems and applications	466
How should the operation's base capacity		Selected further reading	467
be set?	364	Chapter 14:	
What are the ways of coping with		·	460
mismatches between demand	266	Planning and control systems	468
and capacity?	366	Introduction	468
How can operations understand the consequences of their capacity		What are planning and control systems?	469
decisions?	373	What is enterprise resource planning and	
Summary answers to key questions	382	how did it develop into the most common planning and control system?	475
Case study: Blackberry Hill Farm	384	How should planning and control systems	773
Problems and applications	388	be implemented?	483
Selected further reading	389	Summary answers to key questions	486
