A CHAPMAN & HALL BOOK

Contents

Preface	xv
1 Introduction	1
2 Returns	5
2.1 Introduction	5
2.2 Basic Concepts	5
2.3 Adjusted Prices	9
2.4 Statistical Properties of Returns	14
2.5 Analyzing Return Data	20
2.6 Suggestions for Further Reading	37
2.7 Exercises	37
3 Random Walk Hypothesis	41
3.1 Introduction	41
3.2 Conditional Expectation	41
3.3 Efficient Markets and the Martingale Model	45
3.4 Random Walk Models for Asset Prices	48
3.5 Tests of the Random Walk Hypothesis	54
3.6 Do Stock Returns Follow the Random Walk Model?	61
3.7 Suggestions for Further Reading	63
3.8 Exercises	64
4 Portfolios	69
4.1 Introduction	69
4.2 Basic Concepts	69
4.3 Negative Portfolio Weights: Short Sales	73
4.4 Optimal Portfolios of Two Assets	74
4.5 Risk-Free Assets	81
4.6 Portfolios of Two Risky Assets and a Risk-Free Asset	84
4.7 Suggestions for Further Reading	91
4.8 Exercises	91
5 Efficient Portfolio Theory	95
5.1 Introduction	95
5.2 Portfolios of N Assets	95
5.3 Minimum-Risk Frontier	103

5.4	The Minimum-Variance Portfolio	113
5.5	The Efficient Frontier	118
5.6	Risk-Aversion Criterion	121
5.7	The Tangency Portfolio	129
5.8	Portfolio Constraints	133
5.9	Suggestions for Further Reading	139
5.10	Exercises	139
6	Estimation	145
6.1	Introduction	145
6.2	Basic Sample Statistics	145
6.3	Estimation of the Mean Vector and Covariance Matrix . . .	151
6.4	Weighted Estimators	157
6.5	Shrinkage Estimators	163
6.6	Estimation of Portfolio Weights	171
6.7	Using Monte Carlo Simulation to Study the Properties of Estimators	174
6.8	Suggestions for Further Reading	189
6.9	Exercises	190
7	Capital Asset Pricing Model	197
7.1	Introduction	197
7.2	Security Market Line	198
7.3	Implications of the CAPM	202
7.4	Applying the CAPM to a Portfolio	206
7.5	Mispriced Assets	208
7.6	The CAPM without a Risk-Free Asset	211
7.7	Using the CAPM to Describe the Expected Returns on a Set of Assets	215
7.8	Suggestions for Further Reading	217
7.9	Exercises	217
8	The Market Model	221
8.1	Introduction	221
8.2	Market Indices	221
8.3	The Model and Its Estimation	226
8.4	Testing the Hypothesis that an Asset Is Priced Correctly . .	232
8.5	Decomposition of Risk	237
8.6	Shrinkage Estimation and Adjusted Beta	239
8.7	Applying the Market Model to Portfolios	244
8.8	Diversification and the Market Model	247
8.9	Measuring Portfolio Performance	254
8.10	Standard Errors of Estimated Performance Measures	259
8.11	Suggestions for Further Reading	268
8.12	Exercises	269

9	The Single-Index Model	273
9.1	Introduction	273
9.2	The Model	273
9.3	Covariance Structure of Returns under the Single-Index Model	275
9.4	Estimation	281
9.5	Applications to Portfolio Analysis	286
9.6	Active Portfolio Management and the Treyner–Black Method	292
9.7	Suggestions for Further Reading	307
9.8	Exercises	308
10	Factor Models	311
10.1	Introduction	311
10.2	Limitations of the Single-Index Model	311
10.3	The Model and Its Estimation	315
10.4	Factors	321
10.5	Arbitrage Pricing Theory	328
10.6	Factor Premiums	333
10.7	Applications of Factor Models	343
10.8	Suggestions for Further Reading	349
10.9	Exercises	351
	References	355
	Index	363
