

# **Economic & Financial Analysis for Engineering & Project Management**

Abol Ardalan, D.Sc.  
Graduate School of Management & Technology  
University of Maryland University College

## TABLE OF CONTENTS

<b>Preface</b>	<u>ix</u>
<b>Acknowledgment</b>	<u>xiii</u>
<b>Part 1: Financial Analysis and Choice of Alternatives</b>	
1. Introduction	<u>3</u>
Costs and Benefits	<u>4</u>
Importance of Time (Time Value of Money)	<u>5</u>
Interest Rate	<u>6</u>
Continuous Compounding of Interest	<u>7</u>
Effective Rate of Interest	<u>7</u>
Nominal Interest Rate	<u>8</u>
Equivalence	<u>9</u>
Cash Flow Diagram	<u>10</u>
Inclusion of Nonmonetary Costs and Benefits	<u>13</u>
Importance of Cash Flow Diagram	<u>13</u>
The Process of Decision Making	<u>15</u>
Financial Analysis Methods	<u>16</u>
Derivation of the Formulae	<u>16</u>
Problems	<u>17</u>

2. Present Worth	<u>19</u>
Present Value (PV)	<u>19</u>
Net Present Worth	<u>20</u>
Present Value of Uniform Annual Series	<u>20</u>
Present Value of Arithmetic Gradient Series	<u>25</u>
Multiple Alternatives and Equalizing Lives	<u>28</u>
Exclusivity	<u>29</u>
Problems	<u>34</u>
3. Future Worth	<u>39</u>
Future Value (FV)	<u>39</u>
Future Value of Uniform Annual Series	<u>40</u>
Multiple Alternatives	<u>42</u>
Problems	<u>43</u>
4. Annual Worth	<u>45</u>
Annual Worth and Equivalent Uniform Annual Worth	<u>45</u>
Important Point	<u>48</u>
EUAW of an Arithmetic Gradient	<u>49</u>

Multiple Projects	<u>50</u>
Problems	<u>51</u>
5. Rate of Return	<u>55</u>
Rate of Return	<u>55</u>
Multiple Alternatives and Incremental Analysis	<u>57</u>
Multiple Rates of Return	<u>63</u>
Problems	<u>64</u>
6. Benefit-Cost Ratio and Payback Methods	<u>67</u>
Benefit-Cost Ratio	<u>67</u>
Equalizing Lives and Incremental Analysis	<u>68</u>
Payback	<u>71</u>
Multiple Alternatives	<u>72</u>
Problems	<u>73</u>
7. Inflation	<u>75</u>
Inflation and Purchasing Power	<u>75</u>
Inflation and Interest Rate Combined	<u>76</u>
Inflation Adjusted Discount Rate	<u>78</u>
Deflation	<u>79</u>
General Inflation Indices	<u>80</u>
Problems	<u>81</u>

8. Tax and Depreciation	<u>83</u>
Effects of Income Tax	<u>83</u>
Depreciation, Book Value, and Capital Gain	<u>85</u>
Straight-Line Depreciation	<u>85</u>
Double Declining Balance (DDB) Depreciation	<u>87</u>
Modified Accelerated Cost Recovery System (MACRS) Depreciation	<u>89</u>
Sum of Years Digit (SOYD) Depreciation	<u>90</u>
Change of Depreciation Methods	<u>91</u>
Amortization and Depletion	<u>91</u>
Financial Analysis with Tax and Depreciation	<u>92</u>
Problems	<u>96</u>
9. General Comments on Financial Analysis and Problem Solving	<u>101</u>
Applicability of Different Methods	<u>101</u>
Analyzing Financial Structure of an Investment	<u>103</u>
General Structure of Problems	<u>103</u>
Extra Problems	<u>106</u>
<b>Part 2: Lifetime Worth (LTW) Estimation and Calculation</b>	
10. Lifetime Worth: Background and Definitions	<u>115</u>
Background	<u>115</u>

Life	<u>117</u>
System Life	<u>117</u>
Physical Life	<u>118</u>
Technological Life	<u>118</u>
Economic Life	<u>118</u>
Life of Interest and Planning Horizon	<u>119</u>
Phases of the Lifetime	<u>119</u>
Phase 1—Concept Formation	<u>120</u>
Phase 2—Conceptual Design and Development	<u>121</u>
Phase 3—Design, Engineering, Prototyping, and Test	<u>121</u>
Phase 4—Manufacturing, Test, Packaging, and Delivery	<u>121</u>
Phase 5—Installation, Operation, and Maintenance	<u>124</u>
Phase 6—Removal, Salvage, or Resale	<u>124</u>
Concurrent Engineering	<u>124</u>
Problems	<u>125</u>
11. Lifetime Estimation and Calculation	<u>127</u>
The Cash Flow Diagram	<u>127</u>
Work and Cost Breakdown Structure (WBS-CBS)	<u>129</u>
Lifetime Worth Calculation	<u>130</u>
Lifetime Cost Estimation	<u>135</u>

Parametric Estimation	<u>136</u>
Comparative Estimation	<u>138</u>
Engineering Estimation	<u>139</u>
Combination of the Estimating Methods	<u>140</u>
Estimation Accuracy	<u>140</u>
Universal Ratios	<u>141</u>
Problems	<u>142</u>
12. LTW of Software System	<u>145</u>
Introduction	<u>145</u>
Software Development Process	<u>145</u>
Requirements Analysis	<u>146</u>
Preliminary Design	<u>146</u>
Detailed Design	<u>147</u>
Implementation	<u>147</u>
System Test and Acceptance	<u>148</u>
Software Estimation	<u>148</u>
<b>Part 3: Retirement and Replacement</b>	
13. Retirement and Replacement: Introduction and Definitions	<u>155</u>
Introduction	<u>155</u>
Retirement	<u>155</u>
Opportunity Cost	<u>157</u>

Replacement	<u>158</u>
Problems	<u>160</u>
14. Replacement Decision Making	<u>161</u>
Replacement Philosophy	<u>161</u>
Economic Life and Continuous Replacement	<u>163</u>
Computer Determination of the Economic Life	<u>171</u>
Depreciation and Tax	<u>174</u>
Replacement Process	<u>179</u>
More About Replacement	<u>186</u>
Prior Knowledge of Replacement Time	<u>186</u>
Problems	<u>189</u>
<b>Appendix 1: Proof of the Formulae</b>	<u>195</u>
<b>Appendix 2: Compound Interest Tables</b>	<u>197</u>
<b>Index</b>	<u>219</u>
<b>About the Author</b>	<u>221</u>
