Part I A FRAMEWORK FOR FINANCIAL DECISIONS	1
1 An overview of financial management	3
2 The financial environment	23
3 Present values, and bond and share valuation	54
Part II INVESTMENT DECISIONS AND STRATEGIES	81
4 Investment appraisal methods	83
5 Project appraisal – applications	113
6 Investment strategy and process	140
Part III VALUE, RISK AND THE REQUIRED RETURN	159
7 Analysing investment risk	161
8 Relationships between investments: portfolio theory	189
9 Setting the risk premium: the Capital Asset Pricing Model	208
10 The required rate of return on investment	247
11 Enterprise value and equity value	270
12 Identifying and valuing options	303
Part IV SHORT-TERM FINANCING AND POLICIES	329
13 Risk and treasury management	331
14 Working capital and short-term asset management	359
15 Short- and medium-term finance	399
Part V STRATEGIC FINANCIAL DECISIONS	435
16 Long-term finance	437
17 Returning value to shareholders: the dividend decision	487
18 Capital structure and the required return	522
19 Does capital structure really matter?	559
20 Acquisitions and restructuring	593
Part VI INTERNATIONAL FINANCIAL MANAGEMENT	655
21 Managing currency risk	657
22 Foreign investment decisions	697
23 Key issues in modern finance: a review	736
Appendix A Solutions to self-assessment activities	761
Appendix B Solutions to selected questions	779
Appendix C Present value interest factor (PVIF)	811
Appendix D Present value interest factor for an annuity (PVIFA)	813
Glossary	815
References	830
Index	843

Part I			
A FRAMEWORK FOR FINANCIAL DECISIONS			
Chapter 1			
An overview of financial management 3			
1.1 Introduction	4		
1.2 The finance function	5		
1.3 Investment and financial decisions	6		
1.4 Cash – the lifeblood of the business	7		
1.5 The emergence of financial management	8		
1.6 The finance department in the firm	9		
1.7 The financial objective	10		
1.8 The agency problem	12		
1.9 Managing the agency problem	12		
1.10 Social responsibility and shareholder wealth	13		
1.11 The corporate governance debate	14		
1.12 The risk dimension	16		
1.13 The strategic dimension	17		
Summary	19		
Key points	19		
Further reading	20		
Useful websites	20		
Questions	21		
Chapter 2			
The financial environment 23			
2.1 Introduction	24		
2.2 Financial markets	24		
2.3 The financial services sector	26		
2.4 The London Stock Exchange (LSE)	30		
2.5 Are financial markets efficient?	34		
2.6 Reading the financial pages	38		
2.7 Taxation and financial decisions	40		
Summary	41		
Key points	41		
Further reading	41		
Useful websites	41		
Appendix: Financial statement analysis	42		
Questions	51		
Chapter 3			
Present values, and bond and share valuation 54			
3.1 Introduction	55		
3.2 Measuring wealth	55		
3.3 Time-value of money	55		
3.4 Financial arithmetic for capital growth	56		
3.5 Present value	58		
3.6 Present value arithmetic	62		
3.7 Valuing bonds	65		
3.8 Valuing shares: the dividend valuation model	67		
3.9 Problems with the dividend growth model	70		
Summary	72		
Key points	72		
Further reading	73		
Useful websites	73		
Appendix I: The term structure of interest rates and the yield curve	73		
Appendix II: Present value formulae	76		
Appendix III: The P:E ratio and the constant dividend valuation model	77		
Questions	79		
Part II			
INVESTMENT DECISIONS AND STRATEGIES			
Chapter 4			
Investment appraisal methods 83			
4.1 Introduction	84		
4.2 Cash flow analysis	84		
4.3 Net present value	85		
4.4 Investment techniques – net present value	89		
4.5 Internal rate of return	90		
4.6 Profitability index	93		
4.7 Payback period	94		
4.8 Accounting rate of return	95		
4.9 Ranking mutually exclusive projects	97		
4.10 Investment evaluation and capital rationing	100		
Summary	104		
Key points	104		
Further reading	105		
Appendix I: Modified IRR	105		
Appendix II: Multi-period capital rationing and mathematical programming	106		
Questions	110		

Chapter 5**Project appraisal – applications 113**

5.1 Introduction	114
5.2 Incremental cash flow analysis	114
5.3 Replacement decisions	117
5.4 Inflation cannot be ignored	119
5.5 Taxation is a cash flow	121
5.6 Use of DCF techniques	124
5.7 Traditional appraisal methods	126
Summary	130
Key points	130
Further reading	130
Appendix: The problem of unequal lives:	
Poulter plc	131
Questions	133

Chapter 6**Investment strategy and process 140**

6.1 Introduction	141
6.2 Strategic considerations	141
6.3 Advanced manufacturing technology (AMT) investment	144
6.4 Environmental aspects of investment	147
6.5 The capital investment process	148
6.6 Post-auditing	154
Summary	155
Key points	156
Further reading	156
Questions	157

Part III**VALUE, RISK AND THE REQUIRED RETURN****Chapter 7****Analysing investment risk 161**

7.1 Introduction	162
7.2 Expected net present value (ENPV): Betterway plc	163
7.3 Attitudes to risk	163
7.4 The many types of risk	165
7.5 Measurement of risk	166
7.6 Risk description techniques	171
7.7 Adjusting the NPV formula for risk	175
7.8 Risk analysis in practice	177
7.9 Capital investment options	178
Summary	181
Key points	181
Further reading	182
Appendix: Multi-period cash flows and risk	182
Questions	185

Chapter 8**Relationships between investments: portfolio theory 189**

8.1 Introduction	190
8.2 Portfolio analysis: the basic principles	191
8.3 How to measure portfolio risk	192
8.4 Portfolio analysis where risk and return differ	195
8.5 Different degrees of correlation	197
8.6 Worked example: Gerrybild plc	199
8.7 Portfolios with more than two components	201
8.8 Can we use this for project appraisal? Some reservations	203
Summary	204
Key points	204
Further reading	205
Questions	206

Chapter 9**Setting the risk premium: the Capital Asset Pricing Model 208**

9.1 Introduction	209
9.2 Security valuation and discount rates	209
9.3 Concepts of risk and return	210
9.4 International portfolio diversification	214
9.5 Systematic risk	217
9.6 Completing the model	220
9.7 Using the CAPM: assessing the required return	222
Worked example	227
9.8 The underpinnings of the CAPM	228
9.10 Portfolios with many components: the capital market line	229
9.11 How it all fits together: the key relationships	232
9.12 Reservations about the CAPM	233
9.13 Testing the CAPM	234
9.14 Factor models	236
9.15 The Arbitrage Pricing Theory	237
9.16 Fama and French's three-factor model	238
9.17 Issues raised by the CAPM: some food for managerial thought	239
Summary	242
Key points	242
Further reading	243
Appendix: Analysis of variance	243
Questions	245

Chapter 10**The required rate of return on investment 247**

10.1 Introduction	248
10.2 The required return in all-equity firms: the DGM	248
10.3 The required return in all-equity firms: the CAPM	252

10.4	Using 'tailored' discount rates	254	13.2	The treasury function	332
10.5	Worked example: Tiekco plc	261	13.3	Funding	334
10.6	Another problem: taxation and the CAPM	262	13.4	How firms can use the yield curve	337
10.7	Problems with 'tailored' discount rates	263	13.5	Banking relationships	338
10.8	A critique of divisional hurdle rates	264	13.6	Treasury risk management	339
	Summary	266	13.7	Risk management	350
	Key points	266		Summary	356
	Further reading	266		Key points	356
	Questions	267		Further reading	357
				Useful websites	357
				Questions	358
Chapter 11					
Enterprise value and equity value 270					
11.1	Introduction	271	Chapter 14		
11.2	The valuation problem	271	Working capital and short-term asset management 359		
11.3	Valuation using published accounts	272	14.1	Introduction	360
11.4	Valuing the earnings stream: P:E ratios	279	14.2	Working capital management	360
11.5	EBITDA – a halfway house	280	14.3	Predicting corporate failure	361
11.6	Valuing cash flows	281	14.4	Cash operating cycle	362
11.7	The DCF approach	283	14.5	Working capital policy	364
11.8	Valuation of unquoted companies	288	14.6	Overtrading problems	368
11.9	Shareholder value analysis	288	14.7	Managing trade credit	370
11.10	Using value drivers	290	14.8	Inventory management	377
11.11	Worked example: Safa plc	292	14.9	Cash management	383
11.12	Economic Value Added (EVA)	294	14.10	Worked example: Mangle Ltd	386
	Summary	296	14.11	Cash management models	387
	Key points	296		Summary	389
	Further reading	297		Key points	389
	Questions	298		Further reading	390
				Useful websites	390
Chapter 12					
Identifying and valuing options 303					
12.1	Introduction	304	Appendix: Miller–Orr cash management model		
12.2	Share options	304	Questions		
12.3	Option pricing	312	Chapter 15		
12.4	Application of option theory to corporate finance	319	Short- and medium-term finance 399		
12.5	Capital investment options (real options)	320	15.1	Introduction	400
12.6	Why conventional NPV may not tell the whole story	322	15.2	Trade credit	400
	Summary	323	15.3	Bank credit facilities	402
	Key points	323	15.4	Invoice finance (or 'asset-based finance')	407
	Further reading	324	15.5	Using the money market: bill finance	409
	Useful websites	324	15.6	Hire Purchase (HP)	411
	Appendix: Black–Scholes option pricing formula	324	15.7	Leasing	413
	Questions	326	15.8	Lease evaluation: a simple case	416
			15.9	Motives for leasing	419
			15.10	Allowing for corporation tax in lease evaluation	421
			15.11	Worked example of leasing to include taxation: Porlock plc	423
			15.12	Policy implications: when should firms lease?	425
				Summary	427
				Key points	427
				Further reading	428
				Appendix: Financing international trade	428
				Questions	432
Part IV					
SHORT-TERM FINANCING AND POLICIES					
Chapter 13					
Risk and treasury management 331					
13.1	Introduction	332			

Part V

STRATEGIC FINANCIAL DECISIONS

Chapter 16

Long-term finance 437

16.1	Introduction	438
16.2	Guiding lights: corporate aims and corporate finance	438
16.3	How companies raise long-term finance in practice	440
16.4	Shareholders' funds	440
16.5	How unquoted firms can raise equity finance	443
16.6	Worked example: YZ and VCI	447
16.7	Going public	450
16.8	Equity issues by quoted companies	455
16.9	Debt instruments: debentures, bonds and notes	464
16.10	Leasing and sale-and-leaseback (SAL)	478
16.11	Islamic finance	479
	Summary	481
	Key points	481
	Further reading	482
	Questions	483

Chapter 17

Returning value to shareholders: the dividend decision 487

17.1	Introduction	488
17.2	The strategic dimension	490
17.3	The legal dimension	491
17.4	The theory: dividend policy and firm value	491
17.5	Objections to dividend irrelevance	498
17.6	The information content of dividends: dividend smoothing	503
17.7	Worked example	505
17.8	Alternatives to cash dividends	508
17.9	The dividend puzzle	512
17.10	Conclusions	514
	Summary	516
	Key points	516
	Further reading	517
	Appendix: Home-made dividends	517
	Questions	519

Chapter 18

Capital structure and the required return 522

18.1	Introduction	523
18.2	Measures of gearing	524
18.3	Operating and financial gearing	528
18.4	Financial gearing and risk: Lindley plc	531

18.5	The 'traditional' view of gearing and the required return	534
18.6	The cost of debt	537
18.7	The overall cost of capital	539
18.8	Worked example: Damstar plc	542
18.9	More on Economic Value Added (EVA)	545
18.10	Financial distress	546
18.11	Two more issues: signalling and agency costs	551
18.12	Conclusions	551
	Summary	553
	Key points	553
	Further reading	553
	Appendix: Credit ratings	554
	Questions	555

Chapter 19

Does capital structure really matter? 559

19.1	Introduction	560
19.2	The Modigliani–Miller message	560
19.3	MM's propositions	562
19.4	Does it work? Impediments to arbitrage	565
19.5	MM with corporate income tax	566
19.6	Capital structure theory and the CAPM	569
19.7	Linking the Betas: ungearing and re-gearing	572
19.8	MM with financial distress	573
19.9	Calculating the WACC	575
19.10	The adjusted present value method (APV)	577
19.11	Worked example: Rigton plc	578
19.12	Further issues with the APV	579
19.13	Which discount rate should we use?	580
19.14	Valuation of a geared firm	581
19.15	Performance evaluation in a geared firm: the EVA revisited	582
	Summary	583
	Key points	584
	Further reading	585
	Appendix I: Derivation of MM's Proposition II	585
	Appendix II: MM's Proposition III: the cut-off rate for new investment	586
	Appendix III: Allowing for personal taxation: Miller's revision	586
	Questions	588

Chapter 20

Acquisitions and restructuring 593

20.1	Introduction	594
20.2	Takeover activity	595
20.3	Motives for takeover	600
20.4	Alternative bid terms	608
20.5	Evaluating a bid: the expected gains from takeovers	610
20.6	Worked example: ML plc and CO plc	612
20.7	The importance of strategy	614
20.8	The strategic approach	615

20.9	Post-merger activities	621	22.4	The incremental hypothesis	705
20.10	Assessing the impact of mergers	626	22.5	Additional complexities of foreign investment	706
20.11	Value gaps	633	22.6	The discount rate for foreign direct investment (FDI)	707
20.12	Corporate restructuring	635	22.7	Evaluating FDI	709
20.13	Private equity	642	22.8	Worked example: Sparkes plc and Zoltan kft	709
Summary		646	22.9	Exposure to foreign exchange risk	712
Key points		646	22.10	How MNCs manage operating exposure	716
Further reading		647	22.11	Hedging the risk of foreign projects	718
Questions		648	22.12	Political and country risk	719
Part VI			22.13	Managing political and country risk (PCR)	723
INTERNATIONAL FINANCIAL MANAGEMENT			22.14	Financing FDI	725
Chapter 21			22.15	The WACC for FDI	727
Managing currency risk 657			22.16	Applying the APV to FDI	728
21.1	Introduction	658	22.17	Worked example: applying the APV	729
21.2	The structure of exchange rates: spot and forward rates	659	Summary		730
21.3	Foreign exchange exposure	661	Key points		731
21.4	Should firms worry about exchange rate changes?	664	Further reading and website		732
21.5	Economic theory and exposure management	666	Questions		733
21.6	Exchange rate forecasting	672	Chapter 23		
21.7	Devising a foreign exchange management (FEM) strategy	676	Key issues in modern finance: a review 736		
21.8	Internal hedging techniques	679	23.1	Introduction	737
21.9	Simple external hedging techniques	682	23.2	Understanding individual behaviour	738
21.10	More complex techniques	684	23.3	Understanding corporate behaviour	739
21.11	More complex techniques: futures and swaps	687	23.4	Understanding how markets behave	743
21.12	Conclusions	690	23.5	Behavioural finance	750
Summary		691	Summary		758
Key points		691	Key points		759
Further reading		692	Further reading		760
Questions		693	Appendices		
Chapter 22			A	Solutions to self-assessment activities	761
Foreign investment decisions 697			B	Solutions to selected questions	779
22.1	Introduction	698	C	Present value interest factor (PVIF)	811
22.2	Advantages of MNCs over national firms	700	D	Present value interest factor for an annuity (PVIFA)	813
22.3	Foreign market entry strategies	701	Glossary		815
			References		830
			Index		843
