

Earth Science: An Introduction

THIRD EDITION

Marc S. Hendrix

The University of Montana
Missoula, Montana

Graham R. Thompson

Professor Emeritus
The University of Montana
Missoula, Montana

Jonathan Turk

 **CENGAGE**

Australia • Brazil • Mexico • Singapore • United Kingdom • United States

BRIEF CONTENTS

- 1 Earth Systems 1
- 2 Minerals 17
- 3 Rocks 33
- 4 Geologic Time 60
- 5 Geologic Resources 87
- 6 The Active Earth 119
- 7 Earthquakes and the Earth's Structure 145
- 8 Volcanoes and Plutons 170
- 9 Mountains 199
- 10 Weathering, Soil, and Erosion 223
- 11 Freshwater 252
- 12 Water Resources 281
- 13 Glaciers and Glaciations 309
- 14 Deserts and Wind 332
- 15 Ocean Basins 351
- 16 Oceans and Coastlines 379
- 17 The Atmosphere 410
- 18 Energy Balance in the Atmosphere 430
- 19 Moisture, Clouds, and Weather 449
- 20 Climate 477
- 21 Climate Change 492
- 22 Motions in the Heavens 515
- 23 Planets and Their Moons 530
- 24 Stars, Space, and Galaxies 557

CONTENTS

1

EARTH SYSTEMS 1

- Introduction 2
- The Earth's Four Spheres 2
 - The Geosphere 2
 - The Hydrosphere 5
 - The Atmosphere 7
 - The Biosphere 7
- Earth Systems 7
- Time and Rates of Change in Earth Science 8
 - Gradual Change in Earth History 10
 - Catastrophic Change in Earth History 10
- Threshold and Feedback Effects 12
 - Threshold Effects 12
 - Feedback Mechanisms 13
- Humans and Earth Systems 13

2

MINERALS 17

- Introduction 18
- What Is a Mineral? 18
 - Naturally Occurring 19
 - Inorganic 19
 - Solid 19
- The Chemical Composition of Minerals 19
- The Crystalline Nature of Minerals 20
- Physical Properties of Minerals 20
 - Crystal Habit 21
 - Cleavage 21
 - Fracture 22
 - Hardness 22
 - Specific Gravity 23
 - Color 23
 - Streak 23
 - Luster 23
 - Other Properties 24

Mineral Classes and the Rock-Forming Minerals 24

- Silicates 25
 - Rock-Forming Silicates 25
 - Carbonates 26
- Commercially Important Minerals 27
- Harmful and Dangerous Rocks and Minerals 28
 - Silicosis and Black Lung 28
 - Asbestos, Asbestosis, and Cancer 28
 - Radon and Cancer 29
 - Acid Mine Drainage and Heavy Metals Contamination 29

DIGGING DEEPER Here to Stay: Mercury 30

3

ROCKS 33

- Introduction 34
- Rocks and the Rock Cycle 34
 - The Rock Cycle and Earth Systems Interactions 36
- Igneous Rocks 36
 - Magma: The Source of Igneous Rocks 36
 - Types of Igneous Rocks 36
 - Naming and Identifying Igneous Rocks 38
 - Common Igneous Rocks 39
 - Granite and Rhyolite 39
 - Basalt and Gabbro 39
 - Andesite and Diorite 41
 - Peridotite and Komatiite 41
- Sedimentary Rocks 42
 - Clastic Sedimentary Rocks 43
 - Organic Sedimentary Rocks 45
 - Chemical Sedimentary Rocks 45
 - Bioclastic Sedimentary Rocks 46
 - Carbonate Rocks and Global Climate 48
 - Physical Sedimentary Structures 48
- DIGGING DEEPER Gravel Mining and Sustainability 52
- Metamorphic Rocks 54
 - Metamorphic Grade 54
 - Metamorphic Changes 54
 - Textural Changes 54
 - Mineralogical Changes 55
 - Types of Metamorphism and Metamorphic Rocks 56

4

GEOLOGIC TIME 60

Earth Rocks, Earth History, and Mass Extinctions 61

Extraterrestrial Impacts 63

Volcanic Eruptions 64

Supercontinents and Earth's

Carbon Dioxide Budget 64

Geologic Time 66

Relative Geologic Time 66

Interpreting Geologic History from Fossils 69

Unconformities and Correlation 69

Unconformities 70

Correlation 73

Absolute Geologic Time 76

Radioactivity and Half-Life 77

Radiometric Dating 77

Sequence Stratigraphy—Interpreting
the Rock Record through Time 78

The Geologic Time Scale 82

The Earliest Eons of Geologic Time:

Precambrian Time 82

The Phanerozoic Eon 84

5

GEOLOGIC RESOURCES 87

Introduction 88

Mineral Resources 88

Ore and Ore Deposits 89

Magmatic Processes 90

Hydrothermal Processes 91

Sedimentary Processes 93

DIGGING DEEPER Manganese Nodules 94

Weathering Processes 94

Mineral Reserves vs. Mineral Resources 95

The Geopolitics of Metal Resources 96

Mines and Mining 98

Energy Resources: Coal, Petroleum, and Natural
Gas 99

Coal 99

Petroleum 100

Natural Gas 102

Unconventional Petroleum and Gas Reservoirs 103

Coal Bed Methane 106

Tar Sands 106

Energy Resources: Nuclear Fuels and Reactors 107

Energy Resources: Renewable Energy 109

Solar Energy 110

Wind Energy 110

Geothermal Energy 111

Hydroelectric Energy 111

Biomass Energy 111

Transmission of Electricity—

The Hidden Costs 111

The Future of Renewable Energy Resources 112

Conservation as an Alternative Energy Resource 113

Technical Solutions 114

Social Solutions 115

Energy for the 21st Century 116

6

THE ACTIVE EARTH 119

The Origins of Continents and Oceans 120

Alfred Wegener and the Origin of an Idea:
The Continental Drift Hypothesis 120

The Earth's Layers 123

The Crust 125

The Mantle 125

The Lithosphere 125

The Asthenosphere 126

The Mantle below the Asthenosphere 126

The Core 126

The Seafloor Spreading Hypothesis 126

The Theory of Plate Tectonics 130

Divergent Plate Boundaries 131

The Mid-Oceanic Ridge: Rifting in the Oceans 133

Splitting Continents: Rifting in Continental Crust 133

Convergent Plate Boundaries 135

Transform Plate Boundaries 136

The Anatomy of a Tectonic Plate 136

Why Plates Move: The Earth as a Heat Engine 136

Mantle Plumes and Hot Spots 138

Supercontinents 138

Isostasy: Vertical Movement of the Lithosphere 139

How Plate Tectonics Affect Earth's Surface 140

Volcanoes 140

Earthquakes 140

Mountain Building 142

How Plate Tectonics Affect Earth's Climate 142

EARTHQUAKES AND THE EARTH'S STRUCTURE 145

- Introduction 146
- Anatomy of an Earthquake 146
- Earthquake Waves 149
 - Body Waves 150
 - Surface Waves 150
 - Measurement of Seismic Waves 151
 - Measurement of Earthquake Strength 151
 - Locating the Source of an Earthquake 154
- Earthquakes and Tectonic Plate Boundaries 155
 - Earthquakes at a Transform Plate Boundary: The San Andreas Fault Zone 155
 - Earthquakes at Convergent Plate Boundaries 157
 - Earthquakes at Divergent Plate Boundaries 157
 - Earthquakes in Plate Interiors 157
- Earthquake Damage and Hazard Mitigation 158
 - How Rock and Soil Influence Earthquake Damage 158
 - Construction Design and Earthquake Damage 159
 - Tsunamis 159
- Earthquake Prediction 161
 - Long-Term Prediction 161
- DIGGING DEEPER Earthquakes in Cascadia 162**
 - Short-Term Prediction 164
- Studying the Earth's Interior 164
 - Discovery of the Crust–Mantle Boundary 164
 - The Structure of the Mantle 164
 - Discovery of the Core 165
 - Density Measurements 165
- Earth's Magnetism 166

VOLCANOES AND PLUTONS 170

- Magma 171
 - Processes That Form Magma 171
 - Environments of Magma Formation 171
- Basalt and Granite 175
 - Granite and Granitic Magma 175
 - Andesite and Intermediate Magma 175
- Partial Melting and the Origin of Continents 175
 - When Did Continents Form? 175
 - Partial Melting and the Origin of Granitic Continents 176

- Tectonic Accretion 176
- Vertical Mantle Plume Tectonics 176
- Magma Behavior 176
 - Effects of Silica on Magma Behavior 177
 - Effects of Water on Magma Behavior 177
- Plutons 178
- Volcanoes 180
 - Lava and Pyroclastic Rocks 180
 - Fissure Eruptions and Lava Plateaus 182
 - Volcano Types 183
- Volcanic Explosions:
 - Ash-Flow Tuffs and Calderas 187
 - Pyroclastic Flows 187
 - Calderas 188
- DIGGING DEEPER The Destruction of Pompeii 189**
- DIGGING DEEPER The Yellowstone Volcano 190**
- Risk Assessment: Predicting Volcanic Eruptions 191
 - Regional Prediction 191
 - Short-Term Prediction 191
- Volcanic Eruptions and Global Climate 195

MOUNTAINS 199

- Folds and Faults: Geologic Structures 200
 - How Rocks Respond to Tectonic Stress 200
 - Geologic Structures 200
 - Folds, Faults, and Plate Boundaries 208
- Mountains and Mountain Ranges 210
- Island Arcs: Subduction Where Two Oceanic Plates Converge 211
- The Andes: Subduction at a Continental Margin 212
- The Himalayas: A Collision between Continents 215
 - Formation of an Andean-Type Margin 216
 - Continent–Continent Collision 218
 - The Himalayas Today 218
- Mountains and Earth Systems 220

WEATHERING, SOIL, AND EROSION 223

- Introduction 224
- Weathering and Erosion 224
- Mechanical Weathering 225

- Frost Wedging 225
- Abrasion 226
- Organic Activity 227
- Thermal Expansion and Contraction 227
- Chemical Weathering 228**
 - Dissolution 228
 - Hydrolysis 229
 - Oxidation 230
 - Chemical and Mechanical
 - Weathering Acting Together 230
- Soil 232**
 - Components of Soil 232
 - Soil Horizons 232
 - Soil Classification 233
 - Soil-Forming Factors 235
- Mass Wasting and Landslides 242**
- DIGGING DEEPER Soil Erosion and Human Activities 242**
- Types of Rapid Mass Wasting 243**
 - Slide 246
 - Fall 247
- Predicting and Avoiding the Effects of Mass Wasting 247**
 - Why Do Slides, Flows, and Falls Occur? 247

FRESHWATER 252

- Introduction 253
- The Water Cycle 253
- Streams 254**
 - Stream Flow and Velocity 254
 - Stream Erosion and Sediment Transport 256
 - Downcutting and Base Level 256
 - Sinuosity of a Stream Channel 258
 - Drainage Basins and Drainage Divides 261
- DIGGING DEEPER The Richest Hill on Earth and Location of the Idaho-Montana State Line 262**
 - Stream Erosion and Mountains:
 - How Landscapes Evolve 263
- Stream Deposition 263**
- Floods 265**
 - Flood Control 266
 - Flood Control, the Mississippi River Delta, and Hurricane Katrina 267
- Lakes 270**
 - The Life Cycle of a Lake 270
 - Nutrient Balance in Lakes 270
 - Temperature Layering and Turnover in Lakes 271

- Wetlands 271**
- Groundwater 273**
 - Porosity and Permeability 273
 - The Water Table and Aquifers 274
 - Groundwater Movement 275
- Hot Springs, Geysers, and Geothermal Energy 277**

WATER RESOURCES 281

- Introduction 282
- Water Supply and Demand 282**
 - Domestic Water Use 282
 - Industrial Water Use 286
 - Agricultural Water Use 286
- Dams and Diversion 287**
 - Surface Water Diversion 287
 - Groundwater Diversion 292
 - Groundwater Depletion 293
- The Great American Desert 296**
 - The Colorado River 297
- Water and International Politics 297**
- DIGGING DEEPER The Los Angeles Water Project 298**
- Water Pollution 299**
 - DIGGING DEEPER Love Canal 300**
 - Types of Pollutants 300
 - How Sewage, Detergents, and Fertilizers Pollute Waterways 302
 - Toxic Pollutants, Risk Assessment, and Cost–Benefit Analysis 302
 - Groundwater Pollution 303
 - DIGGING DEEPER Yucca Mountain Controversy 304**
 - Treating a Contaminated Aquifer 306
 - Nuclear Waste Disposal 306
 - The Clean Water Act: A Modern Perspective 307

GLACIERS AND GLACIATIONS 309

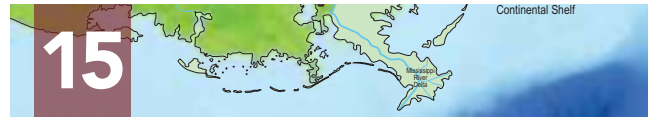

- Introduction 310
- Formation of Glaciers 310**
 - Alpine Glaciers 310
 - Continental Glaciers 311

- Glacial Movement 311
 The Mass Balance of a Glacier 313
- Glacial Erosion 314
 Erosional Landforms Created by Alpine Glaciers 315
 Erosional Landforms Created by a Continental Glacier 318
- Glacial Deposits 318
 Landforms Composed of Till 318
- DIGGING DEEPER** Glacial Erratics and Canadian Diamonds 320
 Landforms Consisting of Stratified Drift 323
- The Pleistocene Glaciation 325
 Causes of the Pleistocene Glacial Cycles 325
 Effects of Pleistocene Continental Glaciers 327
 Sea Level Changes with Glaciation 327
- Snowball Earth: The Greatest Glaciation in Earth's History 327
- The Earth's Disappearing Glaciers 327

DESERTS AND WIND 332

- Introduction 333
- Why Do Deserts Exist? 333
 Latitude 333
 Mountains: Rain-Shadow Deserts 334
 Coastal and Interior Deserts 334
- Water and Deserts 335
 Desert Streams 335
 Desert Lakes 335
 Flash Floods 337
 Pediments and Bajadas 337
- Two American Deserts 338
 The Colorado Plateau 338
 Death Valley and the Great Basin 340
- Wind 341
 Wind Erosion 341
 Transport and Abrasion 341
 Dunes 341
 Loess 344
- DIGGING DEEPER** The North American "Dust Bowl" 346
- Desertification 348

OCEAN BASINS 351

- The Origin of Oceans 352
- The Earth's Oceans 354
- Studying the Seafloor 355
 Sampling 355
 Remote Sensing 355
- DIGGING DEEPER** Invaluable sediment archives recently recovered from the deep ocean floor 356
- Features of the Seafloor 360
 The Mid-Oceanic Ridge System 360
 Global Sea-Level Changes and the Mid-Oceanic Ridge System 364
 Oceanic Trenches and Island Arcs 365
 Seamounts, Oceanic Islands, and Atolls 366
- Sediment and Rocks of the Seafloor 369
 Ocean-Floor Sediment 370
- Continental Margins 372
 Passive Continental Margins 372
 The Continental Shelf 372
 Active Continental Margins 376

OCEANS AND COASTLINES 379

- Introduction 380
- Geography of the Oceans 380
- Seawater 381
 Salts and Trace Elements 381
 Dissolved Gases 382
 Temperature 383
- Tides 384
- Sea Waves 386
- Ocean Currents 386
 Surface Currents 386
 Why Surface Currents Flow in the Oceans 389
 Deep-Sea Currents 391
 Upwelling 392
- The Seacoast 393
 Weathering and Erosion on the Seacoast 393
 Sediment Transport along Coastlines 393
 Tidal Currents 396

- Emergent and Submergent Coastlines 396
 - Factors That Cause Coastal Emergence and Submergence 396
- Beaches 397
 - Sandy Coastlines 398
 - Rocky Coastlines 400
- Life in the Sea 403
 - World Fisheries 403
 - Reefs 405
- Global Warming and Rising Sea Level 407

THE ATMOSPHERE 410

- Introduction 411
- Earth's Early Atmospheres 411
 - The First Atmospheres: 4.6 to 4.0 Billion Years Ago 411
 - When Life Began: 4.0 to 2.6 Billion Years Ago 412
 - Life, Iron, and the Evolution of the Modern Atmosphere 413
 - Systems Interactions That Affected Oxygen Concentration in Earth's Early Atmosphere 414
 - Evolution of the Modern Atmosphere 415
- The Modern Atmosphere 416
- Atmospheric Pressure 417
- Atmospheric Temperature 418
- Air Pollution 420
 - Gases Released When Fossil Fuels Are Burned 421
 - Acid Rain 422
 - Consequences of Acid Rain 422
 - Smog and Ozone in the Troposphere 422
 - Toxic Volatiles 424
 - Particulates and Aerosols 425
- Depletion of the Ozone Layer 425

ENERGY BALANCE IN THE ATMOSPHERE 430

- Introduction 431
- Incoming Solar Radiation 431
 - Absorption and Emission 432
 - Reflection 433
 - Scattering 434

- The Radiation Balance 434
- Energy Storage and Transfer: The Driving Mechanisms for Weather and Climate 437
 - Heat and Temperature 437
 - Heat Transport by Conduction and Convection 438
 - Changes of State 439
 - Heat Storage 439
- Temperature Changes with Latitude and Season 440
 - Temperature Changes with Latitude 440
- DIGGING DEEPER** Latitude and Longitude 440
 - The Seasons 441
- Temperature Changes with Geography 443
 - Altitude 443
 - Ocean Effects 444
 - Wind Direction 445
 - Cloud Cover and Albedo 446

MOISTURE, CLOUDS, AND WEATHER 449

- Moisture in Air 450
 - Humidity 450
 - Supersaturation and Supercooling 451
- Cooling and Condensation 451
 - Radiation Cooling 451
 - Contact Cooling: Dew and Frost 451
 - Cooling of Rising Air 451
- Rising Air and Precipitation 453
 - Orographic Lifting 453
 - Frontal Wedging 453
 - Convection–Convergence 453
 - Convective Processes and Clouds 453
- Types of Clouds 455
- Fog 457
- Pressure and Wind 458
 - Pressure Gradient 458
 - Coriolis Effect 458
 - Friction 459
 - Cyclones and Anticyclones 460
 - Pressure Changes and Weather 460
- Fronts and Frontal Weather 461
 - Warm Fronts and Cold Fronts 462
 - Occluded Front 463
 - Stationary Front 465
 - The Life Cycle of a Midlatitude Cyclone 465
- How the Earth's Surface Features Affect Weather 466
 - Mountain Ranges and Rain-Shadow Deserts 466
 - Forests and Weather 466

- Sea and Land Breezes 467
- Monsoons 467
- Thunderstorms 467
 - Lightning 468
- Tornadoes and Tropical Cyclones 469
 - Tornadoes 469
 - Tropical Cyclones 469
- Hurricane Katrina 472
 - Scope of the Disaster 472
 - Brief History of Gulf Hurricanes 472
- El Niño 473

- CLIMATE** 477
- Introduction 478
- Global Winds and Climate 478
- Climate Zones of Earth 480
 - Humid Tropical Climates: No Winter 481
 - Dry Climates: Evaporation Greater Than Precipitation 484
 - Humid Midlatitude Climates with Mild Winters 484
 - Humid Midlatitude Climate with Severe Winters 487
 - Polar Climate 487
- Urban Climates 488

- CLIMATE CHANGE** 492
- Introduction 493
- Climate Change in Earth's History 493
- Measuring Climate Change 495
 - Historical Records 495
 - Tree Rings 496
 - Plant Pollen 496
 - Oxygen Isotope Ratios in Glacial Ice 496
 - Glacial Evidence 496
 - Plankton and Isotopes in Ocean Sediment 496
 - The Rock and Fossil Record 497
- Astronomical Causes of Climate Change 497
 - Changes in Solar Radiation 497
 - Bolide Impacts 497
- Water and Climate 498
- The Natural Carbon Cycle and Climate 498
 - Carbon in the Atmosphere 498
 - Carbon in the Biosphere 499

- Carbon in the Hydrosphere 499
- Carbon in the Crust and Upper Mantle 499
- Tectonics and Climate Change 501
 - Positions of the Continents 501
 - Mountains and Climate 501
 - Volcanoes and Climate 501
 - How Tectonics, Sea Level, Volcanoes, and Weathering Interact to Regulate Climate 502
- Greenhouse Effect: The Carbon Cycle and Global Warming 503
 - Consequences of Greenhouse Warming 505
- Feedback and Threshold Mechanisms in Climate Change 511
 - Albedo Effects 511
 - Imbalances in Rates of Plant Respiration and Photosynthesis 511
 - Changes in Ocean Currents 511
 - Permafrost and Deep-Sea Methane Deposits 512

- MOTIONS IN THE HEAVENS** 515
- The Motions of the Heavenly Bodies 516
- Aristotle and the Earth-Centered Universe 516
- The Renaissance and the Heliocentric Solar System 518
 - Copernicus 519
 - Brahe and Kepler 519
 - Galileo 519
 - Isaac Newton and the Glue of the Universe 520
- The Motions of the Earth and the Moon 521
 - Motion of the Moon 521
 - Eclipses of the Sun and the Moon 523
- Modern Astronomy 525
 - Optical Telescopes 525
 - Telescopes Using Other Wavelengths 526
 - Emission and Absorption Spectra 526
 - Doppler Measurements 527

- PLANETS AND THEIR MOONS** 530
- The Solar System: A Brief Overview 531
- The Terrestrial Planets 534

- Atmospheres and Climates of the Terrestrial Planets 535
- Geology and Tectonics of the Terrestrial Planets 538
- The Moon: Our Nearest Neighbor 541**
 - Formation of the Moon 542
 - History of the Moon 542
- The Jovian Planets: Size, Compositions, and Atmospheres 544**
 - Jupiter 544
 - Saturn 546
 - Uranus and Neptune 547
- Moons of the Jovian Planets 547**
 - The Moons of Jupiter 547
 - Saturn’s Moons 549
 - The Moons of Uranus and Neptune 549
- Planetary Rings 550**
- Pluto and Other Dwarf Planets 551**
- Asteroids, Comets, and Meteoroids 551**
 - Asteroids 551
 - Comets 552
 - Meteoroids 554

- Stars: The Main Sequence 565**
- The Life and Death of a Star 566**
 - Stars about the Same Mass as Our Sun 566
 - Stars with a Large Mass 568
 - First- and Second-Generation Stars 569
- Neutron Stars, Pulsars, and Black Holes 570**
 - Neutron Stars and Pulsars 570
 - Black Holes 572
 - Gamma Ray Bursts 573
- Galaxies 573**
 - Galactic Motion 574
- The Milky Way 575**
 - The Nucleus of the Milky Way 575
 - Galactic Nebulae 575
- Quasars 576**
 - Looking Backward into Time 577
- Dark Matter 578**
- The End of the Universe 578**
- Why Are We So Lucky? 578**

.....

STARS, SPACE, AND GALAXIES 557

- Introduction 558
- In the Beginning: The Big Bang 558
- The Nonhomogeneous Universe 560
- The Birth of a Star 561
- The Sun 563**
 - The Sun’s Inner Structure 563
 - The Photosphere 564
 - The Sun’s Outer Layers 564

APPENDICES

- A: English-Metric Conversion Chart 582**
- B: Earth Science Mineral Identification 583**
- Glossary 585**
- Index 608**
