ABOUT THE AUTHORS	xxix

PART I INTRODUCTION TO REAL ESTATE ECONOMICS 1

1	Real Estate Space and Asset Markets	3
1.1	Space Market	3
1.1.1	Segmentation of Space Markets: The Immobility of Real Estate	4
1.1.2	Supply, Demand, and Rent in the Space Market	5
1.1.3	Supply Is “Kinked”	6
1.1.4	Relation among Supply, Development Cost, and Rent	7
1.1.5	Forecasting the Future Direction of Rents	8
1.1.6	Is the Supply Function Rising, Level, or Falling?	9
1.2	Asset Market	11
1.2.1	Capital Markets	11
1.2.2	Pricing of Real Estate Assets	14
1.2.3	Is the Asset Market Segmented Like the Space Market?	15
1.2.4	Magnitude of Real Estate Assets in the Overall Capital Market	17
1.3	Chapter Summary	18
	Key Terms	18
	Study Questions	19
2	Real Estate System	21
2.1	Commercial Property Development Industry	21
2.2	Overview of the Real Estate System	22
2.3	Four-Quadrant Model	25
2.4	Using the 4Q Diagram to Help Understand Boom and Bust in Real Estate Markets	27
2.5	Chapter Summary	33
	Key Terms	34
	Study Questions	34
	Part I References and Additional Reading	36

PART II URBAN ECONOMICS AND REAL ESTATE MARKET ANALYSIS 37

3	Central Place Theory and the System of Cities	39
3.1	Pattern of City Size	39
3.2	Pattern of City Location	41
3.3	Factors Underlying the Pattern: Centripetal and Centrifugal Forces	42
3.3.1	Centripetal Forces	43
3.3.2	Centrifugal Forces	44
3.3.3	Balance of Forces	45

3.3.4	Central Place Theory and the Urban Hierarchy	45
3.3.5	Why Does CPT Matter?	46
3.4	Economic Base and the Growth of Cities and Regions	48
3.4.1	Definition of Economic Base	48
3.4.2	Export Base	48
3.4.3	Location Quotients and SICs	49
3.4.4	Service Sector and Export Multiplier	51
3.4.5	Classification of Cities by Economic Base	52
3.5	Classification of Cities for Real Estate Investment Analysis	54
3.6	Chapter Summary	55
	Key Terms	56
	Study Questions	56
4	Inside the City I: Some Basic Urban Economics	59
	A Threshold Concept: Urban Form	60
4.1	Some Basic Economic Principles of Urban Land Value and Use	60
4.1.1	Location and the Residual Nature of Land Value	60
4.1.2	Competition, Equilibrium, and Highest and Best Use	62
4.1.3	Role of Transport Costs: The Bid-Rent Curve	64
4.1.4	Summary of Basic Urban Land Value and Land Use Principles	65
4.2	Classic Monocentric City Model	66
4.2.1	Circlopolis, the Quintessential Monocentric City	66
4.2.2	Using the Model: Some Principles about How Rents and City Size Change	68
4.2.3	Summarizing the Monocentric Model	75
4.3	Chapter Summary	76
	Key Terms	76
	Study Questions	76
5	Inside the City II: A Closer Look	79
5.1	From Property Rent to Property Value: The Effect of Rent Growth Expectations	79
5.2	Effect of Uncertainty on Speculative Land Value	81
5.3	Let's Get Real: New Twists to the Old Model	84
5.3.1	Density Variations and Heterogeneous Land Use	84
5.3.2	Effect of Land Use Boundaries	87
5.3.3	Polycentric Cities	89
5.3.4	Neighborhood Dynamics and Life Cycle	91
5.4	Property Life Cycle and the Effect of Building Structure Depreciation	95
5.5	Chapter Summary	99
	Key Terms	100
	Study Questions	100
6	Real Estate Market Analysis	103
6.1	General Features of Real Estate Market Analysis	104
6.1.1	Purpose of Market Analysis	104
6.1.2	Market Supply and Demand Variables and Indicators	104
6.1.3	Defining the Scope of the Analysis	108
6.1.4	Trend Extrapolation versus Structural Analysis	110
6.1.5	Major General Tasks in Conducting a Basic Short-Term Structural Market Analysis	110

6.2	Formal Model of Space Market Equilibrium Dynamics and Cyclicity	113
6.3	Chapter Summary	117
	Key Terms	117
	Study Questions	117
	Part II References and Additional Reading	119

PART III BASIC FINANCIAL ECONOMIC CONCEPTS AND TOOLS 121

7	Real Estate as an Investment: Some Background Information	123
7.1	Investment Industry, and Real Estate's Role Therein	124
7.1.1	Investor Objectives and Concerns	124
7.1.2	Implications of Investor Heterogeneity	126
7.1.3	General Structure of Investment Products and Vehicles	127
7.2	Real Estate as an Asset Class	134
7.2.1	Four Major Investment Asset Classes	135
7.2.2	Historical Investment Performance	137
7.2.3	Brief History of Commercial Real Estate Investment During Recent Decades	141
7.3	Chapter Summary	145
	Key Terms	145
	Study Questions	146
8	Present Value Mathematics for Real Estate	149
8.1	Single-Sum Formulas	150
8.1.1	Single-Period Discounting and Growing	150
8.1.2	Single-Sums over Multiple Periods of Time	151
8.1.3	Simple versus Compound Interest	152
8.1.4	Effective versus Nominal Rates	153
8.1.5	Bond Equivalent and Mortgage Equivalent Rates	154
8.1.6	Continuously Compounded Interest Rates	155
8.2	Multiperiod Problems	155
8.2.1	Geometric Series Formula	156
8.2.2	Present Value of a Level Annuity in Arrears	157
8.2.3	Present Value of a Level Annuity in Advance	158
8.2.4	Present Value of a Constant-Growth Annuity in Arrears	159
8.2.5	Present Value of a Constant-Growth Perpetuity	160
8.2.6	Some Basic Economic Implications of the Perpetuity Formula	160
8.2.7	Introducing Long-Term Leases	161
8.2.8	Summarizing the Present Value of Geometric Cash Flow Streams	162
8.2.9	How to Convert Annuities to Future Values	163
8.2.10	Solving for the Cash Flows	163
8.2.11	Solving for the Number of Payments	164
8.2.12	Combining the Single Lump Sum and the Level Annuity Stream: Classical Mortgage Mathematics	164
8.2.13	How the Present Value Keys on a Business Calculator Work	165
8.2.14	IRR and Multiperiod DCF Formula	166
8.3	Chapter Summary	167

Key Terms	167
Study Questions	167
9 Measuring Investment Performance: The Concept of Returns	173
9.1 Investment Returns: Basic Definitions and Classification	173
9.1.1 Two Fundamental Types of Return Measures	174
9.1.2 Advantages and Disadvantages of Periodic and Multiperiod Return Measures	175
9.2 Periodic Returns	176
9.2.1 Formal Definition of the Periodic Return	176
9.2.2 Time-Weighted Investment	179
9.2.3 NCREIF Index Return Formula	180
9.2.4 Real versus Nominal Returns	181
9.2.5 Measuring Risk in Returns	182
9.2.6 Relationship between Risk and Return	186
9.2.7 Summarizing Periodic Returns: Synthesizing the Three Ways to Break Down the Total Return	188
9.3 Multiperiod and Dollar-Weighted Returns	189
9.3.1 Time-Weighted Average Return	189
9.3.2 Internal Rate of Return (IRR)	190
9.4 Chapter Summary	193
Key Terms	193
Study Questions	193
Part III References and Additional Reading	198

PART IV REAL ESTATE VALUATION AND INVESTMENT ANALYSIS AT THE MICRO-LEVEL

199

10 The Basic Idea: DCF and NPV	201
10.1 Relation between Return Expectations and Property Values in the Asset Market	202
10.2 Discounted Cash Flow Valuation Procedure	203
10.2.1 Match the Discount Rate to the Risk: Intralease and Interlease Discount Rates	204
10.2.2 Blended IRR: A Single Discount Rate	206
10.2.3 Unbundling Cash Flows: An Example	207
10.3 Ratio Valuation Procedures: Direct Capitalization and GIM as Shortcuts	208
10.3.1 Relationship of the Cap Rate to the Total Return	209
10.3.2 Empirical Cap Rates and Market Values	210
10.4 Typical Mistakes in DCF Application to Commercial Property	211
10.4.1 If Your Case Lacks Merit, Dazzle Them with Numbers	211
10.4.2 Excessive Laziness	212
10.5 Is DCF Really Useful in the Real World?	213
10.6 Capital Budgeting and the NPV Investment Decision Rule	214
10.6.1 NPV Rule Corollary: Zero-NPV Deals Are OK	216
10.6.2 Choosing Among Alternative Zero-NPV Investments	217
10.6.3 Hurdle Rate Version of the Decision Rule	218
10.7 Chapter Summary	220

Appendix 10A Method to Estimate Interlease Discount Rates	220
Appendix 10B Micro-Level Investment Performance Attribution: Parsing the IRR	221
Appendix 10C The Certainty Equivalence Approach to DCF Valuation	225
Key Terms	229
Study Questions	230
11 Nuts and Bolts for Real Estate Valuation: Cash Flow Proformas and Discount Rates	235
11.1 Proformas and Cash Flow Projection	236
11.1.1 PGI and Market Rent Projection	236
11.1.2 Vacancy Allowance and EGI	239
11.1.3 Operating Expenses	240
11.1.4 Net Operating Income	242
11.1.5 Capital Improvement Expenditures	242
11.1.6 The Bottom Line: PBTCF	243
11.1.7 Reversion Cash Flows	243
11.1.8 Numerical Example	245
11.2 Discount Rates: The Opportunity Cost of Capital	249
11.2.1 General Observations about Real Estate Discount Rates	250
11.2.2 Putting in Some Numbers: The Risk-Free Rate	251
11.2.3 Putting in Some More Numbers: Historical Evidence on the OCC for Institutional Commercial Property	251
11.2.4 Another Perspective: Survey Evidence	252
11.2.5 Getting an Indication of Total Return Expectations by Observing Current Cap Rates in the Property Market	254
11.2.6 Variation in Return Expectations for Different Types of Property	256
11.3 Chapter Summary	258
Using Crystal Ball for Real Estate Analysis	on CD
Key Terms	258
Study Questions	259
12 Advanced Micro-Level Valuation	263
12.1 Market Value and Investment Value	264
12.1.1 How to Measure Investment Value	266
12.1.2 Joint Use of IV and MV in Decision Making	267
12.1.3 Watch Out for the IV Sales Pitch	270
12.1.4 Marginal and Intramarginal Investors: How to Get Positive NPV	270
12.2 Danger and Opportunity in Market Inefficiency	272
12.2.1 Valuation Noise	272
12.2.2 Asset Market Predictability	274
12.3 Dueling Asset Markets: The REIT Market versus the Property Market	276
12.3.1 Valuation at the Micro-Level	278
12.3.2 Micro-Level Differential Valuation: Cash Flow Expectations	280
12.3.3 Micro-Level Differential Valuation: Opportunity Cost of Capital	282
12.3.4 What about Informational Efficiency?	284
12.3.5 Micro-Level Risk Is in the Property, Not in the REIT	284
12.3.6 Summarizing the Dueling Markets: Going from the Micro to the Macro Perspective	285
12.4 Chapter Summary	286
Appendix 12A: Basic Valuation Concepts: Transaction Prices and Market Values	286

Appendix 12B: Negotiation and Risk Management in the Real Estate Contracting Process	on CD
Key Terms	290
Study Questions	290
Part IV References and Additional Reading	293

PART V COMPLETING THE BASIC INVESTMENT ANALYSIS PICTURE 295

13 Use of Debt in Real Estate Investment: The Effect of Leverage	297
The “Big Picture”	298
13.1 Basic Definitions and Mechanics of Leverage	299
Management Incentive Effects	301
13.2 Effect of Leverage on the Risk and Return to Equity	301
13.2.1 Effect on the Expected Return	301
13.2.2 Effect on the Risk in the Return	302
13.2.3 Risk and Return: Putting the Two Effects Together	305
13.3 A Useful Formula: The WACC	307
13.3.1 The WACC and REIT Cost of Capital	308
13.3.2 Use of the WACC in Direct Property Investment	308
13.3.3 The WACC and Return Components	309
13.3.4 The WACC and Risk	309
13.4 Positive and Negative Leverage	310
13.5 Effect of Leverage on Growth and Yield	310
13.6 Chapter Summary	313
Key Terms	314
Study Questions	314
14 After-Tax Investment Analysis & Corporate Real Estate	319
14.1 General Effects of Income Taxes and Debt	320
14.2 Numerical Example of After-Tax Proforma	322
14.2.1 Basic Equity Cash Flow Calculations	322
14.2.2 Accrual-Based Income and Tax Shelter	324
14.2.3 After-Tax Operating Cash Flow	325
14.2.4 After-Tax Reversion Cash Flow	326
14.2.5 Cash Flow Components Analysis & Projected Total Return Calculations	327
14.3 After-Tax Equity Valuation and Capital Budgeting	330
14.3.1 After-Tax DCF in General	330
14.3.2 Shortcut for Marginal Investors	332
14.3.3 Evaluating Intramarginal Investment Value	333
14.3.4 Value Additivity and the APV Decision Rule	337
14.3.5 After-Tax Valuation of Debt Financing	338
14.3.6 Example Application of APV to Marginal Investor	342
14.3.7 Example Application of APV to an Intramarginal Investor	346
14.4 Corporate Real Estate: The Own-Versus-Rent Decision	349
14.5 Chapter Summary	350
Appendix 14: Corporate Real Estate: The Own Versus Rent Decision from a Financial Economic Perspective	on CD
Key Terms	351
Study Questions	351

15 Real Estate Investment Capital Structure	355
15.1 Debt When There Is an Equity Capital Constraint	356
15.1.1 Debt to Obtain Positive Equity NPV	356
15.1.2 Debt and Diversification	358
15.1.3 Limitations on the Equity Constraint Argument for the Use of Debt	358
15.2 Other Considerations Regarding the Role of Debt in Real Estate Investments	359
15.2.1 Debt as an Incentive and Disciplinary Tool for Management	359
15.2.2 Debt and Liquidity	361
15.2.3 Cost of Financial Distress	362
15.2.4 Debt and Inflation	363
15.3 Project-Level Capital Structure in Real Estate	366
15.3.1 Enriching the Traditional Capital Structure Plate	366
15.3.2 Numerical Example of Multi-Tiered Project Capital Structure	368
15.3.3 Analyzing Project-Level Capital Structure: An Example Application of Sensitivity Analysis	374
15.4 Chapter Summary	380
Key Terms	381
Study Questions	381
Part V References and Additional Reading	384

PART VI	MORTGAGES FROM AN INVESTMENT PERSPECTIVE	385
----------------	---	------------

16 Mortgage Basics I: An Introduction and Overview	387
16.1 Basic Typology of Mortgages and Overview of the U.S. Mortgage Industry	388
16.2 Basic Legal Concepts and Terminology for Mortgages	391
16.2.1 Legal Structure of Mortgages	391
16.2.2 Priority of Claims in Foreclosure	393
16.2.3 Typical Mortgage Covenants	394
16.3 Default, Foreclosure, and Bankruptcy	397
16.4 Nonlitigious Actions and Workouts	398
16.4.1 Costs of Foreclosure	398
16.4.2 Nonlitigious Actions	399
16.4.3 Workouts	399
16.5 Limited Liability and Foreclosure Costs: The Borrower's Put Option and Strategic Default	400
16.5.1 Limited Liability and the Borrower's Put	400
16.5.2 Foreclosure Costs and Strategic Default	401
16.6 Chapter Summary	403
Key Terms	404
Study Questions	404
17 Mortgage Basics II: Payments, Yields, and Values	407
17.1 Calculating Loan Payments and Balances	407
17.1.1 Four Basic Rules	408
17.1.2 Applying the Rules to Design Loans	409
17.2 Loan Yields and Mortgage Valuation	419
17.2.1 Computing Mortgage Yields	419
17.2.2 Why Points and Fees Exist	422
17.2.3 Using Yields to Value Mortgages	424

17.3	Refinancing Decision	425
17.3.1	Traditional Refinancing Calculation	425
17.3.2	What Is Left out of the Traditional Calculation: Prepayment Option Value	428
17.4	Chapter Summary	431
	Key Terms	432
	Study Questions	432
18	Commercial Mortgage Analysis and Underwriting	439
18.1	Expected Returns Versus Stated Yields: Measuring the Impact of Default Risk	439
18.1.1	Yield Degradation and Conditional Cash Flows	440
18.1.2	Hazard Functions and the Timing of Default	441
18.1.3	Yield Degradation in Typical Commercial Mortgages	443
18.2	Commercial Mortgage Underwriting	448
18.2.1	Basic Property-Level Underwriting Criteria	449
18.2.2	Variables and Loan Terms to Negotiate	452
18.2.3	Numerical Example of the Underwriting Process	453
18.3	Participating Mortgages	456
18.4	Chapter Summary	459
	Key Terms	460
	Study Questions	460
19	Commercial Mortgage Economics and Investment	463
19.1	Some Basic Characteristics of Bonds	463
19.1.1	Duration and Maturity	464
19.1.2	Interest Rate Risk and Preferred Habitat	467
19.1.3	The Yield Curve	469
19.1.4	Maturity Matching and the Management of Fixed-Income Portfolios	471
19.2	Commercial Mortgage Returns: <i>Ex Ante</i> and <i>Ex Post</i>	475
19.2.1	Mortgage Yield: The Components of <i>Ex Ante</i> Returns	475
19.2.2	<i>Ex Post</i> Performance: The Historical Record	479
19.3	Chapter Summary	485
	Key Terms	485
	Study Questions	485
20	Commercial Mortgage-Backed Securities	489
20.1	What Are CMBS?	490
20.1.1	A Brief History: The Birth, Growth, and Maturation of an Industry	491
20.1.2	Fueling the Growth: Conduits and Risk-Based Capital Requirements	492
20.1.3	Magnitude of the CMBS Industry	492
20.2	CMBS Structure: Tranching and Subordination	494
20.2.1	A Simple Numerical Example of Tranching	494
20.2.2	Allocating the Credit Losses	498
20.2.3	Unbundling, Specialization and Value Creation	500
20.3	CMBS Rating and Yields	502
20.3.1	Bond Credit Rating	502
20.3.2	Credit Rating and CMBS Structure	503
20.3.3	Rating CMBS Tranches	508
20.3.4	Yield Spreads and the Capital Market	509
20.3.5	CMBS versus Corporate Bond Spreads	512

20.4	CMBS: Borrower Considerations	514
20.5	Chapter Summary	515
	Key Terms	515
	Study Questions	515
	Part VI References and Additional Reading	518

PART VII MACRO-LEVEL REAL ESTATE INVESTMENT ISSUES 521

21	Real Estate and Portfolio Theory: Strategic Investment Considerations	523
21.1	Numerical Example of the Portfolio Allocation Problem: Real Estate in the Mixed-Asset Portfolio	524
21.2	Basic Mean-Variance Portfolio Theory (MPT)	528
21.2.1	Investor Preferences and Dominant Portfolios	529
21.2.2	Portfolio Theory and Diversification	531
21.2.3	Perceived Role of Real Estate in the Mixed-Asset Portfolio	534
21.2.4	The Efficient Frontier	535
21.2.5	Bringing in Investor Preferences	537
21.2.6	Major Implications of Portfolio Theory for Real Estate Investment	538
21.2.7	Expanding the Asset Class Choice Set: The Role of REITs	540
21.3	Allowing for a Riskless Asset: The Two-Fund Theorem and the Sharpe-Maximizing Portfolio	544
21.3.1	Two-Fund Theorem	544
21.3.2	Sharpe-Maximizing Portfolio	545
21.3.3	Summary of the Implications of the Riskless Asset Construct	548
21.4	Some Broader Considerations in Portfolio Allocation	548
21.5	Chapter Summary	551
	Appendix 21A: A Review of Some Statistics about Portfolio Returns	551
	Cross-Sectional and Time-Series Return Statistics	552
	Time-Series Statistics Used in Portfolio Theory	554
	Appendix 21B: Reasons for the Low Institutional Allocation of Real Estate	on CD
	Excel [®] File with Portfolio Optimization Templates	on CD
	Key Terms	559
	Study Questions	559
22	Equilibrium Asset Valuation and Real Estate's Price of Risk in the Capital Market	561
22.1	Review of Classical Asset Pricing Theory	562
22.1.1	Practical Uses for Asset Price Theory	562
22.1.2	A Threshold Point: What Underlies Asset Risk?	564
22.1.3	From Portfolio Theory to the CAPM	566
22.1.4	The Main Point in the Basic CAPM	568
22.1.5	Isn't the CAPM Wrong?	569
22.1.6	Strengths and Weaknesses in the Basic CAPM	569
22.2	Applying the CAPM to the Private Real Estate Asset Class as a Whole	571
22.2.1	Brief History	571
22.2.2	Broadening the Market Portfolio and Correcting for Smoothing	572

22.3	Attempting to Quantify Sectoral Risk and Return within the Private Real Estate Asset Class: The Cutting Edge	576
22.3.1	Can the Basic CAPM Be Applied within the Private Real Estate Asset Class?	576
22.3.2	Implications for Macro-Level Tactical Investment Analysis within the Private Real Estate Class	579
22.4	Chapter Summary	582
	Appendix 22A: Multifactor Risk Models Applied within the Real Estate Asset Class	on CD
	Appendix 22B: Arbitrage Price Theory and the Multifactor Model of Equilibrium <i>Ex Ante</i> Risk Premiums in the Capital Market	on CD
	Key Terms	582
	Study Questions	582
23	Real Estate Investment Trusts (REITs)	585
23.1	REIT Structure and Market Evolution	586
23.1.1	Tax Status, Regulatory Constraints, and the Concept of FFO	587
23.1.2	The 1990s REIT Boom and the "Modern" REIT Era	588
23.2	REIT Analysis and Valuation in the Stock Market	592
23.2.1	More on REIT Earnings Measures	593
23.2.2	Dividend Pricing Models and the Gordon Shortcut Approach	594
23.2.3	Fundamental Growth Opportunities	602
23.2.4	Are REITs Growth Stocks or Income Stocks?	604
23.2.5	Parallel Asset Markets and NAV-Based Valuation	605
23.2.6	Agency Costs: Conflicts of Interest	610
23.3	Some Considerations of REIT Management Strategy	612
23.4	Fundamental Nature and Value of Reits: Two Models	617
23.5	Chapter Summary: Some Reit Investor Considerations	620
	Key Terms	622
	Study Questions	622
24	International Real Estate Investment: Markets, Strategies, and Implementation	627
24.1	There's A Big World Out There	628
24.1.1	The Global Real Estate Capital Market: Size and Flows	628
24.1.2	The Institutions of Globalization	630
24.2	Going International: Rationales and Obstacles	633
24.2.1	A First Rationale for Going International: Return Opportunities	635
24.2.2	A Second Rationale for Going International: Diversification	641
24.2.3	A Third Rationale for Going International: Managerial Considerations	646
24.2.4	Obstacles to International Property Investment	647
24.3	Developing and Implementing International Real Estate Strategies	651
24.3.1	Public Real Estate Investment	651
24.3.2	Determining Country Allocation	652
24.3.3	The "Home Market" Concept	654
24.4	Chapter Summary	656
	Key Terms	656
	Study Questions	656

25	Data Challenges in Measuring Real Estate Periodic Returns	657
25.1	The Basics: Macro-Level Property Valuation	659
25.1.1	Transaction Noise and Appraisal Error	659
25.1.2	A Simple Example of Temporal Lag Bias	661
25.1.3	The Trade-Off between Noise and Lag	662
25.1.4	The Difference between Aggregate and Disaggregate Valuation	662
25.1.5	Summarizing Macro-Level Valuation Error	663
25.2	From Value Levels to Returns: The General Nature of Performance Measurement Errors	665
25.2.1	The Pure Effect of Random Noise	665
25.2.2	The Pure Effect of Temporal Lag	667
25.2.3	Putting the Two Effects Together	670
25.2.4	What about the <i>Total Return</i> ?	672
25.3	What Is Truth? Lags and the Time Line of Price Discovery in Real Estate	672
25.3.1	Multistep Real Estate Time Line of Information Incorporation into Observable Value	674
25.3.2	So Where Is the "Truth"?	678
25.4	What Is to Be Done?: Dealing with Temporal Lag Bias in Appraisal-Based Returns	678
25.4.1	The First Step: Getting Rid of Stale Appraisals	679
25.4.2	Can We Take a Second Step?	680

Appendix 26: The Real Estate Investment Management Institutional Landscape	on CD
Key Terms	714
Study Questions	715
Part VII References and Additional Reading	718

**PART VIII REAL ESTATE DEVELOPMENT AND OTHER
SELECTED TOPICS 727**

27 Real Options and Land Value	729
27.1 The Call Option Model of Land Value	730
27.2 Simple Numerical Example of OVT Applied to Land Valuation and the Development Timing Decision	731
27.3 A Rigorous Model of Option Value	734
27.3.1 The Arbitrage Perspective on the Option Value	734
27.3.2 The Certainty-Equivalence DCF Perspective on the Option Value	738
27.3.3 Why the Option Valuation Model Works	739
27.4 The Binomial Model of Option Value	740
27.5 A Perpetual Model in Continuous Time	744
27.5.1 The Classical Samuelson-McKean Formula	744
27.5.2 General Implications of the Model for Development Timing and Land Speculation Investment Risk and Return Expectations	746
27.6 Using Option Theory to Understand Overbuilding	750
27.7 Chapter Summary	752
Appendix 27: Extensions of Sections 27.4 and 27.5	on CD
Key Terms	753
Study Questions	753
28 Investment Analysis of Real Estate Development Projects: Overview & Background	757
28.1 Overview of the Development Decision-Making Process	758
28.2 Basic Information: Enumerating Project Costs and Benefits	766
28.3 Construction Budget Mechanics	768
28.4 Simple Financial Feasibility Analysis in Current Practice	770
28.4.1 Simple Feasibility Analysis Explained	770
28.4.2 Problems with the Simple Approach	774
28.5 Chapter Summary	775
Key Terms	775
Study Questions	776
29 Investment Analysis of Real Estate Development Projects, Part 2: Economic Analysis	779
29.1 The Basic Idea	780
29.1.1 Applying NPV to Development Projects	780
29.1.2 Operational Leverage and Estimation of the OCC for Development Investments	786

29.2	Advanced Topic: The Relationship of Development Valuation to the Real Option Model of Land Value	792
29.3	Broadening the Perspective	794
29.3.1	How Developers Think About All This	794
29.3.2	“Soup to Nuts:” Including Lease-up and Land Assembly: “Unblending” the Blended IRR	797
29.4	Evaluating Multi-Phase Developments: Real Options Theory and a Simplification	799
29.5	Chapter Summary	802
	Appendix 29: Evaluating Multi-Phase Developments: A Real Options Approach	on CD
	Excel® File with Cost of Capital Formula and Multi-Phase Project Option Example	on CD
	Key Terms	802
	Study Questions	802
30	Leases and Leasing Strategy	807
30.1	Commercial Property Lease Terminology and Typology	808
30.1.1	Basic Lease Typology: The Responsibility for Expenses	808
30.1.2	Types of Rent Changes in Leases	809
30.2	Lease Characteristics Affecting Value or Rent	811
30.3	Effective Rent	812
30.3.1	Discount Rate in the Effective Rent	814
30.3.2	Effective Rent Numerical Examples	816
30.3.3	Summarizing Effective Rent	817
30.4	Broader Leasing Strategy Considerations: Term Length and the Space Market Term Structure of Rent	817
30.4.1	Interlease Risk	818
30.4.2	Releasing Costs	819
30.4.3	Expectations About the Future Rental Market	820
30.4.4	Uncertainty and the Value of Flexibility and Options in Leases	821
30.4.5	Staggered Lease Expirations and Releasing Risk	821
30.4.6	Summary: Rent Term Structure and Optimal Lease Term Length	822
30.5	Other Leasing and Rent Issues	823
30.5.1	Microspatial Trade-Offs and Synergies	823
30.5.2	Why Percentage Rents? (Consideration of Optimal Rent Structure)	824
30.5.3	Why Concessions?	825
30.5.4	Optimal Asking Rent and Optimal Vacancy	826
30.6	Chapter Summary	827
	Appendix 30A: Valuing a Lease Renewal Option	on CD
	Appendix 30B: Numerical Example of Landlord Lease Term Indifference Rent	on CD
	Appendix 30C: Simple Model of Optimal Landlord Search for Tenants	on CD
	Key Terms	827
	Study Questions	827
	Part VIII References and Additional Reading	829
	Answers to Selected Study Questions	on CD
