Contents

Preface 9

Part One Gathering and Exploring Data

Chapter 1 Statistics: The Art and Science of Learning from Data 28

1.1 Using Data to Answer Statistical Questions 29
1.2 Sample Versus Population 34
1.3 Using Calculators and Computers 43

Chapter Summary 49
Chapter Problems 50

Chapter 2 Exploring Data with Graphs and Numerical Summaries 52

2.1 Different Types of Data 53
2.2 Graphical Summaries of Data 58
2.3 Measuring the Center of Quantitative Data 76
2.4 Measuring the Variability of Quantitative Data 84
2.5 Using Measures of Position to Describe Variability 92
2.6 Recognizing and Avoiding Misuses of Graphical Summaries 102

Chapter Summary 108
Chapter Problems 109

Chapter 3 Association: Contingency, Correlation, and Regression 117

3.1 The Association Between Two Categorical Variables 119
3.2 The Association Between Two Quantitative Variables 127
3.3 Predicting the Outcome of a Variable 139
3.4 Cautions in Analyzing Associations 154

Chapter Summary 170
Chapter Problems 171

Chapter 4 Gathering Data 179

4.1 Experimental and Observational Studies 180
4.2 Good and Poor Ways to Sample 188
4.3 Good and Poor Ways to Experiment 198
4.4 Other Ways to Conduct Experimental and Nonexperimental Studies 204

Chapter Summary 216
Chapter Problems 216

Part Review 1 Online

Part Two Probability, Probability Distributions, and Sampling Distributions

Chapter 5 Probability in Our Daily Lives 226

5.1 How Probability Quantifies Randomness 227
5.2 Finding Probabilities 234
5.3 Conditional Probability 247
5.4 Applying the Probability Rules 258

Chapter Summary 273
Chapter Problems 273

Chapter 6 Probability Distributions 280

6.1 Summarizing Possible Outcomes and Their Probabilities 281
6.2 Probabilities for Bell-Shaped Distributions 293

6.3 Probabilities When Each Observation Has Two Possible Outcomes 305

Chapter Summary 315
Chapter Problems 316

Chapter 7 Sampling Distributions 324

7.1 How Sample Proportions Vary Around the Population Proportion 325

7.2 How Sample Means Vary Around the Population Mean 337

Chapter Summary 352
Chapter Problems 352

Part Review 2 Online

Part Three Inferential Statistics

Chapter 8 Statistical Inference: Confidence Intervals 360

8.1 Point and Interval Estimates of Population Parameters 361

8.2 Constructing a Confidence Interval to Estimate a Population Proportion 367

8.3 Constructing a Confidence Interval to Estimate a Population Mean 380

8.4 Choosing the Sample Size for a Study 391

8.5 Using Computers to Make New Estimation Methods Possible 400

Chapter Summary 404
Chapter Problems 404

Chapter 9 Statistical Inference: Significance Tests About Hypotheses 412

9.1 Steps for Performing a Significance Test 413

9.2 Significance Tests About Proportions 418

9.3 Significance Tests About Means 434

9.4 Decisions and Types of Errors in Significance Tests 444

9.5 Limitations of Significance Tests 449

9.6 The Likelihood of a Type II Error and the Power of a Test 456

Chapter Summary 463
Chapter Problems 464

Chapter 10 Comparing Two Groups 470

10.1 Categorical Response: Comparing Two Proportions 472

10.2 Quantitative Response: Comparing Two Means 486

10.3 Other Ways of Comparing Means, Including a Permutation Test 498

10.4 Analyzing Dependent Samples 513

10.5 Adjusting for the Effects of Other Variables 524

Chapter Summary 530
Chapter Problems 531

Part Review 3 Online

Part Four Analyzing Association and Extended Statistical Methods

Chapter 11 Analyzing the Association Between Categorical Variables 542

11.1 Independence and Dependence (Association) 543

11.2 Testing Categorical Variables for Independence 548

11.3 Determining the Strength of the Association 563

11.4 Using Residuals to Reveal the Pattern of Association 572

11.5 Fisher's Exact and Permutation Tests 576

Chapter Summary 585
Chapter Problems 585

Chapter 12 Analyzing the Association Between Quantitative Variables: Regression Analysis 592

12.1 Modeling How Two Variables Are Related 593
12.2 Inference About Model Parameters and the Association 603
12.3 Describing the Strength of Association 610
12.4 How the Data Vary Around the Regression Line 620
12.5 Exponential Regression: A Model for Nonlinearity 631

Chapter Summary 637
Chapter Problems 638

Chapter 13 Multiple Regression 644

13.1 Using Several Variables to Predict a Response 645
13.2 Extending the Correlation and R^2 for Multiple Regression 651
13.3 Inferences Using Multiple Regression 657
13.4 Checking a Regression Model Using Residual Plots 668
13.5 Regression and Categorical Predictors 674
13.6 Modeling a Categorical Response 680

Chapter Summary 689
Chapter Problems 690

Chapter 14 Comparing Groups: Analysis of Variance Methods 695

14.1 One-Way ANOVA: Comparing Several Means 696
14.2 Estimating Differences in Groups for a Single Factor 706
14.3 Two-Way ANOVA 716

Chapter Summary 730
Chapter Problems 730

Chapter 15 Nonparametric Statistics 736

15.1 Compare Two Groups by Ranking 737
15.2 Nonparametric Methods for Several Groups and for Matched Pairs 748

Chapter Summary 759
Chapter Problems 759

Part Review 4 Online

Appendix A-1
Answers A-7
Index I-1
Index of Applications I-9
Credits C-1
A Guide to Learning From the Art in This Text D-1
Dataset Files D-2
A Guide to Choosing a Statistical Method D-3
Summary of Key Notations and Formulas D-4
