

# Using Excel for Business Analysis

*A Guide to Financial  
Modelling Fundamentals*

Revised Edition

DANIELLE STEIN FAIRHURST

WILEY

# Contents

<b>Preface</b>	<b>ix</b>
<b>CHAPTER 1</b>	
<b>What Is Financial Modelling?</b>	<b>1</b>
What's the Difference between a Spreadsheet and a Financial Model?	4
Types and Purposes of Financial Models	5
Tool Selection	6
What Skills Do You Need to Be a Good Financial Modeller?	17
The Ideal Financial Modeller	24
Summary	28
<b>CHAPTER 2</b>	
<b>Building a Model</b>	<b>31</b>
Model Design	31
The Golden Rules for Model Design	33
Design Issues	35
The Workbook Anatomy of a Model	36
Project Planning Your Model	38
Model Layout Flow Charting	41
Steps to Building a Model	41
Information Requests	50
Version-Control Documentation	51
Summary	53
<b>CHAPTER 3</b>	
<b>Best Practice Principles of Modelling</b>	<b>55</b>
Document Your Assumptions	55
Linking, Not Hard Coding	56
Enter Data Only Once	57
Avoid Bad Habits	57

---

Use Consistent Formulas	57
Format and Label Clearly	58
Methods and Tools of Assumptions Documentation	59
Linked Dynamic Text Assumptions Documentation	67
What Makes a Good Model?	70
Summary	72
<b>CHAPTER 4</b>	
<b>Financial Modelling Techniques</b>	<b>73</b>
The Problem with Excel	73
Error Avoidance Strategies	75
How Long Should a Formula Be?	81
Linking to External Files	83
Building Error Checks	86
Summary	96
<b>CHAPTER 5</b>	
<b>Using Excel in Financial Modelling</b>	<b>97</b>
Formulas and Functions in Excel	97
Excel Versions	101
Handy Excel Shortcuts	103
Basic Excel Functions	109
Logical Functions	112
Nesting: Combining Simple Functions to Create Complex Formulas	115
Cell Referencing Best Practices	119
Named Ranges	122
Summary	126
<b>CHAPTER 6</b>	
<b>Functions for Financial Modelling</b>	<b>127</b>
Aggregation Functions	127
LOOKUP Formulas	140
Nesting INDEX and MATCH	153
OFFSET Function	157
Regression Analysis	161
CHOOSE Function	164
Working with Dates	166
Financial Project Evaluation Functions	174
Loan Calculations	180
Summary	186

---

<b>CHAPTER 7</b>	
<b>Tools for Model Display</b>	<b>187</b>
Basic Formatting	187
Custom Formatting	187
Conditional Formatting	193
Sparklines	200
Bulletproofing Your Model	204
Customising the Display Settings	208
Form Controls	216
Summary	232
<b>CHAPTER 8</b>	
<b>Tools for Financial Modelling</b>	<b>233</b>
Hiding Sections of a Model	233
Grouping	238
Array Formulas	240
Goal Seeking	247
Structured Reference Tables	249
PivotTables	251
Macros	262
Summary	272
<b>CHAPTER 9</b>	
<b>Common Uses of Tools in Financial Modelling</b>	<b>273</b>
Escalation Methods for Modelling	273
Understanding Nominal and Effective (Real) Rates	278
Calculating Cumulative Totals	283
How to Calculate a Payback Period	284
Weighted Average Cost of Capital (WACC)	288
Building a Tiering Table	293
Modelling Depreciation Methods	296
Break-Even Analysis	307
Summary	313
<b>CHAPTER 10</b>	
<b>Model Review</b>	<b>315</b>
Rebuilding an Inherited Model	315
Improving Model Performance	323
Auditing a Financial Model	328
Summary	335
Appendix 10.1: QA Log	336

---

<b>CHAPTER 11</b>	
<b>Stress-Testing, Scenarios, and Sensitivity Analysis in Financial Modelling</b>	<b>337</b>
What Are the Differences between Scenario, Sensitivity, and What-If Analyses?	338
Overview of Scenario Analysis Tools and Methods	340
Advanced Conditional Formatting	349
Comparing Scenario Methods	353
Summary	365
<b>CHAPTER 12</b>	
<b>Presenting Model Output</b>	<b>367</b>
Preparing an Oral Presentation for Model Results	367
Preparing a Graphic or Written Presentation for Model Results	369
Chart Types	372
Working with Charts	380
Handy Charting Hints	386
Dynamic Named Ranges	388
Charting with Two Different Axes and Chart Types	394
Bubble Charts	400
Creating a Dynamic Chart	402
Waterfall Charts	407
Summary	420
