

An Introduction to Developmental Psychology

THIRD EDITION

EDITED BY
ALAN SLATER AND GAVIN BREMNER

The British
Psychological Society

WILEY

Brief Contents

List of Contributors	xxi
Preface to Third Edition	xxiii
PART I INTRODUCTION	1
1 The Scope and Methods of Developmental Psychology <i>Alan Slater, Scott P. Johnson and Darwin Muir</i>	3
2 Theories and Issues in Child Development <i>Scott P. Johnson, Alan Slater and Ian Hocking</i>	41
3 The Nature–Nurture Debate <i>Alan Slater</i>	79
PART II INFANCY	107
4 Prenatal Development <i>Christine Moon and William P. Fifer</i>	109
5 Perception, Knowledge and Action in Infancy <i>J. Gavin Bremner, Kirsty Dunn and Diana S.Y. Tham</i>	143
6 Emotional Development and Attachment Relationships <i>Elizabeth Meins</i>	183
7 Early Social Interactions with People and Objects <i>Cintia Rodríguez, Julia Benassi, Luisa Estrada, and Nicolás Alessandroni</i>	213
8 The Development of Self and Gender <i>Wendy Lawrenson</i>	259
PART III CHILDHOOD	303
9 Cognitive Development <i>Margaret Anne Defeyter</i>	305
10 The Development of Language <i>Heather M. Hill and Stan A. Kuczaj II</i>	341
11 Acquiring a Theory of Mind <i>Peter Mitchell</i>	381
12 Reading and Mathematics in Developmental Psychology <i>Peter Bryant</i>	407

13	Memory Development and Eyewitness Testimony <i>Stephen J. Ceci, Stanka A. Fitneva, Cagla Aydin and Nadia Chernyak</i>	439
14	Play and the Beginnings of Peer Relationships <i>Peter K. Smith</i>	477
15	Prosocial Tendencies, Antisocial Behaviour and Moral Development in Childhood <i>Daniel Hart, Neeta Goel and Robert Atkins</i>	511
PART IV ADOLESCENCE		541
16	Cognitive Development in Adolescence <i>Kang Lee, Gizelle Anzures and Alejo Freire</i>	543
17	Social Development <i>Tirza H.J. Van Noorden and William M. Bukowski</i>	577
PART V PRACTICAL ISSUES		611
18	Educational Implications <i>Alyson Davis and Naomi Winstone</i>	613
19	Risk and Resilience in Development <i>Leslie Morrison Gutman and Eirini Flouri</i>	645
20	Social Problems in Schools <i>Peter K. Smith and Julian Elliott</i>	683
21	Atypical Development <i>Sarah Norgate</i>	715
	Glossary	751
	Names Index	785
	Subject Index	805

Contents

List of Contributors	xxi
Preface to Third Edition	xxiii
PART I INTRODUCTION	1
1 The Scope and Methods of Developmental Psychology	3
<i>Alan Slater, Scott P. Johnson and Darwin Muir</i>	
Introduction	5
Studying Changes with Age	6
Concepts of Human Development	6
<i>'Folk' theories of development: Punishment or praise?</i>	6
<i>Defining development according to world views</i>	8
Ways of Studying Development	10
<i>Designs for studying age-related changes</i>	10
<i>Research methods</i>	15
Beyond Common Sense: The Importance of Research Evidence	29
<i>Social policy implications of child development research</i>	31
Developmental Functions: Growing and Changing	32
<i>Continuous function (a) – increasing ability</i>	32
<i>Continuous function (b) – decreasing ability</i>	33
<i>Discontinuous (step) function</i>	34
<i>U-shaped functions</i>	35
<i>Comparing developmental functions</i>	36
Summary and Conclusions	37
Discussion Points	38
Suggestions for Further Reading	38
References	39
2 Theories and Issues in Child Development	41
<i>Scott P. Johnson, Alan Slater and Ian Hocking</i>	
Introduction	44
Motor Development	44
<i>Maturation theories</i>	45
<i>Dynamic systems theory</i>	47
Cognitive Development	50
<i>Piaget's theory of development</i>	50
<i>Developmental psychology before Piaget</i>	51
<i>Fundamental aspects of human development, according to Piaget</i>	51
<i>The four stages of cognitive development</i>	52

Information Processing Approaches	54
<i>Cognitive development in infancy</i>	55
<i>Cognitive development in childhood</i>	56
<i>Connectionism and brain development</i>	57
<i>Summary</i>	58
<i>Comparing information-processing approaches with Piaget's approach</i>	58
Social-Cognitive Development	59
Vygotsky	59
<i>Behaviourism and social learning theory</i>	59
Ethology and Evolution	62
Evolution	62
<i>The ethological approach</i>	63
Emotional Development	64
<i>Attachment theory – John Bowlby and Mary Ainsworth</i>	64
Psychoanalytic Theories	66
Sigmund Freud – <i>The founder of psychoanalysis</i>	66
<i>The five psychosexual stages</i>	66
<i>Problems with Freudian theory</i>	67
<i>Psychoanalysis, then and now: An overview</i>	68
<i>Modern psychoanalysts – Anna Freud and Erik Erikson</i>	69
Humanistic Theory – Abraham Maslow	69
<i>Abraham Maslow's hierarchy of needs</i>	69
Putting It all Together – Different Theories for Different Needs	70
<i>Gender development</i>	71
Issues in Child Development	73
<i>The nature–nurture issue</i>	73
<i>Stability versus change</i>	73
<i>Continuity versus discontinuity</i>	74
Summary and Conclusions	74
Discussion Points	74
Suggestions for Further Reading	75
References	75
3 The Nature–Nurture Debate	79
Alan Slater	
Introduction	81
<i>Precocial and altricial species</i>	82
<i>Nativism and empiricism</i>	83
Cognitive Development	83
<i>The start of it all: The first intelligence test</i>	84
<i>What is intelligence – one ability or several?</i>	85
<i>Intelligence test items</i>	86
<i>Controversies and issues in intelligence</i>	87
Heritability	88
<i>Heritability estimates</i>	88
Genetic Contributions to Cognitive Growth	89
<i>Familial resemblance</i>	89
<i>Missing heritability</i>	91
<i>Gene × environment interaction (G×E)</i>	91

Environmental Influences on Cognitive Development	92
<i>Adoption studies</i>	92
<i>The Flynn effect</i>	98
Compensatory Education	98
<i>Poverty and malnutrition</i>	98
<i>Head Start and Sure Start</i>	99
Summary and Conclusions	101
Discussion Points	102
Suggestions for Further Reading	102
References	103
PART II INFANCY	107
4 Prenatal Development	109
<i>Christine Moon and William P. Fifer</i>	
Introduction	112
The Brain, the Spinal Cord and the Emergence of Mind	113
<i>Processes and sequencing of brain development</i>	113
<i>Development of the cerebral cortex</i>	114
<i>Behavioural organisation</i>	115
Sensations	118
<i>Touch</i>	118
<i>The chemosensory system</i>	118
<i>The vestibular system</i>	120
<i>The visual system</i>	121
<i>The auditory system</i>	124
Prenatal and Transnatal Auditory Learning	127
<i>Learning about mother's voice and language</i>	128
<i>Summary</i>	129
Risks to Foetal Development	129
<i>Effects of exposure to psychoactive substances</i>	130
<i>Nutrition and foetal development</i>	131
<i>Effects of maternal stress</i>	132
Prenatal Development of Postnatal Functions: The Bridge to Infancy	133
Summary and Conclusions	133
Discussion Points	134
Suggestions for Further Reading	135
References	135
5 Perception, Knowledge and Action in Infancy	143
<i>J. Gavin Bremner, Kirsty Dunn and Diana S.Y. Tham</i>	
Introduction	145
Visual Perception from Birth to Six Months	146
<i>Early limitations of vision: Are they really a problem?</i>	146
<i>How can we investigate infant perception?</i>	147
<i>Shape perception in newborns</i>	148
<i>Newborns perceive a three-dimensional world</i>	150
<i>Perceptual development in the first six months</i>	150
<i>Summary</i>	153

Infants' Perception of People	153
<i>Face perception</i>	154
<i>Discriminating between faces</i>	155
<i>Preference for attractive faces</i>	156
<i>Perceptual narrowing and face processing specialisation</i>	157
<i>Imitation</i>	158
<i>Voice perception</i>	159
<i>Voice and speech discrimination</i>	160
<i>Summary</i>	161
Infants' Knowledge of the World	161
<i>Jean Piaget and the development of object permanence</i>	162
Later Work on Infant Cognition	163
<i>The violation of expectation technique</i>	163
<i>Evidence of object knowledge: The 'drawbridge study' and others</i>	163
<i>Young infants reason about the number of objects in an event</i>	166
<i>Young infants discriminate different numbers of items</i>	167
<i>Summary</i>	169
Object Search Revisited	169
<i>Search failure is not due to lack of motor skill</i>	169
<i>Seeking an explanation of the A not B error</i>	170
Summary and Conclusions	174
<i>Early knowledge</i>	174
<i>Early knowledge does not guide action</i>	174
<i>Remodelling Piaget's account</i>	175
Discussion Points	175
Suggestions for Further Reading	176
References	176
6 Emotional Development and Attachment Relationships	183
<i>Elizabeth Meins</i>	
Introduction	185
Emotional Development	186
<i>Expressing and recognising emotional expressions</i>	186
<i>Infant discrimination of facial expressions</i>	188
<i>Emotion understanding</i>	191
<i>Emotion understanding tasks</i>	192
<i>Emotion regulation</i>	196
Attachment Relationships	197
<i>Bowlby's theory of attachment</i>	197
<i>Mary Ainsworth and the strange situation procedure</i>	199
<i>Internal working models and the Adult Attachment Interview</i>	204
<i>Longitudinal stability in attachment security</i>	205
Summary and Conclusions	206
<i>Emotional competence in infancy</i>	206
<i>Later emotional competence</i>	207
<i>Attachment theory</i>	207
Discussion Points	207
Suggestions for Further Reading	208
References	208

7	Early Social Interactions with People and Objects	213
	<i>Cintia Rodríguez, Julia Benassi, Luisa Estrada and Nicolás Alessandroni</i>	
	Introduction	215
	First Encounters with Others: Biology is Socially Oriented	216
	<i>In the beginning it is rhythm: Synchrony or coordination?</i>	218
	<i>Imitation since birth or accompanying gestures?</i>	220
	Adult–Infant Interaction Becomes Mutual	222
	<i>First intentions are borrowed</i>	223
	The Magic Number Three : Early Triadic Interactions with Others and Objects from the Beginning?	226
	Premature Babies, Incubator and the Kangaroo Experience	231
	Gestures to Communicate with Others	232
	<i>Origin of gestures. What comes first? Does the infant make gestures to herself, or is it the adult who fosters them?</i>	235
	<i>Gestures used by adults: Distance between gesture (sign) and object (referent)</i>	239
	<i>More ideas on gestures in children with autism</i>	241
	Functional Permanence of Objects and Communicative-Educational Practices	242
	<i>Do autistic children use everyday life objects according to their function?</i>	247
	Symbolic Uses of Objects	247
	General Conclusions	250
	Acknowledgements	251
	Discussion Points	251
	Suggestions for Further Reading	252
	References	252
8	The Development of Self and Gender	259
	<i>Wendy Lawrenson</i>	
	Introduction	261
	Existential Self	262
	<i>The development of self-agency</i>	262
	<i>Cognitive responses to the external world</i>	263
	<i>Infants are born to be sociable</i>	263
	The Development of Self-Awareness	265
	<i>The rouge on the nose test</i>	265
	<i>Explaining the development of self-awareness</i>	266
	I Am Me but Am I Worthy? The Study of Self-Esteem – Definition, Measurement and Origin	269
	<i>Distinguishing between self-esteem and self-efficacy</i>	270
	The Power of Language	274
	<i>Attribution theory</i>	275
	<i>This is my body: The development of a sense of body image</i>	276
	<i>Body parts and whole</i>	276
	<i>The tadpole stage in children’s drawings</i>	277
	<i>Are children drawing themselves?</i>	278
	<i>Body size image</i>	278
	Perception of Body Attractiveness	281
	<i>Early social relationships</i>	282
	<i>Modelling and social comparison</i>	282
	<i>Re-constructing the body and body image</i>	283

Gender Identity Development	284
<i>Evaluating Freudian theory</i>	285
<i>Boys and girls and shades of gender</i>	285
<i>The boy who was raised as a girl</i>	287
<i>Rewarding gender-appropriate behaviours</i>	288
<i>Cognitive components of gender identity</i>	290
<i>Construction of gender identity</i>	291
The Chosen Categorical Self	292
<i>Developing a national identity</i>	292
Summary and Conclusions	294
Discussion Points	295
Suggestions for Further Reading	296
References	296

PART III CHILDHOOD

303

9	Cognitive Development	305
	<i>Margaret Anne Defeyter</i>	
	Introduction	306
	Piaget's Cognitive-Developmental Theory	307
	<i>Underlying structures and processes</i>	307
	<i>Piaget's stages of cognitive development</i>	308
	<i>Overall evaluation of Piaget's theory</i>	326
	Case's Neo-Piagetian Theory	327
	Siegler's Overlapping Waves Theory	328
	Vygotsky's Sociocultural Perspective	330
	<i>Overall evaluation of Vygotsky's theory</i>	331
	Theory of Core Knowledge	331
	Summary and Conclusions	334
	Discussion Points	335
	Suggestions for Further Reading	335
	References	335
10	The Development of Language	341
	<i>Heather M. Hill and Stan A. Kuczaj II</i>	
	Introduction	343
	What Is Human Language?	344
	<i>A communication system</i>	344
	<i>A symbolic system</i>	345
	<i>A rule-governed system</i>	345
	<i>Language is productive</i>	345
	The Development of the Pragmatic System	346
	<i>Turn-taking</i>	346
	<i>Initiating interactions</i>	348
	<i>Maintaining conversations</i>	349
	<i>Repairing faulty conversations</i>	349
	The Development of the Phonological System	350
	<i>Speech perception</i>	350
	<i>Speech production</i>	353
	<i>The development of articulation</i>	355

The Development of the Syntactic System	356
<i>The one-word period</i>	357
<i>The two-word period</i>	358
<i>Later syntactic development</i>	359
<i>The significance of overregularisation errors and creative generalisations</i>	360
<i>How can syntactic development be explained?</i>	362
The Acquisition of Word Meaning	364
<i>Guessing a word's meaning</i>	365
<i>The complexity of the task</i>	366
<i>Is children's acquisition of word meaning constrained?</i>	366
<i>The importance of semantic relations</i>	367
The Interaction of Language and Cognitive Development	368
Summary and Conclusions	369
Discussion Points	370
Suggestions for Further Reading	370
References	370
11 Acquiring a Theory of Mind	381
<i>Peter Mitchell</i>	
Introduction	383
<i>Early attunement to others' minds</i>	383
<i>Focusing on false beliefs: The unexpected transfer test</i>	384
When Do Children Begin to Understand that People Hold Beliefs?	386
Do Children Acquire a Theory of Mind?	386
<i>The deceptive box test</i>	387
Is There a Developmental Stage?	388
<i>The case for gradual change</i>	388
<i>Do children suddenly begin giving correct judgements of false belief?</i>	389
<i>Understanding the question asked</i>	390
Signs of Competence During Infancy: Can Infants Understand False Belief?	390
Adults' Difficulty with False Beliefs	392
Factors that Influence Development	394
<i>Nature versus nurture</i>	394
<i>Are we equipped with a dedicated module in the brain for understanding other minds?</i>	395
<i>The role of the family: Siblings</i>	397
<i>The role of the family: Adults</i>	398
<i>The characteristics of the child</i>	399
Autism	399
<i>Lack of imagination</i>	400
<i>Socialisation and communication</i>	400
<i>Causes of autism</i>	400
<i>Failure to understand the mind</i>	400
What is the Purpose of a Theory of Mind?	402
Summary and Conclusions	403
Discussion Points	403
Suggestions for Further Reading	404
References	404

12	Reading and Mathematics in Developmental Psychology	407
	<i>Peter Bryant</i>	
	Introduction	410
	Reading and Writing	411
	<i>The difficulty of alphabetic scripts</i>	412
	<i>Phonemic awareness and learning to read</i>	413
	<i>Rhymes and rimes</i>	413
	<i>Summary</i>	415
	Conditional Spelling Rules	415
	<i>Invented spelling</i>	416
	<i>The split digraph (or the silent 'e')</i>	416
	<i>Morphemic spelling rules: The case of English</i>	417
	<i>Morphemic spelling rules in Greek and French</i>	418
	<i>Morphemic spelling rules are difficult</i>	419
	<i>Three steps in learning morphemic spelling rules</i>	420
	<i>Summary</i>	421
	Number and Counting	422
	<i>Logic and number</i>	422
	<i>Different counting systems</i>	423
	<i>Infants' knowledge of number</i>	424
	<i>Infants' knowledge of addition and subtraction:</i>	
	<i>Wynn's work</i>	425
	<i>Criticisms of Wynn's work</i>	426
	<i>Principles before skills</i>	426
	<i>Acquiring an understanding of number gradually: Carey's individuation hypothesis</i>	427
	<i>Bootstrapping</i>	428
	Number as a Cultural Tool	429
	<i>The decimal system</i>	429
	Logic in the Understanding of Number	430
	<i>Logic and cardinality</i>	431
	<i>Young children sometimes do not realise that</i>	
	<i>same number = same quantity</i>	431
	<i>The importance of one-to-one correspondence</i>	432
	<i>Conclusions about the beginnings of the understanding of number</i>	433
	Summary and Conclusions	433
	Discussion Points	434
	Suggestions for Further Reading	434
	References	435
13	Memory Development and Eyewitness Testimony	439
	<i>Stephen J. Ceci, Stanka A. Fitneva, Cagla Aydin and Nadia Chernyak</i>	
	Introduction	441
	<i>The Bronx case</i>	441
	<i>How reliable are children's reports?</i>	442
	The Development of Memory	442
	<i>Recognition and recall</i>	443
	The Memory Process	443
	<i>Encoding</i>	443
	<i>Storage</i>	444

Retrieval	444
<i>Semantic and episodic memory</i>	445
Four Factors that Influence the Development of Memory: Knowledge, Strategies, Metamemories and Culture	446
<i>Knowledge development</i>	446
<i>Strategy development</i>	450
<i>Metamemory development</i>	452
<i>Cultural differences in memory</i>	455
<i>Other factors influencing memory performance</i>	456
Children's Eyewitness Testimony	457
<i>Suggestibility</i>	458
<i>Ecological validity</i>	458
<i>Cognitive factors</i>	459
<i>Social factors leading to false reports</i>	461
<i>The relationship between theory of mind and suggestibility</i>	464
<i>The interaction of cognitive and social factors</i>	465
<i>Is suggestibility a personality trait?</i>	466
Summary and Conclusions	468
<i>Alternatives to the encoding–storage–retrieval model of memory</i>	468
Discussion Points	469
Suggestions for Further Reading	469
References	470
14 Play and the Beginnings of Peer Relationships	477
<i>Peter K. Smith</i>	
Introduction	479
Early Peer Relationships	480
The Beginnings of Play	481
<i>Sensorimotor play</i>	481
<i>Pretend play</i>	481
The Growth of Social Participation	483
<i>Are siblings important?</i>	484
<i>Sibling relationships and the development of social understanding</i>	485
<i>Siblings and social and cognitive development</i>	485
<i>Only children</i>	486
Functions of Play	491
<i>Is sociodramatic play important?</i>	492
<i>Play tutoring</i>	492
Social Status and Sociometry: The Measurement of Social Relationships in the Peer Group	494
<i>Consequences of sociometric status</i>	496
<i>A social skills processing model</i>	496
<i>Different views on peer maladjustment and aggression</i>	497
<i>Escaping from rejected status</i>	497
Friendship	498
<i>What is special about friends?</i>	499
<i>Consequences of friendships for later well-being</i>	500

Sex Differences in Play and Social Behaviour	501
<i>Explanations of sex differences</i>	502
<i>Gender-typed beliefs</i>	502
Ethnicity	503
<i>Immigrant children</i>	504
Summary and Conclusions	505
Discussion Points	506
Suggestions for Further Reading	506
References	506
15 Prosocial Tendencies, Antisocial Behaviour and Moral Development in Childhood	511
<i>Daniel Hart, Neeta Goel and Robert Atkins</i>	
Introduction	513
What Do Prosocial and Antisocial Mean?	514
<i>Continuity and transformation</i>	515
<i>Are prosocial and antisocial poles on the same dimension?</i>	516
Preview of the Research Review	517
The Developmental Trajectory of Prosocial and Antisocial Behaviour and Thought	517
<i>Toddlers</i>	517
<i>Middle childhood</i>	522
<i>Moral judgement development and personality</i>	528
Social Influences on Prosocial and Antisocial Development	528
Development within Relationships	529
<i>Parents</i>	529
<i>Peers</i>	530
Culture and Development	532
<i>Cultural variability</i>	532
<i>Media and development</i>	533
<i>Culture and identity</i>	534
Summary and Conclusions	535
Discussion Points	535
Suggestions for Further Reading	535
References	536
PART IV ADOLESCENCE	541
16 Cognitive Development in Adolescence	543
<i>Kang Lee, Gizelle Anzures and Alejo Freire</i>	
Introduction	545
Perception and Attention	546
<i>Perception</i>	546
<i>Selective attention</i>	547
Speed of Processing	548
Memory	548
<i>Short-term memory</i>	550
<i>Long-term memory</i>	551
<i>Memory strategies</i>	552

Intelligence	553
<i>Rapid development</i>	553
<i>Stability of development</i>	555
<i>Fluid and crystallised intelligence</i>	556
<i>Intergenerational IQ gains: We're brighter now!</i>	556
Reasoning	557
<i>Deductive and inductive reasoning</i>	557
<i>Analogical reasoning</i>	559
Formal Operational Thinking	560
<i>Abstract thought</i>	561
<i>Realms of possibility</i>	561
<i>The adolescent as an apprentice scientist</i>	561
<i>Scientific problems</i>	562
Controversies about Piaget's Theory and Research Regarding Formal Operational Thought	563
<i>Do all adolescents reach this stage?</i>	563
<i>The role of experience</i>	564
<i>Cross-generational gains</i>	565
Beyond Piaget's Theory	565
<i>Adolescents as rule-based problem-solvers</i>	566
<i>Adolescents as intuitive scientists</i>	567
<i>Three common flaws in children's and adolescents' use of theories</i>	569
<i>General characteristics of adolescent thinking</i>	570
Summary and Conclusions	572
Discussion Points	572
Suggestions for Further Reading	573
References	573
17 Social Development	577
<i>Tirza H.J. Van Noorden and William M. Bukowski</i>	
Introduction	579
Key Characteristics of Development	580
G. Stanley Hall: Adolescence as Storm and Stress	581
<i>Adolescence as a second birth</i>	581
<i>Criticism of Hall's account</i>	582
The Adolescent Social Environment: Kurt Lewin	582
<i>Field theory and the concept of life space</i>	583
Puberty and Psychological Development: The Work of Anna Freud	587
<i>The ego, defence mechanisms and libidinal forces</i>	588
<i>The role of pubertal development</i>	589
<i>Timing of puberty</i>	589
The Family and Adolescence: The Work of Peter Blos	590
