

Young Won Park

Business Architecture Strategy and Platform-Based Ecosystems

 Springer

Contents

1	Introduction: What Is Business Architecture and Why Do We Need It Now?	1
1.1	A Paradox of the Twenty-First Century: Businesses Face Increasing Isolation in an Interconnected World	1
1.2	Business Architecture: A Way Out of Today’s Paradox	2
1.2.1	What Is Product Architecture?	2
1.2.2	Business Architecture Strategy	4
2	Global Business Model Building Based on the Three Core Competences and Business Architecture	9
2.1	Introduction	9
2.2	Core Competences and Business Architecture	10
2.2.1	Core Competences Strategy as Decisive Key for Maintaining Competitive Advantage	10
2.2.2	Core Competence and Business and Organizational Architecture	12
2.2.3	Preliminary Steps to Building a Global Business Model	13
2.3	Analysis of Current Product Development Strategies that Do not Work	14
2.3.1	Issues Involving Product Development	14
2.3.2	Issues Involving Business Management	15
2.3.3	Issues Involving Technology	16
2.3.4	Issues Involving Engineers and Designers	16
2.4	Building a New Business Model	17
2.4.1	The Framework: 3 Linkages	18
2.4.2	The Other Element: Hybrid Human Capital	19
2.5	Conclusion	19

3	Architecture Analysis for Sustainable Innovations	21
3.1	Introduction	21
3.2	Literature Review	22
3.2.1	Product Architecture and Core Competence	22
3.2.2	Integrated Manufacturing Information System and Architecture Analysis Method	23
3.3	Case Studies	30
3.3.1	Case of Firm N	30
3.3.2	Case of Firm O	30
3.4	Conclusion	31
4	Architecture Analysis and Core Competence Strategy for Emerging Markets	33
4.1	Introduction	33
4.2	Literature Review	34
4.2.1	Linkage of Customers and Technology	34
4.2.2	Essential Characteristics Pertaining to Dynamic Core Competence	34
4.3	IT Framework of Global Firms: An Architecture Analysis Model	36
4.3.1	Architecture Analysis to Attain Global Competitive Advantage	36
4.3.2	Theoretical Basis of Architecture Analysis	37
4.3.3	Architecture Analysis and Core Competence Strategy	40
4.4	Conclusion	43
5	Integration of Mechanical, Electrical, and Software Development Utilizing Architecture Analysis	45
5.1	Introduction	45
5.2	Literature Review	46
5.2.1	Differences in Product Design Ideas	46
5.2.2	Integration Challenges of Mechanical, Electrical, and Software Requirements	47
5.2.3	Integration Framework Based on Product Architecture Analysis	49
5.3	Case Study	50
5.3.1	Case of Engineering Chain Integration Failure in Automotive Product Development	51
5.3.2	Responsive Actions Through the IT System	54
5.4	Conclusion	56
6	Product Architecture and IT Strategy	59
6.1	Introduction	59
6.2	Product Architecture and 3D CAD Systems	60
6.2.1	Structure of Product Architecture	60

- 6.2.2 Relationship Between CAD and Product Architecture . . . 61
- 6.3 Research Methods 65
- 6.4 Case Analysis 66
 - 6.4.1 Global Consumer Electronics Maker Samsung 66
 - 6.4.2 Mobile Phone Development by Firm B 72
 - 6.4.3 Laptop Development by Firm C 73
 - 6.4.4 Comparison of Business Divisions 74
- 6.5 Conclusion 76
- 7 Integration of Platform Strategy and Product Architecture 79**
 - 7.1 Introduction 79
 - 7.2 Literature Review 80
 - 7.2.1 Dynamic Competitive Reality 80
 - 7.2.2 Platform Strategy 81
 - 7.2.3 Product Architecture 82
 - 7.3 Research Model 83
 - 7.4 Case Studies 84
 - 7.4.1 Platform Strategy for Changing Competitive Landscapes 85
 - 7.4.2 Platform Strategy Implementation: Facing Cost and Collaboration Challenges 86
 - 7.4.3 Implementing Product Architecture: Systematic Sharing of Design Know-How Details 87
 - 7.4.4 Competitive Performance Outcomes: Toward Integration of Design and Production Processes 88
 - 7.5 Integrative Framework of Platform Strategy and Product Architecture 89
 - 7.6 Conclusion 91
- 8 Japanese *Monozukuri* and Platform-Based Ecosystem Strategy . . . 93**
 - 8.1 Introduction 93
 - 8.2 Literature Review 94
 - 8.2.1 Product Architecture and Manufacturing Capabilities . . . 94
 - 8.2.2 Platform-Based Ecosystem Strategy 96
 - 8.3 Case Illustrations 98
 - 8.3.1 Platform-Based Ecosystems: The Platform Strategy of ARM 98
 - 8.3.2 GE’s Platform Transformation 99
 - 8.3.3 Platform Competition and Collaboration in the Automotive Industry 100
 - 8.3.4 CPS (Cyber Physical System) Strategy 101
 - 8.4 Conclusion 102

9	Dynamic Influence Management System and Organizational Change	103
9.1	Introduction	103
9.2	Literature Review: Innovation and Knowledge Creation Management	104
9.3	Dynamic Influence Management (DIM)	107
9.4	Case Study	107
9.4.1	Cases of Information Influence	107
9.4.2	D-KPI Activities to Boost Information Influence Force	109
9.5	Conclusion	109
10	Moving Forward: Global Integrated Manufacturing Information System (GIMIS)	111
10.1	Are IT for Integral-Type Manufacturing and Global IT Standards Compatible?	111
10.2	Open Issues Concerning Global Manufacturing IT Systems	112
10.2.1	Potential Solution: Insights from Korean Firms' Global Standard IT System (GSIS)	113
10.2.2	Proposal Concerning the Effective Use of a Global Standard IT System (GSIS): Architecture Analysis	116
10.3	Moving Forward: Global Integrated Manufacturing Information System (GIMIS)	117
