## CONTENTS IN BRIEF

---

List of Business Snapshots .....	17
List of Technical Notes.....	18
Preface .....	19
1. Introduction.....	23
2. Mechanics of futures markets .....	46
3. Hedging strategies using futures .....	71
4. Interest rates .....	99
5. Determination of forward and futures prices.....	126
6. Interest rate futures .....	154
7. Swaps .....	174
8. Securitization and the credit crisis of 2007.....	207
9. OIS discounting, credit issues, and funding costs .....	222
10. Mechanics of options markets .....	235
11. Properties of stock options .....	256
12. Trading strategies involving options .....	276
13. Binomial trees .....	296
14. Wiener processes and Itô's lemma .....	324
15. The Black–Scholes–Merton model.....	343
16. Employee stock options .....	376
17. Options on stock indices and currencies .....	389
18. Futures options .....	405
19. The Greek letters.....	421
20. Volatility smiles .....	453
21. Basic numerical procedures .....	472
22. Value at risk .....	516
23. Estimating volatilities and correlations .....	543
24. Credit risk .....	566
25. Credit derivatives.....	593
26. Exotic options.....	620
27. More on models and numerical procedures.....	646
28. Martingales and measures .....	677
29. Interest rate derivatives: The standard market models.....	695
30. Convexity, timing, and quanto adjustments.....	715
31. Interest rate derivatives: Models of the short rate.....	728
32. HJM, LMM, and multiple zero curves.....	762
33. Swaps Revisited.....	782
34. Energy and commodity derivatives .....	797
35. Real options .....	814
36. Derivatives mishaps and what we can learn from them.....	828
Glossary of terms .....	840
DerivaGem software.....	862
Major exchanges trading futures and options .....	867
Tables for $N(x)$ .....	868
Author index.....	870
Subject index.....	874

# Contents

	<b>List of Business Snapshots.....</b>	<b>17</b>
	<b>List of Technical Notes.....</b>	<b>18</b>
	<b>Preface .....</b>	<b>19</b>
<b>Chapter 1.</b>	<b>Introduction .....</b>	<b>23</b>
	1.1 Exchange-traded markets .....	24
	1.2 Over-the-counter markets .....	25
	1.3 Forward contracts.....	28
	1.4 Futures contracts .....	30
	1.5 Options .....	30
	1.6 Types of traders.....	33
	1.7 Hedgers.....	33
	1.8 Speculators .....	36
	1.9 Arbitrageurs.....	38
	1.10 Dangers .....	39
	Summary.....	40
	Further reading .....	41
	Practice questions.....	41
	Further questions.....	43
<b>Chapter 2.</b>	<b>Mechanics of futures markets.....</b>	<b>46</b>
	2.1 Background .....	46
	2.2 Specification of a futures contract.....	48
	2.3 Convergence of futures price to spot price .....	50
	2.4 The operation of margin accounts .....	51
	2.5 OTC markets .....	54
	2.6 Market quotes.....	57
	2.7 Delivery .....	60
	2.8 Types of traders and types of orders.....	61
	2.9 Regulation .....	62
	2.10 Accounting and tax.....	63
	2.11 Forward vs. futures contracts.....	65
	Summary.....	66
	Further reading .....	67
	Practice questions.....	67
	Further questions.....	69
<b>Chapter 3.</b>	<b>Hedging strategies using futures.....</b>	<b>71</b>
	3.1 Basic principles.....	71
	3.2 Arguments for and against hedging .....	73
	3.3 Basis risk.....	76
	3.4 Cross hedging .....	80

3.5	Stock index futures.....	84
3.6	Stack and roll.....	90
	Summary.....	92
	Further reading.....	92
	Practice questions.....	93
	Further questions.....	95
	Appendix: Capital asset pricing model.....	97
<b>Chapter 4.</b>	<b>Interest rates.....</b>	<b>99</b>
4.1	Types of rates.....	99
4.2	Measuring interest rates.....	101
4.3	Zero rates.....	104
4.4	Bond pricing.....	104
4.5	Determining Treasury zero rates.....	106
4.6	Forward rates.....	108
4.7	Forward rate agreements.....	110
4.8	Duration.....	113
4.9	Convexity.....	117
4.10	Theories of the term structure of interest rates.....	118
	Summary.....	120
	Further reading.....	121
	Practice questions.....	121
	Further questions.....	124
<b>Chapter 5.</b>	<b>Determination of forward and futures prices.....</b>	<b>126</b>
5.1	Investment assets vs. consumption assets.....	126
5.2	Short selling.....	127
5.3	Assumptions and notation.....	128
5.4	Forward price for an investment asset.....	129
5.5	Known income.....	132
5.6	Known yield.....	134
5.7	Valuing forward contracts.....	134
5.8	Are forward prices and futures prices equal?.....	136
5.9	Futures prices of stock indices.....	137
5.10	Forward and futures contracts on currencies.....	139
5.11	Futures on commodities.....	142
5.12	The cost of carry.....	145
5.13	Delivery options.....	146
5.14	Futures prices and expected future spot prices.....	146
	Summary.....	148
	Further reading.....	150
	Practice questions.....	150
	Further questions.....	152
<b>Chapter 6.</b>	<b>Interest rate futures.....</b>	<b>154</b>
6.1	Day count and quotation conventions.....	154
6.2	Treasury bond futures.....	157
6.3	Eurodollar futures.....	162
6.4	Duration-based hedging strategies using futures.....	167
6.5	Hedging portfolios of assets and liabilities.....	169
	Summary.....	169
	Further reading.....	170
	Practice questions.....	170
	Further questions.....	172

<b>Chapter 7. Swaps</b>	<b>174</b>
7.1 Mechanics of interest rate swaps	175
7.2 Day count issues	180
7.3 Confirmations	181
7.4 The comparative-advantage argument	181
7.5 The nature of swap rates	185
7.6 Determining LIBOR/swap zero rates	186
7.7 Valuation of interest rate swaps	186
7.8 Term structure effects	190
7.9 Fixed-for-fixed currency swaps	190
7.10 Valuation of fixed-for-fixed currency swaps	194
7.11 Other currency swaps	197
7.12 Credit risk	198
7.13 Other types of swaps	200
Summary	202
Further reading	203
Practice questions	203
Further questions	205
<b>Chapter 8. Securitization and the credit crisis of 2007</b>	<b>207</b>
8.1 Securitization	207
8.2 The US housing market	211
8.3 What went wrong?	215
8.4 The aftermath	217
Summary	218
Further reading	219
Practice questions	220
Further questions	220
<b>Chapter 9. OIS discounting, credit issues, and funding costs</b>	<b>222</b>
9.1 The risk-free rate	222
9.2 The OIS rate	224
9.3 Valuing swaps and FRAs with OIS discounting	227
9.4 OIS vs. LIBOR: Which is correct?	228
9.5 Credit risk: CVA and DVA	229
9.6 Funding costs	231
Summary	232
Further reading	233
Practice questions	233
Further questions	234
<b>Chapter 10. Mechanics of options markets</b>	<b>235</b>
10.1 Types of options	235
10.2 Option positions	237
10.3 Underlying assets	239
10.4 Specification of stock options	240
10.5 Trading	245
10.6 Commissions	245
10.7 Margin requirements	246
10.8 The options clearing corporation	248
10.9 Regulation	249
10.10 Taxation	249
10.11 Warrants, employee stock options, and convertibles	251
10.12 Over-the-counter options markets	251

	Summary .....	252
	Further reading.....	253
	Practice questions.....	253
	Further questions .....	254
<b>Chapter 11. Properties of stock options.....</b>		<b>256</b>
11.1	Factors affecting option prices.....	256
11.2	Assumptions and notation.....	260
11.3	Upper and lower bounds for option prices.....	260
11.4	Put–call parity.....	263
11.5	Calls on a non-dividend-paying stock.....	267
11.6	Puts on a non-dividend-paying stock.....	268
11.7	Effect of dividends .....	271
	Summary .....	272
	Further reading.....	273
	Practice questions.....	273
	Further questions .....	275
<b>Chapter 12. Trading strategies involving options.....</b>		<b>276</b>
12.1	Principal-protected notes .....	276
12.2	Trading an option and the underlying asset .....	278
12.3	Spreads.....	280
12.4	Combinations .....	288
12.5	Other payoffs.....	291
	Summary .....	292
	Further reading.....	293
	Practice questions.....	293
	Further questions .....	294
<b>Chapter 13. Binomial trees .....</b>		<b>296</b>
13.1	A one-step binomial model and a no-arbitrage argument .....	296
13.2	Risk-neutral valuation.....	300
13.3	Two-step binomial trees .....	302
13.4	A put example .....	305
13.5	American options.....	306
13.6	Delta.....	307
13.7	Matching volatility with $u$ and $d$ .....	308
13.8	The binomial tree formulas.....	310
13.9	Increasing the number of steps .....	310
13.10	Using DerivaGem .....	311
13.11	Options on other assets.....	312
	Summary .....	315
	Further reading.....	316
	Practice questions.....	317
	Further questions .....	318
	Appendix: Derivation of the Black–Scholes–Merton option-pricing formula from a binomial tree.....	320
<b>Chapter 14. Wiener processes and Itô’s lemma .....</b>		<b>324</b>
14.1	The Markov property .....	324
14.2	Continuous-time stochastic processes.....	325
14.3	The process for a stock price .....	330
14.4	The parameters.....	333
14.5	Correlated processes .....	334
14.6	Itô’s lemma .....	335

14.7	The lognormal property .....	336
	Summary .....	337
	Further reading .....	338
	Practice questions.....	338
	Further questions.....	339
	Appendix: Derivation of Itô's lemma .....	341
<b>Chapter 15.</b>	<b>The Black–Scholes–Merton model .....</b>	<b>343</b>
15.1	Lognormal property of stock prices .....	344
15.2	The distribution of the rate of return .....	345
15.3	The expected return.....	346
15.4	Volatility .....	347
15.5	The idea underlying the Black–Scholes–Merton differential equation .....	351
15.6	Derivation of the Black–Scholes–Merton differential equation .....	353
15.7	Risk-neutral valuation .....	356
15.8	Black–Scholes–Merton pricing formulas .....	357
15.9	Cumulative normal distribution function .....	360
15.10	Warrants and employee stock options .....	361
15.11	Implied volatilities.....	363
15.12	Dividends .....	365
	Summary .....	368
	Further reading .....	369
	Practice questions.....	370
	Further questions.....	372
	Appendix: Proof of Black–Scholes–Merton formula using risk-neutral valuation .....	374
<b>Chapter 16.</b>	<b>Employee stock options.....</b>	<b>376</b>
16.1	Contractual arrangements.....	376
16.2	Do options align the interests of shareholders and managers?.....	378
16.3	Accounting issues .....	379
16.4	Valuation.....	380
16.5	Backdating scandals .....	385
	Summary .....	386
	Further reading .....	387
	Practice questions.....	387
	Further questions.....	388
<b>Chapter 17.</b>	<b>Options on stock indices and currencies .....</b>	<b>389</b>
17.1	Options on stock indices .....	389
17.2	Currency options .....	391
17.3	Options on stocks paying known dividend yields .....	394
17.4	Valuation of European stock index options.....	396
17.5	Valuation of European currency options.....	399
17.6	American options .....	400
	Summary .....	401
	Further reading .....	401
	Practice questions.....	402
	Further questions.....	404
<b>Chapter 18.</b>	<b>Futures options.....</b>	<b>405</b>
18.1	Nature of futures options .....	405
18.2	Reasons for the popularity of futures options .....	408
18.3	European spot and futures options .....	408
18.4	Put–call parity .....	409

18.5	Bounds for futures options .....	410
18.6	Valuation of futures options using binomial trees.....	411
18.7	Drift of a futures price in a risk-neutral world.....	413
18.8	Black's model for valuing futures options .....	414
18.9	American futures options vs. American spot options .....	416
18.10	Futures-style options.....	416
	Summary .....	417
	Further reading.....	418
	Practice questions.....	418
	Further questions .....	419
<b>Chapter 19.</b>	<b>The Greek letters.....</b>	<b>421</b>
19.1	Illustration .....	421
19.2	Naked and covered positions .....	422
19.3	A stop-loss strategy .....	422
19.4	Delta hedging.....	424
19.5	Theta .....	431
19.6	Gamma .....	433
19.7	Relationship between delta, theta, and gamma .....	436
19.8	Vega .....	437
19.9	Rho .....	439
19.10	The realities of hedging .....	440
19.11	Scenario analysis.....	441
19.12	Extension of formulas.....	441
19.13	Portfolio insurance .....	444
19.14	Stock market volatility .....	446
	Summary .....	446
	Further reading.....	448
	Practice questions.....	448
	Further questions .....	450
	Appendix: Taylor series expansions and hedge parameters .....	452
<b>Chapter 20.</b>	<b>Volatility smiles .....</b>	<b>453</b>
20.1	Why the volatility smile is the same for calls and puts .....	453
20.2	Foreign currency options.....	455
20.3	Equity options.....	458
20.4	Alternative ways of characterizing the volatility smile.....	459
20.5	The volatility term structure and volatility surfaces.....	460
20.6	Greek letters.....	461
20.7	The role of the model .....	462
20.8	When a single large jump is anticipated.....	462
	Summary .....	464
	Further reading.....	465
	Practice questions.....	465
	Further questions .....	467
	Appendix: Determining implied risk-neutral distributions from volatility smiles.....	469
<b>Chapter 21.</b>	<b>Basic numerical procedures .....</b>	<b>472</b>
21.1	Binomial trees.....	472
21.2	Using the binomial tree for options on indices, currencies, and futures contracts .....	480
21.3	Binomial model for a dividend-paying stock.....	482
21.4	Alternative procedures for constructing trees .....	487

21.5	Time-dependent parameters .....	490
21.6	Monte Carlo simulation .....	491
21.7	Variance reduction procedures .....	497
21.8	Finite difference methods .....	500
	Summary .....	510
	Further reading .....	511
	Practice questions.....	512
	Further questions.....	514
<b>Chapter 22.</b>	<b>Value at risk.....</b>	<b>516</b>
22.1	The VaR measure .....	516
22.2	Historical simulation .....	519
22.3	Model-building approach .....	523
22.4	The linear model .....	526
22.5	The quadratic model .....	531
22.6	Monte Carlo simulation.....	533
22.7	Comparison of approaches .....	534
22.8	Stress testing and back testing.....	535
22.9	Principal components analysis.....	535
	Summary .....	539
	Further reading .....	539
	Practice questions.....	540
	Further questions.....	541
<b>Chapter 23.</b>	<b>Estimating volatilities and correlations .....</b>	<b>543</b>
23.1	Estimating volatility .....	543
23.2	The exponentially weighted moving average model.....	545
23.3	The GARCH (1,1) model .....	547
23.4	Choosing between the models .....	548
23.5	Maximum likelihood methods.....	549
23.6	Using GARCH (1,1) to forecast future volatility .....	554
23.7	Correlations .....	557
23.8	Application of EWMA to four-index example.....	560
	Summary.....	562
	Further reading .....	562
	Practice questions.....	562
	Further questions.....	564
<b>Chapter 24.</b>	<b>Credit risk.....</b>	<b>566</b>
24.1	Credit ratings .....	566
24.2	Historical default probabilities .....	567
24.3	Recovery rates .....	568
24.4	Estimating default probabilities from bond yield spreads.....	569
24.5	Comparison of default probability estimates.....	572
24.6	Using equity prices to estimate default probabilities .....	575
24.7	Credit risk in derivatives transactions.....	577
24.8	Default correlation.....	583
24.9	Credit VaR .....	586
	Summary.....	589
	Further reading .....	589
	Practice questions.....	590
	Further questions.....	591

<b>Chapter 25. Credit derivatives .....</b>	<b>593</b>
25.1 Credit default swaps .....	594
25.2 Valuation of credit default swaps.....	597
25.3 Credit indices .....	601
25.4 The use of fixed coupons.....	602
25.5 CDS forwards and options .....	603
25.6 Basket credit default swaps.....	603
25.7 Total return swaps .....	603
25.8 Collateralized debt obligations.....	605
25.9 Role of correlation in a basket CDS and CDO.....	607
25.10 Valuation of a synthetic CDO.....	607
25.11 Alternatives to the standard market model.....	614
Summary .....	616
Further reading.....	616
Practice questions.....	617
Further questions .....	618
<b>Chapter 26. Exotic options .....</b>	<b>620</b>
26.1 Packages .....	620
26.2 Perpetual American call and put options .....	621
26.3 Nonstandard American options.....	622
26.4 Gap options .....	623
26.5 Forward start options .....	624
26.6 Cliquet options .....	624
26.7 Compound options.....	624
26.8 Chooser options.....	625
26.9 Barrier options .....	626
26.10 Binary options .....	628
26.11 Lookback options .....	629
26.12 Shout options.....	631
26.13 Asian options .....	631
26.14 Options to exchange one asset for another.....	633
26.15 Options involving several assets.....	634
26.16 Volatility and variance swaps .....	635
26.17 Static options replication .....	638
Summary .....	640
Further reading.....	641
Practice questions.....	641
Further questions .....	643
<b>Chapter 27. More on models and numerical procedures.....</b>	<b>646</b>
27.1 Alternatives to Black–Scholes–Merton.....	647
27.2 Stochastic volatility models.....	652
27.3 The IVF model.....	654
27.4 Convertible bonds .....	655
27.5 Path-dependent derivatives.....	658
27.6 Barrier options .....	662
27.7 Options on two correlated assets .....	665
27.8 Monte Carlo simulation and American options .....	668
Summary .....	672
Further reading.....	673
Practice questions.....	674
Further questions .....	675

<b>Chapter 28. Martingales and measures .....</b>	<b>677</b>
28.1 The market price of risk .....	678
28.2 Several state variables .....	681
28.3 Martingales.....	682
28.4 Alternative choices for the numeraire .....	683
28.5 Extension to several factors .....	687
28.6 Black’s model revisited .....	688
28.7 Option to exchange one asset for another.....	689
28.8 Change of numeraire .....	690
Summary.....	691
Further reading .....	692
Practice questions.....	692
Further questions.....	694
<b>Chapter 29. Interest rate derivatives: The standard market models .....</b>	<b>695</b>
29.1 Bond options .....	695
29.2 Interest rate caps and floors.....	700
29.3 European swap options.....	706
29.4 OIS discounting.....	710
29.5 Hedging interest rate derivatives .....	710
Summary.....	711
Further reading .....	712
Practice questions.....	712
Further questions.....	714
<b>Chapter 30. Convexity, timing, and quanto adjustments .....</b>	<b>715</b>
30.1 Convexity adjustments .....	715
30.2 Timing adjustments.....	719
30.3 Quantos .....	721
Summary.....	724
Further reading .....	724
Practice questions.....	724
Further questions.....	726
Appendix: Proof of the convexity adjustment formula .....	727
<b>Chapter 31. Interest rate derivatives: Models of the short rate.....</b>	<b>728</b>
31.1 Background .....	728
31.2 Equilibrium models.....	729
31.3 No-arbitrage models.....	736
31.4 Options on bonds .....	741
31.5 Volatility structures .....	742
31.6 Interest rate trees .....	743
31.7 A general tree-building procedure.....	745
31.8 Calibration.....	754
31.9 Hedging using a one-factor model.....	756
Summary.....	757
Further reading .....	757
Practice questions.....	758
Further questions.....	760
<b>Chapter 32. HJM, LMM, and multiple zero curves .....</b>	<b>762</b>
32.1 The Heath, Jarrow, and Morton model.....	762
32.2 The LIBOR market model .....	765
32.3 Handling multiple zero curves.....	775
32.4 Agency mortgage-backed securities.....	777

	Summary .....	779
	Further reading.....	780
	Practice questions.....	780
	Further questions .....	781
<b>Chapter 33. Swaps Revisited .....</b>		<b>782</b>
33.1	Variations on the vanilla deal .....	782
33.2	Compounding swaps.....	784
33.3	Currency swaps.....	785
33.4	More complex swaps .....	786
33.5	Equity swaps .....	789
33.6	Swaps with embedded options.....	791
33.7	Other swaps .....	793
	Summary .....	794
	Further reading.....	795
	Practice questions.....	795
	Further questions .....	796
<b>Chapter 34. Energy and commodity derivatives.....</b>		<b>797</b>
34.1	Agricultural commodities .....	797
34.2	Metals.....	798
34.3	Energy products.....	799
34.4	Modeling commodity prices.....	801
34.5	Weather derivatives.....	807
34.6	Insurance derivatives.....	808
34.7	Pricing weather and insurance derivatives.....	808
34.8	How an energy producer can hedge risks .....	810
	Summary .....	811
	Further reading.....	811
	Practice questions.....	812
	Further questions .....	813
<b>Chapter 35. Real options .....</b>		<b>814</b>
35.1	Capital investment appraisal .....	814
35.2	Extension of the risk-neutral valuation framework .....	815
35.3	Estimating the market price of risk .....	817
35.4	Application to the valuation of a business .....	818
35.5	Evaluating options in an investment opportunity .....	818
	Summary .....	825
	Further reading.....	825
	Practice questions.....	826
	Further questions .....	826
<b>Chapter 36. Derivatives mishaps and what we can learn from them .....</b>		<b>828</b>
36.1	Lessons for all users of derivatives.....	828
36.2	Lessons for financial institutions.....	832
36.3	Lessons for nonfinancial corporations .....	837
	Summary .....	839
	Further reading.....	839
