

MARKETING RESEARCH

AN APPLIED APPROACH

FIFTH EDITION

NARESH K. MALHOTRA
DANIEL NUNAN
DAVID F. BIRKS

Brief contents

<i>Preface</i>	<i>xiii</i>
<i>Publisher's acknowledgements</i>	<i>xv</i>
<i>About the authors</i>	<i>xvii</i>
1. Introduction to marketing research	1
2. Defining the marketing research problem and developing a research approach	29
3. Research design	59
4. Secondary data collection and analysis	90
5. Internal secondary data and analytics	121
6. Qualitative research: its nature and approaches	147
7. Qualitative research: focus group discussions	179
8. Qualitative research: in-depth interviewing and projective techniques	207
9. Qualitative research: data analysis	233
10. Survey and quantitative observation techniques	267
11. Causal research design: experimentation	302
12. Measurement and scaling: fundamentals, comparative and non-comparative scaling	333
13. Questionnaire design	371
14. Sampling: design and procedures	409
15. Sampling: determining sample size	442
16. Survey fieldwork	471
17. Social media research	491
18. Mobile research	513
19. Data integrity	528
20. Frequency distribution, cross-tabulation and hypothesis testing	556
21. Analysis of variance and covariance	601

22.	Correlation and regression	632
23.	Discriminant and logit analysis	673
24.	Factor analysis	707
25.	Cluster analysis	735
26.	Multidimensional scaling and conjoint analysis	762
27.	Structural equation modelling and path analysis	795
28.	Communicating research findings	831
29.	Business-to-business (b2b) marketing research	854
30.	Research ethics	881
	Glossary	908
	Subject index	926
	Name index	952
	Company index	954

Contents

<i>Preface</i>	xiii	Analytical model	52
<i>Publisher's acknowledgements</i>	xv	Research questions	53
<i>About the authors</i>	xvii	Hypothesis	54
		<i>Summary</i>	54
		<i>Questions</i>	55
		<i>Exercises</i>	56
		<i>Notes</i>	57
1 Introduction to marketing research	1		
<i>Objectives</i>	2		
<i>Overview</i>	2		
What does 'marketing research' mean?	3		
A brief history of marketing research	6		
Definition of marketing research	6		
The marketing research process	9		
A classification of marketing research	12		
The global marketing research industry	15		
Justifying the investment in marketing research	19		
The future – addressing the marketing research skills gap	22		
<i>Summary</i>	25		
<i>Questions</i>	26		
<i>Exercises</i>	26		
<i>Notes</i>	27		
2 Defining the marketing research problem and developing a research approach	29		
<i>Objectives</i>	30		
<i>Overview</i>	30		
Importance of defining the problem	31		
The marketing research brief	32		
Components of the marketing research brief	33		
The marketing research proposal	36		
The process of defining the problem and developing a research approach	39		
Environmental context of the problem	42		
Discussions with decision makers	42		
Interviews with industry experts	44		
Initial secondary data analyses	45		
Marketing decision problem and marketing research problem	46		
Defining the marketing research problem	49		
Components of the research approach	50		
Objective/theoretical framework	51		
		3 Research design	59
		<i>Objectives</i>	60
		<i>Overview</i>	60
		Research design definition	61
		Research design from the decision makers' perspective	62
		Research design from the participants' perspective	63
		Research design classification	69
		Descriptive research	73
		Causal research	79
		Relationships between exploratory, descriptive and causal research	80
		Potential sources of error in research designs	82
		<i>Summary</i>	85
		<i>Questions</i>	86
		<i>Exercises</i>	86
		<i>Notes</i>	87
		4 Secondary data collection and analysis	90
		<i>Objectives</i>	91
		<i>Overview</i>	91
		Defining primary data, secondary data and marketing intelligence	92
		Advantages and uses of secondary data	94
		Disadvantages of secondary data	96
		Criteria for evaluating secondary data	96
		Classification of secondary data	99
		Published external secondary sources	100
		Databases	104
		Classification of online databases	104
		Syndicated sources of secondary data	106
		Syndicated data from households	109

Syndicated data from institutions	115	Questions	203
Summary	117	Exercises	204
Questions	118	Notes	205
Exercises	119		
Notes	119		
5 Internal secondary data and analytics	121	8 Qualitative research: in-depth interviewing and projective techniques	207
Objectives	122	Objectives	208
Overview	122	Overview	208
Internal secondary data	125	In-depth interviews	209
Geodemographic data analyses	128	Projective techniques	221
Customer relationship management	132	Comparison between qualitative techniques	227
Big data	134	Summary	228
Web analytics	136	Questions	229
Linking different types of data	139	Exercises	230
Summary	144	Notes	230
Questions	144		
Exercises	145	9 Qualitative research: data analysis	233
Notes	146	Objectives	234
		Overview	234
		The qualitative researcher	235
		The process of qualitative data analysis	239
		Grounded theory	251
		Content analysis	254
		Semiotics	256
		Qualitative data analysis software	259
		Summary	262
		Questions	263
		Exercises	264
		Notes	264
		10 Survey and quantitative observation techniques	267
		Objectives	268
		Overview	268
		Survey methods	269
		Online surveys	271
		Telephone surveys	275
		Face-to-face surveys	276
		A comparative evaluation of survey methods	279
		Other survey methods	288
		Mixed-mode surveys	289
		Observation techniques	289
		Observation techniques classified by mode of administration	292
		A comparative evaluation of the observation techniques	295
		Advantages and disadvantages of observation techniques	296
		Summary	297
		Questions	297
		Exercises	298
		Notes	299
6 Qualitative research: its nature and approaches	147		
Objectives	148		
Overview	148		
Primary data: qualitative versus quantitative research	150		
Rationale for using qualitative research	152		
Philosophy and qualitative research	155		
Ethnographic research	162		
Grounded theory	168		
Action research	171		
Summary	174		
Questions	176		
Exercises	176		
Notes	177		
7 Qualitative research: focus group discussions	179		
Objectives	180		
Overview	180		
Classifying qualitative research techniques	182		
Focus group discussion	183		
Planning and conducting focus groups	188		
The moderator	193		
Other variations of focus groups	194		
Other types of qualitative group discussions	195		
Misconceptions about focus groups	196		
Online focus groups	198		
Advantages of online focus groups	200		
Disadvantages of online focus groups	201		
Summary	202		

11 Causal research design: experimentation	302		
Objectives	303	Determine the content of individual questions	380
Overview	303	Overcoming the participant's inability and unwillingness to answer	381
Concept of causality	304	Choose question structure	385
Conditions for causality	305	Choose question wording	389
Definitions and concepts	308	Arrange the questions in proper order	394
Definition of symbols	310	Identify the form and layout	396
Validity in experimentation	310	Reproduce the questionnaire	397
Extraneous variables	311	Eliminate problems by pilot-testing	398
Controlling extraneous variables	313	Summarising the questionnaire design process	400
A classification of experimental designs	315	Designing surveys across cultures and countries	402
Pre-experimental designs	316	Summary	403
True experimental designs	317	Questions	404
Quasi-experimental designs	318	Exercises	405
Statistical designs	320	Notes	405
Laboratory versus field experiments	323		
Experimental versus non-experimental designs	325	14 Sampling: design and procedures	409
Application: test marketing	326	Objectives	410
Summary	328	Overview	410
Questions	329	Sample or census	412
Exercises	330	The sampling design process	414
Notes	330	A classification of sampling techniques	419
		Non-probability sampling techniques	420
12 Measurement and scaling: fundamentals, comparative and non-comparative scaling	333	Probability sampling techniques	425
Objectives	334	Choosing non-probability versus probability sampling	433
Overview	334	Summary of sampling techniques	434
Measurement and scaling	335	Issues in sampling across countries and cultures	436
Scale characteristics and levels of measurement	336	Summary	437
Primary scales of measurement	337	Questions	438
A comparison of scaling techniques	342	Exercises	439
Comparative scaling techniques	343	Notes	439
Non-comparative scaling techniques	347		
Itemised rating scales	349	15 Sampling: determining sample size	442
Itemised rating scale decisions	352	Objectives	443
Multi-item scales	356	Overview	443
Scale evaluation	358	Definitions and symbols	445
Choosing a scaling technique	363	The sampling distribution	446
Mathematically derived scales	364	Statistical approaches to determining sample size	447
Summary	364	The confidence interval approach	448
Questions	365	Multiple characteristics and parameters	454
Exercises	366	Other probability sampling techniques	454
Notes	367	Adjusting the statistically determined sample size	455
		Calculation of response rates	456
13 Questionnaire design	371	Non-response issues in sampling	457
Objectives	372	Summary	464
Overview	372	Questions	464
Questionnaire definition	374	Exercises	465
Questionnaire design process	375	Appendix: The normal distribution	466
Specify the information needed	378	Notes	468
Specify the type of interviewing method	379		

16 Survey fieldwork	471		
<i>Objectives</i>	472	Cleaning the data	541
<i>Overview</i>	472	Statistically adjusting the data	543
The nature of survey fieldwork	474	Selecting a data analysis strategy	545
Survey fieldwork and the data-collection process	475	Data integrity across countries and cultures	548
Selecting survey fieldworkers	475	Practise data analysis with SPSS	549
Training survey fieldworkers	476	<i>Summary</i>	552
Recording the answers	479	<i>Questions</i>	552
Supervising survey fieldworkers	481	<i>Exercises</i>	553
Evaluating survey fieldworkers	482	<i>Notes</i>	554
Fieldwork and online research	483	20 Frequency distribution, cross-tabulation and hypothesis testing	556
Fieldwork across countries and cultures	485	<i>Objectives</i>	557
<i>Summary</i>	487	<i>Overview</i>	557
<i>Questions</i>	487	Frequency distribution	560
<i>Exercises</i>	488	Statistics associated with frequency distribution	562
<i>Notes</i>	489	A general procedure for hypothesis testing	565
17 Social media research	491	Cross-tabulations	570
<i>Objectives</i>	492	Statistics associated with cross-tabulation	576
<i>Overview</i>	492	Hypothesis testing related to differences	580
What do we mean by 'social media'?	492	Parametric tests	582
The emergence of social media research	494	Non-parametric tests	588
Approaches to social media research	495	Practise data analysis with SPSS	593
Accessing social media data	497	<i>Summary</i>	596
Social media research methods	499	<i>Questions</i>	596
Research with image and video data	508	<i>Exercises</i>	597
Limitations of social media research	509	<i>Notes</i>	598
<i>Summary</i>	510	21 Analysis of variance and covariance	601
<i>Questions</i>	510	<i>Objectives</i>	602
<i>Exercises</i>	511	<i>Overview</i>	602
<i>Notes</i>	511	Relationship among techniques	604
18 Mobile research	513	One-way ANOVA	605
<i>Objectives</i>	514	Statistics associated with one-way ANOVA	606
<i>Overview</i>	514	Conducting one-way ANOVA	606
What is a mobile device?	514	Illustrative applications of one-way ANOVA	610
Approaches to mobile research	516	n-way ANOVA	614
Guidelines specific to mobile marketing research	518	Analysis of covariance (ANCOVA)	619
Key challenges in mobile research	522	Issues in interpretation	620
<i>Summary</i>	525	Repeated measures ANOVA	622
<i>Questions</i>	526	Non-metric ANOVA	624
<i>Exercises</i>	526	Multivariate ANOVA	624
<i>Notes</i>	526	Practise data analysis with SPSS	625
19 Data integrity	528	<i>Summary</i>	626
<i>Objectives</i>	529	<i>Questions</i>	627
<i>Overview</i>	529	<i>Exercises</i>	627
The data integrity process	530	<i>Notes</i>	630
Checking the questionnaire	531	22 Correlation and regression	632
Editing	532	<i>Objectives</i>	633
Coding	533	<i>Overview</i>	633
Transcribing	539	Product moment correlation	634
		Partial correlation	638

Non-metric correlation	640		
Regression analysis	641		
Bivariate regression	641		
Statistics associated with bivariate regression analysis	642		
Conducting bivariate regression analysis	642		
Multiple regression	651		
Statistics associated with multiple regression	652		
Conducting multiple regression analysis	653		
Multicollinearity	661		
Relative importance of predictors	662		
Cross-validation	662		
Regression with dummy variables	663		
Analysis of variance and covariance with regression	664		
Practise data analysis with SPSS	665		
Summary	666		
Questions	667		
Exercises	667		
Notes	670		
23 Discriminant and logit analysis	673		
Objectives	674		
Overview	674		
Basic concept of discriminant analysis	675		
Relationship of discriminant and logit analysis to ANOVA and regression	676		
Discriminant analysis model	676		
Statistics associated with discriminant analysis	677		
Conducting discriminant analysis	678		
Conducting multiple discriminant analysis	688		
Stepwise discriminant analysis	696		
The logit model	696		
Conducting binary logit analysis	696		
Practise data analysis with SPSS	702		
Summary	703		
Questions	704		
Exercises	705		
Notes	705		
24 Factor analysis	707		
Objectives	708		
Overview	708		
Basic concept	709		
Factor analysis model	710		
Statistics associated with factor analysis	711		
Conducting factor analysis	712		
Applications of common factor analysis	724		
Practise data analysis with SPSS	729		
Summary	730		
Questions	731		
Exercises	731		
Notes	733		
25 Cluster analysis		735	
Objectives		736	
Overview		736	
Basic concept		737	
Statistics associated with cluster analysis		739	
Conducting cluster analysis		739	
Applications of non-hierarchical clustering		750	
Applications of TwoStep clustering		752	
Clustering variables		754	
Practise data analysis with SPSS		757	
Summary		758	
Questions		759	
Exercises		759	
Notes		760	
26 Multidimensional scaling and conjoint analysis		762	
Objectives		763	
Overview		763	
Basic concepts in MDS		765	
Statistics and terms associated with MDS		765	
Conducting MDS		766	
Assumptions and limitations of MDS		773	
Scaling preference data		773	
Correspondence analysis		775	
Relationship among MDS, factor analysis and discriminant analysis		776	
Basic concepts in conjoint analysis		776	
Statistics and terms associated with conjoint analysis		777	
Conducting conjoint analysis		778	
Assumptions and limitations of conjoint analysis		786	
Hybrid conjoint analysis		786	
Practise data analysis with SPSS		788	
Summary		789	
Questions		790	
Exercises		790	
Notes		791	
27 Structural equation modelling and path analysis		795	
Objectives		796	
Overview		796	
Basic concepts in SEM		797	
Statistics and terms associated with SEM		798	
Foundations of SEM		800	
Conducting SEM		802	
Higher-order CFA		813	
Relationship of SEM to other multivariate techniques		814	
Application of SEM: first-order factor model		814	
Application of SEM: second-order factor model		817	
Path analysis		823
