BRIEF CONTENTS

	Preface	xxv
	About the Authors	xxix
1	Introduction	1
2	Buying and Selling Securities	22
3	Security Markets	47
4	Efficient Markets, Investment Value, and Market Price	85
5	The Valuation of Riskless Securities	108
6	The Portfolio Selection Problem	139
7	Portfolio Analysis	171
8	Riskfree Borrowing and Lending	204
9	The Capital Asset Pricing Model	227
10	Factor Models	256
11	Arbitrage Pricing Theory	283
12	Taxes and Inflation	305
13	Fixed-Income Securities	340
14	Bond Analysis	386
15	Bond Portfolio Management	417
16	Common Stocks	457
17	The Valuation of Common Stocks	523
18	Earnings	559
19	Options	601
20	Futures	654
21	Investment Companies	699
22	Financial Analysis	740
23	Investment Management	792
24	Portfolio Performance Evaluation	825
25	International Investing	876
	Glossary	906
	Selected Solutions	934
	Index	939

	PREFACE		**xxv**
	ABOUT THE AUTHORS		**xxix**
1	**INTRODUCTION**		**1**
	1.1	THE INVESTMENT ENVIRONMENT	2
		1.1.1 Securities	2
		1.1.2 Risk, Return, and Diversification	8
		1.1.3 Security Markets	9
		1.1.4 Financial Intermediaries	10
	1.2	THE INVESTMENT PROCESS	11
		1.2.1 Investment Policy	11
		1.2.2 Security Analysis	12
		1.2.3 Portfolio Construction	13
		1.2.4 Portfolio Revision	14
		1.2.5 Portfolio Performance Evaluation	14
	1.3	INVESTMENTS AS A CAREER	14
	1.4	GLOBALIZATION	16
	1.5	SUMMARY	17
	INSTITUTIONAL ISSUES: INSTITUTIONAL INVESTORS		4
	INSTITUTIONAL ISSUES: INVESTMENT POLICY		13
2	**BUYING AND SELLING SECURITIES**		**22**
	2.1	ORDER SIZE	23
	2.2	TIME LIMIT	23
	2.3	TYPES OF ORDERS	24
		2.3.1 Market Orders	24
		2.3.2 Limit Orders	24
		2.3.3 Stop Orders	24
		2.3.4 Stop Limit Orders	25
	2.4	MARGIN ACCOUNTS	25
		2.4.1 Margin Purchases	26
		2.4.2 Short Sales	30
		2.4.3 Securities Lending	37
		2.4.4 Aggregation	38
	2.5	SUMMARY	41
	INSTITUTIONAL ISSUES: MARKET NEUTRAL STRATEGIES		32
	INSTITUTIONAL ISSUES: HEDGE FUNDS		40

3 SECURITY MARKETS **47**
3.1 CALL AND CONTINUOUS MARKETS 47
3.1.1 Call Markets 47
3.1.2 Continuous Markets 47
3.2 MAJOR MARKETS IN THE UNITED STATES 48
3.2.1 New York Stock Exchange 48
3.2.2 Other Exchanges 56
3.2.3 Over-the-Counter Market 57
3.2.4 Third and Fourth Markets 59
3.2.5 Preferencing 60
3.2.6 Foreign Markets 63
3.3 INFORMATION-MOTIVATED AND LIQUIDITY-MOTIVATED TRADERS 65
3.4 CENTRAL MARKET 67
3.5 CLEARING PROCEDURES 68
3.6 INSURANCE 69
3.7 COMMISSIONS 69
3.7.1 Fixed Commissions 69
3.7.2 Competitive Commissions 69
3.8 TRANSACTIONS COSTS 71
3.8.1 Bid-Ask Spread 71
3.8.2 Price Impact 72
3.9 REGULATION OF SECURITY MARKETS 74
3.10 SUMMARY 76
INSTITUTIONAL ISSUES: CROSSING SYSTEMS: EVOLUTION OF THE FOURTH MARKET 62
INSTITUTIONAL ISSUES: SOFT DOLLARS 70

4 EFFICIENT MARKETS, INVESTMENT VALUE, AND MARKET PRICE **85**
4.1 DEMAND AND SUPPLY SCHEDULES 85
4.1.1 Demand-to-Buy Schedule 86
4.1.2 Supply-to-Sell Schedule 86
4.1.3 Interaction of Schedules 87
4.1.4 Elasticity of the Demand-to-Buy Schedule 89
4.1.5 Shifts of the Demand-to-Buy and Supply-to-Sell Schedules 89
4.1.6 Summary 91
4.2 MARKET EFFICIENCY 92
4.2.1 The Efficient Market Model 93
4.2.2 Fama's Formulation of the Efficient Market Model 94
4.2.3 Security Price Changes as a Random Walk 95

4.2.4 Observations About Perfectly Efficient Markets 96
4.2.5 Observations About Perfectly Efficient Markets With Transactions Costs 97
4.3 Testing for Market Efficiency 97
4.3.1 Event Studies 98
4.3.2 Looking for Patterns 102
4.3.3 Examining Performance 102
4.4 Summary of Market Efficiency Test Results 103
4.4.1 Weak-Form Tests 103
4.4.2 Semistrong-Form Tests 103
4.4.3 Strong-Form Tests 103
4.4.4 Summary of Efficient Markets 103
4.5 Summary 104
Institutional Issues: The Arizona Stock Exchange: A Better Mousetrap 90
Institutional Issues: The Active versus Passive Debate 98

5 The Valuation of Riskless Securities 108
5.1 Nominal Versus Real Interest Rates 108
5.2 Yield-to-Maturity 112
5.2.1 Calculating Yield-to-Maturity 112
5.3 Spot Rates 114
5.4 Discount Factors 115
5.5 Forward Rates 116
5.6 Forward Rates and Discount Factors 118
5.7 Compounding 118
5.8 The Bank Discount Method 119
5.9 Yield Curves 119
5.10 Term Structure Theories 120
5.10.1 The Unbiased Expectations Theory 120
5.10.2 The Liquidity Preference Theory 124
5.10.3 The Market Segmentation Theory 127
5.10.4 The Preferred Habitat Theory 127
5.10.5 Empirical Evidence on the Theories 127
5.11 Holding-Period Return 128
5.12 Summary 130
Appendix: Continuous Compounding 135
Institutional Issues: Almost Riskfree Securities 110

6 The Portfolio Selection Problem 139
6.1 Initial and Terminal Wealth 140
6.1.1 Determining the Rate of Return on a Portfolio 140
6.1.2 An Example 141

6.2 Nonsatiation and Risk Aversion 141
6.2.1 Nonsatiation 141
6.2.2 Risk Aversion 142
6.3 Utility 142
6.3.1 Marginal Utility 142
6.3.2 Certainty Equivalents and Risk Premiums 144
6.4 Indifference Curves 144
6.5 Calculating Expected Returns and Standard Deviations for Portfolios 148
6.5.1 Expected Returns 149
6.5.2 Standard Deviations 151
6.6 Summary 155
Appendix A: Characteristics of Probability Distributions 162
A.1 Probability Distributions 162
A.2 Central Tendency 163
A.3 Dispersion 164
A.4 Comovement 165
Appendix B: Risk-Neutral and Risk-Seeking Investors 166
Institutional Issues: Behavioral Finance 146
Institutional Issues: Alternative Risk Measures 156

7 Portfolio Analysis 171
7.1 The Efficient Set Theorem 171
7.1.1 The Feasible Set 172
7.1.2 The Efficient Set Theorem Applied to the Feasible Set 172
7.1.3 Selection of the Optimal Portfolio 173
7.2 Concavity of the Efficient Set 175
7.2.1 Bounds on the Location of Portfolios 175
7.2.2 Actual Locations of the Portfolios 179
7.3 The Market Model 181
7.3.1 Random Error Terms 181
7.3.2 Graphical Representation of the Market Model 182
7.3.3 Beta 183
7.3.4 Actual Returns 184
7.4 Diversification 184
7.4.1 Portfolio Total Risk 185
7.4.2 Portfolio Market Risk 186
7.4.3 Portfolio Unique Risk 186
7.4.4 An Example 187
7.4.5 Random versus Efficient Diversification 190
7.5 Summary 190
Appendix A: The Markowitz Model 193
A.1 Determining the Composition and Location of the Efficient Set 193

A.2 Determining the Composition of the Optimal Portfolio 197
Appendix B: Determining the Inputs Needed for Locating the Efficient Set 198
Institutional Issues: The Trouble with Optimizers 176
Institutional Issues: The Active Manager Portfolio Selection Problem 188

8 Riskfree Borrowing and Lending 204
8.1 Defining the Riskfree Asset 204
8.2 Allowing For Riskfree Lending 205
8.2.1 Investing in Both a Riskfree Asset and a Risky Asset 206
8.2.2 Investing in Both the Riskfree Asset and a Risky Portfolio 208
8.2.3 The Effect of Riskfree Lending on the Efficient Set 210
8.2.4 The Effect of Riskfree Lending on Portfolio Selection 211
8.3 Allowing for Riskfree Borrowing 211
8.3.1 Borrowing and Investing in a Risky Security 211
8.3.2 Borrowing and Investing in a Risky Portfolio 215
8.4 Allowing for Both Riskfree Borrowing and Lending 215
8.4.1 The Effect of Riskfree Borrowing and Lending on the Efficient Set 215
8.4.2 The Effect of Riskfree Borrowing and Lending on Portfolio Selection 217
8.5 Summary 218
Appendix A: Allowing for Different Borrowing and Lending Rates 221
Appendix B: Determining the Composition of the Investor's Optimal Portfolio O^* 223
Institutional Issues: The Cost of Short-Term Borrowing 218

9 The Capital Asset Pricing Model 227
9.1 Assumptions 227
9.2 The Capital Market Line 229
9.2.1 The Separation Theorem 229
9.2.2 The Market Portfolio 230
9.2.3 The Efficient Set 231
9.3 The Security Market Line 233
9.3.1 Implications for Individual Risky Assets 233
9.3.2 An Example 236

9.4 The Market Model 238
9.4.1 Market Indices 239
9.4.2 Market and Non-Market Risk 240
9.4.3 An Example 240
9.4.4 Motivation for the Partitioning of Risk 241
9.5 Summary 241
Appendix A: Some Extended Versions of the CAPM 245
A.1 Imposing Restrictions on Riskfree Borrowing 245
A.1.1 The Capital Market Line 245
A.1.2 The Security Market Line 246
A.2 Introducing Heterogeneous Expectations 247
A.3 Liquidity 248
Appendix B: A Derivation of the Security Market Line 250
Institutional Issues: The Elusive Market Portfolio 232

10 Factor Models 256
10.1 Factor Models and Return-Generating Processes 256
10.1.1 Factor Models 256
10.1.2 Application 257
10.2 One-Factor Models 257
10.2.1 An Example 258
10.2.2 Generalizing the Example 259
10.2.3 The Market Model 260
10.2.4 Two Important Features of One-Factor Models 260
10.3 Multiple-Factor Models 262
10.3.1 Two-Factor Models 262
10.3.2 Sector-Factor Models 266
10.3.3 Extending the Model 267
10.3.4 An Alternative 267
10.4 Estimating Factor Models 270
10.4.1 Time-Series Approaches 270
10.4.2 Cross-Sectional Approaches 271
10.4.3 Factor-Analytic Approaches 275
10.4.4 Limitations 275
10.5 Factor Models and Equilibrium 275
10.6 Summary 276
Institutional Issues: The Barra U.S. Equity Multiple-Factor Model 268

11 Arbitrage Pricing Theory 283
11.1 Factor Models 283
11.1.1 Principle of Arbitrage 284
11.1.2 Arbitrage Portfolios 284

11.1.3 The Investor's Position 286
11.2 Pricing Effects 286
11.2.1 A Graphical Illustration 287
11.2.2 Interpreting the APT Pricing Equation 288
11.3 Two-Factor Models 289
11.3.1 Arbitrage Portfolios 289
11.3.2 Pricing Effects 291
11.4 Multiple-Factor Models 291
11.5 A Synthesis of the APT and the CAPM 292
11.5.1 One-Factor Models 292
11.5.2 Multiple-Factor Models 295
11.6 Identifying the Factors 296
11.7 Summary 297
Institutional Issues: Applying Arbitrage Pricing Theory 294

12 Taxes and Inflation 305
12.1 Taxes in the United States 305
12.1.1 Corporate Income Taxes 306
12.1.2 Personal Income Taxes 309
12.1.3 Before-Tax Investing 319
12.2 Inflation in the United States 322
12.2.1 Measuring Inflation 322
12.2.2 Price Indices 323
12.3 Nominal and Real Returns 325
12.3.1 Nominal Returns 325
12.3.2 Fisher Model of Real Returns 325
12.3.3 The Effect of Investor Expectations 326
12.4 Interest Rates and Inflation 327
12.5 The Effect of Inflation on Borrowers and Lenders 327
12.6 Indexation 328
12.6.1 Government Bonds 328
12.6.2 Indexing Other Contracts 330
12.7 Stock Returns and Inflation 330
12.7.1 Long-Term Historical Relationships 330
12.7.2 Short-Term Historical Relationships 331
12.7.3 Relationships Involving Expected Inflation 331
12.8 Summary 333
Institutional Issues: Taxing Pension Funds 310
Institutional Issues: Adjusting Capital Gains Taxes for Inflation 320

13 Fixed-Income Securities 340
13.1 Savings Deposits 340
13.1.1 Commercial Banks 340
13.1.2 Other Types of Personal Savings Accounts 341

13.2 Money Market Instruments 343
13.2.1 Commercial Paper 343
13.2.2 Certificates of Deposit 343
13.2.3 Bankers' Acceptances 344
13.2.4 Eurodollars 345
13.2.5 Repurchase Agreements 345
13.3 U.S. Government Securities 345
13.3.1 U.S. Treasury Bills 348
13.3.2 U.S. Treasury Notes 350
13.3.3 U.S. Treasury Bonds 351
13.3.4 U.S. Savings Bonds 352
13.3.5 Zero-Coupon Treasury Security Receipts 353
13.4 Federal Agency Securities 354
13.4.1 Bonds of Federal Agencies 354
13.4.2 Bonds of Federally Sponsored Agencies 355
13.4.3 Participation Certificates 357
13.4.4 Collateralized Mortgage Obligations 358
13.5 State and Local Governmental Securities 360
13.5.1 Issuing Agencies 361
13.5.2 Types of Municipal Bonds 364
13.5.3 Tax Treatment 364
13.5.4 The Market for Municipal Bonds 365
13.5.5 Municipal Bond Insurance 366
13.6 Corporate Bonds 367
13.6.1 Tax Treatment 367
13.6.2 The Indenture 367
13.6.3 Types of Bonds 368
13.6.4 Call Provisions 369
13.6.5 Sinking Funds 370
13.6.6 Private Placements 370
13.6.7 Bankruptcy 370
13.6.8 Trading in Corporate Bonds 374
13.7 Foreign Bonds 376
13.8 Eurobonds 376
13.9 Preferred Stock 377
13.10 Summary 378
Institutional Issues: Collateralized Bond Obligations 362
Institutional Issues: Distressed Securities 372

14 Bond Analysis 386
14.1 Applying the Capitalization of Income Method to Bonds 386
14.1.1 Promised Yield-to-Maturity 387
14.1.2 Intrinsic Value 387

14.2 Bond Attributes 388
14.2.1 Coupon Rate and Length of Time Until Maturity 389
14.2.2 Call and Put Provisions 390
14.2.3 Tax Status 391
14.2.4 Marketability 392
14.2.5 Likelihood of Default 392
14.3 The Risk Structure of Interest Rates 402
14.4 Determinants of Yield Spreads 404
14.5 Financial Ratios as Predictors of Default 406
14.5.1 Univariate Methods 406
14.5.2 Multivariate Methods 407
14.5.3 Investment Implications 408
14.6 Summary 408
Institutional Issues: Taking Advantage of the Bond Rating Process 396
Institutional Issues: Matrix Bond Pricing 402

15 Bond Portfolio Management 417
15.1 Bond Market Efficiency 417
15.1.1 Price Behavior of Treasury Bills 418
15.1.2 Expert Predictions of Interest Rates 418
15.1.3 Price Reaction to Bond Rating Changes 419
15.1.4 Money Supply Announcements 419
15.1.5 Performance of Bond Portfolio Managers 420
15.1.6 Summary 420
15.2 Bond Pricing Theorems 421
15.3 Convexity 423
15.4 Duration 424
15.4.1 The Formula 425
15.4.2 Relationship to Bond Price Changes 426
15.4.3 Relationship Between Convexity and Duration 427
15.4.4 Changes in the Term Structure 428
15.5 Immunization 429
15.5.1 How Immunization Is Accomplished 429
15.5.2 Problems with Immunization 431
15.6 Active Management 433
15.6.1 Horizon Analysis 433
15.6.2 Bond Swaps 437
15.6.3 Contingent Immunization 438
15.6.4 Riding the Yield Curve 439
15.7 Passive Management 442
15.8 Bonds versus Stocks 443

15.9 Summary 444
Appendix: Empirical Regularities in the Bond Market 448
A.1 The January Effect 448
A.2 The Day-of-the-Week Effect 449
Institutional Issues: Surplus Management 434
Institutional Issues: Modified Duration and Key Rate Durations 440

16 Common Stocks 457
16.1 The Corporate Form 457
16.1.1 Stock Certificates 458
16.1.2 Voting 458
16.1.3 Proxy Fight 458
16.1.4 Takeovers 460
16.1.5 Ownership Versus Control 461
16.1.6 Stockholders' Equity 461
16.2 Cash Dividends 466
16.3 Stock Dividends and Stock Splits 467
16.3.1 Ex-Distribution Dates 467
16.3.2 Reasons for Stock Dividends and Splits 468
16.4 Preemptive Rights 469
16.5 Stock Quotations 471
16.5.1 Nasdaq 471
16.5.2 U.S. Stock Exchanges 471
16.5.3 Foreign Stock Exchanges 474
16.6 *Ex Ante* and *Ex Post* Values 474
16.7 Common Stocks Betas 474
16.8 Growth versus Value 480
16.8.1 Book-Value-to-Market-Value Ratio 480
16.8.2 Earnings-to-Price Ratio 481
16.8.3 Size 482
16.8.4 Interrelationships 482
16.9 Primary Markets 483
16.9.1 Private Placements 483
16.9.2 Public Sale 484
16.9.3 Underpricing of Ipo's 485
16.9.4 Seasoned Offerings 486
16.9.5 Shelf Registration 487
16.9.6 Rule 144A Securities 488
16.9.7 Secondary Distributions 489
16.10 Summary 492
Appendix A: Empirical Regularities in the Stock Market 496
A.1 Seasonality in Stock Returns 496
A.1.1 January Effect 497
A.1.2 Day-of-the-Week Effect 497

A.2 Interrelationship of Size and January Effects 499
A.3 International Evidence 501
A.3.1 Size Effect 501
A.3.2 January Effect 501
A.3.3 Day-of-the-Week Effect 502
A.3.4 Size and January Effects 502
A.4 Summary of Empirical Regularities 503
APPENDIX B: ADJUSTMENTS TO HISTORICAL COMMON STOCK BETAS 503
B.1 Leverage and Beta 506
B.2 Industry Beta Values 508
B.2.1 Forecasting Beta 508
B.2.2 Multiple-Industry Firms 509
B.2.3 Adjustments Based on Financial Characteristics 510
B.2.4 Example 511
B.3 Beta Services 511
INSTITUTIONAL ISSUES: CORPORATE GOVERNANCE 462
INSTITUTIONAL ISSUES: HOW FIRMS IN THE PEOPLE'S REPUBLIC OF CHINA RAISE FUNDS 490

17 THE VALUATION OF COMMON STOCKS 523
17.1 CAPITALIZATION OF INCOME METHOD OF VALUATION 523
17.1.1 Net Present Value 524
17.1.2 Internal Rate of Return 524
17.1.3 Application to Common Stocks 525
17.2 THE ZERO-GROWTH MODEL 526
17.2.1 Net Present Value 526
17.2.2 Internal Rate of Return 527
17.2.3 Application 527
17.3 THE CONSTANT-GROWTH MODEL 527
17.3.1 Net Present Value 528
17.3.2 Internal Rate of Return 529
17.3.3 Relationship to the Zero-Growth Model 529
17.4 THE MULTIPLE-GROWTH MODEL 529
17.4.1 Net Present Value 530
17.4.2 Internal Rate of Return 531
17.4.3 Relationship to the Constant-Growth Model 532
17.4.4 Two-Stage and Three-Stage Models 532
17.5 VALUATION BASED ON A FINITE HOLDING PERIOD 533
17.6 MODELS BASED ON PRICE-EARNINGS RATIOS 534
17.6.1 The Zero-Growth Model 536
17.6.2 The Constant-Growth Model 537
17.6.3 The Multiple-Growth Model 538

17.7 Sources of Earnings Growth 539
17.8 A Three-Stage DDM 542
17.8.1 Making Forecasts 542
17.8.2 Estimating the Intrinsic Value 545
17.8.3 Implied Returns 545
17.8.4 The Security Market Line 545
17.8.5 Required Returns and Alphas 546
17.8.6 The Implied Return on the Stock Market 547
17.9 Dividend Discount Models and Expected Returns 547
17.9.1 Rate of Convergence of Investors' Predictions 547
17.9.2 Predicted Versus Actual Returns 549
17.10 Summary 549
Institutional Issues: Applying Dividend Discount Models 542
Institutional Issues: Multiple Valuation Models 550

18 Earnings 559
18.1 Stock Valuation Based on Earnings 559
18.1.1 Earnings, Dividends, and Investment 560
18.1.2 Earnings Determine Market Value 563
18.2 Determinants of Dividends 564
18.2.1 Changes in Earnings and Dividends 564
18.2.2 The Lintner Model 565
18.2.3 Test Results 566
18.3 The Information Content of Dividends 567
18.3.1 Signaling 567
18.3.2 Dividend Initiations and Omissions 568
18.3.3 Dividends and Losses 569
18.4 Accounting Earnings Versus Economic Earnings 570
18.4.1 Accounting Earnings 570
18.4.2 Economic Earnings 570
18.5 Price-Earnings Ratios 572
18.5.1 The Historical Record 572
18.5.2 Permanent and Transitory Components of Earnings 573
18.6 Relative Growth Rates of Firms' Earnings 575
18.6.1 Earnings Growth Rates 576
18.6.2 Annual Earnings 577
18.6.3 Quarterly Earnings 577
18.7 Earnings Announcements and Price Changes 578
18.7.1 Deviations from Time-Series Models of Earnings 579
18.7.2 Unexpected Earnings and Abnormal Returns 582
18.7.3 Security Analysts' Forecasts of Future Earnings 582

18.7.4 Management Forecasts of Future Earnings 585
18.7.5 Sources of Errors in Forecasting 587
18.9 Summary 587
Institutional Issues: Consensus Earnings Expectations 588

19 Options 601
19.1 Types of Option Contracts 601
19.1.1 Call Options 601
19.1.2 Put Options 604
19.2 Option Trading 605
19.2.1 Trading Activity 605
19.2.2 Most Active Options 606
19.2.3 Trading on Exchanges 607
19.2.4 Commissions 609
19.3 Margin 609
19.4 Valuation of Options 610
19.4.1 Valuation at Expiration 610
19.4.2 Profits and Losses on Calls and Puts 611
19.4.3 Profits and Losses from Some Option Strategies 614
19.5 The Binomial Option Pricing Model 616
19.5.1 Call Options 616
19.5.2 Put Options 621
19.5.3 Put-Call Parity 622
19.6 The Black-Scholes Model for Call Options 623
19.6.1 The Formula 623
19.6.2 Comparison with the Binomial Option Pricing Model 625
19.6.3 Static Analysis 626
19.6.4 Estimating a Stock's Risk from Historical Prices 626
19.6.5 The Market Consensus of a Stock's Risk 627
19.6.6 More on Hedge Ratios 628
19.6.7 Limitations on Its Use 629
