

ROBERT WICHMANN  
CHRIS BROOKS

R GUIDE TO ACCOMPANY

INTRODUCTORY  
ECONOMETRICS  
FOR FINANCE

4TH EDITION

# Contents

<b>1</b>	<b>Introduction to R and RStudio</b>	<b>1</b>
1.1	What Are R and RStudio? . . . . .	1
1.2	What Does RStudio Look Like? . . . . .	1
<b>2</b>	<b>Getting Started</b>	<b>3</b>
2.1	Packages . . . . .	3
2.2	Importing Data . . . . .	3
2.3	Data Description . . . . .	5
2.4	Changing and Creating Data . . . . .	6
2.5	Graphics and Plots . . . . .	7
2.6	Keeping Track of Your Work . . . . .	8
<b>3</b>	<b>Linear Regression – Estimation of an Optimal Hedge Ratio</b>	<b>10</b>
<b>4</b>	<b>Hypothesis Testing – Example 1: Hedging Revisited</b>	<b>13</b>
<b>5</b>	<b>Hypothesis Testing – Example 2: The CAPM</b>	<b>15</b>
<b>6</b>	<b>Sample Output for Multiple Hypothesis Tests</b>	<b>19</b>
<b>7</b>	<b>Multiple Regression Using an APT-Style Model</b>	<b>20</b>
7.1	Stepwise Regression . . . . .	22
<b>8</b>	<b>Quantile Regression</b>	<b>25</b>
<b>9</b>	<b>Calculating Principal Components</b>	<b>28</b>
<b>10</b>	<b>Diagnostic Testing</b>	<b>30</b>
10.1	Testing for Heteroscedasticity . . . . .	30
10.2	Using White’s Modified Standard Error Estimates . . . . .	31
10.3	The Newey–West Procedure for Estimating Standard Errors . . . . .	32
10.4	Autocorrelation and Dynamic Models . . . . .	33
10.5	Testing for Non-Normality . . . . .	34
10.6	Dummy Variable Construction and Application . . . . .	35
10.7	Multicollinearity . . . . .	38
10.8	The RESET Test for Functional Form . . . . .	38
10.9	Stability Tests . . . . .	39
10.10	Recursive Estimation . . . . .	40
<b>11</b>	<b>Constructing ARMA Models</b>	<b>43</b>
11.1	Estimating Autocorrelation Coefficients . . . . .	43
11.2	Using Information Criteria to Decide on Model Orders . . . . .	44
<b>12</b>	<b>Forecasting Using ARMA Models</b>	<b>47</b>
<b>13</b>	<b>Estimating Exponential Smoothing Models</b>	<b>49</b>
<b>14</b>	<b>Simultaneous Equations Modelling</b>	<b>50</b>

<b>15 Vector Autoregressive (VAR) Models</b>	<b>54</b>
<b>16 Testing for Unit Roots</b>	<b>60</b>
<b>17 Cointegration Tests and Modelling Cointegrated Systems</b>	<b>62</b>
17.1 The Johansen Test for Cointegration . . . . .	64
<b>18 Volatility Modelling</b>	<b>69</b>
18.1 Estimating GARCH Models . . . . .	69
18.2 EGARCH and GJR Models . . . . .	70
18.3 GARCH-M Estimation . . . . .	72
18.4 Forecasting from GARCH Models . . . . .	74
18.5 Estimation of Multivariate GARCH Models . . . . .	75
<b>19 Modelling Seasonality in Financial Data</b>	<b>78</b>
19.1 Dummy Variables for Seasonality . . . . .	78
19.2 Estimating Markov Switching Models . . . . .	79
<b>20 Panel Data Models</b>	<b>82</b>
<b>21 Limited Dependent Variable Models</b>	<b>87</b>
<b>22 Simulation Methods</b>	<b>93</b>
22.1 Deriving Critical Values for a Dickey–Fuller Test Using Simulation . . . . .	93
22.2 Pricing Asian Options . . . . .	97
<b>23 Value at Risk</b>	<b>100</b>
23.1 Extreme Value Theory . . . . .	100
23.2 The Hill Estimator for Extreme Value Distributions . . . . .	101
23.3 VaR Estimation Using Bootstrapping . . . . .	102
<b>24 The Fama–MacBeth Procedure</b>	<b>105</b>
<b>References</b>	<b>108</b>
