
Thorsten Hens • Sabine Elmiger

Economic Foundations for Finance

From Main Street to Wall Street

 Springer

Contents

| | | |
|----------|---|----|
| 1 | Introduction | 1 |
| 2 | Financial Markets and Institutions | 5 |
| 3 | The Basic Economic Model | 11 |
| 3.1 | Definition of the Market Equilibrium | 11 |
| 3.2 | Basic Features of the Market Equilibrium | 13 |
| 3.3 | Production and Utility Function Properties and Implications | 15 |
| 3.4 | Technological Progress and Population Growth | 18 |
| 3.5 | Summary | 23 |
| 3.6 | Exercises | 23 |
| 4 | Extension of the Model to Capital | 25 |
| 4.1 | Market Equilibrium | 26 |
| 4.2 | Central Planner's Problem | 33 |
| 4.3 | Illustration of the Market Equilibrium | 34 |
| 4.4 | Cobb–Douglas Production Function and Logarithmic Utility | 37 |
| 4.4.1 | Effect of Population Growth | 40 |
| 4.4.2 | Effect of Technological Progress | 42 |
| 4.5 | Summary | 43 |
| 4.6 | Exercises | 44 |
| 5 | Extension of the Model to an Infinite Horizon | 47 |
| 5.1 | Intertemporal Market Equilibrium | 47 |
| 5.2 | Financial Capital and Payout Irrelevance | 54 |
| 5.3 | Illustration of the Market Equilibrium | 55 |
| 5.4 | Effect of Population Growth | 59 |
| 5.5 | Effect of Technological Progress | 63 |
| 5.6 | Income Inequality | 67 |
| 5.7 | Introduction of Stocks | 71 |
| 5.8 | A Special Case: The Gordon Growth Model | 74 |
| 5.9 | Return on Equity and Debt | 75 |
| 5.10 | Summary | 76 |
| 5.11 | Exercises | 77 |

| | | |
|----------|--|-----|
| 6 | Extension of the Model to Uncertainty | 79 |
| 6.1 | Uncertainty Structure | 79 |
| 6.2 | Concave Utility and Risk Aversion..... | 81 |
| 6.3 | Intertemporal Planner's Problem | 83 |
| 6.4 | Market Equilibrium | 85 |
| 6.4.1 | Household's Decision Problem | 85 |
| 6.4.2 | Firm's Decision Problem | 86 |
| 6.5 | Stochastic Discount Factor and Asset Prices | 88 |
| 6.5.1 | Capital Structure and Payout Irrelevance | 91 |
| 6.5.2 | Equity Premium from the Household's Perspective..... | 93 |
| 6.5.3 | Equity Premium from the Firm's Perspective | 97 |
| 6.5.4 | Stochastic Discount Factor from Market Returns | 101 |
| 6.5.5 | Capital Asset Pricing Model | 102 |
| 6.5.6 | Technological Progress and Population Growth | 104 |
| 6.6 | Summary | 107 |
| 6.7 | Exercises..... | 107 |
| 7 | Extension of the Model to Exhaustible Resources | 111 |
| 7.1 | Hotelling's Rule | 112 |
| 7.2 | Central Planner's Problem | 112 |
| 7.3 | Market Equilibrium | 116 |
| 7.4 | Cobb–Douglas Production Function and Logarithmic Utility | 120 |
| 7.4.1 | Sustainable Technological Progress | 121 |
| 7.4.2 | Technological Progress as a Growth Driver | 124 |
| 7.4.3 | Pricing Implications | 128 |
| 7.5 | Summary | 130 |
| 7.6 | Exercises..... | 131 |
| 8 | Aggregation | 133 |
| 8.1 | Complete Markets..... | 133 |
| 8.2 | Arbitrage and the Fundamental Theorem of Asset Pricing | 135 |
| 8.3 | Market Equilibrium with Multiple Agents..... | 136 |
| 8.4 | First Welfare Theorem | 140 |
| 8.5 | Aggregation of Households..... | 141 |
| 8.6 | Aggregation of Firms | 144 |
| 8.7 | Individual or Aggregate Rationality? | 147 |
| 9 | Conclusion | 149 |
| A | Mathematical Tools | 153 |
| A.1 | Notation | 153 |
| A.2 | Sequences and Series | 153 |
| A.3 | Functions | 154 |
| A.4 | Concave and Convex Functions | 154 |
| A.5 | Differences and Rates of Change..... | 156 |
| A.6 | First and Second Derivative | 156 |

| | | |
|----------|--|------------|
| A.7 | The Product Rule and Chain Rule | 157 |
| A.8 | Partial Derivatives | 157 |
| A.9 | Homogeneous Functions | 158 |
| A.10 | Constrained Optimization | 158 |
| A.11 | Envelope Theorem | 159 |
| A.12 | Expectation, Variance and Covariance | 160 |
| A.13 | Convex Sets | 161 |
| A.14 | Jensen's Inequality | 161 |
| A.15 | The Intercept Theorem | 162 |
| A.16 | Vectors and Matrices | 162 |
| A.17 | System of Linear Equations | 164 |
| B | Sufficiency of the First Order Conditions | 165 |
| C | Covariance of the SDF and Returns | 169 |
| | References | 173 |
| | Index | 177 |
