BRIEF CONTENTS

CHAPTER 1 Statistics and Data *2*

CHAPTER 2 Tabular and Graphical Methods *18*

CHAPTER 3 Numerical Descriptive Measures *60*

CHAPTER 4 Introduction to Probability *104*

CHAPTER 5 Discrete Probability Distributions *144*

CHAPTER 6 Continuous Probability Distributions *182*

CHAPTER 7 Sampling and Sampling Distributions *218*

CHAPTER 8 Interval Estimation *258*

CHAPTER 9 Hypothesis Testing *292*

CHAPTER 10 Comparisons Involving Means *328*

CHAPTER 11 Comparisons Involving Proportions *370*

CHAPTER 12 Basics of Regression Analysis *402*

CHAPTER 13 More on Regression Analysis *456*

APPENDIXES

APPENDIX A Tables *510*

APPENDIX B Answers to Selected Even-Numbered Exercises *520*

Glossary *537*

Index *I-1*

CONTENTS

CHAPTER 1

STATISTICS AND DATA 2

1.1 **The Relevance of Statistics** 4

1.2 **What is Statistics?** 5
The Need for Sampling 6
Cross-Sectional and Time Series Data 6
Structured and Unstructured Data 7
Big Data 8
Data on the Web 8

1.3 **Variables and Scales of Measurement** 10
The Nominal Scale 11
The Ordinal Scale 12
The Interval Scale 13
The Ratio Scale 14
Synopsis of Introductory Case 15

Conceptual Review 16

CHAPTER 2

TABULAR AND GRAPHICAL METHODS 18

2.1 **Summarizing Qualitative Data** 20
Pie Charts and Bar Charts 21
Cautionary Comments When Constructing or Interpreting Charts or Graphs 24
Using Excel to Construct a Pie Chart and a Bar Chart 24
A Pie Chart 24
A Bar Chart 25

2.2 **Summarizing Quantitative Data** 27
Guidelines for Constructing a Frequency Distribution 28
Synopsis Of Introductory Case 32
Histograms, Polygons, and Ogives 32
Using Excel to Construct a Histogram, a Polygon, and an Ogive 36
A Histogram Constructed from Raw Data 36
A Histogram Constructed from a Frequency Distribution 37
A Polygon 38
An Ogive 38

2.3 **Stem-and-Leaf Diagrams** 42

2.4 **Scatterplots** 44
Using Excel to Construct a Scatterplot 46
Writing with Statistics 47
Conceptual Review 49

Additional Exercises And Case Studies 50
Exercises 50
Case Studies 53

Appendix 2.1 **Guidelines for Other Software Packages** 55

CHAPTER 3

NUMERICAL DESCRIPTIVE MEASURES 60

3.1 **Measures of Central Location** 62
The Mean 62
The Median 64
The Mode 65
The Weighted Mean 66
Using Excel to Calculate Measures of Central Location 67
Using Excel's Function Option 67
Using Excel's Data Analysis Toolpak Option 68
Note on Symmetry 69

3.2 **Percentiles and Boxplots** 71
Calculating the *p*th Percentile 72
Note on Calculating Percentiles 73
Constructing and Interpreting a Boxplot 73

3.3 **Measures of Dispersion** 76
Range 76
The Mean Absolute Deviation 77
The Variance and the Standard Deviation 78
The Coefficient of Variation 79
Using Excel to Calculate Measures of Dispersion 80
Using Excel's Function Option 80
Using Excel's Data Analysis Toolpak Option 80

3.4 **Mean-Variance Analysis and the Sharpe Ratio** 81
Synopsis of Introductory Case 83

3.5 **Analysis of Relative Location** 84
Chebyshev's Theorem 85
The Empirical Rule 85
z-Scores 86

3.6 **Summarizing Grouped Data** 89

3.7 **Measures of Association** 92
Using Excel to Calculate Measures of Association 94
Writing with Statistics 95
Conceptual Review 97

Additional Exercises and Case Studies 98
Exercises 98
Case Studies 101

Appendix 3.1: **Guidelines for Other Software Packages** 102

CHAPTER 4

INTRODUCTION TO PROBABILITY 104

4.1 **Fundamental Probability Concepts** 106
Events 107
Assigning Probabilities 109

4.2 Rules of Probability *113*
The Complement Rule *113*
The Addition Rule *114*
The Addition Rule for Mutually Exclusive Events *115*
Conditional Probability *116*
Independent and Dependent Events *118*
The Multiplication Rule *119*
The Multiplication Rule for Independent Events *119*

4.3 Contingency Tables and Probabilities *123*
A Note on Independence *126*
Synopsis of Introductory Case *126*

4.4 The Total Probability Rule and Bayes' Theorem *128*
The Total Probability Rule *128*
Bayes' Theorem *131*
Writing With Statistics *135*
Conceptual Review *137*

Additional Exercises and Case Studies *138*
Exercises 138
Case Studies *142*

CHAPTER 5

DISCRETE PROBABILITY DISTRIBUTIONS *144*

5.1 Random Variables and Discrete Probability Distributions *146*
The Discrete Probability Distribution *147*

5.2 Expected Value, Variance, and Standard Deviation *151*
Expected Value *152*
Variance and Standard Deviation *152*
Risk Neutrality and Risk Aversion *153*

5.3 The Binomial Distribution *156*
Using Excel to Obtain Binomial Probabilities *161*

5.4 The Poisson Distribution *164*
Synopsis of Introductory Case *167*
Using Excel to Obtain Poisson Probabilities *167*

5.5 The Hypergeometric Distribution *169*
Using Excel to Obtain Hypergeometric Probabilities *171*
Writing with Statistics *173*
Conceptual Review *175*

Additional Exercises and Case Studies *176*
Exercises 176
Case Studies *178*

Appendix 5.1: Guidelines for Other Software Packages *179*

CHAPTER 6

CONTINUOUS PROBABILITY DISTRIBUTIONS *182*

6.1 Continuous Random Variables and the Uniform Distribution *184*
The Continuous Uniform Distribution *185*

6.2 The Normal Distribution *188*
Characteristics of the Normal Distribution *189*
The Standard Normal Distribution *190*
Finding a Probability for a Given *z* Value *191*
Finding a *z* Value for a Given Probability *193*
The Transformation of Normal Random Variables *195*
Synopsis of Introductory Case *199*
A Note on the Normal Approximation of the Binomial Distribution *199*
Using Excel for the Normal Distribution *199*

6.3 The Exponential Distribution *204*
Using Excel for the Exponential Distribution *207*
Writing with Statistics *209*
Conceptual Review *210*

Additional Exercises and Case Studies *211*
Exercises 211
Case Studies *214*

Appendix 6.1: Guidelines for Other Software Packages *215*

CHAPTER 7

SAMPLING AND SAMPLING DISTRIBUTIONS *218*

7.1 Sampling *220*
Classic Case of a "Bad" Sample: The *Literary Digest* Debacle of 1936 *220*
Trump's Stunning Victory in 2016 *221*
Sampling Methods *222*
Using Excel to Generate a Simple Random Sample *224*

7.2 The Sampling Distribution of the Sample Mean *225*
The Expected Value and the Standard Error of the Sample Mean *226*
Sampling from a Normal Population *227*
The Central Limit Theorem *228*

7.3 The Sampling Distribution of the Sample Proportion *232*
The Expected Value and the Standard Error of the Sample Proportion *232*
Synopsis of Introductory Case *236*

7.4 The Finite Population Correction Factor *237*

7.5 Statistical Quality Control *240*
Control Charts *241*
Using Excel to Create a Control Chart *244*
Writing with Statistics *247*
Conceptual Review *248*
Additional Exercises and Case Studies *250*
Exercises 250
Case Studies *252*

Appendix 7.1: Derivation of the Mean and the Variance for $\overline{X}$ and $\overline{P}$ *253*

Appendix 7.2: Properties of Point Estimators *254*

Appendix 7.3: Guidelines for Other Software Packages *255*

CHAPTER 8

INTERVAL ESTIMATION *258*

8.1 Confidence Interval for the Population Mean when σ is Known *260*
Constructing a Confidence Interval for μ When σ Is Known *261*
The Width of a Confidence Interval *263*
Using Excel to Construct a Confidence Interval for μ When σ Is Known *265*

8.2 **Confidence Interval for the Population Mean When σ is Unknown** *268*
The *t* Distribution *268*
Summary of the t_{df} Distribution *268*
Locating t_{df} Values and Probabilities *269*
Constructing a Confidence Interval for μ When σ Is Unknown *270*
Using Excel to Construct a Confidence Interval for μ When σ Is Unknown *271*

8.3 **Confidence Interval for the Population Proportion** *275*

8.4 **Selecting the Required Sample Size** *278*
Selecting *n* to Estimate μ *279*
Selecting *n* to Estimate *p* *280*
Synopsis of Introductory Case *281*
Writing with Statistics *282*
Conceptual Review *284*

Additional Exercises and Case Studies *285*
Exercises 285
Case Studies *288*

Appendix 8.1: Guidelines for Other Software Packages *290*

CHAPTER 9

HYPOTHESIS TESTING *292*

9.1 **Introduction to Hypothesis Testing** *294*
The Decision to "Reject" or "Not Reject" the Null Hypothesis *294*
Defining the Null and the Alternative Hypotheses *295*
Type I and Type II Errors *297*

9.2 **Hypothesis Test for the Population Mean When σ is Known** *300*
The *p*-Value Approach *300*
Confidence Intervals and Two-Tailed Hypothesis Tests *304*
Using Excel to Test μ When σ Is Known *305*
One Last Remark *306*

9.3 **Hypothesis Test for the Population Mean When σ is Unknown** *308*
Using Excel to Test μ When σ is Unknown *309*
Synopsis of Introductory Case *310*

9.4 **Hypothesis Test for the Population Proportion** *313*
Writing with Statistics *317*
Conceptual Review *318*

Additional Exercises and Case Studies *320*
Exercises 320
Case Studies *322*

Appendix 9.1: The Critical Value Approach *324*

Appendix 9.2: Guidelines for Other Software Packages *326*

CHAPTER 10

COMPARISONS INVOLVING MEANS *328*

10.1 **Inference Concerning the Difference Between Two Means** *330*
Confidence Interval for $\mu_1 - \mu_2$ *330*
Hypothesis Test for $\mu_1 - \mu_2$ *332*
Using Excel for Testing Hypotheses about $\mu_1 - \mu_2$ *334*

10.2 **Inference Concerning Mean Differences** *340*
Recognizing a Matched-Pairs Experiment *341*
Confidence Interval for μ_D *341*
Hypothesis Test for μ_D *342*
Using Excel for Testing Hypotheses about μ_D *344*
Synopsis of Introductory Case *345*

10.3 **Inference Concerning Differences Among Many Means** *349*
The *F* Distribution *349*
Finding $F_{(df_1,df_2)}$ Values and Probabilities *349*
One-Way ANOVA Test *350*
Between-Treatments Estimate of σ^2: *MSTR* *352*
Within-Treatments Estimate of σ^2: *MSE* *353*
The One-Way ANOVA Table *355*
Using Excel to Construct a One-Way ANOVA Table *355*
Writing with Statistics *359*
Conceptual Review *360*

Additional Exercises and Case Studies *362*
Exercises 362
Case Studies *366*

Appendix 10.1: Guidelines for Other Software Packages *367*

CHAPTER 11

COMPARISONS INVOLVING PROPORTIONS *370*

11.1 **Inference Concerning the Difference Between Two Proportions** *372*
Confidence Interval for $p_1 - p_2$ *372*
Hypothesis Test for $p_1 - p_2$ *373*

11.2 **Goodness-Of-Fit Test for a Multinomial Experiment** *378*
The χ^2 Distribution *378*
Finding χ^2_{df} Values and Probabilities *379*

11.3 **Chi-Square Test For Independence** *385*
Calculating Expected Frequencies *386*
Synopsis of Introductory Case *389*
Writing with Statistics *392*
Conceptual Review *393*

Additional Exercises and Case Studies *394*
Exercises 394
Case Studies *398*

Appendix 11.1: Guidelines for Other Software Packages *399*

CHAPTER 12

BASICS OF REGRESSION ANALYSIS *402*

12.1 **The Simple Linear Regression Model** *404*
Determining the Sample Regression Equation *406*
Using Excel *408*
Constructing a Scatterplot with Trendline *408*
Estimating a Simple Linear Regression Model *408*

12.2 **The Multiple Linear Regression Model** *411*
Using Excel to Estimate a Multiple Linear Regression Model *413*

12.3 **Goodness-of-Fit Measures** *416*
The Standard Error of the Estimate *416*
The Coefficient of Determination, R^2 *417*
The Adjusted R^2 *419*

12.4 **Tests of Significance** *422*
Tests of Individual Significance *422*
A Test for a Nonzero Slope Coefficient *425*
Test of Joint Significance *427*
Reporting Regression Results *429*
Synopsis of Introductory Case *429*

12.5 Model Assumptions and Common Violations 433
Common Violation 1: Nonlinear Patterns *435*
Detection *435*
Remedy *436*
Common Violation 2: Multicollinearity *436*
Detection *437*
Remedy *438*
Common Violation 3: Changing Variability *438*
Detection *438*
Remedy *439*
Common Violation 4: Correlated Observations *440*
Detection *440*
Remedy *441*
Common Violation 5: Excluded Variables *441*
Remedy *441*
Summary *441*
Using Excel to Construct Residual Plots *442*
Writing with Statistics *444*
Conceptual Review *446*
Additional Exercises and Case Studies *448*
Case Studies *451*
Appendix 12.1: Guidelines for Other Software Packages *453*

CHAPTER 13

MORE ON REGRESSION ANALYSIS *456*

13.1 Dummy Variables *458*
A Qualitative Explanatory Variable with Two Categories *458*
A Qualitative Explanatory Variable with Multiple Categories *461*
13.2 Interactions with Dummy Variables 467
Synopsis of Introductory Case *471*
13.3 Regression Models for Nonlinear Relationships *473*
Quadratic Regression Models *473*
Regression Models with Logarithms *478*
The Log-Log Model *478*
The Logarithmic Model *479*
The Exponential Model *480*
13.4 Trend Forecasting Models *487*
The Linear and the Exponential Trend *487*
Polynomial Trends *490*
13.5 Forecasting with Trend and Seasonality *495*
Seasonal Dummy Variables *495*
Writing with Statistics *499*
Conceptual Review *501*
Additional Exercises and Case Studies *503*
Case Studies *507*

APPENDIXES

APPENDIX A Tables *510*
APPENDIX B Answers to Selected Even-Numbered Exercises *520*

Glossary *537*
Index *I-1*
