
Giancarlo Gandolfo

International Finance and Open-Economy Macroeconomics

Second Edition

With Contributions by Daniela Federici

 Springer

Contents

Part I Introduction

1 International Finance and International Macroeconomics:	
An Overview	3
1.1 Globalization	5
1.2 Old and New Approaches to International Finance	6
1.3 Structure of the Book	7
1.4 Small and Large Open Economies	8
References	9

Part II The Basics

2 The Foreign Exchange Market	13
2.1 Introduction	13
2.2 The Spot Exchange Market	15
2.3 The Real Exchange Rate	18
2.4 The Effective Exchange Rate	21
2.5 The Forward Exchange Market	22
2.5.1 Introduction	22
2.5.2 Various Covering Alternatives: Forward Premium and Discount	23
2.6 The Transactors in the Foreign Exchange Market	27
2.6.1 Speculators	27
2.6.2 Non-Speculators	28
2.6.3 Monetary Authorities	29
2.7 Derivatives	29
2.7.1 Futures	29
2.7.2 Options	30
2.7.3 Swap Transactions	31
2.7.4 Credit Derivatives	33
2.8 Eurodollars and Xeno-Currencies	34
2.9 Appendix	35
2.9.1 N-Point Arbitrage	35
References	37

3	Exchange-Rate Regimes	39
3.1	The Two Extremes, and Intermediate Regimes	39
3.2	The Bretton Woods System	43
3.2.1	The Monetary Authorities' Intervention	44
3.3	The Current Nonsystem	46
3.4	International Organisations	47
3.4.1	The IMF	47
3.4.2	The World Bank	50
	References	51
4	International Interest-Rate Parity Conditions	53
4.1	Covered Interest Arbitrage, and Covered Interest Parity (CIP)	53
4.2	Uncovered Interest Parity (UIP)	56
4.3	Uncovered Interest Parity with Risk Premium	57
4.4	Real Interest Parity	58
4.5	Efficiency of the Foreign Exchange Market	59
4.6	Perfect Capital Mobility, Perfect Asset Substitutability, and Interest Parity Conditions	60
4.7	Appendix	62
4.7.1	Rational Expectations and Efficiency of the Foreign Exchange Market	62
4.7.2	The Peso Problem	63
4.7.3	The Siegel Paradox	64
	References	65
5	The Balance of Payments	67
5.1	Balance-of-Payments Accounting and Presentation	67
5.1.1	Introduction	67
5.1.2	Accounting Principles	70
5.1.3	Standard Components	73
5.1.4	Capital Account	76
5.1.5	Financial Account	76
5.2	The Meaning of Surplus, Deficit, and Equilibrium in the Balance of Payments	80
	References	83
6	Real and Financial Flows in an Open Economy	85
6.1	Introduction	85
6.2	The Row Identities	87
6.3	The Column Identities	89
6.4	Derived Identities	91
6.5	Identities Are Only Identities	93

Part III Flow Approaches

7	The Elasticity Approach	97
7.1	Introduction	97
7.2	Critical Elasticities and the So-Called Marshall-Lerner Condition	98
7.2.1	The Balance of Payments in Domestic Currency	99
7.2.2	The Balance of Payments in Foreign Currency	101
7.2.3	Elasticity Optimism vs Pessimism	102
7.3	Foreign Exchange Market Equilibrium and Stability	102
7.3.1	Derivation of the Demand and Supply Schedules: Multiple Equilibria and Stability	103
7.4	Interrelations Between the Spot and Forward Exchange Rate	106
7.4.1	The Various Excess Demand Schedules	107
7.4.2	Forward Market Equilibrium and the Spot Rate	110
7.4.3	The Monetary Authorities' Intervention	111
7.5	Appendix	113
7.5.1	The Critical Elasticities Condition	113
7.5.2	The Stability of the Foreign Exchange Market	121
7.5.3	A Model for the Simultaneous Determination of the Spot and Forward Exchange Rate	122
	References	125
8	The Multiplier Approach	127
8.1	The Basic Model	128
8.2	Balance-of-Payments Adjustment in the Case of an Exogenous Increase in Exports	131
8.3	Balance-of-Payments Adjustment in the Case of an Exogenous Increase in Imports	134
8.4	Intermediate Goods and the Multiplier	136
8.5	The Empirical Relevance of the Multiplier	137
8.6	The Transfer Problem	137
8.6.1	The Classical Theory	139
8.6.2	The Multiplier Theory	140
8.6.3	Observations and Qualifications	142
8.7	Appendix	143
8.7.1	The Multiplier Without Foreign Repercussions	143
8.7.2	Foreign Repercussions in a n -Country Model	146
8.7.3	Intermediate Goods and the Multiplier	153
8.7.4	The Transfer Problem	156
	References	158

9	An Integrated Approach	161
9.1	Interaction Between Exchange Rate and Income in the Adjustment Process	161
9.1.1	A Graphic Representation	163
9.1.2	Stability	166
9.1.3	Comparative Statics and the Transfer Problem	168
9.2	The J-Curve	169
9.3	The S-Curve	171
9.4	The Alleged Insulating Power of Flexible Exchange Rates, and the International Propagation of Disturbances	172
9.5	Appendix	174
9.5.1	A Simplified Version of the Laursen and Metzler Model	174
9.5.2	The <i>BB</i> and <i>RR</i> Schedules	174
9.5.3	The J-Curve	178
9.5.4	The Original Two-Country Version of the Laursen and Metzler Model	182
	References	190
10	The Mundell-Fleming Model	191
10.1	Introductory Remarks	191
10.2	Fixed Exchange Rates	192
10.2.1	Graphic Representation of the Equilibrium Conditions	193
10.2.2	Simultaneous Real, Monetary and External Equilibrium: Stability	197
10.2.3	Comparative Statics	204
10.3	Flexible Exchange Rates	208
10.4	Appendix	211
10.4.1	The Mundell-Fleming Model Under Fixed Exchange Rates	211
10.4.2	The Mundell-Fleming Model Under Flexible Exchange Rates	216
	References	220
11	Policy Implications of the Mundell-Fleming Model, and the Assignment Problem	221
11.1	Introduction	221
11.2	Internal and External Balance, and the Assignment Problem	223
11.2.1	The Assignment Problem	224
11.2.2	Observations and Qualifications	226
11.3	Flexible Exchange Rates	229
11.4	Perfect Capital Mobility	231
11.5	Appendix	233
11.5.1	Monetary and Fiscal Policy Under Fixed Exchange Rates	233

11.5.2	Monetary and Fiscal Policy Under Flexible Exchange Rates.....	238
11.5.3	Perfect Capital Mobility	240
	References.....	242
Part IV Stock and Stock-Flow Approaches		
12	The Monetary Approach to the Balance of Payments and Related Approaches	245
12.1	Introduction	245
12.2	The Classical (Humean) Price-Specie-Flow Mechanism	245
12.3	The Monetary Approach to the Balance of Payments.....	247
12.3.1	The Basic Propositions and Implications	248
12.3.2	A Simple Model.....	251
12.3.3	Does a Devaluation Help?	252
12.3.4	Concluding Remarks	253
12.4	The New Cambridge School of Economic Policy	254
12.5	Appendix	257
12.5.1	The Classical Theory.....	257
12.5.2	The Monetary Approach to the Balance of Payments ...	259
	References.....	264
13	Portfolio and Macroeconomic Equilibrium in an Open Economy ...	265
13.1	Introduction	265
13.2	Asset Stock Adjustment in a Partial Equilibrium Framework ...	266
13.3	Portfolio and Macroeconomic Equilibrium Under Fixed Exchange Rates	270
13.3.1	Introductory Remarks	270
13.3.2	A Simple Model.....	271
13.3.3	Momentary and Long-Run Equilibrium.....	274
13.4	Portfolio and Macroeconomic Equilibrium under Flexible Exchange Rates	277
13.4.1	Introductory Remarks	277
13.4.2	The Basic Model	279
13.4.3	Static Expectations	283
13.4.4	Rational Expectations and Overshooting	286
13.5	Appendix	289
13.5.1	Partial-Equilibrium Asset Adjustment	289
13.5.2	Portfolio and Macroeconomic Equilibrium Under Fixed Exchange Rates	291
13.5.3	Portfolio and Macroeconomic Equilibrium Under Flexible Exchange Rates	298
	References.....	310
14	Growth in an Open Economy	311
14.1	Export-Led Growth	312
14.1.1	The Lamfalussy Model	312

14.1.2	The Beckerman Model	313
14.2	Growth and the Balance of Payments	315
14.3	Balance-of-Payments Constrained Growth (Thirlwall)	317
14.3.1	Extensions	319
14.4	Appendix	323
14.4.1	Exports, Growth, and the Balance of Payments	323
14.4.2	Dynamic Stability of Thirlwall's Model	325
	References	327

Part V The Exchange Rate

15	Exchange-Rate Determination	333
15.1	The Purchasing-Power-Parity Theory	333
15.1.1	The Harrod-Balassa-Samuelson Model	335
15.2	The Traditional Flow Approach	336
15.3	The Modern Approach: Money and Assets in Exchange-Rate Determination	336
15.3.1	The Monetary Approach	337
15.3.2	Sticky Prices, Rational Expectations, and Overshooting of the Exchange-Rate	339
15.3.3	The Portfolio Approach	342
15.4	The Exchange Rate in Macroeconometric Models	346
15.5	Exchange-Rate Determination: Empirical Studies	349
15.5.1	Introduction	349
15.5.2	The Reactions to Meese and Rogoff, and the Way Out	351
15.5.3	An Economy-Wide Model Beats the Random Walk	352
15.5.4	The Exchange Rate in Experimental Economics	353
15.6	Equilibrium Exchange Rates: BEERs, DEERs, FEERs and All That	354
15.7	Chaos Theory and the Exchange Rate	355
15.8	Appendix	357
15.8.1	PPP and the Harrod-Balassa-Samuelson Effect	357
15.8.2	The Dornbusch Overshooting Model	358
15.8.3	The Modern Approach to Exchange-Rate Determination	359
15.8.4	Chaos Theory and the Exchange Rate	368
	References	380
16	Capital Movements, Speculation, and Currency Crises	385
16.1	Long-Term Capital Movements	385
16.2	Short-Term Capital Movements and Foreign Exchange Speculation	388
16.2.1	Flexible Exchange Rates and Speculation	390
16.3	Speculative Attacks, Currency Crises, and Contagion	392
16.3.1	A First Generation Model	393

16.3.2	A Second Generation Model.....	396
16.3.3	Third Generation Models	399
16.3.4	Towards Fourth Generation Models?.....	404
16.3.5	The Indicators Approach: Can Crises Be Forecast?	405
16.3.6	Contagion.....	408
16.4	Appendix	414
16.4.1	A First-Generation Model	414
16.4.2	A Second-Generation Model	416
16.4.3	Krugman's Third Generation Model: The Stabilization Dilemma	417
	References.....	418
17	Fixed Vs Flexible Exchange Rates	423
17.1	The Traditional Arguments.....	423
17.2	The Modern View	426
17.2.1	Money Demand Shock.....	427
17.2.2	Aggregate Demand Shock	427
17.2.3	Aggregate Supply Shock.....	427
17.2.4	Conclusion.....	429
17.3	The Experience of the Managed Float	429
17.3.1	Introduction.....	429
17.3.2	New Light on an Old Debate?	431
17.4	Exchange-Rate Pass-Through	435
17.4.1	The Vicious Circle Depreciation-Inflation	438
17.5	Appendix	441
17.5.1	The Shock-Insulating Properties of Fixed and Flexible Exchange Rates	441
17.5.2	The Effects of Various Shocks.....	443
17.5.3	The Intertemporal Approach.....	449
17.5.4	The Simple Dynamics of the Depreciation-Inflation Circle	449
	References.....	451

Part VI The Intertemporal Approach

18	The Intertemporal Approach to the Balance of Payments, and the Real Exchange Rate.....	457
18.1	Introduction: The Absorption Approach.....	457
18.2	Intertemporal Decisions, the Current Account, and Capital Flows	460
18.2.1	The Feldstein-Horioka Puzzle	463
18.2.2	The Harberger-Laursen-Metzler Effect Again	464
18.3	Intertemporal Approaches to the Real Exchange Rate	465
18.3.1	Introduction.....	465
18.3.2	The RAIOM Approach	465
18.3.3	The NATREX Approach: An Overview	468

18.3.4	A More Technical Presentation	470
18.4	Appendix	476
18.4.1	The Two-Period Case	476
18.4.2	The Harberger-Laursen-Metzler Effect	478
18.4.3	An Infinite Horizon Model	480
18.4.4	The RAIOM Approach to the Real Exchange Rate	483
18.4.5	The NATREX Approach	486
	References	494
19	Other Applications	497
19.1	Introduction	497
19.2	An Intertemporal Model with Endogenous Growth in an Open Economy	497
19.2.1	The Net Borrower Economy	501
19.3	Nominal Rigidities	502
19.3.1	Extensions	506
19.4	Appendix	507
19.4.1	The Dynamic Optimization Problem	507
19.4.2	The Net Borrower Nation	511
19.4.3	Nominal Rigidities	515
	References	525
 Part VII International Monetary Integration		
20	International Monetary Integration	529
20.1	Introduction	529
20.2	The Theory of Optimum Currency Areas	530
20.2.1	The Traditional (or “Criteria”) Approach	531
20.2.2	The Cost-Benefit Approach	533
20.2.3	The New Theory	536
20.2.4	Optimum for Whom?	538
20.3	The Common Monetary Unit and the Basket Currency	538
20.4	The Common Monetary Policy, the Inconsistent Triad, and Fiscal Policy	540
20.4.1	Fiscal Policy Coordination	542
20.5	The Single-Currency Problem	544
20.6	Appendix	547
20.6.1	Fiscal Policy in a Monetary Union	547
20.6.2	Fiscal Coordination	552
	References	553
21	The European Monetary Union	557
21.1	The European Monetary System	557
21.1.1	The EMS and the Theory of Optimum Currency Areas	559
21.2	The Maastricht Treaty and the Gradual Approach to EMU	561

21.2.1	Further Developments	563
21.2.2	Fiscal Governance	567
21.3	The Institutional Aspects	568
21.4	The Maastricht Criteria	570
21.5	The New Theory of Optimum Currency Areas and EMU	573
21.6	The Euro and the Dollar	576
21.6.1	The International Role of a Currency	578
References	579
Part VIII Problems of the International Monetary (Non)System		
22	Key Events in the Postwar International Monetary System	585
22.1	Introductory Remarks	585
22.2	Convertibility	587
22.3	Eurodollars	588
22.4	Special Drawing Rights	588
22.5	Collapse of Bretton Woods	591
22.6	Petrodollars	594
22.7	Demonetization of Gold	594
22.8	EMS and EMU	597
22.9	The International Debt Crisis	597
22.10	The Asian Crisis	598
References	599
23	International Liquidity, the Demand for International Reserves, and Xeno-Markets	601
23.1	Introductory Remarks	601
23.2	The Descriptive Approach	602
23.3	The Optimizing Approach	604
23.4	Is International Liquidity Still a Problem?	606
23.4.1	Some Facts and Puzzles	606
23.5	The Composition of International Reserves	609
23.6	The Analysis of Euro-Markets	611
23.6.1	The Fixed-Multiplier Approach	611
23.6.2	The Portfolio Approach to Euro-Markets	612
23.7	An Evaluation of the Costs and Benefits of Xeno-Markets	614
23.8	Appendix	616
23.8.1	The Maximization of a Welfare Function	616
23.8.2	Intertemporal Maximization and the Normative Theory of Economic Policy	619
23.8.3	The Composition of International Reserves	624
23.8.4	A Portfolio Model of the Euro-Market	626
References	630

24	Current Problems	635
24.1	Introduction	635
24.2	International Policy Coordination	636
24.2.1	Policy Optimization, Game Theory, and International Coordination	636
24.2.2	The Problem of the Reference Model and the Obstacles to Coordination.....	639
24.3	The Debt Problem.....	642
24.3.1	NATREX Model of External Debt and Real Exchange Rate.....	643
24.4	The Subprime Crisis	645
24.5	Proposals for the International Management of Exchange Rates	648
24.5.1	Introduction.....	648
24.5.2	McKinnon's Global Monetary Objective	649
24.5.3	John Williamson's Target Zones.....	650
24.5.4	The Tobin Tax	651
24.6	Appendix	653
24.6.1	International Policy Coordination	653
24.6.2	Target Zones	655
24.6.3	The Tobin Tax	657
	References.....	663
	Index	667
