Contents

List of figures	xv
List of tables	xviii
Preface	xix
1 Research: a way of thinking	1
<i>Research: an integral part of your practice</i>	1
<i>Research: a way to gather evidence for your practice</i>	4
<i>Applications of research</i>	4
<i>Research: what does it mean?</i>	5
<i>The research process: characteristics and requirements</i>	8
<i>Types of research</i>	9
Types of research: application perspective	10
Types of research: objectives perspective	10
Types of research: mode of enquiry perspective	11
<i>Paradigms of research</i>	14
<i>Summary</i>	15
2 The research process: a quick glance	17
<i>The research process: an eight-step model</i>	18
<i>Phase I: deciding what to research</i>	23
Step I: formulating a research problem	23
<i>Phase II : planning a research study</i>	23
Step II: conceptualising a research design	23
Step III: constructing an instrument for data collection	24
Step IV: selecting a sample	25
Step V: writing a research proposal	25
<i>Phase III: conducting a research study</i>	26
Step VI: collecting data	26
Step VII: processing and displaying data	26
Step VIII: writing a research report	27
<i>Summary</i>	27

STEP I FORMULATING A RESEARCH PROBLEM	29
3 Reviewing the literature	31
<i>The place of the literature review in research</i>	31
Bringing clarity and focus to your research problem	32
Improving your research methodology	32
Broadening your knowledge base in your research area	33
Enabling you to contextualise your findings	33
<i>How to review the literature</i>	33
Searching for the existing literature	34
Reviewing the selected literature	37
Developing a theoretical framework	38
Developing a conceptual framework	40
<i>Writing about the literature reviewed</i>	40
<i>Summary</i>	42
4 Formulating a research problem	43
<i>The research problem</i>	44
<i>The importance of formulating a research problem</i>	44
<i>Sources of research problems</i>	45
<i>Considerations in selecting a research problem</i>	47
<i>Steps in formulating a research problem</i>	48
<i>The formulation of research objectives</i>	50
<i>The study population</i>	55
<i>Establishing operational definitions</i>	55
<i>Formulating a research problem in qualitative research</i>	57
<i>Summary</i>	58
5 Identifying variables	61
<i>What is a variable?</i>	62
<i>The difference between a concept and a variable</i>	63
<i>Converting concepts into variables</i>	64
<i>Types of variable</i>	66
From the viewpoint of causal relationship	66
From the viewpoint of the study design	71
From the viewpoint of the unit of measurement	72
<i>Types of measurement scale</i>	73
The nominal or classificatory scale	76
The ordinal or ranking scale	76
The interval scale	77
The ratio scale	77
<i>Summary</i>	78

6	Constructing hypotheses	81
	<i>The definition of a hypothesis</i>	81
	<i>The functions of a hypothesis</i>	83
	<i>The testing of a hypothesis</i>	83
	<i>The characteristics of a hypothesis</i>	84
	<i>Types of hypothesis</i>	85
	<i>Errors in testing a hypothesis</i>	87
	<i>Hypotheses in qualitative research</i>	88
	<i>Summary</i>	89
STEP II CONCEPTUALISING A RESEARCH DESIGN		91
7	The research design	93
	<i>What is a research design?</i>	94
	<i>The functions of a research design</i>	94
	<i>The theory of causality and the research design</i>	95
	<i>Summary</i>	101
8	Selecting a study design	103
	<i>Differences between quantitative and qualitative study designs</i>	103
	<i>Study designs in quantitative research</i>	105
	Study designs based on the number of contacts	105
	Study designs based on the reference period	111
	Study designs based on the nature of the investigation	113
	<i>Other designs commonly used in quantitative research</i>	122
	The cross-over comparative experimental design	123
	The replicated cross-sectional design	124
	Trend studies	124
	Cohort studies	125
	Panel studies	125
	Blind studies	126
	Double-blind studies	126
	<i>Study designs in qualitative research</i>	126
	Case study	126
	Oral history	127
	Focus groups/group interviews	127
	Participant observation	128
	Holistic research	129
	Community discussion forums	129
	Reflective journal log	130
	<i>Other commonly used philosophy-guided designs</i>	130
	Action research	131

Feminist research	132
Participatory and collaborative research enquiry	132
<i>Summary</i>	133
STEP III CONSTRUCTING AN INSTRUMENT FOR DATA COLLECTION	135
9 Selecting a method of data collection	137
<i>Differences in the methods of data collection in quantitative and qualitative research</i>	138
<i>Major approaches to information gathering</i>	138
<i>Collecting data using primary sources</i>	140
Observation	140
The interview	144
The questionnaire	145
Constructing a research instrument in quantitative research	156
Asking personal and sensitive questions	156
The order of questions	158
Pre-testing a research instrument	158
Prerequisites for data collection	159
<i>Methods of data collection in qualitative research</i>	159
Constructing a research instrument in qualitative research	162
<i>Collecting data using secondary sources</i>	163
Problems with using data from secondary sources	163
<i>Summary</i>	164
10 Collecting data using attitudinal scales	167
<i>Measurement of attitudes in quantitative and qualitative research</i>	167
<i>Attitudinal scales in quantitative research</i>	168
<i>Functions of attitudinal scales</i>	168
<i>Difficulties in developing an attitudinal scale</i>	169
<i>Types of attitudinal scale</i>	170
The summated rating or Likert scale	170
The equal-appearing interval or Thurstone scale	174
The cumulative or Guttman scale	175
<i>Attitudinal scales and measurement scales</i>	175
<i>Attitudes and qualitative research</i>	175
<i>Summary</i>	175
11 Establishing the validity and reliability of a research instrument	177
<i>The concept of validity</i>	178
<i>Types of validity in quantitative research</i>	179
Face and content validity	179
Concurrent and predictive validity	180
Construct validity	180

<i>The concept of reliability</i>	181
<i>Factors affecting the reliability of a research instrument</i>	182
<i>Methods of determining the reliability of an instrument in quantitative research</i>	182
External consistency procedures	182
Internal consistency procedures	183
<i>Validity and reliability in qualitative research</i>	184
<i>Summary</i>	186
STEP IV SELECTING A SAMPLE	189
12 Selecting a sample	191
<i>The differences between sampling in quantitative and qualitative research</i>	192
<i>Sampling in quantitative research</i>	193
The concept of sampling	193
Sampling terminology	194
Principles of sampling	194
Factors affecting the inferences drawn from a sample	197
Aims in selecting a sample	197
Types of sampling	197
Non-random/non-probability sampling designs in quantitative research	206
Systematic sampling design: a 'mixed' design	208
The calculation of sample size	209
<i>Sampling in qualitative research</i>	212
The concept of saturation point in qualitative research	213
<i>Summary</i>	213
STEP V WRITING A RESEARCH PROPOSAL	215
13 How to write a research proposal	217
<i>The research proposal in quantitative and qualitative research</i>	217
<i>Contents of a research proposal</i>	218
Preamble/introduction	220
The problem	222
Objectives of the study	224
Hypotheses to be tested	226
Study design	227
The setting	230
Measurement procedures	230
Ethical issues	231
Sampling	231
Analysis of data	232
Structure of the report	235
Problems and limitations	236

Appendix	237
<i>Work schedule</i>	237
<i>Summary</i>	237
STEP VI COLLECTING DATA	239
14 Considering ethical issues in data collection	241
<i>Ethics: the concept</i>	241
<i>Stakeholders in research</i>	243
<i>Ethical issues to consider concerning research participants</i>	244
Collecting information	244
Seeking consent	244
Providing incentives	245
Seeking sensitive information	245
The possibility of causing harm to participants	245
Maintaining confidentiality	246
<i>Ethical issues to consider relating to the researcher</i>	246
Avoiding bias	246
Provision or deprivation of a treatment	246
Using inappropriate research methodology	247
Incorrect reporting	247
Inappropriate use of the information	247
<i>Ethical issues regarding the sponsoring organisation</i>	247
Restrictions imposed by the sponsoring organisation	247
The misuse of information	248
<i>Summary</i>	248
STEP VII PROCESSING AND DISPLAYING DATA	251
15 Processing data	253
<i>Part one: Data processing in quantitative studies</i>	255
Editing	255
Coding	256
<i>Part two: Data processing in qualitative studies</i>	277
Content analysis in qualitative research – an example	279
<i>The role of statistics in research</i>	288
<i>Summary</i>	288
16 Displaying data	291
<i>Methods of communicating and displaying analysed data</i>	291
Text	292
Tables	292
Graphs	297
<i>Summary</i>	308

STEP VIII WRITING A RESEARCH REPORT	311
17 Writing a research report	313
<i>Writing a research report</i>	313
<i>Developing an outline</i>	314
<i>Writing about a variable</i>	319
<i>Referencing</i>	320
<i>Writing a bibliography</i>	321
<i>Summary</i>	321
18 Research methodology and practice evaluation	323
<i>What is evaluation?</i>	324
<i>Why evaluation?</i>	325
<i>Intervention–development–evaluation process</i>	327
<i>Perspectives in the classification of evaluation studies</i>	328
<i>Types of evaluation from a focus perspective</i>	329
Evaluation for programme/intervention planning	330
Process/monitoring evaluation	332
Evaluating participation of the target population	333
Evaluating service delivery manner	335
Impact/outcome evaluation	337
Cost–benefit/cost–effectiveness evaluation	341
<i>Types of evaluation from a philosophical perspective</i>	342
Goal-centred/objective-oriented evaluation	342
Consumer-oriented/client-centred evaluation	342
Improvement-oriented evaluation	343
Holistic/illuminative evaluation	343
<i>Undertaking an evaluation: the process</i>	343
Step 1: Determining the purpose of evaluation	343
Step 2: Developing objectives or evaluation questions	344
Step 3: Converting concepts into indicators into variables	347
Step 4: Developing evaluation methodology	350
Step 5: Collecting data	350
Step 6: Analysing data	350
Step 7: Writing an evaluation report	351
Step 8: Sharing findings with stakeholders	351
<i>Involving stakeholders in evaluation</i>	351
<i>Ethics in evaluation</i>	352
<i>Summary</i>	353
Appendix: Developing a research project: a set of exercises for beginners	355
Glossary	377
Bibliography	403
Index	409
