Business Information Systems

Technology, Development and Management for the E-Business

Fifth edition

PAUL BOCIJ, ANDREW GREASLEY AND SIMON HICKIE

PEARSON

Harlow, England • London • New York • Boston • San Francisco • Toronto • Sydney • Auckland • Singapore • Hong Kong
Tokyo • Seoul • Taipei • New Delhi • Cape Town • São Paulo • Mexico City • Madrid • Amsterdam • Munich • Paris • Milan

Brief contents

Preface xv
Guided tour xxii
Plan of the book xxiv
About the authors xxv
Authors' acknowledgements xxvi
Publisher's acknowledgements xxvii

Part 1 INTRODUCTION TO BUSINESS INFORMATION SYSTEMS

Chapter 1 Basic concepts – understanding information 5
Chapter 2 Basic concepts: an introduction to business information systems 35
Chapter 3 Hardware and software 65
Chapter 4 Databases and business intelligence 145
Chapter 5 Networks, telecommunications and the Internet 177
Chapter 6 Enterprise and functional BIS 217

Part 2 BUSINESS INFORMATION SYSTEMS DEVELOPMENT

Chapter 7 An introduction to acquiring and developing BIS 263
Chapter 8 Initiating systems development 293
Chapter 9 BIS project management 319
Chapter 10 Systems analysis 349
Chapter 11 Systems design 391
Chapter 12 System build, implementation and maintenance: change management 439

Part 3 BUSINESS INFORMATION SYSTEMS MANAGEMENT

Chapter 13 Information systems strategy 477
Chapter 14 Information systems management 507
Chapter 15 Managing information security 539
Chapter 16 End-user computing – providing end-user services 573
Chapter 17 Ethical, legal and moral constraints on information systems 599

Glossary 634
Index 661

Contents in detail

Part 1
INTRODUCTION TO BUSINESS INFORMATION SYSTEMS

1 Basic concepts – understanding information 5

Links to other chapters 4
Learning outcomes / Management issues 5
Introduction 6
Data and information 6
Creating information 8
Qualities of information 11
Case study 1.1: Technology sponsors a complementary form of capitalism 14
Knowledge and wisdom 15
The business environment 16
Managerial decision making 18
Case study 1.2: Dealing with the data deluge 23
Focus on knowledge management 27
Summary 29
Exercises 29
References / Further reading / Web links 31

2 Basic concepts: an introduction to business information systems 35

Links to other chapters 34
Learning outcomes / Management issues 35
Introduction 36
Introduction to systems 36
Different types of systems 41
Business information systems 42
Resources that support BIS 43
Categories of business information system 46
E-business systems 46
Enterprise systems 49
BIS and strategic advantage 50
Case study 2.1: PayPal eyes in-store retail customers 51
Mini case study: Capital One develops information leadership 56
Case study 2.2: Corporate IT falling short of potential 57
Summary 58
Exercises 59
References / Further reading / Web links 61

3 Hardware and software 65

Links to other chapters 64
Learning outcomes / Management issues 65
Introduction 66
Components of a computer system 66
Major categories of computers 67
Case study 3.1: Mainframes are thriving in a cloud world 68
Types of microcomputers 71
Input devices 75
Mini case study: Optical mark recognition 77
Output devices 81
Focus on printers 84
Storage devices 87
Processors 93
Case study 3.2: Hertz reaps virtualisation rewards 96
Focus on managing technological change 97
Categories of software 100
Document production software 104
Case study 3.3: Business life – rise of the paperless meeting 105
Graphics packages 109
Spreadsheets 111
Management applications of productivity software 115
Multimedia software 116
Software for using the internet 117

Case study 3.4: Cloud is silver lining for German online bank Fidor 130
Focus on software distribution models 134
Summary 137
Exercises 138
References / Further reading / Web links 141

4 Databases and business intelligence 145

Links to other chapters 144
Learning outcomes / Management issues 145
Introduction 146
Databases 146
Business intelligence 153
Data warehouses 153
Mini case study: How to get rid of 'devil customers' 154
Case study 4.1: Big data put under the spotlight as never before 157
Data mining 159
Case study 4.2: Making business intelligence work 160
Business analytics 162
Mini case study: Traders' tools turn tables on dodgy deals 162
Case study 4.3: After 160 years, the value of maps is starting to be appreciated 170
Mini case study: Using GIS to identify road traffic accident locations 171
Summary 172
Exercises 173
References / Further reading / Web links 174

5 Networks, telecommunications and the Internet 177

Links to other chapters 176
Learning outcomes / Management issues 177
Introduction 178
Computer networks 178
Network components 181
Network types 190
The Internet 194
Case study 5.1: Death of a matchmaker 199
Focus on how the Internet works – Internet standards 203
Focus on mobile or wireless access devices 206
Case study 5.2: Americans turning off TV and on to digital devices 208
Focus on EDI 208
Focus on Voice over IP (VoIP) 210
Case study 5.3: Asian mobile chat apps challenge western dominance 211
Summary 212
Exercises 213
References / Further reading / Web links 215

6 Enterprise and functional BIS 217

Links to other chapters 216
Learning outcomes / Management issues 217
Introduction 218
Enterprise systems 218
Case study 6.1: ERP: a convincing case must be made before investment 221
Case study 6.2: Managing the supply chain 227
Mini case study: The supply chains that could bind unsuspecting managers 231
Operations information systems 233
Case study 6.3: Retail applications of TPS by Sainsbury's 236
Management information systems 245
Departmental applications 250
Summary 256
Exercises 256
References / Further reading / Web links 257

Part 2 BUSINESS INFORMATION SYSTEMS DEVELOPMENT

7 An introduction to acquiring and developing BIS 263

Links to other chapters 262
Learning outcomes / Management issues 263
Introduction 264
How and why are information systems acquired? 264
Software acquisition and the systems development lifecycle 269
Bespoke development 274
Case study 7.1: Lloyds Bank Insurance Services applies RAD 275
Case study 7.2: Use of waterfall v. agile methods at Mellon Financial 280
Purchase of an off-the-shelf package 282
User-developed applications 285
Case study 7.3: Lascelles Fine Foods 286

Summary 288
Exercises 289
References / Further reading / Web links 290

8 Initiating systems development 293

Links to other chapters 292
Learning outcomes / Management issues 293
Introduction 294
Reasons for project initiation 294
The feasibility study 297
Risk management 302
Case study 8.1: Recession reveals the dark side of advanced IT 304
Acquisition choices and methods 305
Focus on techniques for comparing systems 306
Mini case study: Feature checklist for comparing three different groupwave products 307
Case study 8.2: Sedgemoor District Council 312
Summary 313
Exercises 314
References / Further reading / Web links 315

9 BIS project management 319

Links to other chapters 318
Learning outcomes / Management issues 319
Introduction 320
Case study 9.1: Putting an all-inclusive price tag on successful IT 320
The project management process 322
Mini case study: The key to . . . project planning 322
Case study 9.2: Project management: lessons can be learned from successful delivery 324
Steps in project management 326
Focus on A project management methodology: PRINCE2 334
A project management tool: network analysis 338
Summary 344
Exercises 345
References / Further reading / Web links 346

10 Systems analysis 349

Links to other chapters 348
Learning outcomes / Management issues 349
Introduction 350
Identifying the requirements 350
Focus on requirements determination in a lean or agile environment 358
Documenting the findings 359
Case study 10.1: IFD drawing – a student records system 362
Focus on soft systems methodology 379
Systems analysis – an evaluation 383
Software tools for systems analysis 384
Case study 10.2: ABC case study 384
Summary 386
Exercises 387
References / Further reading / Web links 388

11 Systems design 391

Links to other chapters 390
Learning outcomes / Management issues 391
Introduction 392
Aims of system design 392
Case study 11.1: Beaverbrooks the Jewellers 393
Constraints on system design 394
The relationship between analysis and design 395
Elements of design 395
System or outline design 397
Case study 11.2: Systems management: driving innovation should be the main objective 401
Detailed design (module design) 405
Focus on relational database design and normalisation 405
Design of input and output 421
User interface design 423
Focus on web site design for B2C e-commerce 424
Input design 426
Output design 428
Designing interfaces between systems 428
Defining the structure of program modules 428
Security design 429
Design tools: case (computer-aided software engineering) tools 430
Error handling and exceptions 430
Help and documentation 430
Focus on object-oriented design (OOD) 431
Summary 433
Exercises 433
References / Further reading / Web links 435

12 System build, implementation and maintenance: change management 439

Links to other chapters 438
Learning outcomes / Management issues 439
Introduction 440
System build and implementation 440
Mini case study: Jim Goodnight: crunching the numbers 444

Maintenance 448
Change management 450
Case study 12.1: Business-process management (BPM) 458
Case study 12.2: Play pick-and-mix to innovate with SOA 463
Summary 469
Exercises 470
References / Further reading / Web links 471

Part 3
BUSINESS INFORMATION SYSTEMS MANAGEMENT

13 Information systems strategy 477

Links to other chapters 476
Learning outcomes / Management issues 477
Introduction 478
The strategic context 478
Introduction to BIS strategy 479
Case study 13.1: Which cloud model will prevail? 484
Tools for strategic analysis and definition 485
IS and business strategy integration 495
Focus on IS/IT and SMEs 499
Case study 13.2: Next generation of clients forces pace of IT change 501
Summary 502
Exercises 503
References / Further reading / Web links 504

14 Information systems management 507

Links to other chapters 506
Learning outcomes / Management issues 507
Introduction 508
Information systems investment appraisal 508
Determining investment levels for information systems in an organisation 509
Locating the information systems management function 512
Outsourcing 515
Mini case study: Customers admit blame for outsourcing failures 516
Case study 14.1: Outsourcing: beware false economies 522
Beyond strategic information systems – the importance of IS capability 524
Focus on IT infrastructure flexibility 526
Pulling it together: IT governance and COBIT 527
Case study 14.2: IT trends shape future corporate strategies 532
Summary 534
Exercises 535
References / Further reading / Web links 536

15 Managing information security 539

Links to other chapters 538
Learning outcomes / Management issues 539
Introduction 540
The need for controls 540
Mini case study: Complacent staff weak link in combating cyber criminals 543
Case study 15.1: Online cybercrime rings forced to home in on smaller prey 547
Control strategies 548
Types of controls 551
Some techniques for controlling information systems 552
Focus on malware 556
Case study 15.2: Cybercrime costs US $100bn a year 561
Threats related to internet services 562
Summary 566
Exercises 567
References / Further reading / Web links 569

16 End-user computing – providing end-user services 573

Links to other chapters 572
Learning outcomes / Management issues 573
Introduction 574
End-user IS services 574
Managing network services 575
Mini case study: Cyberslacking: employees surf non-work-related web sites 577
End-user computing 579
The IT help desk 581
Case study 16.1: The 21st-century help desk 583
End-user development 585
Managing EUC as part of IS strategy 591
Case study 16.2: Time to call the help desk? 592
Summary 593
Exercises 594
References / Further reading / Web link 595

17 Ethical, legal and moral constraints on information systems 599

Links to other chapters 598
Learning outcomes / *Management issues* 599
Introduction 600
Professionalism, ethics and morality 600
Codes of conduct 601
Case study 17.1: Small mistakes attract the biggest trouble 605
Social issues 606
Legal issues 613
Case study 17.2: Sony fined after lapses at games network 616
Focus on software piracy 623
Mini case study: Pirate Bay hacker jailed for two years 625
Summary 629
Exercises 630
References / *Further reading* / *Web links* 632
