# Advanced Microeconomics

 Springer Gabler

# Contents

Chapter I. Cooperation as the central focus of microeconomics	1
1. Three modes of cooperation	1
2. This book	3
<b>Part A. Basic decision and preference theory</b>	<b>7</b>
Chapter II. Decisions in strategic form	9
1. Introduction and three examples	9
2. Sets, functions, and real numbers	12
3. Dominance and best responses	15
4. Mixed strategies and beliefs	17
5. Rationalizability	23
6. Topics and literature	25
7. Solutions	25
8. Further exercises without solutions	29
Chapter III. Decisions in extensive form	31
1. Introduction and two examples	31
2. Decision trees and actions	33
3. Strategies and subtrees: perfect information	35
4. Strategies and subtrees: imperfect information	42
5. Moves by nature, imperfect information, and perfect recall	47
6. Topics	51
7. Solutions	51
8. Further exercises without solutions	56
Chapter IV. Ordinal preference theory	59
1. The vector space of goods and its topology	59
2. Preference relations	65
3. Axioms: convexity, monotonicity, and continuity	69
4. Utility functions	74
5. Quasi-concave utility functions and convex preferences	79
6. Marginal rate of substitution	82

7. Topics	87
8. Solutions	88
9. Further exercises without solutions	92
<b>Chapter V. Decisions under risk</b>	<b>93</b>
1. Simple and compound lotteries	93
2. The St. Petersburg lottery	96
3. Preference axioms for lotteries	100
4. Risk attitudes	103
5. Stochastic dominance	110
6. Topics	118
7. Solutions	119
8. Further exercises without solutions	125
<b>Part B. Household theory and theory of the firm</b>	<b>127</b>
<b>Chapter VI. The household optimum</b>	<b>129</b>
1. Budget	129
2. The household optimum	135
3. Comparative statics and vocabulary	142
4. Solution theory	151
5. Indirect utility function	159
6. Consumer's rent and Marshallian demand	162
7. Topics	165
8. Solutions	165
9. Further exercises without solutions	171
<b>Chapter VII. Comparative statics and duality theory</b>	<b>173</b>
1. The duality approach	173
2. Envelope theorems and Shephard's lemma	180
3. Concavity, the Hesse matrix, and the Hicksian law of demand	184
4. Slutsky equations	190
5. Compensating and equivalent variations	196
6. Topics	205
7. Solutions	205
8. Further exercises without solutions	208
<b>Chapter VIII. Production theory</b>	<b>209</b>
1. The production set	209
2. Efficiency	213
3. Convex production sets and concave production functions	219

4. Exploring the production mountain (function)	222
5. Topics	228
6. Solutions	228
7. Further exercises without solutions	230
Chapter IX. Cost minimization and profit maximization	231
1. Revisiting the production set	231
2. Cost minimization	233
3. Long-run and short-run cost minimization	238
4. Profit maximization	240
5. Profit maximization?	244
6. The separation function of markets	253
7. Topics	255
8. Solutions	255
9. Further exercises without solutions	260
<b>Part C. Games and industrial organization</b>	<b>261</b>
Chapter X. Games in strategic form	263
1. Introduction, examples, and definition	263
2. Dominance	269
3. Best responses and Nash equilibria	274
4. ... for mixed strategies, also	276
5. Existence and number of mixed-strategy equilibria	281
6. Critical reflections on game theory	283
7. Topics	285
8. Solutions	285
9. Further exercises without solutions	288
Chapter XI. Price and quantity competition	289
1. Monopoly: Pricing policy	289
2. Price competition	294
3. Monopoly: quantity policy	299
4. Quantity competition	312
5. Topics and literature	322
6. Solutions	323
7. Further exercises without solutions	328
Chapter XII. Games in extensive form	329
1. Examples	329
2. Defining strategies	341

3. Subgame perfection and backward induction	344
4. Multi-stage games	346
5. Product differentiation	349
6. Application: Strategic trade policy	356
7. Topics and literature	361
8. Solutions	361
9. Further exercises without solutions	366
<b>Chapter XIII. Repeated games</b>	<b>367</b>
1. Example: Repeating the pricing game	367
2. Definitions	371
3. Equilibria of stage games and of repeated games	372
4. The infinitely repeated prisoners' dilemma	374
5. Topics	378
6. Solutions	378
7. Further exercises without solutions	380
<b>Part D. Bargaining theory and Pareto optimality</b>	<b>381</b>
<b>Chapter XIV. Pareto optimality in microeconomics</b>	<b>383</b>
1. Introduction: Pareto improvements	383
2. Identical marginal rates of substitution	384
3. Identical marginal rates of transformation	390
4. Equality of marginal rates of substitution and transformation	392
5. Topics	398
6. Solutions	398
7. Further exercises without solutions	402
<b>Chapter XV. Cooperative game theory</b>	<b>403</b>
1. Introduction	403
2. The coalition function	403
3. Summing and zeros	405
4. Solution correspondences	406
5. The Shapley value	411
6. Simple games	416
7. Five non-simple games	420
8. Topics and literature	425
9. Solutions	425
<b>Chapter XVI. The Rubinstein bargaining model</b>	<b>433</b>
1. Introduction	433

2. Many equilibria	434
3. Backward induction for a three-stage Rubinstein game	435
4. Backward induction for the Rubinstein game	437
5. Subgame perfect strategies for the Rubinstein game	438
6. Patience in bargaining	439
7. Topics	440
8. Solutions	440
<b>Part E. Bayesian games and mechanism design</b>	<b>443</b>
Chapter XVII. Static Bayesian games	445
1. Introduction and an example	445
2. Definitions	446
3. Revisiting mixed-strategy equilibria	451
4. Correlated equilibria	456
5. The first-price auction	460
6. The double auction	464
7. Topics	469
8. Solutions	469
9. Further exercises without solutions	472
Chapter XVIII. The revelation principle and mechanism design	473
1. Introduction	473
2. Revisiting the first-price auction	474
3. Social choice problems and mechanisms	477
4. The revelation principle	480
5. The Clarke-Groves mechanism	484
6. Topics and literature	489
7. Further exercises without solutions	490
<b>Part F. Perfect competition and competition policy</b>	<b>491</b>
Chapter XIX. General equilibrium theory	493
1. Introduction to General Equilibrium Theory	493
2. Exchange economy: positive theory	496
3. Exchange and production economy: positive theory	509
4. Normative theory	510
5. Topics and literature	518
6. Solutions	519
7. Further exercises without solutions	523

Chapter XX.	Beyond general equilibrium theory	525
1.	Nobel price for Friedrich August von Hayek	525
2.	Envy freeness	526
3.	The jungle economy	527
4.	Applications	531
5.	Austrian critical perspectives and Schumpeter	533
6.	A critical review of GET	540
7.	Topics	543
8.	Solutions	543
9.	Further exercises without solutions	545
Chapter XXI.	Introduction to competition policy and regulation	547
1.	Themes	547
2.	Markets	548
3.	Models	550
4.	Overall concepts of competition (policy)	558
5.	Topics	561
6.	Solutions	561
7.	Further exercises without solutions	564
<b>Part G.</b>	<b>Contracts and principal-agent theories</b>	<b>565</b>
Chapter XXII.	Adverse selection	567
1.	Introduction and an example	567
2.	A polysonistic labor market	570
3.	A polysonistic labor market with education	574
4.	A polysonistic labor market with education and screening	577
5.	Revisiting the revelation principle	580
6.	Topics and literature	581
7.	Solutions	581
Chapter XXIII.	Hidden action	583
1.	Introduction	583
2.	The principal-agent model	584
3.	Sequence, strategies, and solution strategy	585
4.	Observable effort	586
5.	Unobservable effort	587
6.	Special case: two outputs	590
7.	More complex principal-agent structures	596
8.	Topics and literature	598
9.	Solutions	598
