Brief contents

<i>Contents</i>	<i>vii</i>
<i>Guided tour</i>	<i>xvii</i>
<i>Introduction</i>	<i>xix</i>
<i>Acknowledgements</i>	<i>xxi</i>
Part 1 Basics of research	1
1 Role of research in psychology	3
2 Aims and hypotheses in research	27
3 Variables, concepts and measures	45
4 Problems of generalisation and decision-making in research: Chance findings and sample size	63
5 Research reports: The total picture	85
6 Improving your quantitative write-up	115
7 Literature search	136
8 Ethics and data management in research	162
Part 2 Quantitative research methods	183
9 Basic laboratory experiments	185
10 Advanced experimental designs	212
11 Cross-sectional or correlational research: Non-manipulation studies	234
12 Longitudinal studies	249
13 Sampling and population surveys	264
14 Data analysis issues and scientific progress	283
Part 3 Fundamentals of testing and measurement	309
15 Psychological tests: Their use and construction	311
16 Reliability and validity: Evaluating the value of tests and measures	330
17 Coding data	347
Part 4 Qualitative research methods	361
18 Why qualitative research?	363
19 Qualitative data collection	379
20 Transcribing language data: Jefferson system	392

21	Thematic analysis	402
22	Grounded theory	418
23	Discourse analysis	435
24	Conversation analysis	448
25	Interpretative phenomenological analysis	460
26	Evaluating qualitative research	477
27	Improving your qualitative write-up	488
 Part 5 Research for projects, dissertations and theses		507
28	Developing ideas for research	509
29	Managing your research project	527
	<i>Glossary</i>	536
	<i>References</i>	543
	<i>Index</i>	555

Part 1 Basics of research 1

1	Role of research in psychology	3
	<i>Overview</i>	3
1.1	Introduction	4
1.2	The importance of reading	5
1.3	Evaluating the evidence	6
1.4	Inferring causality	8
1.5	Types of research and the assessment of causality	11
1.6	Practice	21
1.7	Conclusion	24
	<i>Key points</i>	25
	<i>Activities</i>	26
2	Aims and hypotheses in research	27
	<i>Overview</i>	27
2.1	Introduction	28
2.2	Types of study	29
2.3	Aims of research	31
2.4	Research hypotheses	32
2.5	Four types of hypothesis	33
2.6	Difficulties in formulating aims and hypotheses	37
2.7	Conclusion	43
	<i>Key points</i>	43
	<i>Activities</i>	44

3	Variables, concepts and measures	45
	<i>Overview</i>	45
3.1	Introduction	46
3.2	History of the variable in psychology	46
3.3	Types of variable	48
3.4	Independent and dependent variables	50
3.5	Measurement characteristics of variables	50
3.6	Stevens' theory of scales of measurement	53
3.7	Operationalising concepts and variables	58
3.8	Conclusion	61
	<i>Key points</i>	62
	<i>Activities</i>	62
4	Problems of generalisation and decision-making in research: Chance findings and sample size	63
	<i>Overview</i>	63
4.1	Introduction	64
4.2	Universalism	65
4.3	Sampling and generalisation	66
4.4	Statistics and generalisation	70
4.5	Directional and non-directional hypotheses again	73
4.6	More on the similarity between measures of effect (difference) and association	75
4.7	Sample size and size of association	77
4.8	Conclusion	83
	<i>Key points</i>	84
	<i>Activities</i>	84
5	Research reports: The total picture	85
	<i>Overview</i>	85
5.1	Introduction	86
5.2	Overall strategy of report writing	87
5.3	Sections of the research report in detail	93
5.4	Conclusion	111
	<i>Key points</i>	113
	<i>Activities</i>	114
6	Improving your quantitative write-up	115
	<i>Overview</i>	115
6.1	Introduction	116
6.2	Poorly written quantitative report	117

6.3	Analysis of the report	121
6.4	Improved version of the report	128
6.5	Conclusion	134
	<i>Key points</i>	134
	<i>Activities</i>	135
7	Literature search	136
	<i>Overview</i>	136
7.1	Introduction	137
7.2	Library classification systems	143
7.3	Electronic databases	146
7.4	Obtaining articles not in your library	154
7.5	Personal bibliographic database software	157
7.6	Conclusion	160
	<i>Key points</i>	160
	<i>Activities</i>	161
8	Ethics and data management in research	162
	<i>Overview</i>	162
8.1	Introduction	163
8.2	Ethics: general principles	165
8.3	Research ethics	165
8.4	Ethics and publication	173
8.5	How to obtain a participant's consent	174
8.6	Data management	176
8.7	Conclusion	178
	<i>Key points</i>	179
	<i>Activities</i>	180

Part 2 Quantitative research methods 183

9	Basic laboratory experiments	185
	<i>Overview</i>	185
9.1	Introduction	186
9.2	Characteristics of the true or randomised experiment	189
9.3	More advanced research designs	197
9.4	Conclusion	210
	<i>Key points</i>	211
	<i>Activity</i>	211

10	Advanced experimental designs	212
	<i>Overview</i>	212
10.1	Introduction	213
10.2	Multiple levels of the independent variable	214
10.3	Multiple dependent variables	218
10.4	Factorial designs	219
10.5	Psychology and social psychology of the laboratory experiment	224
10.6	Conclusion	231
	<i>Key points</i>	232
	<i>Activities</i>	232
11	Cross-sectional or correlational research: Non-manipulation studies	234
	<i>Overview</i>	234
11.1	Introduction	235
11.2	Cross-sectional designs	236
11.3	The case for non-manipulation studies	238
11.4	Key concepts in the analysis of cross-sectional studies	240
11.5	Conclusion	248
	<i>Key points</i>	248
	<i>Activities</i>	248
12	Longitudinal studies	249
	<i>Overview</i>	249
12.1	Introduction	250
12.2	Panel designs	252
12.3	Different types of third variable	254
12.4	Analysis of non-experimental designs	257
12.5	Conclusion	262
	<i>Key points</i>	263
	<i>Activities</i>	263
13	Sampling and population surveys	264
	<i>Overview</i>	264
13.1	Introduction	265
13.2	Types of probability sampling	266
13.3	Non-probability sampling	269
13.4	National surveys	271
13.5	Socio-demographic characteristics of samples	274
13.6	Sample size and population surveys	275
13.7	Conclusion	281

	<i>Key points</i>	282
	<i>Activities</i>	282
14	Data analysis issues and scientific progress	283
	<i>Overview</i>	283
14.1	Introduction	284
14.2	Confidence intervals	287
14.3	Effect sizes	290
14.4	Power	291
14.5	Replication Crisis	296
14.6	Questionable research practices and truth inflation	298
14.7	Conclusion	304
	<i>Key points</i>	307
	<i>Activities</i>	307

Part 3 Fundamentals of testing and measurement 309

15	Psychological tests: Their use and construction	311
	<i>Overview</i>	311
15.1	Introduction	312
15.2	Concept of a scale	313
15.3	Scale construction	315
15.4	Item analysis or factor analysis?	324
15.5	Other considerations in test construction	326
15.6	Conclusion	328
	<i>Key points</i>	329
	<i>Activities</i>	329
16	Reliability and validity: Evaluating the value of tests and measures	330
	<i>Overview</i>	330
16.1	Introduction	331
16.2	Reliability of measures	332
16.3	Validity	336
16.4	Types of validity	336
16.5	Conclusion	345
	<i>Key points</i>	345
	<i>Activity</i>	346

17	Coding data	347
	<i>Overview</i>	347
17.1	Introduction	348
17.2	Types of coding	349
17.3	Reliability and validity when coding	353
17.4	Qualitative coding	355
17.5	Conclusion	358
	<i>Key points</i>	358
	<i>Activities</i>	359

Part 4 Qualitative research methods 361

18	Why qualitative research?	363
	<i>Overview</i>	363
18.1	Introduction	364
18.2	What is qualitative research?	365
18.3	History of the qualitative/quantitative divide in psychology	368
18.4	Quantification–qualitative methods continuum	371
18.5	Evaluation of qualitative versus quantitative methods	375
18.6	Conclusion	377
	<i>Key points</i>	377
	<i>Activity</i>	378
19	Qualitative data collection	379
	<i>Overview</i>	379
19.1	Introduction	380
19.2	Major qualitative data collection approaches	381
19.3	Conclusion	390
	<i>Key points</i>	390
	<i>Activities</i>	391
20	Transcribing language data: Jefferson system	392
	<i>Overview</i>	392
20.1	Introduction	393
20.2	Jefferson transcription	394
20.3	Advice for transcribers	399
20.4	Conclusion	400

<i>Key points</i>	400
<i>Activities</i>	401
21 Thematic analysis	402
<i>Overview</i>	402
21.1 Introduction	403
21.2 What is thematic analysis?	404
21.3 Basic approach to thematic analysis	406
21.4 More sophisticated version of thematic analysis	409
21.5 Conclusion	416
<i>Key points</i>	417
<i>Activity</i>	417
22 Grounded theory	418
<i>Overview</i>	418
22.1 Introduction	419
22.2 Development of grounded theory	421
22.3 Data in grounded theory	423
22.4 How to do grounded theory analysis	423
22.5 Computer grounded theory analysis	428
22.6 Evaluation of grounded theory	431
22.7 Conclusion	433
<i>Key points</i>	434
<i>Activity</i>	434
23 Discourse analysis	435
<i>Overview</i>	435
23.1 Introduction	436
23.2 Basic discourse analysis theory	438
23.3 The agenda of discourse analysis	440
23.4 Doing discourse analysis	442
23.5 Conclusion	447
<i>Key points</i>	447
<i>Activities</i>	447
24 Conversation analysis	448
<i>Overview</i>	448
24.1 Introduction	449
24.2 Precepts of conversation analysis	452
24.3 Stages in conversation analysis	453

24.4	Conclusion	458
	<i>Key points</i>	458
	<i>Activities</i>	459
25	Interpretative phenomenological analysis	460
	<i>Overview</i>	460
25.1	Introduction	461
25.2	Philosophical foundations of interpretative phenomenological analysis	462
25.3	Stages in interpretative phenomenological analysis	469
25.4	Conclusion	475
	<i>Key points</i>	475
	<i>Activities</i>	476
26	Evaluating qualitative research	477
	<i>Overview</i>	477
26.1	Introduction	478
26.2	Criteria for novices	478
26.3	Evaluating qualitative research	480
26.4	Validity	483
26.5	Conclusion	486
	<i>Key points</i>	487
	<i>Activities</i>	487
27	Improving your qualitative write-up	488
	<i>Overview</i>	488
27.1	Introduction	489
27.2	Poorly written qualitative report	494
27.3	Critical evaluation	500
27.4	Conclusion	504
	<i>Key points</i>	505
	<i>Activities</i>	505

Part 5 Research for projects, dissertations and theses 507

28	Developing ideas for research	509
	<i>Overview</i>	509
28.1	Introduction	510
28.2	Why not a replication study?	512

28.3	Choosing a research topic	516
28.4	Sources of research ideas	518
28.5	Conclusion	525
	<i>Key points</i>	526
	<i>Activity</i>	526
29	Managing your research project	527
	<i>Overview</i>	527
29.1	Introduction	528
29.2	Advice for consideration	528
29.3	Conclusion	534
	<i>Key points</i>	535
	<i>Glossary</i>	536
	<i>References</i>	543
	<i>Index</i>	555
