*Preface*     *xiii*

*About the Authors*     *xv*

<b>1. An Introduction to the Multi-Asset Investment Problem</b>	<b>1</b>
1.1 What is Multi-Asset Investing?	2
1.2 The Conventional Structure	4
1.3 Transitioning from Active Management to Exposure Allocation	4
1.4 Creating an Improved Allocation Structure	5
1.5 Constructing a Multi-Asset Portfolio to Manage Tail Risks	6
1.6 Multi-Asset Investing in Emerging Markets	6
1.7 From Multi-Asset Strategies to Multi-Asset Solutions	7
1.8 Structuring a Multi-Asset Business	7
<b>2. The Traditional Allocation Structure</b>	<b>9</b>
2.1 The Traditional Investment Process	10
2.2 The Asset Allocation Process	12
2.3 The Belief in Diversification	13
2.4 Harnessing Equity Risk Premium and the Investment Horizon	19
2.5 Asset Classes as Mutually Exclusive Silos	20
2.6 Organization Structure and Resource Allocation	20
2.7 Implications for Skill Required in Asset Allocation	21
2.8 Requirements for a Revised Allocation Solution	22
2.9 Parallel Debates Created in the Search for a Revised Allocation Solution	23
<b>3. Transitioning from Active Management to Exposure Allocation</b>	<b>25</b>
3.1 A Historic Rationalization of Alpha and Beta	26
3.2 Progression of Active Management	27
3.3 Generalizing the Beta Concept	27
3.4 The Demise of Asset Class Demarcated Allocation	28
3.5 Implications for the Active Investment Process	29
3.6 Investment Strategy Categorization	30
3.6.1 Fundamental, Quantitative and Technical	30
3.6.2 Top-down, Bottom-up and Relative Value	31
3.7 Positioning of Alternative Investments	31

3.8	Obsolescence of Portable Alpha	32
3.9	Positioning of Fundamental Indexation and Smart Beta	32
3.10	Risk in an Exposure-Based Framework	33
3.11	Horizon-Based Organizational Demarcation	34
3.12	Transition from an Asset-Based to an Exposure-Based Organization	34
3.13	Conclusion	37
<b>4.</b>	<b>Redefining Risk Premium for Multi-Asset Allocation Decisions</b>	<b>39</b>
4.1	Incumbent Risk and Risk Premium Frameworks	40
4.2	Framework for the Concurrent Presence of All Asset Classes	41
4.3	Incorporating Intra-Horizon Risk	42
4.4	Risk and Return Premium for Allocation Silos	43
4.5	Asset Class Premiums – Comparison of Traditional and Proposed Methods	45
4.6	Asset Class Premiums – Impact of Different Investment Horizons	46
4.7	Asset Class Risk – Comparison of Traditional and Proposed Methods	47
4.8	Asset Class Risk – Impact of Different Investment Horizons	48
4.9	Sovereign Risk and Risk Premium	49
4.10	Application to Various Multi-Asset Investment Problem Scenarios	51
4.11	Conclusion	52
<b>5.</b>	<b>A Multi-Strategy Allocation Structure</b>	<b>53</b>
5.1	Categories of Allocation Approaches	54
5.2	A Multi-Strategy Framework for the Allocation Problem	58
5.3	The Benefits of Strategy Diversification	59
5.4	Individual Allocation Methodology Requirements	61
5.5	Example of a Multi-Strategy Allocation Approach	63
5.6	Conclusion	66
<b>6.</b>	<b>A Fundamental Exposure Allocation Approach – Business Cycles</b>	<b>67</b>
6.1	The Passive Economic Model	67
6.2	An Active Economic Approach	68
6.3	A Five Cycle Asset Allocation Approach	69
6.3.1	Cycle I – The Global Business Cycle	69
6.3.2	Cycle II – The Local Business Cycle	70
6.3.3	Cycle III – The Monetary Cycle	71
6.3.4	Cycle IV – The Credit and Capex Cycles	73
6.3.5	Cycle V – Market Cycle	73
6.4	Cycle Limiting Risk Parameters	73
6.5	Segregating the Core and Cyclical Components	74
6.6	The Composite Five Cycle Framework	75
<b>7.</b>	<b>A Systematic Exposure Allocation Process – Active Risk Budgeting</b>	<b>77</b>
7.1	Modeling the Business Cycle	78
7.2	Modeling the Monetary Cycle	80

7.3	Risk Adjustment for Equity Valuation	81
7.4	Creating an Adjusted Risk Budgeting Allocation Methodology	82
7.5	Simulated Performance Results	85
7.6	Confirming Robustness of ARB Allocation Methodology	90
	7.6.1 Performance in Different Time Periods	90
	7.6.2 Performance in Different Market Conditions	90
7.7	Implementation of a Drawdown Management Process	94
<b>8.</b>	<b>Estimation of Asset Allocation</b>	<b>97</b>
8.1	The Consensus Asset Allocation Dataset	97
8.2	Using Consensus Data for Allocation Decisions	98
	8.2.1 Basic Allocation Decisions	98
	8.2.2 Creating Tactical Allocation Changes	99
	8.2.3 Conviction Level in Allocation Stances	102
	8.2.4 Currency Hedge Ratio Decisions	103
	8.2.5 Separating the Poor Forecasters from the Accurate Ones	105
	8.2.6 Contrasting the Variety of Allocation Methodologies	105
<b>9.</b>	<b>Optimization for Multi-Asset Portfolios</b>	<b>107</b>
9.1	Evolution of the Mean Variance Framework	107
9.2	Portfolio Allocation and Measures of Performance	109
9.3	A Utility-Based Approach	110
9.4	The Fund Manager's Objectives	110
9.5	The Efficient Frontier	112
9.6	Optimal Portfolio Choice	113
9.7	Incorporating the Constraints	114
9.8	Tail Risk Constraint	115
9.9	Event Risk	115
9.10	Macro Risk	116
9.11	Regime Risk	116
9.12	Correlation Risk	117
9.13	Formulation of the Optimization Problem	118
9.14	The Unconstrained Allocation	119
9.15	Applying the Constraints	121
9.16	The Preferred Portfolio	127
9.17	Conclusions	130
<b>10.</b>	<b>Managing Tail Risk in Multi-Asset Portfolios</b>	<b>133</b>
10.1	Portfolio Management – The Practical Setting	134
10.2	Asset Allocation – The Practical Setting	134
10.3	Creating a Real Risk Measure: End-of-Horizon vs. Intra-Horizon Risk	135
10.4	Model Uncertainty	139
10.5	Stop-Losses	143
10.6	Implementing Tail Risk Management	150
10.7	Notation and Variables	153

<b>11. Multi-Asset Investing in Emerging Markets</b>	<b>155</b>
11.1 Observation 1: Sub-Optimal Geographic Categorization of Emerging Markets	155
11.2 Observation 2: Inappropriate Sector Classification for Emerging Markets	156
11.3 Observation 3: Stock Concentration in Equity Indices	158
11.4 Observation 4: The Potential for Active Management	159
11.5 Observation 5: Performance of Active Managers	159
11.6 Observation 6: Over-Dependence on a Single Investment Decision	162
11.7 Summary of Observations	162
11.8 Pitfalls in Emerging Market Investment Frameworks	163
11.9 An Improved Framework for Emerging Market Investments	164
<b>12. The Importance of Asset Allocation in Asian Equities</b>	<b>169</b>
12.1 Impact of Breadth on Portfolio Excess Return	169
12.2 Impact of Varying Cross-Sectional Dispersion on Portfolio Excess Return	170
12.3 The Relative Importance of Asset Allocation and Stock Selection	172
12.4 Comparing the US and Asian Equity Investment Universe	173
12.5 Conclusions	176
<b>13. Implementing a Multi-Asset Strategy – Active or Passive</b>	<b>179</b>
13.1 Investment Determinants for the Active-Passive Decision	179
13.2 Asset Owner Constraints Impacting the Active–Passive Decision	184
<b>14. An Exposure-Based Risk Diagnostics Framework</b>	<b>185</b>
14.1 Shortcomings of a Traditional Risk Analysis Approach	185
14.2 Evaluating Intended and Unintended Risk	186
14.3 A Multi-Dimensional Risk Architecture	187
14.3.1 Skill Analysis	188
14.3.2 Investment Process Component Analysis	189
14.3.3 Regime Risk Analysis	189
14.3.4 Style and Factor Risk Analysis	190
14.3.5 Macro Risk Analysis	190
14.3.6 Stress Event Risk Analysis	191
14.3.7 Peer Group Comparison Analysis	192
<b>15. Impact of Manager Compensation on Allocation Decisions</b>	<b>195</b>
15.1 Compensation Structure	196
15.2 Managerial Constraints	197
15.2.1 Managerial Skill	198
15.2.2 Managerial Risk Preferences	198
15.3 Optimal Activeness	199
15.4 The Distribution of Performance	202
15.5 The Importance of Skill	203
15.6 Activeness and Age	205
15.7 Implications for a Multi-Period Setting	206
15.7.1 Compensation Structure	206
15.7.2 The Distribution of Performance	206

15.8	Examples of Managerial Contracts	208
15.9	Conclusions	209
<b>16.</b>	<b>From Multi-Asset Strategies to Multi-Asset Solutions</b>	<b>211</b>
16.1	Current Phase of Industry Transition	213
16.2	Multi-Asset Solutions as an Industry Function	214
16.3	Characteristics of a Multi-Asset Solution Provider	215
16.4	Customization Parameters for an Investment Solution	215
16.5	Requirements for a Standardized Implementation	219
16.6	The Importance of Attributing Performance	219
16.7	Conclusions	220
<b>17.</b>	<b>Multi-Asset Investing for Private Wealth Assets</b>	<b>221</b>
17.1	The Private Wealth Multi-Asset Investment Problem	221
17.2	Business Model and Organizational Issues	224
17.3	Incumbent Investment Frameworks	226
17.4	A Multi-Asset Private Wealth Investment Platform	227
17.5	Goals-Based Allocation	228
17.6	Implication for the Long-Only Active Manager	230
17.7	Conclusions	230
<b>18.</b>	<b>Structuring a Multi-Asset Investing Business</b>	<b>233</b>
18.1	Product Structure and Positioning	233
18.2	Product Advantages and Disadvantages	235
18.3	Product Investment Skills	236
18.4	Target Client Segmentation	237
18.5	Where Did Existing Products Fall Short?	238
18.6	Client Segment – Expectations and Evaluation	242
<b>19.</b>	<b>Competing for Better Institutional Investment Outcomes</b>	<b>245</b>
19.1	Mission and Beliefs – The First and Most Critical Step	246
19.2	Frameworks: Traditional Asset Class Versus Risk Premium	248
19.3	Linking Beliefs With Return Drivers and Portfolio Construction Decisions	250
19.3.1	A New Perspective	252
19.3.2	A Wider Opportunity Set for Exploiting Alpha	253
19.3.3	Ensuring That Everything Is Consistent with Beliefs	255
19.4	Governance Consideration	256
19.4.1	Closing the Governance Gap: Build or Buy	256
19.4.2	The Separation of Governing and Executive Functions	257
19.5	Choosing an Implementation Route for Delegation	259
19.5.1	Bundling Multiple Investment Strategies into Pooled Funds	259
19.5.2	Fully Bespoke Implementation	260
19.6	Monitoring	262
19.7	Conclusions	263
	<i>Bibliography and References</i>	265
	<i>Index</i>	269
