<b>1</b>	<b>Introduction: Economics and Environmental Degradation .....</b>	<b>1</b>
1.1	<b>Thesis 1 .....</b>	<b>3</b>
1.2	<b>Thesis 2.....</b>	<b>7</b>
1.3	<b>Thesis 3 .....</b>	<b>9</b>
	References .....	11
<b>2</b>	<b>Environmental Externalities and Their Internalization Through Voluntary Approaches .....</b>	<b>13</b>
2.1	<b>The Socially Optimal Pollution Level in Case of a Unilateral Externality .....</b>	<b>14</b>
2.2	<b>Ways to Internalize Externalities .....</b>	<b>16</b>
2.2.1	<b>The Coase Theorem .....</b>	<b>16</b>
2.2.2	<b>Other Voluntary Approaches .....</b>	<b>30</b>
	<b>Appendix: Multilateral Externalities, Public Goods, and Mixed Goods .....</b>	<b>32</b>
	References .....	35
<b>3</b>	<b>Monetary Valuation of the Environment .....</b>	<b>37</b>
3.1	<b>Theoretical Background.....</b>	<b>38</b>
3.1.1	<b>Price Changes .....</b>	<b>38</b>
3.1.2	<b>Quantity Changes .....</b>	<b>46</b>
3.2	<b>The Contingent Valuation Method: Measuring Utility by Means of Surveys.....</b>	<b>47</b>
3.2.1	<b>The Idea .....</b>	<b>47</b>
3.2.2	<b>The Procedure .....</b>	<b>50</b>
3.2.3	<b>Problems with Contingent Valuation Studies .....</b>	<b>51</b>
3.2.4	<b>Conclusions for the Design and Validity of CVM Studies .....</b>	<b>62</b>
	References .....	65
<b>4</b>	<b>A Comparison of Environmental Policy Instruments .....</b>	<b>67</b>
4.1	<b>Background.....</b>	<b>69</b>
4.2	<b>Command and Control Instruments .....</b>	<b>70</b>
4.2.1	<b>Types of Command and Control Instruments .....</b>	<b>70</b>
4.2.2	<b>Advantages and Disadvantages of Command and Control Instruments ....</b>	<b>70</b>
4.3	<b>Advantages of Environmental Taxes .....</b>	<b>75</b>
4.3.1	<b>Cost-Effectiveness in Abating Emissions ("Static Efficiency").....</b>	<b>75</b>
4.3.2	<b>Stronger Incentives for Innovation ("Dynamic Efficiency").....</b>	<b>77</b>
4.4	<b>Problems with Environmental Taxation .....</b>	<b>80</b>
4.4.1	<b>Differences of Environmental Impact .....</b>	<b>80</b>
4.4.2	<b>Unknown Marginal Abatement Costs .....</b>	<b>82</b>
4.4.3	<b>Effects of Environmental Taxation in Case of a Supplier's Monopoly .....</b>	<b>86</b>

4.4.4	The Possibility of Rising Emissions Through Environmental Taxation .....	89
4.4.5	An Excessive Dynamic Incentive Effect .....	93
4.4.6	Welfare Losses Due to the Double Burden of Environmental Taxes .....	94
4.5	<b>The Double Dividend Hypothesis: The Idea of “Greening” the Tax System .....</b>	98
4.5.1	The Idea of the Double Dividend .....	98
4.5.2	The Level of the Optimal Environmental Tax When the Double Dividend Is Taken into Account .....	100
4.5.3	Challenging the Existence of Double Dividends .....	102
4.5.4	Conflicts of Environmental Taxes with Other Economic Objectives .....	107
4.6	<b>Emission Trading: An Alternative Incentive-Based Instrument of Environmental Policy .....</b>	110
4.6.1	The Functioning and the Prospective Advantages of Cap-and-Trade Systems .....	111
4.6.2	Dynamic Efficiency of Permit Schemes .....	116
4.6.3	Problems with Emission Trading .....	119
4.6.4	Cap-and-Trade Systems in Practice .....	125
4.7	<b>The Limits of Emission Pricing: An Integrated View of Instrument Choice in Environmental Policy .....</b>	129
	References .....	131
5	<b>International Environmental Problems .....</b>	133
5.1	Introduction .....	134
5.2	<b>A Two-Country Game with a Reciprocal Externality: Payoff Structure and Nash Equilibria .....</b>	135
5.2.1	The Model .....	135
5.2.2	Payoff Rankings and Country Types .....	136
5.2.3	Explanation of Country Types .....	137
5.2.4	Nash Equilibria .....	138
5.3	<b>Transformations of the One-Shot Game .....</b>	140
5.3.1	Changes of Abatement Costs .....	140
5.3.2	Extended Preferences .....	144
5.4	<b>Repeated Games .....</b>	146
5.5	<b>Success Factors of International Environmental Cooperation: Two Examples .....</b>	151
	References .....	154
	<b>Supplementary Information</b>	
	Index .....	159
