AN AUERBACH BOOK

Contents

Preface ..... **xi**
Acknowledgments ..... **xiii**
About the Authors ..... **xv**

1 Introduction **1**
Learning Objectives 1
1.1 What the Book Is All About 1
1.1.1 About Manufacturing Supply Chains 2
1.2 How This Book Is Organized 4
1.3 About Terminology Used in ERP Software 5
1.4 About the Case Descriptions 9
1.5 Key Terms 10
1.6 Chapter Summary 10

2 The Basics of ERP Systems for Manufacturing Supply Chains **11**
Learning Objectives 11
2.1 The ERP Solution 11
2.2 ERP Data 17
2.3 ERP Modules 18
2.4 ERP Systems for Manufacturing Supply Chains 21
2.4.1 The Rise of Applications of ERP Systems in Manufacturing Supply Chains 21
2.4.2 Core ERP Modules for Manufacturing Supply Chains 23
2.4.3 Business Processes Supported by an ERP-System for Manufacturing Supply Chain 27
2.5 Basic Functionality and Features in an ERP System for Manufacturing Supply Chain 28
2.5.1 Security Setup 28
2.5.2 Language Management 29
2.5.3 Personalization of User Interfaces 30
2.5.4 Number Sequences 32

2.5.5 Enterprise Breakdown 33
2.5.6 Master Data Management 35
2.5.7 External and Internal Documents 36
2.5.8 Reporting Tools 38
2.6 Financial Accounting in an ERP System for Manufacturing Supply Chain 39
2.7 Additional Business Software Applications 42
2.8 Key Terms 46
2.9 Chapter Summary 46

3 Inventory Management 47
Learning Objectives 47
3.1 The Inventory Management Module 47
3.2 Key Data in the Inventory Management Module 48
3.3 Basic Features and Functionality 54
3.3.1 Item Numbering 54
3.3.2 Product Descriptions and Other Identifications 57
3.3.3 Variant and Configuration Management 58
3.3.4 Units of Measure 59
3.3.5 Inventory On-hand 59
3.3.6 Item Tracking 60
3.3.7 Reservation 62
3.3.8 Inventory Valuation 63
3.4 Key Inventory Management Processes 66
3.4.1 Inventory Receipts and Issues 66
3.4.2 Inventory Counting 66
3.4.3 Inventory Transfers 69
3.4.4 The Transfer Order Process 70
3.5 Other Inventory Management Functionality 71
3.5.1 Warehouse Management Module 72
3.5.2 Shipment and Transportation 72
3.5.3 Quality Management 74
3.6 Key Terms 74
3.7 Chapter Summary 75

4 Purchase Module 77
Learning Objectives 77
4.1 The Purchase Module 77
4.2 Key Data in the Purchase Module 77
4.3 Basic Functionality 82
4.3.1 Purchase Order Numbering 82
4.3.2 Purchase Order Types 82
4.3.3 Purchase Order Statuses 85

4.3.4 Purchase Pricing and Agreements 86
4.3.5 Delivery Time and Promising 87
4.4 The Purchase Order Process 88
4.5 Other Purchase Module Functionalities 91
4.5.1 Internal Purchase Requisitions 91
4.5.2 Request for Quote (RFQ) 91
4.6 Key Terms 92
4.7 Chapter Summary 92

5 Sales Module 93
Learning Objectives 93
5.1 The Sales Module 93
5.2 Data in the Sales Module 93
5.3 Basic Functionality 97
5.3.1 Sales Order Number 97
5.3.2 Sales Order Type 99
5.3.3 Sales Order Statuses 100
5.3.4 Sales Price and Sales Price Agreements 101
5.3.5 Order Promising 103
5.4 The Sales Order Process 104
5.5 Other Sales Module Functionalities 109
5.5.1 Sales Quotations 109
5.5.2 Return Management 110
5.5.3 Direct Delivery 111
5.6 Key Terms 111
5.7 Chapter Summary 111

6 Production Module 113
Learning Objectives 113
6.1 The Production Module 113
6.2 Data in the Production Module 113
6.3 Basic Functionality 118
6.3.1 Single-level versus Multilevel BOM 118
6.3.2 Phantom Items 120
6.3.3 Routing Options 120
6.3.4 Production Planning 121
6.3.5 Shop Floor Activities 122
6.3.6 Production Cost Calculation 125
6.4 The Production Order Process 128
6.5 Other Production Module Functionality 132
6.5.1 Subcontracting 132
6.5.2 Back Flushing and Order-less Production 133
6.5.3 Defective Quantities, Scrap, and BI-products 134

6.5.4 Tooling 134
6.5.5 Engineering Change 135
6.5.6 Other Production Modes and Industry Specific Functionalities 135
6.6 Key Terms 136
6.7 Chapter Summary 136

7 Master Planning Module 137
Learning Objectives 137
7.1 The Master Planning Module 137
7.2 Data in the Master Planning Module 138
7.3 Basic Functionality 142
7.3.1 Master-Planning Run 142
7.3.2 Planning Methods 145
7.3.3 Time Fencing 149
7.3.4 Other Planning Rules and Parameter 152
7.3.5 Forecasting 153
7.3.6 Capacity Planning 156
7.3.7 Planning Alerts 158
7.3.8 Planning Overview 158
7.4 Planning Processes 160
7.4.1 Sales and Operations Planning 161
7.4.2 Master Production Scheduling 163
7.4.3 Material Requirement Planning 166
7.5 Key Terms 168
7.6 Chapter Summary 169

8 Using ERP Systems in a Manufacturing Facility 171
Learning Objectives 171
8.1 How an ERP-System Affects the Manufacturing Supply Chain 171
8.1.1 The ERP-system's Role in a Facility's Manufacturing Supply Chain 172
8.1.2 The Setup of the Planning Method in Real-life ERP Systems 176
8.2 Effect of ERP Systems Planning Methods on Flow of a Facility's Manufacturing Supply Chain 178
8.2.1 The (Customer Order) Decoupling Point 180
8.2.2 The Relation Between the Replenishment Orders and the Requiring Orders 181
8.2.3 "Forecastability" 182

8.3 Setting the Correct Planning Method on Each Item/Warehouse Combination in the Manufacturing Supply Chain 184
8.4 Configuring an ERP System for Different Manufacturing Strategies 190
8.5 Key Terms 193
8.6 Chapter Summary 194

9 Using ERP Systems in Manufacturing Supply Chains 195
Learning Objectives 195
9.1 Basic ERP Strategies for Manufacturing Supply Chains 195
9.1.1 Why Choose a "Multiple-ERP" Strategy for Supporting the Manufacturing Supply Chain 196
9.1.2 Why Choose a OneERP Strategy 198
9.2 Key Factors When Choosing ERP Application for Supporting a Manufacturing Supply Chain 201
9.3 The ERP System's Role in a Cross Facility and/or Company Manufacturing Supply Chain 205
9.4 Setting up an ERP-Enabled Multicompany Manufacturing Supply Chain 209
9.5 Configuring ERP for Increased Manufacturing Supply Chain Performance 212
9.6 Key Terms 214
9.7 Chapter Summary 214

Index 217
