About the author	xiii
Preface	xiv
Publisher's acknowledgements	xv
1 Logistics, the supply chain and competitive strategy	1
Supply chain management is a wider concept than logistics	2
Competitive advantage	4
The supply chain becomes the value chain	9
The mission of logistics management	10
The supply chain and competitive performance	12
The changing competitive environment	13
2 Delivering customer value	25
The marketing and logistics interface	26
Delivering customer value	27
What is customer service?	28
The impact of out-of-stock	30
Customer service and customer retention	32
Market-driven supply chains	35
Defining customer service objectives	39
Setting customer service priorities	43
Setting service standards	47
3 Going to market	51
Distribution channels are value delivery systems	52
One size doesn't fit all	55
Innovation in the distribution channel	56
The omni-channel revolution	58
The personalised supply chain	62
4 The financial impact of logistics	65
Logistics and the bottom line	66
Logistics and the balance sheet	67
Logistics and shareholder value	69
Logistics cost analysis	74
The concept of total cost analysis	75
Understanding the cost-to-serve	78
Customer profitability analysis	79
Direct product profitability	84
Cost drivers and activity-based costing	86

5	Matching supply and demand	89
	The lead-time gap	90
	Improving visibility of demand	91
	The decoupling point	93
	The supply chain fulcrum	94
	Forecast for capacity, execute against demand	96
	Demand management and planning	96
	Collaborative planning, forecasting and replenishment	100
6	Creating the responsive supply chain	105
	Using the volume/variability matrix	108
	Product 'push' versus demand 'pull'	111
	The Japanese philosophy	116
	The agile supply chain	117
	The foundations of agility	120
	A routemap to responsiveness	125
7	Strategic lead-time management	129
	Time-based competition	129
	The concept of lead-time	133
	Logistics pipeline management	137
	Reducing logistics lead-time	141
8	The synchronous supply chain	149
	The extended enterprise and the virtual supply chain	150
	The role of information in the virtual supply chain	152
	Laying the foundations for synchronisation	155
	'Quick response' logistics	157
	Production strategies for QR	160
	Logistics systems dynamics	161
9	Developing and managing the supply network	167
	The transition from purchasing to strategic sourcing	169
	Segmenting the supply base	172
	Category management	174
	Agile procurement in an uncertain world	179
10	Complexity and the supply chain	181
	The sources of supply chain complexity	182
	The cost of complexity	188
	Product design and supply chain complexity	189
	Mastering complexity	190
11	Managing the global pipeline	195
	The globalisation of supply chains	197
	Gaining visibility in the global pipeline	201

	Financing global supply chains	205
	Organising for global logistics	205
	Thinking global, acting local	209
	Globalisation: the next phase	211
12	The digital supply chain	213
	Supply chain 4.0	214
	Big data and analytics	216
	Artificial intelligence and machine learning	217
	The Internet of Things	219
	Robotics and automation	219
	Blockchains and smart contracts	220
	Control towers and digital twins	222
	The road to digital transformation	223
13	Service logistics	227
	What is a service?	227
	Buying performance	228
	The service dominant logic	229
	The trend to 'servitisation'	229
	Implications of servitisation for logistics	231
	The critical role of capacity	231
	Service supply chain processes	234
	Managing the service supply chain	236
14	Managing risk in the supply chain	237
	Why are supply chains more vulnerable?	239
	Understanding the supply chain risk profile	241
	Managing supply chain risk	245
	Achieving supply chain resilience	253
15	The era of network competition	259
	The new organisational paradigm	260
	Collaboration and trust in the supply chain	262
	Reducing costs through collaborative working	265
	'Co-opetition' – co-operating with competitors	268
	Managing the supply chain as a network	268
	Supply chain orchestration	269
	From 3PL to 4PL™	271
	The last word	273
16	Overcoming the barriers to supply chain integration	275
	Creating the logistics vision	276
	The problems with conventional organisations	276
	Developing the logistics organisation	280
	Logistics as a vehicle for change	284
	Benchmarking	286

17	Creating a sustainable supply chain	291
	The triple bottom line	291
	Greenhouse gases and the supply chain	293
	Reducing the transport-intensity of supply chains	295
	Beyond the carbon footprint	296
	Reduce, re-use, re-cycle	299
	The impact of congestion	301
18	The supply chain of the future	305
	Emerging mega-trends	306
	Shifting centres of gravity	307
	Supply chain governance and compliance	308
	The need for adaptability	309
	Seeking structural flexibility	310
	The road ahead	313
	Waste in the supply chain	313
	The New Industrial Revolution	314
	Seven major business transformations	315
	The implications for tomorrow's logistics managers	317
	Index	323
