CONTENTS

List of figures *viii*
List of tables *ix*

1 Introducing the impact space 1
- 1.1 Introduction 1
- 1.2 Global differences in terms of impact 2
- 1.3 Development of social problems over time 3
- 1.4 The role of technology in the fight against climate change 5
- 1.5 Definition of impact 8
- 1.6 Social business models 10
- 1.7 Social innovation and the role of technology 12
- 1.8 Emerging opportunities based on AI and blockchain technology 13
- 1.9 The impact investing market 14
- 1.10 Financing institutions and instruments 16
- 1.11 General problems in the impact space 18

2 Introduction to artificial intelligence 20
- 2.1 How to think about artificial intelligence 20
- 2.2 Introduction to data science 23
- 2.3 Historical development of AI 25
- 2.4 Diversity of approaches 28
- 2.5 Data structure 29
- 2.6 Types of learning 30
- 2.7 Definition of AI 32
- 2.8 Mechanics of neural networks 33
- 2.9 Ethical considerations and shortcomings 36

3 AI-first impact business models 40
3.1 Introduction 40
3.2 The AI factory 41
3.3 Use of data 46
3.4 Classification of AI systems 48
3.5 Use of AI in public settings 48
3.6 Use of AI in the labor market 51
3.7 Use of AI in healthcare 55
3.8 Use of AI in education 58
3.9 Use of AI to improve the lives of persons with disabilities 59
3.10 Use of AI in agriculture and the fight against climate change 60

4 AI and impact finance 63
4.1 Introduction 63
4.2 Historical overview with a focus on credit scoring 65
4.3 Finance for underserved segments of the population 66
4.4 Impact fintechs 70
4.5 Provision of capital to investments promising higher impact 72
4.6 Access to finance for impact enterprises 75

5 Basic principles of the blockchain technology 78
5.1 How to think about the blockchain technology 78
5.2 Definition of the blockchain technology 81
5.3 History and evolving narratives 82
5.4 Technology and ecosystem 83
5.5 Consensus mechanisms 85
5.6 Cryptographic components 86
5.7 Smart contracts 87
5.8 Tokens 89

6 Blockchain-enabled impact business models 93
6.1 Introduction 93
6.2 Identification of good projects 95
6.3 Markets, institutions, and organizational forms 97
6.4 Decentralized autonomous organization (DAO) – a new organizational paradigm 99
6.5 The use of the blockchain technology in the supply chain 100
6.6 The use of the blockchain technology to document violence and war crimes 102
6.7 The use of the blockchain technology for philanthropy 102
6.8 The documentation of land rights with the blockchain technology 103
6.9 New juridical approaches based on the blockchain technology 104

7 Blockchain and impact finance 107
7.1 Introduction 107
7.2 Investment models 109
7.3 The potential of the blockchain technology for the field 114
7.4 Lending protocols 117
7.5 Exchange liquidity pools or automatic market makers 120
7.6 Use case in the delivery of food assistance 121
7.7 Asset storing for refugees 122

8 Outlook and future developments 124
8.1 Introduction 124
8.2 Combination of AI and blockchain technologies 125
8.3 Criminal business models 126
8.4 Outlook 129
