<b>Preface</b>	<b>xi</b>
<b>Author</b>	<b>xiii</b>
<b>Introduction</b>	<b>xv</b>
<b>1 Probability Spaces</b>	<b>1</b>
1.1 Probability Theory: A Very Brief History . . . . .	1
1.2 A Finite Measure Space with a “Story” . . . . .	2
1.2.1 Bond Loss Example . . . . .	7
1.3 Some Probability Measures on $\mathbb{R}$ . . . . .	11
1.3.1 Measures from Discrete Probability Theory . . . . .	11
1.3.2 Measures from Continuous Probability Theory . . . . .	16
1.3.3 More General Probability Measures on $\mathbb{R}$ . . . . .	20
1.4 Independent Events . . . . .	20
1.4.1 Independent Classes and Associated Sigma Algebras . . . . .	24
1.5 Conditional Probability Measures . . . . .	27
1.5.1 Law of Total Probability . . . . .	28
1.5.2 Bayes’ Theorem . . . . .	32
<b>2 Limit Theorems on Measurable Sets</b>	<b>35</b>
2.1 Introduction to Limit Sets . . . . .	35
2.2 The Borel-Cantelli Lemma . . . . .	38
2.3 Kolmogorov’s Zero-One Law . . . . .	43
<b>3 Random Variables and Distribution Functions</b>	<b>47</b>
3.1 Introduction and Definitions . . . . .	47
3.1.1 Bond Loss Example (Continued) . . . . .	50
3.2 “Inverse” of a Distribution Function . . . . .	52
3.2.1 Properties of $F^*$ . . . . .	54
3.2.2 The Function $F^{**}$ . . . . .	60
3.3 Random Vectors and Joint Distribution Functions . . . . .	62
3.3.1 Marginal Distribution Functions . . . . .	65
3.3.2 Conditional Distribution Functions . . . . .	67
3.4 Independent Random Variables . . . . .	69
3.4.1 Sigma Algebras Generated by R.V.s . . . . .	70
3.4.2 Independent Random Variables and Vectors . . . . .	71
3.4.3 Distribution Functions of Independent R.V.s . . . . .	74
3.4.4 Independence and Transformations . . . . .	75

<b>4</b>	<b>Probability Spaces and i.i.d. RVs</b>	<b>77</b>
4.1	Probability Space $(S', \mathcal{E}', \mu')$ and i.i.d. $\{X_j\}_{j=1}^N$ . . . . .	78
4.1.1	First Construction: $(S'_F, \mathcal{E}'_F, \mu'_F)$ . . . . .	79
4.2	Simulation of Random Variables - Theory . . . . .	81
4.2.1	Distributional Results . . . . .	81
4.2.2	Independence Results . . . . .	86
4.2.3	Second Construction: $(S'_U, \mathcal{E}'_U, \mu'_U)$ . . . . .	88
4.3	An Alternate Construction for Discrete Random Variables . . . . .	91
4.3.1	Third Construction: $(S'_p, \mathcal{E}'_p, \mu'_p)$ . . . . .	93
<b>5</b>	<b>Limit Theorems for RV Sequences</b>	<b>99</b>
5.1	Two Limit Theorems for Binomial Sequences . . . . .	99
5.1.1	The Weak Law of Large Numbers . . . . .	100
5.1.2	The Strong Law of Large Numbers . . . . .	103
5.1.3	Strong Laws versus Weak Laws . . . . .	108
5.2	Convergence of Random Variables 1 . . . . .	108
5.2.1	Notions of Convergence . . . . .	109
5.2.2	Convergence Relationships . . . . .	111
5.2.3	Slutsky's Theorem . . . . .	115
5.2.4	Kolmogorov's Zero-One Law . . . . .	118
<b>6</b>	<b>Distribution Functions and Borel Measures</b>	<b>123</b>
6.1	Distribution Functions on $\mathbb{R}$ . . . . .	125
6.1.1	Probability Measures from Distribution Functions . . . . .	126
6.1.2	Random Variables from Distribution Functions . . . . .	129
6.2	Distribution Functions on $\mathbb{R}^n$ . . . . .	130
6.2.1	Probability Measures from Distribution Functions . . . . .	131
6.2.2	Random Vectors from Distribution Functions . . . . .	135
6.2.3	Marginal and Conditional Distribution Functions . . . . .	136
<b>7</b>	<b>Copulas and Sklar's Theorem</b>	<b>137</b>
7.1	Fréchet Classes . . . . .	137
7.2	Copulas and Sklar's Theorem . . . . .	140
7.2.1	Identifying Copulas . . . . .	144
7.3	Partial Results on Sklar's Theorem . . . . .	145
7.4	Examples of Copulas . . . . .	149
7.4.1	Archimedean Copulas . . . . .	150
7.4.2	Extreme Value Copulas . . . . .	154
7.5	General Result on Sklar's Theorem . . . . .	158
7.5.1	The Distributional Transform . . . . .	160
7.5.2	Sklar's Theorem - The General Case . . . . .	164
7.6	Tail Dependence and Copulas . . . . .	165
7.6.1	Bivariate Tail Dependence . . . . .	165
7.6.2	Multivariate Tail Dependence and Copulas . . . . .	170
7.6.3	Survival Functions and Copulas . . . . .	173
<b>8</b>	<b>Weak Convergence</b>	<b>179</b>
8.1	Definitions of Weak Convergence . . . . .	180
8.2	Properties of Weak Convergence . . . . .	184
8.3	Weak Convergence and Left Continuous Inverses . . . . .	189
8.4	Skorokhod's Representation Theorem . . . . .	191

8.4.1	Mapping Theorem on $\mathbb{R}$ . . . . .	192
8.5	Convergence of Random Variables 2 . . . . .	194
8.5.1	Mann-Wald Theorem on $\mathbb{R}$ . . . . .	194
8.5.2	The Delta-Method . . . . .	195
<b>9</b>	<b>Estimating Tail Events 1</b> . . . . .	<b>201</b>
9.1	Large Deviation Theory 1 . . . . .	202
9.2	Extreme Value Theory 1 . . . . .	206
9.2.1	Introduction and Examples . . . . .	206
9.2.2	Extreme Value Distributions . . . . .	210
9.2.3	The Fisher-Tippett-Gnedenko Theorem . . . . .	212
9.3	The Pickands-Balkema-de Haan Theorem . . . . .	223
9.3.1	Quantile Estimation . . . . .	223
9.3.2	Tail Probability Estimation . . . . .	224
9.4	$\gamma$ in Theory: von Mises' Condition . . . . .	229
9.5	Independence vs. Tail Independence . . . . .	234
9.6	Multivariate Extreme Value Theory . . . . .	235
9.6.1	Multivariate Fisher-Tippett-Gnedenko Theorem . . . . .	236
9.6.2	The Extreme Value Distribution $G$ . . . . .	238
9.6.3	The Extreme Value Copula $C_G$ . . . . .	241
	<b>References</b> . . . . .	<b>249</b>
	<b>Index</b> . . . . .	<b>253</b>
