Preface **ix**

To Michael, David, and Jeffrey **xi**

Introduction **xiii**

1 Discussion of the Riemann Integral **1**
1.1 Weakness in the Definition of Existence 1
1.2 Some Positive Results on Function Limits 3
1.3 Counterexamples to Generalizing Positive Results 7

2 Lebesgue Integration **11**
2.1 Integrating Simple Functions 11
2.1.1 Riemann Integral of Step Functions 12
In 1-Dimension 12
In n-Dimensions 15
2.1.2 Lebesgue Integral of Simple Functions 18
2.2 Integrating More General Functions - A Discussion 23
2.2.1 Riemann Integration 23
2.2.2 Lebesgue Integration 25
2.3 Integrating Bounded Measurable Functions 27
2.3.1 Definition of the Lebesgue Integral 27
2.3.2 Riemann Implies Lebesgue on Rectangles 30
2.3.3 Properties of the Lebesgue Integral 32
2.3.4 Bounded Convergence Theorem 35
2.4 Integrating Nonnegative Measurable Functions 38
2.4.1 Definition and Properties of the Lebesgue Integral . . 38
2.4.2 Integrating Nonnegative Function Sequences 41
Fatou's Lemma 42

Lebesgue's Monotone Convergence Theorem 44
2.5 Integrating General Measurable Functions 47
2.5.1 Definition and Properties of the Lebesgue Integral . . 47
2.5.2 Lebesgue's Dominated Convergence Theorem 52
2.5.3 Absolute Riemann Implies Lebesgue on $\mathbb{R}^n$ 54
2.6 Summary of Convergence Results 55
2.6.1 The Limit Theorems of Lebesgue Theory 56
2.6.2 The Riemann Integral: A Discussion 58

3 Lebesgue Integration and Differentiation 65
3.1 FTCs of the Riemann Theory 65
3.2 Derivative of a Lebesgue Integral 67
3.2.1 Monotone Functions 67
3.2.2 Functions Differentiable a.e. 81
3.2.3 Derivative of an Integral 86
3.3 Lebesgue Integral of a Derivative 91
3.3.1 Examples of FTC Failure 92
3.3.2 The Lebesgue FTC - Version I 100
3.4 Lebesgue Integration by Parts 106

4 Stieltjes Integration 109
4.1 Riemann-Stieltjes Integrals on $\mathbb{R}$ 111
4.1.1 Introduction and Definition 111
4.1.2 Properties of R-S Integrals 116
Existence of the R-S Integral 119
Properties of the R-S Integral 123
Bounded Variation Integrators 125
4.1.3 Evaluating Riemann-Stieltjes Integrals 128
4.1.4 A Key Result on Riemann-Stieltjes Integration 131
Banach Spaces 132
Bounded Linear Functionals 139
A Key Result on R-S Integration 145
4.2 Riemann-Stieltjes Integrals on $\mathbb{R}^n$ 145
4.2.1 Introduction and Definition 145
4.2.2 Properties of R-S Integrals 152
Existence of R-S Integrals 152
Properties of R-S Integrals 155
4.2.3 Evaluating Riemann-Stieltjes Integrals 158
