

Marketing Analytics

Statistical Tools for Marketing and Consumer Behavior Using SPSS

**José Marcos Carvalho de Mesquita
and Erik Kosteljik**

Contents

<i>Preface</i>	vii
1 Creating and examining databases in SPSS	1
1.1 <i>Creating the SPSS spreadsheet and manipulating data</i>	1
1.2 <i>Descriptive statistics with frequencies</i>	5
1.3 <i>Cross tabulation</i>	7
2 Introduction to exploratory data analysis	12
2.1 <i>Exploratory data analysis</i>	12
2.2 <i>Verification of assumptions</i>	17
2.3 <i>Outliers</i>	23
2.4 <i>Missing values</i>	24
3 Analysis of variance	27
3.1 <i>Application of t-test in SPSS</i>	27
3.2 <i>Theoretical background – analysis of variance (ANOVA)</i>	29
3.3 <i>Marketing application of ANOVA</i>	30
3.4 <i>Application of ANOVA in SPSS</i>	31
3.5 <i>Theoretical background – multivariate analysis of variance (MANOVA)</i>	39
3.6 <i>Application of MANOVA in SPSS</i>	41
4 Regression analysis	48
4.1 <i>Theoretical background – simple regression analysis</i>	48
4.2 <i>Theoretical background – multiple regression analysis</i>	50
4.3 <i>Marketing application of regression analysis</i>	55
4.4 <i>Application of multiple regression in SPSS</i>	55
5 Time series analysis	63
5.1 <i>Theoretical background – time series analysis</i>	63
5.2 <i>Marketing application of time series analysis</i>	66
5.3 <i>Application of time series analysis in SPSS</i>	67

6 Discriminant analysis	83
<i>6.1 Theoretical background – two groups discriminant analysis</i>	83
<i>6.2 Theoretical background – multiple discriminant analysis</i>	85
<i>6.3 Marketing application of discriminant analysis</i>	86
<i>6.4 Application of discriminant analysis in SPSS</i>	87
<i>6.5 Theoretical background – logistic regression</i>	94
<i>6.6 Application of logistic regression in SPSS</i>	96
7 Cluster analysis	106
<i>7.1 Theoretical background – cluster analysis</i>	107
<i>7.2 Marketing application of cluster analysis</i>	112
<i>7.3 Application of cluster analysis in SPSS – hierarchical approach</i>	112
<i>7.4 Application of cluster analysis in SPSS – nonhierarchical approach</i>	123
8 Exploratory Factor Analysis (EFA)	131
<i>8.1 Theoretical background – exploratory factor analysis</i>	131
<i>8.2 Marketing application of exploratory factor analysis</i>	135
<i>8.3 Application of exploratory factor analysis in SPSS</i>	136
9 Confirmatory Factor Analysis (CFA)	152
<i>9.1 Theoretical background – confirmatory factor analysis</i>	152
<i>9.2 Marketing application of CFA</i>	154
<i>9.3 Application of confirmatory factor analysis with AMOS</i>	155
<i>9.4 The CFA model in AMOS</i>	155
<i>9.5 The CFA analysis</i>	156
<i>9.6 The CFA output</i>	162
10 Structural Equation Modeling (SEM)	173
<i>10.1 Theoretical background – structural equation modeling</i>	173
<i>10.2 Marketing application of SEM</i>	174
<i>10.3 Application of structural equation modeling with AMOS</i>	175
<i>10.4 The SEM model in AMOS</i>	176
<i>10.5 The SEM analysis</i>	179
<i>10.6 The SEM output</i>	181
<i>Appendix 1: Fitness center questionnaire</i>	191
<i>Appendix 2: Supermarket questionnaire</i>	194
<i>Bibliography</i>	197
<i>Index</i>	199
