The Industrial Organization of Banking

Bank Behavior, Market Structure,
and Regulation

Third Edition

 Springer

Contents

1	The Banking Environment: Stocks, Flows, Information, and Risks . . .	1
	Three Fundamental Areas Within the Industrial Organization of Banking	1
	Objectives	2
	Bank Behavior and the Structure of Banking Markets	2
	Bank Competition and Public Policy	3
	Assessing Bank Regulation	3
	The Bank Balance Sheet	4
	Bank Assets	4
	Loans	5
	Securities	5
	Cash Assets	6
	Trends in US Bank Asset Allocations	6
	Bank Liabilities and Equity Capital	8
	Large-Denomination Time Deposits	8
	Transactions Deposits, Savings Deposits, and Small-Denomination Time Deposits	8
	Purchased Funds and Subordinated Notes and Debentures	9
	Bank Capital	9
	Trends in Bank Liabilities and Equity Capital	9
	The Bank Income Statement	10
	Interest Income	10
	Noninterest Income	11
	Interest Expenses	11
	Expenses for Loan Loss Provisions	11
	Real Resource Expenses	12
	Bank Profitability Measures	12
	Asymmetric Information and Risks in Banking	13
	Adverse Selection	13
	Moral Hazard	13
	Risks on the Balance Sheet	13

Credit Risk	14
Market Risks	14
Liquidity Risk	14
Systemic Risk	14
Trends in US Banking Industry Structure	15
The Number of Commercial Banks	15
Mergers, Acquisitions, and Concentration	16
2 Modeling the Banking Firm Under Perfect Competition	
Versus Monopoly	17
Identifying the Outputs and Inputs of a Bank	17
What Banks Do: Alternative Perspectives on Bank Production	18
Assessing the Economic Outputs and Inputs of Banks	19
Banks as Portfolio Managers	20
The Basic Bank Portfolio-Management Model	20
Limitations of Portfolio Management Models	21
Banks as Firms	21
Banks' Utilization of Real Resources and Implications for	
Relationship Between Loans and Deposits	22
Implicit Resource Costs Within a Model of Perfectly Competitive	
Banks	23
A Static Banking Model	23
Perfectly Competitive Markets for Bank Assets	24
Perfectly Competitive Markets for Bank Liabilities	26
Evaluating Properties of a Static Perfectly Competitive Banking	
System	27
Fundamental Dynamics in a Perfectly Competitive Banking	
Model and Implications for Portfolio Separation	29
The Non-Implications of the Upsurge in Reserve Holdings for the	
Industrial Organization of Retail Banking Markets	32
Monopolistic and Monopsonistic Banking Markets	34
Monopolistic and Monopsonistic Interest Rate Determination	
in Bank Loan and Deposit Markets	35
Social Losses due to Imperfect Competition in Banking	36
3 Alternative Models of Imperfect Competition in	
Banking Markets	39
Oligopoly and Oligopsony in Banking Markets	39
Cournot-Style Quantity-Setting Rivalry	39
Fixed Costs and Endogenous Rivalry Among Banks	41
Structural Asymmetry of Loan and Deposit Markets:	
The Dominant-Bank Model	43
A Dominant-Bank Model	43
Strategic Entry Deterrence	44

- Extending the Dominant-Bank Model: Cournot Rivalry Among a Set of Dominant Banks 45
- Monopolistic and Monopsonistic Competition in Banking Markets 46
 - A Chamberlin-Style Approach 46
 - Monopolistic and Monopsonistic Competition with Horizontal Product Differentiation 47
 - Bank Rivalry for Loans and Deposits with Horizontal *and* Vertical Product Differentiation 50
 - Accounting for Simultaneous Horizontal and Vertical Quality Differentiation in a Banking Framework 50
 - Fundamental Implications of Vertically Differentiated Quality Rivalry Among Banks 52
 - Quality Rivalry and Internalized and Externalized Portfolio Interdependence 53
 - Vertical Quality Rivalry and the Mutual Coexistence of Large and Small Banks 53
- 4 The Industrial Economics of Banking 55**
 - The Structure-Conduct-Performance Paradigm in Banking 55
 - Evaluating the Applicability of the SCP Paradigm to the Banking Industry 57
 - Traditional SCP Evidence from Cross-Sectional Banking Data 57
 - Dynamic Interest Rate Responses: Competition and Pass-Through Effects 58
 - The Conduct and Relative Performances of Large and Small Banks 60
 - Market Structure and Bank-Customer Relationships 62
 - Basic Market-Structure Implications of Bank-Customer Relationships 62
 - Evidence on Bank-Customer Relationships 64
 - Determinants and Impacts of Bank-Customer Relationships 64
 - Competition and Relationship Lending 68
 - The Efficient Structure Theory and Banking Costs 70
 - The Efficient Structure Challenge to the SCP Paradigm 70
 - Banking Efficiency and Costs 71
 - Evidence Regarding the Efficient Structure Theory 72
 - Efficient Structure Theory and Bank Performance 74
 - Endogenous Sunk Fixed Costs and Banking Industry Structure 77
 - Endogenous Sunk Costs and Concentration 77
 - Non-Price Competition in Banking: Implicit Deposit Rates versus Quality Rivalry 78
 - Evidence on Advertising Outlays in the Banking Industry 79
 - Endogenous Sunk Costs and the Banking Industry 80

5	The Economics of International Banking	83
	The Growth of Global Banking	84
	The First Big Wave of Banking Globalization:	
	The Colonial Period	84
	The Second Globalization Wave: The Most Recent Decades	84
	Fundamental Structural Elements Influencing	
	Cross-Border Banking	85
	Distance	86
	Competitive Structure and Effects of Entry in Host-Country	
	Banking Markets	87
	Bank Size and Entry Costs	89
	Idiosyncratic Elements and Prior Experience	90
	The Industrial Organization of Multinational Banking	91
	Determinants of the Overall Scope of Foreign Direct	
	Investment in Banking	91
	Greenfield Investment versus Acquisitions of Host	
	Nations' Banks	92
	Real-Resource-Based Analyses of Cross-Border Trade in Banking	
	Services	94
	Differences in Nation's Capital–Labor Ratios and Efficiencies as	
	Determinants of Cross-Border Banking	94
	The Structure of Niepmann's Framework for a Closed	
	Economy	96
	Extending Niepmann's Setup to a Two-Country Environment	97
	An Intra-Industry Model of International Trade in	
	Banking Services	99
	A Closed-Economy Setting with Differentiated	
	Banking Services	100
	A Two-Economy Environment with Traded Banking Services	101
	Evidence on the Empirical Relevance of Trade-Based	
	Theories of International Banking	103
6	The Economics of Banking Antitrust	105
	Why Banks Merge	105
	Profit Enhancements from Mergers	105
	Diversification Benefits of Bank Mergers	109
	Assessing Loan and Deposit-Market Effects of Bank Consolidation	110
	Mergers in Initially Perfectly Competitive Banking Markets	110
	Mergers in Initially Imperfectly Competitive Banking Markets	111
	Evidence on the Consequences of Banking Consolidation	113
	Mergers and Market Power	113
	Evidence on Efficiency Gains from Banking Consolidation	115
	Banking Antitrust in Practice	117
	U.S. Bank Merger Guidelines	117
	The Relevant Market	118
	Merger Screening	119

- Evaluating the U.S. Bank Merger Guidelines 120
 - Is the Official Relevant Banking Market Really Relevant? 120
 - Do the Formal Guidelines Mis-Measure Market Power? 123
 - Implications of Endogenous Sunk Fixed Costs 124
 - Do Banking Consolidations Preclude Entry and Reduce Consumer Welfare? 125
 - Rethinking Bank Merger Analysis 126
- 7 Bank Competition, Stability, and Regulation 129**
 - Banks as Issuers of Demandable Debt 130
 - The Diamond–Dybvig Model 130
 - An Optimal Risk-Sharing Contract 130
 - The Diamond–Dybvig Intermediation Solution and the Problem of Runs 131
 - Evaluating the Diamond–Dybvig Analysis 132
 - Banks as Screeners and Monitors 134
 - Evidence on Bank Monitoring Activities 135
 - Evidence from Announcement Effects 135
 - Evidence from Firm Investment and Bond Yields 136
 - Evidence from Syndicated Loans and Loan Sales 136
 - Direct Evidence of Bank Monitoring Activities 138
 - A Monitoring Model with Heterogeneous Banks 138
 - Behavior of Monitoring and Non-monitoring Banks 139
 - Loan-Market Equilibrium and Equilibrium Monitoring 140
 - The Relationship between Banking Competition and Risks 142
 - Perfect Competition and Bank Risks 142
 - The “Excessive Deposit Competition” Argument 142
 - The Competition-Illiquidity Argument 144
 - The Competition-Asset Risk Argument 144
 - Market Power and Bank Risks: Theory and Evidence 145
 - Competition and Risk: Theory 146
 - Bank Size, Competition, and Risk: Evidence 147
 - Deposit Insurance, “Too Big to Fail” Doctrine, and the Basel Standards 150
 - The Distorting Effects of Deposit Insurance 150
 - The Impact of the Too-Big-to-Fail Doctrine 152
 - Capital Regulation and the Three Pillars of the Basel Framework 155
- 8 Capital Regulation, Bank Behavior, and Market Structure 157**
 - The Portfolio Management Perspective on Capital Regulation 157
 - The Bank as a Competitive, Mean–Variance Portfolio Manager Facing Capital-Constrained Asset Portfolios 158
 - Taking Deposit-Insurance Distortions into Account 160
 - Explaining the Mixed Implications of Portfolio-Management Models 161
 - Asset-Liability Management Under Capital Regulation 162

- An Incentive-Based Perspective on Capital Regulation 163
 - Perfect Competition Models of Bank Capital Regulation 163
 - Monopolistic Competition Models of Capital Regulation 168
- Demandable Debt, Bank Risks, and Capital Regulation 170
 - Capital Regulation and Fragile Deposits 170
 - Moral Hazard, Bank Lending and Monitoring, and Capital Regulation 171
- Capital Regulation and Bank Heterogeneities 173
 - Adverse Selection and Capital Regulation 173
 - Capital Requirements, Heterogeneous Banks, and Industry Structure 174
- Capital, Loan and Risk Adjustments, and Bank Performance 177
 - Do Toughened Capital Requirements Actually Boost Bank Capital Ratios and Influence Aggregate Lending? 177
 - Do Tougher Capital Regulations Yield Better Outcomes? Empirical Evidence 180
- 9 Regulation and the Structure of the Banking Industry 185**
 - Public Interest Versus Public-Choice Perspectives on Bank Regulation 185
