Zhenying Wang

The Principle of Trading Economics

Springer

Contents

Part I Agent Behavior

1 Trading Agent . . . 3
- 1.1 Choice of Trading Agent . . . 3
- 1.2 Family . . . 10
  - 1.2.1 Evolution of Family . . . 10
  - 1.2.2 Family Trading Decision . . . 16
  - 1.2.3 Family Trading Purpose . . . 17
- 1.3 Enterprise . . . 18
  - 1.3.1 Emergence and Evolution of Enterprise . . . 19
  - 1.3.2 Enterprise Structure . . . 27
  - 1.3.3 Scale and Scope of Enterprise . . . 31
  - 1.3.4 Business Model . . . 37
  - 1.3.5 Goal of Enterprise . . . 40
- 1.4 Unified Motivation of Agents . . . 47

2 Agent Description . . . 51
- 2.1 Financial Statement . . . 51
- 2.2 Accounting Matrix . . . 61
  - 2.2.1 Accounting Matrix . . . 61
  - 2.2.2 Examples of Accounting Matrices . . . 63
- 2.3 Treatment of Accounting Matrix . . . 65
  - 2.3.1 Basic Principles of Pricing . . . 66
  - 2.3.2 Accounting of Human Capital . . . 68
  - 2.3.3 Intangible Asset . . . 70
  - 2.3.4 Capital Premium . . . 71
  - 2.3.5 Decision Deviation . . . 72
  - 2.3.6 Revenue Distribution . . . 74

2.4 Accounting Matrix Indicator . . . 74
2.5 Accounting Space . . . 77
2.5.1 Basic Concepts of Accounting Space . . . 78
2.5.2 Accounting Isosurface . . . 78
2.5.3 Distribution in the Accounting Space . . . 80

3 Trading Process . . . 85
3.1 Definition of Trading . . . 85
3.1.1 Significance of Trading . . . 85
3.1.2 Concept of Simple Trading . . . 87
3.1.3 Expansion of the Concept of Trading . . . 89
3.1.4 A Combination of Trading . . . 93
3.1.5 Forward Trading and Reverse Trading . . . 94
3.1.6 Immediate and Deferred Trading . . . 95
3.2 Trading Space . . . 96
3.3 Structure of Trading Space . . . 103
3.4 Geometric Description of Trading . . . 105
3.4.1 Trading Phase Space . . . 106
3.4.2 Relation Between the Two Spaces . . . 108
3.5 Timeliness of Trading . . . 112
3.5.1 Trading Time Limit . . . 113
3.5.2 Valuation Time Domain . . . 114
3.5.3 Phenomenon of Short-Term Trading . . . 120
3.6 Expected Return Function . . . 122
3.6.1 Concept of Expected Return Function . . . 122
3.6.2 Operation of Expected Return Function . . . 125
3.6.3 Nature of Expected Return Function . . . 127

4 Trading Environment . . . 129
4.1 Environment Composition . . . 130
4.1.1 Information Environment . . . 130
4.1.2 Institutional Environment . . . 131
4.1.3 Infrastructure Environment . . . 133
4.1.4 Agent Environment . . . 134
4.2 Trading Environment Orientation . . . 136
4.3 Quality of Trading Environment . . . 141
4.3.1 External Cost of Trading . . . 142
4.3.2 Influence of the External Cost of Trading on the H Function . . . 148
4.3.3 Uncertainty of the Trading Environment . . . 150
4.4 Relation Between Government and Trading Environment . . . 153

5 Use of Information 159
5.1 Significance of Information 159
5.2 Definition of Information 161
5.2.1 Definition of Information 161
5.2.2 Category of Information 163
5.2.3 Level of Information 165
5.2.4 Timeliness of Information 165
5.3 Information Set 166
5.3.1 Information Element 167
5.3.2 Information Beam 168
5.3.3 Information Set 168
5.4 Information Transfer 171
5.5 Use of Information 174
5.5.1 Information Absorption 175
5.5.2 Construction of Information Set 177
5.5.3 Use of Information in Different Decision-Making Mechanisms 179
5.5.4 Information Mapping 180
5.5.5 Flowchart of Use of Information 182
5.6 Information Enhancement 183
5.6.1 Concept of Information Enhancement 183
5.6.2 Conditions for Information Enhancement 184
5.6.3 Information Enhancement Process 187
5.6.4 Information Overload 188

6 Trading Decisions 191
6.1 Decision Model 191
6.2 Decision-Making Process 196
6.2.1 Trading Situation 196
6.2.2 Trading Domain 197
6.2.3 Constraint Set 198
6.2.4 Strategy Set 200
6.2.5 Trading Set 203
6.2.6 Feedback Mechanism of Trading Decision 204
6.3 State Parameter 208
6.3.1 Trading Willingness 209
6.3.2 Minimum Confidence 210
6.3.3 Minimum Return 212
6.4 Principle of Trading Decision 214
6.4.1 Principle of Expected Return Maximization 217
6.4.2 Principle of Approximate Decision 221
6.4.3 Principle of Network Correlation 223
6.4.4 Principle of Decision Model Selection 224

6.5 Law of Liquidity Equilibrium . . . 226
6.6 Trading Conditional Equation . . . 227
6.6.1 Conditional Equation . . . 227
6.6.2 Conditional Equation Conversion in Different States . . . 230
6.6.3 Interpretation of Conditional Equation . . . 232

7 Pricing of Trading . . . 235
7.1 Classical Price Theory . . . 235
7.2 Non-supply-and-Demand Determinants of Pricing . . . 237
7.2.1 Pricing Mechanism . . . 238
7.2.2 Trading Rules . . . 239
7.2.3 Market Structure . . . 241
7.3 Unilateral Pricing Mechanism . . . 242
7.3.1 Unilateral Pricing Mechanism . . . 242
7.3.2 Pricing Behavior . . . 242
7.3.3 Price Equation . . . 252
7.4 Bilateral Pricing Mechanism . . . 255
7.4.1 Bilateral Pricing Mechanism . . . 255
7.4.2 Pricing Behavior . . . 256
7.4.3 Price Equation . . . 258
7.5 Multilateral Pricing Mechanism . . . 261
7.5.1 Multilateral Pricing Mechanism . . . 261
7.5.2 Pricing Behavior . . . 262
7.5.3 Price Equation . . . 264
7.6 Comparison of Pricing Mechanisms . . . 268

8 Trading Stochastic Equation . . . 271
8.1 Trading Vector . . . 271
8.1.1 Stochastic Process . . . 271
8.1.2 Trading Vector . . . 272
8.1.3 Transition Probability . . . 273
8.2 State Space . . . 274
8.2.1 Connected State . . . 274
8.2.2 Closed Set of States . . . 275
8.2.3 Probability of Absorption . . . 276
8.2.4 Contraction of Closed Set . . . 277
8.2.5 State Cycle . . . 277
8.3 Calculation of Transition Probability . . . 278
8.3.1 Influence of Historical Factors . . . 278
8.3.2 Influence of New Factors . . . 280
8.3.3 Calculation of Transition Probability . . . 280
8.4 Trading Stochastic Equation . . . 281

8.5 Characteristics of Trading Stochastic Process 285
8.5.1 Path Dependence 285
8.5.2 Poverty Stickiness 286

Part II System Operation

9 Trading Network 289
9.1 Methodology of System Complexity 289
9.2 Network Structure 295
9.3 Trading Network 297
9.3.1 The Concept of Trading Network 298
9.3.2 Super Trading Agent 301
9.3.3 Foreign Trader 302
9.3.4 Sales Matrix 303
9.3.5 Trading Phase 303
9.3.6 The Trading Network Structure 304
9.4 Network Parameters 305
9.4.1 Common Network Parameters 305
9.4.2 Trading Network Parameters 310

10 Network Compactness 315
10.1 Interaction Among Trading Agents 316
10.2 Compactness 322
10.2.1 The Concept of Compactness 322
10.2.2 The Measurement of Compactness 324
10.2.3 The Performance of Compactness 325
10.3 Influencing Factors 326
10.3.1 Density of the Trading Network 326
10.3.2 Leverage Ratio 327
10.3.3 Debt Structure 329
10.3.4 Equity Relationship 331
10.3.5 Public Sentiment 331
10.4 The Evolution of Compactness 335

11 Trading Loop 339
11.1 Self-reinforcing Process 339
11.2 Trading Loop 344
11.2.1 The Concept of Trading Feedback Loop 344
11.2.2 The Classification of Trading Loop 353
11.3 The Operation of Trading Loop 355
11.3.1 The Startup of the Trading Loop 355
11.3.2 Response Intensity 357
11.3.3 The Peak Value of Intensity 361

11.3.4 Feedback Cycle . . . 362
11.3.5 Trading Loop Equivolume . . . 363
11.4 The Application of Trading Loop . . . 364
11.4.1 The Application in Analysis . . . 364
11.4.2 Views on the Theory of Reflexivity . . . 365

12 Trading Potential . . . 367
12.1 Definition of Trading Potential . . . 367
12.2 The Calculation of Potential Intensity . . . 372
12.3 Recursive Equation of Trading Potential . . . 374
12.4 Diffusion Equation of Trading Potential . . . 377
12.5 Crisis Triggered by the Vibration of Trading Potential . . . 380

13 State Distribution . . . 385
13.1 Trading State . . . 385
13.2 Trading State Entropy . . . 388
13.3 Evolution of State Entropy . . . 391
13.4 State Cohesion . . . 395
13.5 State Coupled Equation . . . 397
13.6 Economic Cycle Model . . . 402
13.6.1 A Review of Cycle Theory . . . 402
13.6.2 Trading Cycle Model . . . 406
13.6.3 Function of the Economic Cycle . . . 409

14 Trading Network Equation . . . 413
14.1 Network Equation in a Closed System . . . 413
14.1.1 Idea of Constructing the Equation . . . 413
14.1.2 Network Equation . . . 415
14.1.3 Network Equation with Node Degrees . . . 422
14.1.4 Solving Network Equation . . . 423
14.2 Network Equation in an Open System . . . 429
14.3 Analysis of Network Effects . . . 430
14.3.1 Self-organization of the Trading Network . . . 431
14.3.2 Multiplier Effect of the Trading Network . . . 432
14.3.3 Nonlinearity of the Trading Network . . . 434

15 System Equation . . . 437
15.1 Methods of Constructing the System Equation . . . 437
15.2 System Equation . . . 438
15.2.1 Establishment of the System Equation . . . 438
15.2.2 Two Explanations of Equations . . . 444
15.3 Nature of System Equation . . . 444
15.3.1 Instability of the System . . . 445
15.3.2 Uncertainty of the System . . . 448
15.3.3 Irreversibility of the System . . . 449

15.4 Deduction of Macro Indicators . . . 450
15.4.1 Total Trading Volume . . . 450
15.4.2 Total Output Value . . . 452
15.5 Derivation of Classical Relations . . . 455
15.5.1 Phillips Relationship . . . 455
15.5.2 Okun's Law . . . 460

16 Economic Growth . . . 463
16.1 Analytical Approach . . . 463
16.2 Growth Model . . . 469
16.2.1 Selection of Variables . . . 469
16.2.2 Economic Growth Model . . . 472
16.2.3 Special Form of the Growth Equation . . . 473
16.2.4 The Recursive Expansion of the Growth Equation . . . 478
16.2.5 Relations Between Growth Equation and System Equation . . . 479
16.3 Economic Growth Process . . . 481
16.3.1 Start of Economic Growth . . . 481
16.3.2 Conditions of Explosive Growth . . . 490
16.3.3 Review of the "Take-Off" Theory . . . 492
16.4 Divergence of Growth . . . 495
16.4.1 Divergence Within the Economy . . . 495
16.4.2 Divergence Among Countries . . . 496
16.5 Limits to Growth . . . 497

17 Price Level . . . 509
17.1 Price Structure . . . 509
17.2 Monetary Condition . . . 511
17.2.1 Introduction to Monetary Theories . . . 512
17.2.2 Definition of Money . . . 518
17.2.3 Velocity of Money . . . 519
17.2.4 Equation of Bubbles . . . 522
17.2.5 Monetary Recursive Equation . . . 524
17.3 Price Equation . . . 525
17.3.1 Pricing Mechanism in the Modern Economy . . . 526
17.3.2 Price Equation . . . 528
17.3.3 Feedback Mechanism of Price Transmission . . . 532
17.4 Two Issues of Price . . . 535
17.4.1 Price Stability . . . 535
17.4.2 Stagflation . . . 538

Part III Trading Evolution

18 System Evolution 543
18.1 Essence of System Evolution 543
18.2 Direction of System Evolution 548
18.2.1 Academic Debate Over the Evolution Direction 549
18.2.2 Social Evolution Led by Efficiency 552
18.2.3 Approaches to Achieve Efficiency 558
18.2.4 Efficiency Structure and Its Improvement 565
18.3 Evolutionary Effects 566
18.3.1 Effect of External Trading Cost 567
18.3.2 Effect of Strategy Set 568
18.3.3 Effect of Trading Base 571

19 Measurement of Evolution 573
19.1 Review of Academic Research 573
19.2 Dimension of System Evolution 576
19.3 Geometric Measurement 579
19.3.1 Measurement of Technological Evolution 580
19.3.2 Measurement of Knowledge Evolution 582
19.3.3 Measurement of Institutional Evolution 585
19.4 Comprehensive Measurement 586

20 Evolutionary Model 593
20.1 Evolutionary System 593
20.2 System Evolution 601
20.3 Evolutionary Model 606
20.4 Evolutionary Equilibrium 613
20.4.1 The Unitary Equilibrium 615
20.4.2 The Staggered Equilibrium 616
20.4.3 The Stalemated Equilibrium 617
20.5 Evolutionary Cycle 618

21 Technological Evolution 623
21.1 Technological Progress 624
21.1.1 Ways to Achieve Technological Progress 624
21.1.2 Technology Import Equation 627
21.1.3 Principle of Acceleration of Technological Progress . . . 635
21.1.4 Principle of Diminishing Effect of Innovation 636
21.2 Technology Distribution 637
21.2.1 Distribution of Technology Among Agents 638
21.2.2 Spatial Distribution of Technology 640
21.2.3 Redistribution of Technology 644
21.3 Effect of Technological Progress 645

22 Knowledge Evolution . . . 649
22.1 Knowledge System . . . 650
22.2 Knowledge Innovation . . . 658
22.3 Knowledge Spread . . . 664
22.4 Shared Knowledge . . . 669
22.5 Culture and Knowledge . . . 672

23 Institutional Evolution . . . 675
23.1 Definition of Institution . . . 675
23.1.1 Concept of Institution . . . 675
23.1.2 Institution and State . . . 680
23.1.3 Institution and Judiciary . . . 683
23.1.4 Institution and Morality . . . 685
23.2 Polity . . . 687
23.3 Institutional Game . . . 696
23.4 Maintenance of Institutions . . . 708
23.4.1 Deviation from Target . . . 709
23.4.2 Reform Damping . . . 712
23.4.3 Maintenance Model . . . 715
23.5 Evolution of Institutional Efficiency . . . 718
23.5.1 Evolutionary Mechanism of Institutional Efficiency . . . 718
23.5.2 Evaluation of Institutional Efficiency . . . 721

24 Phase Evolution . . . 725
24.1 Characteristics of Phase Structure . . . 725
24.2 Trading Phase Cluster . . . 727
24.3 Evolution of Industrial Structure . . . 730
24.3.1 Spontaneous Upgrade of the Industry . . . 730
24.3.2 Cost of Industrial Upgrading . . . 734
24.3.3 Approaches of Industrial Upgrading . . . 735
24.3.4 Sequence of Industrial Upgrading . . . 737
24.3.5 Industrial Structure Compression . . . 739
24.3.6 Concentration Tendency in the Industry . . . 741

25 Network Evolution . . . 745
25.1 Evolution of Trading Network Structure . . . 745
25.2 Expansion of the Trading Network . . . 753
25.3 Compactification of the Trading Network . . . 759
25.4 Flattening of the Trading Network . . . 760
25.5 Phase Multiplication of the Trading Network . . . 761
25.6 Polarization of the Trading Network . . . 762

26 Law of Evolution . . . 769
26.1 Principle of Evolution Irreversibility . . . 770
26.2 Principle of Coevolution . . . 772

26.3 Principle of Advantage of Openness 781
26.4 Principle of Relaxation Balance 784
26.5 Principle of Speed Regression 792

Bibliography 801
