CONTENTS

Preface and Acknowledgments	xv
Purpose of this book	xv
Organization of this book	xv
Summary	xvi
Foreword	xix
Introduction	xxiii
The future of green buildings	xxiii
Social and cultural change	xxiv
Technological changes	xxiv
Economic changes	xxv
Political and legal changes	xxv
Industry practices	xxv
Certification programs	xxvi
The marketing dilemma	xxvi
Part I: The Green Building Market	I
1 What is a Green Building?	3
Green building characteristics	3
The LEED rating systems	7
Other green building rating systems	13
Typical green building measures	13
The case for high-performance buildings	14
Drivers of green building market growth	18
Barriers to green building market growth	23
2 Today's Green Building Market	26
Green building market leaders	26
Green building market surveys	30
LEED project trends in 2007	30
Current market impact of green buildings	34
LEED rating system use	44
Use of certification programs for green building projects	44

3	The Business Case for Green Buildings	52
	Incentives and impediments to green buildings	52
	Benefits that build a business case	54
	Who benefits?	65
4	Costs of Green Buildings	69
	High-performance on a budget	70
	Cost drivers for green buildings	70
	The 2003 cost study for the State of California	71
	Davis Langdon cost studies	72
	The 2004 General Services Administration Cost Study	74
	Soft costs for green building projects	75
	The green schools report	76
	Using integrated design to reduce costs	76
5	Vertical Markets for Green Buildings	81
	Commercial offices	82
	Educational buildings	85
	Public facilities	94
	Healthcare and hospital facilities	97
	High-rise housing	98
6	Specialty Markets for Sustainable Design	102
	Green commercial interiors	102
	Existing building sustainability upgrades	106
	Urban planning and design	110
	Mixed-use development	113
	Greening the retail sector	114
	Green hotels and resorts	117
	Large public facilities: transportation and sports	119
	International markets	121
7	Green Building Technologies	126
	Green roofs	126
	Demand for specific green building measures in LEED-NC certified projects	126
	Energy-efficient technologies	131
	Marketing certified wood products for green building projects	135
	Marketing solar energy systems	138
8	Experiences of Green Building Marketing	149
	Surveys of green building marketing	150
	One firm's approach: Bruner/Cott Architects	154

Case study: SERA Architects, Inc.	155
Recommendations for marketers and practitioners	156
Case study: Thomas Hacker Architects, Inc.	157
A fundamental marketing problem	159
Case study: Turner Construction Company	160
Part 2: Marketing Sustainable Design Services	163
9 Contemporary Marketing Theory and Practice	165
Understanding the “diffusion of innovations”	165
Green buildings as an innovative product	169
Two other ways to understand innovation diffusion	172
Understanding segmentation, targeting, positioning and differentiation	173
Competitive strategy	180
Particular issues for marketing green building services	184
10 Sustainable Design Marketing Tactics	187
Who is using LEED?	188
Roles of building professionals	190
Case study: Green building roles for structural and civil engineers	191
Greening a design firm	193
Assessing sustainable design marketing strategy	193
Integrating sustainable design into marketing programs	195
Business development	200
Marketing tactics that work	202
Developing a sustainable design focus	203
Integrating green design and marketing activities	205
Using diffusion theory to focus your marketing efforts	206
Case study: Mithun	207
11 Challenges by Green Marketing Dynamics	210
Marketing requirements for service firms	210
Changing the DNA of a design firm	214
Changing the DNA of a major construction firm:	218
Swinerton Builders	
The people problem	221
Part 3: The Future of Green Building Marketing	227
12 Seven Keys to Sustainable Design Marketing	229
The seven keys	230
Marketing as an evolving strategy	239
Understanding the demand for green buildings	239

Designing marketing materials	243
Ensuring client satisfaction after project completion	244
13 The Future of Green Buildings	246
Green building growth rates by market sector	246
Commercial green building growth rates	247
The rapid rise of the green residential sector	249
The larger picture: carbon reduction	250
Continuing barriers to green buildings and green development	251
Future LEED versions	252
Beyond LEED	255
Appendix 1: Green Building Resources	259
Bibliography	259
Conferences	260
Books	260
Periodicals	262
Websites	263
Selected articles	264
Organizations	264
Appendix 2: LEED Rating Systems Comparison	266
Appendix 3: Acronym Reference List	270
Author Biography	272
Index	275
