

# Handbook of hygiene control in the food industry

Edited by  
H. L. M. Lelieveld, M. A. Mostert and J. Holah

CRC Press  
Boca Raton Boston New York Washington, DC

WOODHEAD PUBLISHING LIMITED  
Cambridge England

# Contents

<i>Contributor contact details</i> .....	xvii
<i>Preface</i> .....	xxiii
<b>1 Introduction</b> .....	1
<i>S. Notermans and S. C. Powell, Lancashire Postgraduate School of Medicine and Health, UK, and E. Hoornstra, TNO Nutrition and Food Research, The Netherlands</i>	
1.1 Introduction: the evolution of food hygiene .....	1
1.2 Definitions of hygiene .....	11
1.3 Sources of food contamination .....	13
1.4 Hygiene control measures in food processing .....	17
1.5 Future trends .....	21
1.6 References .....	24
<b>Part I Risks</b>	
<b>2 The range of microbial risks in food processing</b> .....	31
<i>M. H. Zwietering and E. D. van Asselt, Wageningen University, The Netherlands</i>	
2.1 Introduction: the risk of microbial foodborne disease .....	31
2.2 The control of food safety .....	37
2.3 Using food safety objectives to manage microbial risks .....	38
2.4 Conclusions .....	44
2.5 References .....	44

<b>3 Biofilm risks</b> .....	46
<i>G. Wirtanen and S. Salo, VTT Biotechnology, Finland</i>	
3.1 Introduction: biofilm formation and detection .....	46
3.2 Pathogens in biofilms .....	50
3.3 Biofilms and microbial contamination in food processing ....	57
3.4 Prevention of biofilm formation and biofilm removal .....	58
3.5 Future trends .....	60
3.6 Sources of further information and advice .....	61
3.7 References .....	62
<b>4 Pathogen resistance to sanitisers</b> .....	69
<i>A. J. van Asselt and M. C. te Giffel, NIZO Food Research, The Netherlands</i>	
4.1 Introduction: disinfection methods .....	69
4.2 Factors influencing the effectiveness of cleaning and disinfection .....	70
4.3 Strategies for optimisation of cleaning and disinfection .....	78
4.4 Types of pathogen response .....	82
4.5 Predicting microbial resistance .....	84
4.6 Future trends .....	86
4.7 Sources of further information and advice .....	88
4.8 References .....	88
<b>5 Aerosols as a contamination risk</b> .....	93
<i>D. Burfoot, Silsoe Research Institute, UK</i>	
5.1 Introduction .....	93
5.2 Factors affecting aerosol contamination .....	94
5.3 Aerosol generation .....	95
5.4 Aerosol dispersal .....	96
5.5 Ways to reduce the risk from airborne contamination .....	98
5.6 Future trends .....	100
5.7 Sources of further information and advice .....	100
5.8 References .....	101
<b>6 Consumer perceptions of risks from food</b> .....	103
<i>L. J. Frewer and A. R. H. Fischer, Wageningen University, The Netherlands</i>	
6.1 Introduction .....	103
6.2 Risk perceptions of consumers are not the same as technical risk assessments .....	104
6.3 Risk perception and barriers to effective risk communication	107
6.4 Developing an effective risk communication strategy .....	108
6.5 Application of combined consumer behaviour – food safety studies .....	112

6.6	The need for more intensive cooperation between natural and social scientists .....	112
6.7	Conclusions .....	115
6.8	References .....	116

## Part II Improving design

<b>7</b>	<b>Improving building design</b> .....	123
	<i>D. J. Graham, Graham Sanitary Design Consulting Limited, USA</i>	
7.1	Introduction: sanitation and design .....	123
7.2	Applying the HACCP concept to building design .....	125
7.3	Site selection and plant layout .....	127
7.4	Water supply and waste disposal .....	128
7.5	Landscaping and the surrounding area .....	128
7.6	Roof areas .....	130
7.7	Loading bays .....	131
7.8	Entry/exit points and external lighting .....	132
7.9	Inside the plant .....	133
7.10	Future trends .....	145
7.11	Bibliography .....	147
<b>8</b>	<b>Improving zoning within food processing plants</b> .....	148
	<i>J. Holah, Campden and Chorleywood Food Research Association, UK</i>	
8.1	Introduction .....	148
8.2	Barrier 1: Site .....	150
8.3	Barrier 2: Factory building .....	151
8.4	Barrier 3: High-care/risk areas .....	155
8.5	Barrier 4: Finished product enclosure .....	165
8.6	References .....	167
<b>9</b>	<b>Improving the design of floors</b> .....	168
	<i>B. Carpentier, Agence Française de Sécurité Sanitaire des Aliments, France</i>	
9.1	Introduction .....	168
9.2	What are floors made of? .....	168
9.3	Requirements for flooring materials .....	173
9.4	Test methods .....	178
9.5	Construction of floors .....	180
9.6	Future trends .....	181
9.7	Sources of further information and advice .....	181
9.8	References .....	182

<b>10 Improving the design of walls</b> .....	185
<i>D. J. Graham, Graham Sanitary Design Consulting Limited, USA</i>	
10.1 Introduction .....	185
10.2 Exterior walls .....	185
10.3 Interior walls .....	188
10.4 Bibliography .....	190
<b>11 Improving the hygienic design of closed equipment</b> .....	191
<i>A. Friis and B. B. Jensen, Technical University of Denmark</i>	
11.1 Introduction: the hygienic performance of closed equipment	191
11.2 The importance of flow parameters in hygienic performance	192
11.3 Computational fluid dynamics models for optimising hygiene	197
11.4 Applications of computational fluid dynamics in improved hygienic design .....	200
11.5 Future trends .....	207
11.6 Sources of further information and advice .....	208
11.7 References .....	209
<b>12 Improving the hygienic design of heating equipment</b> .....	212
<i>A. P. M. Hasting, Tony Hasting Consulting, UK</i>	
12.1 Introduction .....	212
12.2 Heat exchanger design .....	213
12.3 Developments in heat exchanger design .....	215
12.4 Future trends .....	217
12.5 Conclusions .....	218
12.6 References .....	219
<b>13 Improving the hygienic design of equipment in handling dry materials</b> .....	220
<i>K. Mager, Quest International, The Netherlands</i>	
13.1 Introduction: principles of hygienic design .....	220
13.2 Dry particulate materials and hygienic processing .....	220
13.3 Cleaning regimes .....	221
13.4 Design principles .....	222
13.5 Types of equipment in dry material handling areas .....	226
13.6 Conclusions: improving hygiene in powder processing .....	227
13.7 References .....	227
<b>14 Improving the hygienic design of packaging equipment</b> .....	228
<i>C. J. de Koning, CFS b.v., The Netherlands</i>	
14.1 Introduction .....	228
14.2 Requirements for hygienic design .....	229
14.3 Application of ISO 14159 .....	229
14.4 Other standards and guidelines .....	237
14.5 Conclusion .....	238

<b>15 Improving the hygienic design of electrical equipment</b> .....	239
<i>L. Uiterlinden, GTI Process Solutions BV, The Netherlands,</i>	
<i>H. M. J. van Eijk, Unilever R&amp;D Vlaardingen, The Netherlands and</i>	
<i>A. Griffin, Unilever – Port Sunlight, UK</i>	
15.1 Introduction .....	239
15.2 Hygienic zoning .....	240
15.3 Hygienic electrical design principles .....	242
15.4 Installation requirements for medium hygiene areas .....	244
15.5 Installation requirements for high-hygiene areas .....	250
15.6 General requirements for construction materials .....	257
15.7 Future trends .....	261
15.8 Bibliography .....	262
15.9 Appendix: abbreviations .....	262
<b>16 Improving the hygienic design of valves</b> .....	263
<i>F. T. Schonrock, 3-A Sanitary Standards Inc., USA</i>	
16.1 Introduction .....	263
16.2 Valve types .....	263
16.3 Hygienic aspects of valve design .....	268
16.4 Current guidelines, standards, and references .....	272
<b>17 Improving the hygienic design of pipes</b> .....	273
<i>H. Hoogland, Unilever R&amp;D Vlaardingen, The Netherlands</i>	
17.1 Introduction .....	273
17.2 Piping design: good practice .....	273
17.3 Materials of construction .....	274
17.4 Product recovery .....	275
17.5 Microbial growth in piping systems .....	276
17.6 Plant design .....	277
17.7 References .....	278
<b>18 Improving the hygienic design of pumps</b> .....	279
<i>R. Stahlkopf, Tuchenhagen GmbH, Germany</i>	
18.1 Introduction: types of pump used in food processing .....	279
18.2 Components used in pumps .....	279
18.3 Cleanability, surface finish and other requirements .....	284
18.4 Materials and motor design .....	285
18.5 Summary .....	285
18.6 Bibliography .....	286
<b>19 Improving hygienic control by sensors</b> .....	287
<i>M. Bücking, Fraunhofer IME, Germany and J. E. Haugen, Matforsk AS,</i>	
<i>Norway</i>	
19.1 Introduction .....	287
19.2 Sensor types .....	289

19.3	Common industrial applications and future trends .....	298
19.4	References .....	301

**Part III Improving hygiene management and methods**

**20 Risk assessment in hygiene management .....** 309

*I. H. Huisman, Nutricia, The Netherlands and E. Espada Aventin, Unilever R&D Vlaardingen, The Netherlands*

20.1	Introduction .....	309
20.2	Quality management and risk assessment .....	312
20.3	Examples of risk assessments .....	316
20.4	Future trends .....	321
20.5	Sources of further information and advice .....	322
20.6	References .....	322

**21 Good manufacturing practice (GMP) in the food industry .....** 324

*J. R. Blanchfield, Consultant, UK*

21.1	Introduction .....	324
21.2	Effective manufacturing operations and food control .....	327
21.3	Personnel and training .....	329
21.4	Documentation .....	330
21.5	Premises, equipment, product and process design .....	330
21.6	Manufacturing and operating procedures .....	331
21.7	Ingredients and packaging materials .....	332
21.8	Managing production operations: intermediate and finished products .....	335
21.9	Storage and movement of product .....	336
21.10	Special requirements for certain foods .....	337
21.11	Rejection of product and complaints handling .....	340
21.12	Product recall and other emergency procedures .....	342
21.13	'Own label' and other contract manufacture .....	344
21.14	Good control laboratory practice (GLP) .....	344
21.15	Future trends .....	346
21.16	References .....	347

**22 The use of standard operating procedures (SOPs) .....** 348

*R. H. Schmidt, University of Florida, USA and P. D. Pierce, Jr, US Army Veterinary Corps*

22.1	Introduction: defining standard operating procedures (SOPs) .....	348
22.2	The key components of SOPs and SOP programs .....	349
22.3	SOP requirements under regulatory HACCP programs .....	355
22.4	Common problems in implementing SOPs effectively .....	358
22.5	Sources of further information .....	360
22.6	References .....	361

<b>23</b>	<b>Managing risks from allergenic residues</b> .....	363
	<i>R. W. R. Crevel, Unilever Colworth, UK</i>	
23.1	Introduction .....	363
23.2	Food allergy and product safety .....	364
23.3	Management of food allergy risks .....	366
23.4	Role of allergen detection and other considerations .....	369
23.5	Future trends .....	374
23.6	References .....	375
<b>24</b>	<b>Managing contamination risks from food packaging materials</b> .....	378
	<i>L. Raaska, VTT Biotechnology, Finland</i>	
24.1	Introduction .....	378
24.2	Potential microbiological problems with packaging .....	380
24.3	Improving hygienic production and management .....	386
24.4	Future trends .....	391
24.5	Sources of further information and advice .....	392
24.6	References .....	392
<b>25</b>	<b>Improving hygiene in food transportation</b> .....	396
	<i>E. U. Thoden van Velzen and L. J. S. Lukasse, Wageningen University and Research Centre, The Netherlands</i>	
25.1	Introduction .....	396
25.2	Legislation .....	396
25.3	Implementation of the current legislation .....	397
25.4	Examples .....	398
25.5	Temperature management .....	399
25.6	Avoiding cross-contamination .....	403
25.7	Future trends .....	404
25.8	Acknowledgements .....	405
25.9	References and notes .....	405
<b>26</b>	<b>Improving the control of insects in food processing</b> .....	407
	<i>E. Shaaya, The Volcani Center, Israel, R. Maller, Pepsi Co., USA</i> <i>M. Kostyukovsky, The Volcani Center, Israel and L. Maller,</i> <i>United States Department of Agriculture</i>	
26.1	Introduction .....	407
26.2	The grain bulk as an ecosystem .....	408
26.3	Moisture migration in the grain bulk .....	411
26.4	Dry- and wet-grain heating .....	412
26.5	Insects in stored products .....	414
26.6	Measures of control .....	417
26.7	Future trends .....	423
26.8	Acknowledgement .....	424
26.9	Bibliography .....	424

<b>27</b>	<b>Improving cleaning-in-place (CIP)</b> .....	425
	<i>K. Lorenzen, Tuchenhagen GmbH, Germany</i>	
27.1	Introduction: limitations in current CIP systems .....	425
27.2	Cleaning and disinfection parameters .....	426
27.3	Factors determining the effectiveness of a CIP system .....	429
27.4	Improving CIP systems .....	438
27.5	Future trends .....	443
27.6	References and further reading .....	444
<b>28</b>	<b>Improving cleaning-out-of-place (COP)</b> .....	445
	<i>L. Keener, International Product Safety Consultants, USA</i>	
28.1	Introduction .....	445
28.2	Best practices in developing an effective COP process .....	446
28.3	Defining the process .....	447
28.4	Elaboration of process parameters .....	448
28.5	Validation .....	463
28.6	Records and process documentation .....	464
28.7	Summary .....	465
28.8	Bibliography .....	466
<b>29</b>	<b>Improving the cleaning of heat exchangers</b> .....	468
	<i>P. J. Fryer and G. K. Christian, University of Birmingham, UK</i>	
29.1	Introduction .....	468
29.2	Processing effects on fouling and cleaning .....	472
29.3	Investigations into cleaning process parameters .....	479
29.4	Ways of improving cleaning .....	486
29.5	Conclusions .....	490
29.6	Acknowledgements .....	491
29.7	References .....	491
<b>30</b>	<b>Improving the cleaning of tanks</b> .....	497
	<i>S. Salo, VTT Biotechnology, Finland, A. Friis, Technical University of Denmark and G. Wirtanen, VTT Biotechnology, Finland</i>	
30.1	Introduction to cleaning tanks .....	497
30.2	Factors affecting cleaning efficacy .....	498
30.3	Hygienic design test methods .....	501
30.4	Detecting the cleanliness of tanks .....	502
30.5	Using computational fluid dynamics (CFD) to assess cleanability of closed process lines .....	503
30.6	Future trends .....	504
30.7	References .....	504
<b>31</b>	<b>Ozone decontamination in hygiene management</b> .....	507
	<i>L. Fielding and R. Bailey, University of Wales Institute Cardiff, UK</i>	
31.1	Introduction .....	507

31.2	Historical uses of ozone .....	509
31.3	The effect of ozone on microorganisms .....	510
31.4	Undesirable effects of ozone .....	510
31.5	Practical applications of ozone .....	511
31.6	Future potential .....	513
31.7	Conclusion .....	513
31.8	Sources of further information and advice .....	513
31.9	References .....	514
<b>32</b>	<b>Enzymatic cleaning in food processing .....</b>	<b>516</b>
	<i>A. Grasshoff, Federal Dairy Research Centre, Germany</i>	
32.1	Introduction .....	516
32.2	Enzyme-based cleaning procedures .....	518
32.3	Laboratory trials of enzyme-based cleaning .....	522
32.4	Field trials .....	531
32.5	Risks .....	534
32.6	Future trends .....	535
32.7	References .....	537
<b>33</b>	<b>Contamination routes and analysis in food processing environments .....</b>	<b>539</b>
	<i>J. Lundén, J. Björkroth and H. Korkeala, University of Helsinki, Finland</i>	
33.1	Introduction to contamination analysis in the food industry ..	539
33.2	Different types of contamination analyses .....	540
33.3	<i>Listeria monocytogenes</i> contamination in food processing environments .....	543
33.4	Psychrotrophic lactic acid bacterium contamination in meat processing environments .....	547
33.5	Applying knowledge from contamination analysis to improve hygienic food manufacturing .....	550
33.6	Future trends .....	551
33.7	Sources of further information and advice .....	551
33.8	References .....	551
<b>34</b>	<b>Testing surface cleanability in food processing .....</b>	<b>556</b>
	<i>J. Verran, Manchester Metropolitan University, UK</i>	
34.1	Introduction .....	556
34.2	Microorganisms .....	557
34.3	Hygienic surfaces .....	560
34.4	Organic soil .....	564
34.5	Future trends .....	567
34.6	Sources of further information and advice .....	568
34.7	Acknowledgements .....	568
34.8	References .....	568

<b>35</b>	<b>Improving the monitoring of fouling, cleaning and disinfection in closed process plant</b> .....	572
	<i>A. P. M. Hasting, Tony Hasting Consulting, UK</i>	
35.1	Introduction .....	572
35.2	Background .....	573
35.3	Current approaches to monitoring .....	574
35.4	Laboratory/pilot-scale studies .....	581
35.5	Industry requirements and potential benefits .....	584
35.6	Future trends .....	585
35.7	Conclusions .....	585
35.8	References .....	586
<b>36</b>	<b>Improving surface sampling and detection of contamination</b> ...	588
	<i>C. Griffith, University of Wales Institute Cardiff, UK</i>	
36.1	Introduction .....	588
36.2	Microbiological surface sampling .....	596
36.3	Non-microbiological surface sampling .....	603
36.4	Monitoring/sampling protocols and strategies .....	608
36.5	Future trends .....	614
36.6	References .....	616
<b>37</b>	<b>Improving air sampling</b> .....	619
	<i>H. Miettinen, VTT Biotechnology, Finland</i>	
37.1	Introduction .....	619
37.2	Microbial viability in the air .....	620
37.3	Why, how and what to sample .....	621
37.4	Bioaerosols and bioaerosol samplers .....	622
37.5	Air sampling methods .....	624
37.6	Bioaerosol assay methods .....	632
37.7	Interpretation of bioaerosol results .....	635
37.8	Future trends .....	636
37.9	References and further reading .....	637
<b>38</b>	<b>Testing the effectiveness of disinfectants and sanitisers</b> .....	641
	<i>J.-Y. Maillard, Cardiff University, UK</i>	
38.1	Introduction .....	641
38.2	Types of biocidal products .....	642
38.3	Criteria for testing biocidal action .....	651
38.4	Tests for disinfectants and sanitisers .....	656
38.5	Test limitations and scope for improvement .....	661
38.6	Future trends .....	663
38.7	Sources of further information and advice .....	664
38.8	References .....	665

<b>39 Traceability of cleaning agents and disinfectants</b> .....	672
<i>D. Rosner, Ecolab GmbH &amp; Co., Germany</i>	
39.1 Introduction .....	672
39.2 General issues in tracing of cleaning solutions and hygiene products .....	673
39.3 Particular issues in tracing of hygiene products .....	675
39.4 Conclusion .....	683
39.5 Future trends .....	683
<b>40 Improving hygiene auditing</b> .....	684
<i>P. Overbosch, Kraft Foods, Germany</i>	
40.1 Introduction .....	684
40.2 Why have a hygiene improvement audit in the first place? ..	686
40.3 Auditing and the hierarchy of a controlled system .....	686
40.4 Purposes of an auditing system .....	688
40.5 Designing a system for improvement audits .....	689
40.6 Performing the audit .....	690
40.7 References .....	696
<i>Index</i> .....	697
