

# RESEARCH METHODS for the Behavioral Sciences

**FOURTH EDITION**

**Charles Stangor**  
University of Maryland

---

Australia • Brazil • Japan • Korea • Mexico • Singapore • Spain • United Kingdom • United States

# Brief Contents

	Preface	xv	
<b>PART ONE</b>	<b>GETTING STARTED</b>		<b>1</b>
	<b>1</b>	Introduction to Research	2
	<b>2</b>	Developing the Research Hypothesis	25
	<b>3</b>	Ethics in Research	41
<b>PART TWO</b>	<b>MEASURING AND DESCRIBING</b>		<b>65</b>
	<b>4</b>	Measures	66
	<b>5</b>	Reliability and Validity	88
	<b>6</b>	Surveys and Sampling	106
	<b>7</b>	Naturalistic Methods	127
<b>PART THREE</b>	<b>TESTING RESEARCH HYPOTHESES</b>		<b>141</b>
	<b>8</b>	Hypothesis Testing and Inferential Statistics	142
	<b>9</b>	Correlational Research Designs	159
	<b>10</b>	Experimental Research: One-Way Designs	183
<b>PART FOUR</b>	<b>DESIGNING AND INTERPRETING RESEARCH</b>		<b>205</b>
	<b>11</b>	Experimental Research: Factorial Designs	206
	<b>12</b>	Experimental Control and Internal Validity	227
	<b>13</b>	External Validity	254
	<b>14</b>	Quasi-Experimental Research Designs	272
APPENDIX A	Reporting Research Results	290	
APPENDIX B	Data Preparation and Univariate Statistics	338	
APPENDIX C	Bivariate Statistics	358	
APPENDIX D	Multivariate Statistics	374	
APPENDIX E	Statistical Tables	395	
APPENDIX F	Using Computers to Collect Data	415	
	Glossary	418	
	References	429	
	Index	436

Preface xv

## **PART ONE GETTING STARTED 1**

### **1 Introduction to Research 2**

Behavioral Research	4
Everyday Science Versus Empirical Research	5
Relying on Our Intuition	6
Discovering the Limitations of Using Intuition	6
The Scientific Method	8
Values Versus Facts in Scientific Research	8
Basic and Applied Research	11
The Importance of Studying Research Methods	12
Evaluating Research Reports	12
Conducting Research	12
Thinking Critically About Research	13
Research Designs: Three Approaches to Studying Behavior	13
Descriptive Research: Assessing the Current State of Affairs	14
Correlational Research: Seeking Relationships Among Variables	16
Experimental Research: Understanding the Causes of Behavior	18
The Selection of an Appropriate Method	19
Current Research in the Behavioral Sciences: Preferences for Brands That Contain the Letters of Our Own Name	20
SUMMARY	21
KEY TERMS	22
REVIEW AND DISCUSSION QUESTIONS	23
RESEARCH PROJECT IDEAS	23

### **2 Developing the Research Hypothesis 25**

Getting Ideas	26
Solving Important Real-World Problems	27
Using Observation and Intuition	27
Using Existing Research	28

<b>Doing a Literature Search</b>	<b>30</b>
Locating Sources of Information	30
Conducting the Search	31
<b>Formalizing Ideas Into Research Hypotheses</b>	<b>35</b>
Laws	35
Theories	35
The Research Hypothesis	37
<b>SUMMARY</b>	<b>38</b>
<b>KEY TERMS</b>	<b>39</b>
<b>REVIEW AND DISCUSSION QUESTIONS</b>	<b>39</b>
<b>RESEARCH PROJECT IDEAS</b>	<b>39</b>

<b>3 Ethics in Research</b>	<b>41</b>
<b>What Is Ethical Research?</b>	<b>42</b>
<b>Protecting Research Participants From Physical and Psychological Harm</b>	<b>44</b>
Types of Threats	44
The Potential for Lasting Impact	46
<b>Providing Freedom of Choice</b>	<b>47</b>
Conducting Research Outside the Laboratory	47
Securing Informed Consent	48
Weighing Informed Consent Versus the Research Goals	50
<b>Maintaining Awareness of Power Differentials</b>	<b>51</b>
Avoiding Abuses of Power	51
Respecting Participants' Privacy	51
<b>Honestly Describing the Nature and Use of the Research</b>	<b>52</b>
When Deception Is Necessary	53
Simulation Studies: An Alternative to Deception	53
The Consequences of Deception	54
Debriefing	54
<b>Using Animals as Research Participants</b>	<b>56</b>
<b>Ensuring That Research Is Ethical</b>	<b>57</b>
The Institutional Review Board	59
The Researcher's Own Ethics	60
Correctly and Honestly Reporting Research Results	60
<b>SUMMARY</b>	<b>61</b>
<b>KEY TERMS</b>	<b>61</b>
<b>REVIEW AND DISCUSSION QUESTIONS</b>	<b>62</b>
<b>RESEARCH PROJECT IDEAS</b>	<b>62</b>

## PART TWO

**MEASURING AND DESCRIBING****65****4****Measures****66**

<b>Fundamentals of Measurement</b>	<b>67</b>
<b>Operational Definition</b>	<b>67</b>
Converging Operations	68
Conceptual and Measured Variables	69
Nominal and Quantitative Variables	70
Measurement Scales	71
<b>Self-Report Measures</b>	<b>72</b>
Free-Format Self-Report Measures	72
Fixed-Format Self-Report Measures	74
Reactivity as a Limitation in Self-Report Measures	79
<b>Behavioral Measures</b>	<b>80</b>
Nonreactive Measures	82
Psychophysiological Measures	82
<b>Choosing a Measure</b>	<b>83</b>
<b>Current Research in the Behavioral Sciences:</b>	
<b>Using Multiple Measured Variables to Assess the</b>	
<b>Conceptual Variable of Panic Symptoms</b>	<b>84</b>
<b>SUMMARY</b>	<b>86</b>
<b>KEY TERMS</b>	<b>86</b>
<b>REVIEW AND DISCUSSION QUESTIONS</b>	<b>87</b>
<b>RESEARCH PROJECT IDEAS</b>	<b>87</b>

**5****Reliability and Validity****88**

<b>Random and Systematic Error</b>	<b>89</b>
<b>Reliability</b>	<b>91</b>
Test-Retest Reliability	91
Reliability as Internal Consistency	92
Interrater Reliability	95
<b>Construct Validity</b>	<b>95</b>
Face Validity	96
Content Validity	97
Convergent and Discriminant Validity	97
Criterion Validity	99
<b>Improving the Reliability and Validity of Measured Variables</b>	<b>100</b>
<b>Comparing Reliability and Validity</b>	<b>101</b>
<b>Current Research in the Behavioral Sciences: The Hillyer-Joynes</b>	
<b>Kinematics Scale of Locomotion in Rats With Spinal Injuries</b>	<b>103</b>

SUMMARY	104
KEY TERMS	104
REVIEW AND DISCUSSION QUESTIONS	105
RESEARCH PROJECT IDEAS	105

## **6 Surveys and Sampling** 106

<b>Surveys</b>	<b>107</b>
Interviews	107
Questionnaires	108
Use of Existing Survey Data	109
<b>Sampling and Generalization</b>	<b>110</b>
Definition of the Population	110
Probability Sampling	110
Sampling Bias and Nonprobability Sampling	112
<b>Summarizing the Sample Data</b>	<b>114</b>
Frequency Distributions	114
Descriptive Statistics	118
<b>Sample Size and the Margin of Error</b>	<b>122</b>
<b>Current Research in the Behavioral Sciences:</b>	
Assessing Americans' Attitudes Toward Health Care	123
SUMMARY	124
KEY TERMS	124
REVIEW AND DISCUSSION QUESTIONS	125
RESEARCH PROJECT IDEAS	126

## **7 Naturalistic Methods** 127

<b>Naturalistic Research</b>	<b>128</b>
<b>Observational Research</b>	<b>129</b>
The Unacknowledged Participant	130
The Acknowledged Participant	131
Acknowledged and Unacknowledged Observers	132
<b>Case Studies</b>	<b>132</b>
<b>Systematic Coding Methods</b>	<b>133</b>
Deciding What to Observe	134
Deciding How to Record Observations	134
Choosing Sampling Strategies	135
<b>Archival Research</b>	<b>135</b>
<b>Current Research in the Behavioral Sciences:</b>	
Detecting Psychopathy From Thin Slices of Behavior	137
SUMMARY	138
KEY TERMS	139

REVIEW AND DISCUSSION QUESTIONS	139
RESEARCH PROJECT IDEAS	139

## PART THREE

**TESTING RESEARCH HYPOTHESES 141****8 Hypothesis Testing and Inferential Statistics 142**

Probability and Inferential Statistics	143
Sampling Distributions and Hypothesis Testing	145
The Null Hypothesis	146
Testing for Statistical Significance	147
Reduction of Inferential Errors	149
Type 1 Errors	149
Type 2 Errors	150
Statistical Power	151
The Tradeoff Between Type 1 and Type 2 Errors	152
Statistical Significance and the Effect Size	153
Practical Uses of the Effect-Size Statistic	154
SUMMARY	156
KEY TERMS	156
REVIEW AND DISCUSSION QUESTIONS	157
RESEARCH PROJECT IDEAS	157

**9 Correlational Research Designs 159**

Associations Among Quantitative Variables	160
Linear Relationships	162
Nonlinear Relationships	162
Statistical Assessment of Relationships	163
The Pearson Correlation Coefficient	163
The Chi-Square Statistic	164
Multiple Regression	168
Correlation and Causality	170
Interpreting Correlations	170
Using Correlational Data to Test Causal Models	173
When Correlational Designs Are Appropriate	177
Current Research in the Behavioral Sciences: Moral Conviction, Religiosity, and Trust in Authority	179
SUMMARY	180
KEY TERMS	180
REVIEW AND DISCUSSION QUESTIONS	181
RESEARCH PROJECT IDEAS	181

<b>10</b>	<b>Experimental Research: One-Way Designs</b>	<b>183</b>
	<b>Demonstration of Causality</b> 184	
	Association 184	
	Temporal Priority 185	
	Control of Common-Causal Variables 185	
	<b>One-Way Experimental Designs</b> 185	
	The Experimental Manipulation 186	
	Selection of the Dependent Variable 187	
	Variety and Number of Levels 188	
	<b>Analysis of Variance</b> 190	
	Hypothesis Testing in Experimental Designs 190	
	Between-Groups and Within-Groups Variance Estimates 191	
	The ANOVA Summary Table 191	
	<b>Repeated-Measures Designs</b> 193	
	Advantages of Repeated-Measures Designs 194	
	Disadvantages of Repeated-Measures Designs 194	
	When to Use a Repeated-Measures Design 196	
	<b>Presentation of Experiment Results</b> 197	
	<b>When Experiments Are Appropriate</b> 198	
	<b>Current Research in the Behavioral Sciences:</b>	
	<b>Does Social Exclusion “Hurt”?</b> 199	
	SUMMARY 200	
	KEY TERMS 201	
	REVIEW AND DISCUSSION QUESTIONS 201	
	RESEARCH PROJECT IDEAS 202	

## PART FOUR

**DESIGNING AND INTERPRETING RESEARCH** **205**

<b>11</b>	<b>Experimental Research: Factorial Designs</b>	<b>206</b>
	<b>Factorial Experimental Designs</b> 207	
	The Two-Way Design 208	
	Main Effects 209	
	Interactions and Simple Effects 211	
	The ANOVA Summary Table 211	
	<b>Understanding Interactions</b> 213	
	Patterns of Observed Means 213	
	Interpretation of Main Effects When Interactions Are Present 215	
	<b>More Factorial Designs</b> 216	
	The Three-Way Design 216	
	Factorial Designs Using Repeated Measures 218	

<b>Comparison of the Condition Means in Experimental Designs</b>	<b>219</b>
Pairwise Comparisons	219
Complex Comparisons	221
<b>Current Research in the Behavioral Sciences:</b>	
<b>Using Feelings in the Ultimatum Game</b>	<b>222</b>
<b>SUMMARY</b>	<b>224</b>
<b>KEY TERMS</b>	<b>224</b>
<b>REVIEW AND DISCUSSION QUESTIONS</b>	<b>225</b>
<b>RESEARCH PROJECT IDEAS</b>	<b>225</b>

<b>12</b>	<b>Experimental Control and Internal Validity</b>	<b>227</b>
	<b>Threats to the Validity of Research</b>	<b>228</b>
	<b>Experimental Control</b>	<b>229</b>
	Extraneous Variables	230
	Confounding Variables	230
	<b>Control of Extraneous Variables</b>	<b>231</b>
	Limited-Population Designs	232
	Before-After Designs	232
	Matched-Group Designs	234
	Standardization of Conditions	235
	<b>Creation of Valid Manipulations</b>	<b>236</b>
	Impact and Experimental Realism	236
	Manipulation Checks	237
	Confound Checks	239
	How to Turn Confounding Variables Into Factors	240
	Pilot Testing	240
	<b>Threats to Internal Validity</b>	<b>241</b>
	Placebo Effects	242
	Demand Characteristics	243
	Experimenter Bias	245
	Random Assignment Artifacts	247
	<b>Current Research in the Behavioral Sciences:</b>	
	<b>Testing the “Romantic Red” Hypothesis</b>	<b>248</b>
	<b>SUMMARY</b>	<b>249</b>
	<b>KEY TERMS</b>	<b>250</b>
	<b>REVIEW AND DISCUSSION QUESTIONS</b>	<b>250</b>
	<b>RESEARCH PROJECT IDEAS</b>	<b>251</b>

<b>13</b>	<b>External Validity</b>	<b>254</b>
	Understanding External Validity	255
	Generalization	256
	Generalization Across Participants	256
	Generalization Across Settings	258
	Replications	260
	Exact Replications	260
	Conceptual Replications	260
	Constructive Replications	261
	Participant Replications	262
	Summarizing and Integrating Research Results	263
	Research Programs	264
	Review Papers	264
	Meta-Analysis	264
	Interpretation of Research Literatures	267
	Current Research in the Behavioral Sciences: A Meta-Analysis of the Effectiveness of Current Treatment Approaches for Withdrawal From Tranquilizer Addictions	268
	SUMMARY	269
	KEY TERMS	269
	REVIEW AND DISCUSSION QUESTIONS	270
	RESEARCH PROJECT IDEAS	270
<b>14</b>	<b>Quasi-Experimental Research Designs</b>	<b>272</b>
	Program Evaluation Research	273
	Quasi-Experimental Designs	274
	Single-Group Design	274
	Comparison-Group Design	276
	Single-Group Before-After Design	277
	Comparison-Group Before-After Design	278
	Regression to the Mean as a Threat to Internal Validity	279
	Time-Series Designs	281
	Participant-Variable Designs	283
	Demographic Variables	283
	Personality Variables	284
	Interpretational Difficulties	284
	Single-Participant Designs	284
	Current Research in the Behavioral Sciences: Damage to the Hippocampus Abolishes the Cortisol Response to Psychosocial Stress in Humans	286

	SUMMARY	287	
	KEY TERMS	288	
	REVIEW AND DISCUSSION QUESTIONS	288	
	RESEARCH PROJECT IDEAS	289	
APPENDIX A	<b>Reporting Research Results</b>		<b>290</b>
	Communication of Scientific Knowledge	291	
	Face-to-Face Contact	291	
	Publication in Scientific Journals	292	
	<b>The Research Report</b>	<b>295</b>	
	Headings in APA Format	296	
	Title Page	297	
	Abstract	299	
	Introduction	301	
	Method	303	
	Results	304	
	Discussion	306	
	References	307	
	Footnotes and Author Notes	309	
	Tables and Figures	309	
	<b>Tips on Writing the Research Report</b>	<b>310</b>	
	SUMMARY	311	
	KEY TERMS	311	
	REVIEW AND DISCUSSION QUESTIONS	312	
	RESEARCH PROJECT IDEAS	312	
APPENDIX B	<b>Data Preparation and Univariate Statistics</b>		<b>338</b>
	Preparing Data for Analysis	339	
	Collecting the Data	339	
	Analyzing the Data	340	
	Entering the Data Into the Computer	340	
	Checking and Cleaning the Data	342	
	Dealing with Missing Data	343	
	Deleting and Retaining Data	344	
	Transforming the Data	346	
	<b>Conducting Statistical Analysis</b>	<b>346</b>	
	Descriptive Statistics, Parameters, and Inferential Statistics	346	
	Statistical Notation	347	
	<b>Computing Descriptive Statistics</b>	<b>348</b>	
	Frequency Distributions	348	
	Measures of Central Tendency	349	

	Measures of Dispersion	350	
	Computer Output	351	
	Standard Scores	352	
	The Standard Normal Distribution	352	
	<b>Working With Inferential Statistics</b>	<b>354</b>	
	Unbiased Estimators	354	
	The Central Limit Theorem	354	
	The Standard Error	354	
	Confidence Intervals	355	
	<b>SUMMARY</b>	<b>355</b>	
	<b>KEY TERMS</b>	<b>356</b>	
	<b>REVIEW AND DISCUSSION QUESTIONS</b>	<b>356</b>	
	<b>RESEARCH PROJECT IDEAS</b>	<b>357</b>	
<b>APPENDIX C</b>	<b>Bivariate Statistics</b>		<b>358</b>
	<b>The Pearson Correlation Coefficient</b>	<b>359</b>	
	Calculating $r$	359	
	Obtaining the $p$ -Value	361	
	<b>Contingency Tables</b>	<b>362</b>	
	The Chi-Square Test for Independence	362	
	Kappa	364	
	<b>Bivariate Regression</b>	<b>366</b>	
	The Regression Equation	366	
	The Regression Line	366	
	Partitioning of the Sum of Squares	367	
	<b>One-Way Analysis of Variance</b>	<b>368</b>	
	Computation of a One-Way Between-Participants ANOVA	369	
	The ANOVA Summary Table	371	
	Eta	372	
	<b>SUMMARY</b>	<b>372</b>	
	<b>KEY TERMS</b>	<b>372</b>	
	<b>REVIEW AND DISCUSSION QUESTIONS</b>	<b>373</b>	
	<b>RESEARCH PROJECT IDEAS</b>	<b>373</b>	
<b>APPENDIX D</b>	<b>Multivariate Statistics</b>		<b>374</b>
	<b>Multiple Regression</b>	<b>375</b>	
	Regression Coefficients	376	
	The Multiple Correlation Coefficient ( $R$ )	378	
	Hierarchical and Stepwise Analyses	378	
	Multiple Regression and ANOVA	379	
	<b>Loglinear Analysis</b>	<b>379</b>	

	<b>Means Comparisons</b>	<b>380</b>	
	A Priori Contrast Analysis	380	
	Post Hoc Means Comparisons	382	
	<b>Multivariate Statistics</b>	<b>383</b>	
	Coefficient Alpha	383	
	Exploratory Factor Analysis	384	
	Canonical Correlation and MANOVA	387	
	Structural Equation Analysis	388	
	<b>How to Choose the Appropriate Statistical Test</b>	<b>391</b>	
	<b>SUMMARY</b>	<b>392</b>	
	<b>KEY TERMS</b>	<b>393</b>	
	<b>REVIEW AND DISCUSSION QUESTIONS</b>	<b>393</b>	
	<b>RESEARCH PROJECT IDEAS</b>	<b>394</b>	
<b>APPENDIX E</b>	<b>Statistical Tables</b>		<b>395</b>
	<b>Statistical Table A: Random Numbers</b>	<b>396</b>	
	Selecting a Random Sample	396	
	Selecting Orders for Random Assignment Conditions	396	
	<b>Statistical Table B: Distribution of <math>z</math> in the Standard Normal Distribution</b>	<b>398</b>	
	<b>Statistical Table C: Critical Values of <math>t</math></b>	<b>402</b>	
	<b>Statistical Table D: Critical Values of <math>r</math></b>	<b>403</b>	
	<b>Statistical Table E: Critical Values of Chi Square</b>	<b>405</b>	
	<b>Statistical Table F: Critical Values of <math>F</math></b>	<b>406</b>	
	<b>Statistical Table G: Statistical Power</b>	<b>414</b>	
<b>APPENDIX F</b>	<b>Using Computers to Collect Data</b>		<b>415</b>
	<b>Glossary</b>		<b>418</b>
	<b>References</b>		<b>429</b>
	<b>Index</b>		<b>436</b>
