# **Sales Management Control Strategies in Banking**

Strategic Fit and Performance Impact

**GABLER**

**RESEARCH**

## Acknowledgements

I would like to express my sincere gratitude to my doctoral supervisor Prof. Dr. Andreas Hackethal for his academic guidance and support throughout my three and a half years as a doctoral candidate at the European Business School (ebs), International University Schloss Reichartshausen. He gave me the decisive, intellectual impulses and freedom for the successful completion of this work. Without his profound advice, encouragement, and trust this dissertation would not have been possible. I am deeply grateful to him.

Furthermore, I would like to sincerely thank Prof. Dr. Utz Schäffer for agreeing to provide the second opinion on my dissertation as well as his time and interest in my research. His thought-provoking, scientific counsel significantly improved this thesis.

I am also profoundly thankful to the European Business School, a truly distinct academic institution, its excellent professorate, and the entire ebs community. They have laid the foundation for my academic development and created a highly supportive and inspiring research environment. Especially, I would like to thank all the members of the HCI Endowed Chair of Financial Services and its sponsors who have contributed to my work in many ways.

My further appreciation belongs to Dr. Tobias Weigl and Henning Syllwasschy for countless hours of constructive discussions as well as their honest and thoughtful feedback. Their intellectual sparring and advice was inestimable for the development and refinement of this work.

Moreover, I would like to thank my employer Bain & Company for the support during my leave of absence and especially the financial services partner group for their valuable input and experience sharing. In particular, I am indebted to Dr. Rasmus Wegener and Dr. Thomas Gumsheimer for their outstanding support and mentorship.

Lastly, I would like to express my gratitude to my parents, sister, and friends. Without the love and belief of my parents Undine and Jürgen none of this would have been possible. They have been a constant source of strength and support on my path of life. My special thanks belong to my wife Lisa. She not only endured the ups and downs of my dissertation venture, her love, patience, and encouragement kept me going when my steps seemed to falter.
