BRIEF CONTENTS

1	What is Statistics?	1
2	Graphical Descriptive Techniques I	11
3	Graphical Descriptive Techniques II	43
4	Numerical Descriptive Techniques	97
5	Data Collection and Sampling	161
6	Probability	175
7	Random Variables and Discrete Probability Distributions	217
8	Continuous Probability Distributions	263
9	Sampling Distributions	307
10	Introduction to Estimation	335
11	Introduction to Hypothesis Testing	360
12	Inference about a Population	398
13	Inference about Comparing Two Populations	448
14	Analysis of Variance	525
15	Chi-Squared Tests	596
16	Simple Linear Regression and Correlation	633
17	Multiple Regression	692
Appendix A	Data File Sample Statistics	A-1
Appendix B	Tables	B-1
Appendix C	Answers to Selected Even-Numbered Exercises	C-1
Index	I-1	

CONTENTS

1 What Is Statistics? 1

Introduction 1

- 1.1 Key Statistical Concepts 5
- 1.2 Statistical Applications in Business 6
- 1.3 Large Real Data Sets 6
- 1.4 Statistics and the Computer 7

2 Graphical Descriptive Techniques I 11

Introduction 12

- 2.1 Types of Data and Information 13
- 2.2 Describing a Set of Nominal Data 18
- 2.3 Describing the Relationship between Two Nominal Variables and Comparing Two or More Nominal Data Sets 32

3 Graphical Descriptive Techniques II 43

Introduction 44

- 3.1 Graphical Techniques to Describe a Set of Interval Data 44
- 3.2 Describing Time-Series Data 64
- 3.3 Describing the Relationship between Two Interval Variables 74
- 3.4 Art and Science of Graphical Presentations 82

4 Numerical Descriptive Techniques 97

Introduction 98

Sample Statistic or Population Parameter 98

- 4.1 Measures of Central Location 98
- 4.2 Measures of Variability 108
- 4.3 Measures of Relative Standing and Box Plots 117
- 4.4 Measures of Linear Relationship 126
- 4.5 (Optional) Applications in Professional Sports: Baseball 144

- 4.6 (Optional) Applications in Finance: Market Model 147
- 4.7 Comparing Graphical and Numerical Techniques 150
- 4.8 General Guidelines for Exploring Data 153

5 Data Collection and Sampling 161

Introduction 162

- 5.1 Methods of Collecting Data 162
- 5.2 Sampling 165
- 5.3 Sampling Plans 167
- 5.4 Sampling and Nonsampling Errors 172

6 Probability 175

Introduction 176

- 6.1 Assigning Probability to Events 176
- 6.2 Joint, Marginal, and Conditional Probability 180
- 6.3 Probability Rules and Trees 191
- 6.4 Bayes's Law 199
- 6.5 Identifying the Correct Method 209

7 Random Variables and Discrete Probability Distributions 217

Introduction 218

- 7.1 Random Variables and Probability Distributions 218
- 7.2 Bivariate Distributions 229
- 7.3 (Optional) Applications in Finance: Portfolio Diversification and Asset Allocation 237
- 7.4 Binomial Distribution 243
- 7.5 Poisson Distribution 251

8 Continuous Probability Distributions 263

Introduction 264

- 8.1 Probability Density Functions 264
- 8.2 Normal Distribution 270
- 8.3 (Optional) Exponential Distribution 287
- 8.4 Other Continuous Distributions 291

9 Sampling Distributions 307

Introduction 308

- 9.1 Sampling Distribution of the Mean 308
- 9.2 Sampling Distribution of a Proportion 321
- 9.3 Sampling Distribution of the Difference between Two Means 327
- 9.4 From Here to Inference 330

10 Introduction to Estimation 335

Introduction 336

- 10.1 Concepts of Estimation 336
- 10.2 Estimating the Population Mean When the Population Standard Deviation Is Known 339
- 10.3 Selecting the Sample Size 353

11 Introduction to Hypothesis Testing 360

Introduction 361

- 11.1 Concepts of Hypothesis Testing 361
- 11.2 Testing the Population Mean When the Population Standard Deviation Is Known 365
- 11.3 Calculating the Probability of a Type II Error 385
- 11.4 The Road Ahead 394

12 Inference about a Population 398

Introduction 399

- 12.1 Inference about a Population Mean When the Standard Deviation Is Unknown 399
- 12.2 Inference about a Population Variance 413
- 12.3 Inference about a Population Proportion 421
- 12.4 (Optional) Applications in Marketing: Market Segmentation 435

13 Inference about Comparing Two Populations 448

Introduction 449

- 13.1 Inference about the Difference between Two Means: Independent Samples 449
- 13.2 Observational and Experimental Data 472
- 13.3 Inference about the Difference between Two Means: Matched Pairs Experiment 475
- 13.4 Inference about the Ratio of Two Variances 489
- 13.5 Inference about the Difference between Two Population Proportions 495

Appendix 13 Review of Chapters 12 and 13 519

14	Analysis of Variance	525
	Introduction	526
	14.1 One-Way Analysis of Variance	526
	14.2 Multiple Comparisons	543
	14.3 Analysis of Variance Experimental Designs	553
	14.4 Randomized Block (Two-Way) Analysis of Variance	554
	14.5 Two-Factor Analysis of Variance	563
	14.6 (Optional) Applications in Operations Management: Finding and Reducing Variation	578
	Appendix 14 Review of Chapters 12 to 14	589
15	Chi-Squared Tests	596
	Introduction	597
	15.1 Chi-Squared Goodness-of-Fit Test	597
	15.2 Chi-Squared Test of a Contingency Table	604
	15.3 Summary of Tests on Nominal Data	615
	15.4 (Optional) Chi-Squared Test for Normality	617
	Appendix 15 Review of Chapters 12 to 15	626
16	Simple Linear Regression and Correlation	633
	Introduction	634
	16.1 Model	634
	16.2 Estimating the Coefficients	637
	16.3 Error Variable: Required Conditions	647
	16.4 Assessing the Model	650
	16.5 Using the Regression Equation	666
	16.6 Regression Diagnostics—I	671
	Appendix 16 Review of Chapters 12 to 16	684
17	Multiple Regression	692
	Introduction	693
	17.1 Model and Required Conditions	693
	17.2 Estimating the Coefficients and Assessing the Model	694
	17.3 Regression Diagnostics—II	713
	17.4 Regression Diagnostics—III (Time Series)	716
	Appendix 17 Review of Chapters 12 to 17	729

Appendix **A** Data File Sample Statistics A-1

Appendix **B** Tables B-1

Appendix **C** Answers to Selected Even-Numbered Exercises C-1
