CONTENTS

GETTING STARTED

About Classroom in a Book. 1
Prerequisites. 1
Installing the program 2
Fonts used in this book 2
Copying the Classroom in a Book files 2
To install the Classroom in a Book files 2
Restoring default preferences 3
To save current Illustrator preferences 3
To delete current Illustrator preferences 4
To restore saved preferences after completing the lessons. . . . 4
Additional resources 4
Adobe certification 6

WHAT'S NEW IN ADOBE ILLUSTRATOR CS5

Perspective Drawing 8
Beautiful Strokes. 8
Bristle Brush 9
Multiple artboard enhancements 9
Shape Builder tool 9
Drawing enhancements. 10
Round-trip editing with Adobe Flash Catalyst CS5. 10
Resolution-independent Effects 10
Clean, sharp graphics for web and mobile devices 11
Integration with Adobe CS Review 11

A QUICK TOUR OF ADOBE ILLUSTRATOR CS5

Lesson overview 12
Getting started 14
Working with multiple artboards 14

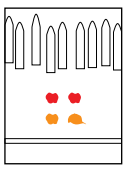
Creating shapes 15
Working with the Shape Builder tool 16
Working with drawing modes 18
Working with strokes 18
Working with color groups and recoloring artwork 19
Placing Adobe Photoshop images in Illustrator 21
Using Live Trace 21
Using Live Paint 22
Working with the Blob Brush tool 23
Working with type 24
Using the Appearance panel and effects 25
Working with brushes 26
Creating and editing a gradient 27
Working with symbols 29
Working with perspective 30

1 GETTING TO KNOW THE WORK AREA

Lesson overview 32
Getting started 34
Understanding the workspace 37
Working with the Tools panel 38
The Control panel 41
Working with panels 42
Resetting and saving your workspace 46
Using panel menus 47
Changing the view of artwork 48
Using the view commands 48
Using the Zoom tool 49
Scrolling through a document 50
Viewing artwork 51
Navigating multiple artboards 52
Using the Navigator panel 54
Understanding rulers 55
Arranging multiple documents 56

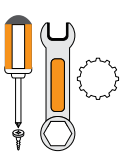
Document groups 59
Finding resources for using Illustrator. 61
Searching for a topic in the Search For Help box 61
Checking for updates 62
Exploring on your own. 62

2 SELECTING AND ALIGNING



Lesson overview 64
Getting started 66
Selecting objects 66
Using the Selection tool. 66
Using the Direct Selection tool 68
Creating selections with a marquee 69
Creating selections with the Magic Wand tool 70
Selecting similar objects 71
Aligning objects 72
Align objects to each other. 72
Aligning to a key object 72
Aligning points 73
Distributing objects. 73
Aligning to the artboard 74
Working with groups 75
Group items 75
Working in isolation mode 76
Adding to a group 76
Object arrangement 78
Arrange objects. 78
Selecting objects behind. 79
Hiding objects 79
Applying selection techniques 80
Exploring on your own. 82

3 CREATING AND EDITING SHAPES



Lesson overview 84
Getting started 86
Creating a document with multiple artboards 86
Working with basic shapes 88

Accessing the basic shape tools 89
Understanding drawing modes 89
Creating rectangles 90
Creating rounded rectangles 93
Creating ellipses 94
Creating polygons 95
Draw Inside mode 96
Changing stroke width and alignment 99
Working with line segments 100
Joining paths 102
Creating Stars 103
Using the Eraser tool 104
Using the Width tool 105
Outlining strokes 109
Combining and editing shapes 109
Working with the Shape Builder tool 109
Working with Pathfinder effects 112
Working with shape modes 114
Using Live Trace to create shapes 116
Exploring on your own 118

4 TRANSFORMING OBJECTS

Lesson overview 120
Getting started 122
Working with artboards 123
Adding artboards to the document 123
Editing artboards 124
Renaming Artboards 127
Reordering Artboards 128
Transforming content 128
Working with rulers and guides 128
Scaling objects 129
Reflecting objects 132
Rotating objects 133
Distorting objects 134
Shearing objects 136

Positioning objects precisely 137
Changing the perspective 138
Multiple transformations 140
Using the Free Distort effect 141
Exploring on your own 142

5 DRAWING WITH THE PEN AND PENCIL TOOLS

Lesson overview 144
Getting started 146
Creating straight lines 148
Creating curved paths 149
Building a curve 151
Converting curved points to corner points 153
Creating the violin illustration 156
Drawing curves 156
Selecting a curve 156
Drawing a curved shape 157
Drawing different kinds of curves 158
Drawing the violin shape 159
Creating the strings 161
Splitting a path 162
Adding arrowheads 162
Creating a dashed line 164
Editing curves 165
Deleting and adding anchor points 166
Convert between smooth points and corner points 168
Drawing with the Pencil tool 170
Editing with the Pencil tool 171
Finishing the violin illustration 172
Assembling the parts 172
Painting the artwork 174
Exploring on your own 174

6 COLOR AND PAINTING

Lesson overview 176
Getting started 178
Understanding color 178

Color modes 179
Understanding the color controls 179
Creating color 182
Building and saving a custom color 182
Editing a swatch 183
Using Illustrator swatch libraries 184
Creating a spot color 185
Using the Color Picker 186
Creating and saving a tint of a color 187
Copying attributes 188
Creating color groups 188
Working with the Color Guide panel 190
Editing a color group 191
Editing colors in artwork 194
Working with the Kuler panel 196
Assigning colors to your artwork 198
Adjusting colors 201
Painting with patterns and gradients 201
Applying existing patterns 201
Creating your own pattern 203
Applying a pattern 204
Editing a pattern 204
Working with Live Paint 206
Creating a Live Paint group 206
Editing Live Paint regions 208
Working with Gap Options 210
Exploring on your own 211

7 WORKING WITH TYPE

Lesson overview 214
Getting started 216
Working with type 217
Creating point type 217
Creating area type 218
Importing a plain text file 219
Creating columns of text 220

Understanding text flow 221
Working with overflow text and text reflow 222
Threading text 223
Resizing type objects 224
Formatting type 226
Changing the font size 228
Changing the font color 229
Changing additional text attributes 229
Changing paragraph attributes 231
Saving and using styles 233
Creating and using a paragraph style 233
Creating and using a character style 234
Sampling text 235
Reshaping text with an envelope warp 236
Wrapping text around an object 239
Creating text on open paths 239
Creating text on closed paths 240
Creating text outlines 242
Exploring on your own 244

8 WORKING WITH LAYERS

Lesson overview 246
Getting started 248
Creating layers 250
Moving objects and layers 252
Locking layers 253
Viewing layers 254
Pasting layers 256
Creating clipping masks 259
Merging layers 260
Applying appearance attributes to layers 262
Isolating layers 264
Exploring on your own 266

9 WORKING WITH PERSPECTIVE DRAWING

Lesson overview 270
Getting started 272
Understanding perspective 272

Understanding the Perspective Grid 273
Working with the Perspective Grid 273
Using a preset grid 273
Editing the Perspective Grid 274
Drawing objects in perspective 277
Selecting and transforming objects in perspective 279
Attaching objects to perspective 284
Editing planes and objects together 285
Adding and editing text in perspective 290
Working with symbols in perspective 292
Adding Symbols to the Perspective Grid 292
Transforming Symbols in perspective 292
Release content from perspective 295
Exploring on your own 296

10 BLENDING COLORS AND SHAPES

Lesson overview 298
Getting started 300
Working with gradients 301
Creating and applying a linear gradient 301
Adjusting the direction and angle of a gradient blend 304
Creating a radial gradient 305
Changing colors and adjusting the gradient 306
Applying gradients to multiple objects 309
Adding transparency to gradients 313
Working with blended objects 315
Creating a blend with specified steps 316
Modifying the blend 317
Creating smooth color blends 319
Exploring on your own 321

11 WORKING WITH BRUSHES

Lesson overview 324
Getting started 326
Working with brushes 327
Using Calligraphic brushes 327
Editing a brush 328

Using a fill color with brushes 329
Remove a brush stroke 329
Using Art brushes 330
Drawing with the Paintbrush tool 330
Editing paths with the Paintbrush tool 331
Create an Art brush 333
Edit an Art brush 334
Using Bristle brushes 335
Changing bristle brush options 335
Painting with a Bristle brush 336
Using Pattern brushes 338
Creating a Pattern brush 340
Applying a Pattern brush 342
Changing the color attributes of brushes 344
Changing a brush color using Tints colorization 344
Changing the brush color using Hue Shift colorization 346
Working with the Blob Brush tool 347
Drawing with the Blob Brush tool 348
Merging paths with the Blob Brush tool 348
Editing with the Eraser tool 349
Exploring on your own 351

12 APPLYING EFFECTS

Lesson overview 354
Getting started 356
Using live effects 357
Applying an effect 357
Editing an effect 359
Styling text with effects 360
Editing shapes with a Pathfinder effect 363
Offsetting paths 364
Applying a Photoshop effect 366
Working with a 3D effect 369
Creating a revolved object 369
Changing the lighting of a 3D object 371
Mapping a symbol to the 3D artwork 372
Exploring on your own 375

13 APPLYING APPEARANCE ATTRIBUTES AND GRAPHIC STYLES

Lesson overview 378
Getting started 380
Using appearance attributes 381
Editing and adding appearance attributes 381
Reordering appearance attributes 383
Adding an additional stroke and fill 384
Using graphic styles 385
Creating and saving a graphic style 386
Applying a graphic style to an object 387
Applying a graphic style to a layer 387
Applying existing graphic styles 390
Adding to an existing graphic style 392
Applying an appearance to a layer 394
Copying, applying, and removing graphic styles 394
Exploring on your own 397

14 WORKING WITH SYMBOLS

Lesson overview 400
Getting started 402
Working with symbols 403
Using existing Illustrator symbol libraries 403
Creating symbols 406
Editing a symbol 407
Breaking a link to a symbol 409
Replacing symbols 410
Renaming symbols 411
Working with the symbolism tools 411
Spraying symbol instances 411
Editing symbols with the Symbolism tools 414
Copy and edit symbol sets 416
Storing and retrieving artwork in the Symbols panel 417
Mapping a symbol to 3D artwork 418
Symbols and Flash integration 418
Exploring on your own 422

15 COMBINING ILLUSTRATOR CS5 GRAPHICS WITH OTHER ADOBE APPLICATIONS

Lesson overview 424
Getting started 426
Working with Adobe Bridge 426
Combining artwork 428
Vector versus bitmap graphics 428
Placing Adobe Photoshop files 430
Placing a Photoshop file 430
Duplicating and editing a placed image 431
Embed a Photoshop image with Layer comps 433
Applying color edits to a placed image 435
Masking an image 437
Applying a clipping mask to an image 437
Editing a mask 437
Masking an object with multiple shapes 438
Release a mask 439
Creating an opacity mask 440
Sampling colors in placed images 443
Replacing a placed, linked image 444
Exporting a layered file to Photoshop 445
Illustrator and Adobe InDesign 446
Illustrator and Adobe Flash 446
Illustrator and Adobe Flash Catalyst 446
Illustrator and Adobe Flex 447
Exploring on your own 447
