3	What If: Credit Risk Stress Testing	45
3.1	Definition and objective of stress tests	47
3.2	Stressed scenarios	51
3.2.1	Hypothetical or macroeconomic scenarios	51
3.2.2	Historical or shock scenarios	52
3.2.3	Worst-case scenarios	53
3.2.4	Stress scenario requirements	53
3.3	Types of stress tests	54
3.3.1	Sensitivity analysis	55
3.3.2	Scenario analysis	55
3.3.3	What-if analysis	56
3.3.4	Concentration risk analysis	57
3.3.4.1	Single name concentration risk stress test	57
3.3.4.2	Sector concentration risk stress test	58
3.3.5	Reverse stress testing	58
3.4	Stress test information and subsequent mitigation	59
3.5	Conclusion	60
<b>Part II Credit Portfolio Management in Practice</b>		<b>63</b>
4	Evolution of Portfolio Management Business Models	65
4.1	From credit advisory to active credit portfolio management	67
4.2	A full cycle approach to credit portfolio management	72
4.3	Bridging distinct worlds: loans, bonds and credit derivatives	77
4.3.1	Asymmetric information in bank loans	78
4.3.2	Convergence of bank loans and debt capital markets instruments	80
4.4	The role of loan transfer pricing	83
4.4.1	Risk-adjusted loan pricing	84
4.4.2	Loan transfer pricing	85
4.4.3	Loan transfer pricing based on observable loan market prices	87
4.4.4	Loan transfer pricing based on observable credit spreads	89
4.4.5	Transfer pricing based on generic curves	92
4.4.6	Risk adjusted versus transfer pricing	96
4.5	Practical implementation: organizational and infrastructure challenges	98
4.5.1	Governance and mandate	99
4.5.2	Organizational design	102
4.5.3	Performance measurement and communication	105

---

4.5.4	Portfolio analytics and IT infrastructure	106
4.5.5	Implementation of an ACPM function	107
5	Accounting Complexity and Implications	109
5.1	Hedge accounting and other solutions for accounting asymmetry	114
5.1.1	Hedge Accounting for Credit Risk	116
5.1.1.1	Types of hedge accounting and requirements	117
5.1.1.2	Assessing fair value changes and measuring hedge effectiveness	119
5.1.1.3	Hedge accounting eligible assets and strategy	120
5.1.1.4	Conclusion	123
5.1.2	Fair valuing loans	124
5.1.2.1	FVO eligible assets and pricing	125
5.1.2.2	Regulatory requirements for application of FVO	127
5.1.2.3	Conclusion	127
5.1.3	Financial Guarantee	128
5.1.3.1	Accounting rules for Financial Guarantees	129
5.1.3.2	Conclusion	130
5.1.4	Combination of hedge and reinvestment portfolio	131
5.1.4.1	DV01 neutral hedge and reinvestment strategy	137
5.1.4.2	Beta neutral hedge and reinvestment strategy	139
5.1.4.3	Notional neutral hedge and reinvestment strategy	140
5.1.4.4	Cost (cash flow) neutral hedge and reinvestment strategy	142
5.1.4.5	Conclusion	144
6	Regulatory Capital Management under Basel II	145
6.1	Capital optimization – key considerations	146
6.2	Regulatory capital relief through CDS and guarantees	148
6.2.1	Determination of capital relief amount	151
6.2.2	Adjustments in capital reduction for CRM	154
6.3	Conclusion	157
<b>Part III</b>	<b>Hedging Techniques and Toolkits</b>	<b>159</b>
7	CDS: Hedging of Issuer and Counterparty Risks	165
7.1	Mechanism and conventions of CDS	168
7.1.1	Transaction terms and conditions	169

7.1.2	Quotation conventions	169
7.1.2.1	Spread, fixed coupons and upfront payments	171
7.1.2.2	Termination and coupon payment dates	173
7.1.3	Reference entity	174
7.1.4	Reference and deliverable obligations	174
7.2	Credit events	177
7.2.1	Hard credit events	179
7.2.2	Restructuring credit event	182
7.3	Settlement after a credit event	191
7.3.1	Physical settlement	191
7.3.2	Cash settlement and auction mechanics	193
7.3.3	Final price versus loss given default	203
7.4	Succession events	205
8	Loan Credit Derivatives, Sub-Participations and Credit Indices	207
8.1	Loan only credit derivatives – LCDS	207
8.1.1	LCDS deliverables	209
8.1.2	Information advantage	210
8.1.3	Early termination	210
8.1.4	The new North American Bullet LCDS	212
8.1.4.1	Refinancing event	212
8.1.4.2	Convention changes	213
8.1.5	Settlement after a credit event	214
8.2	Sub-participations	214
8.2.1	Participations from the perspective of the grantor and the investor	215
8.2.1.1	Loan administration	215
8.2.1.2	Alignment of interest and recourse to grantor	216
8.2.1.3	Grantor credit risk and insolvency	216
8.2.2	Default event	217
8.2.3	Comparison of sub-participations to standardized CDS	217
8.2.4	Conclusion	218
8.3	Linear credit indices	219
8.3.1	Index family and composition	219
8.3.2	Credit events for CDS indices	222
9	Hedge Strategies for Baskets, Swaptions and Macro Hedges	224
9.1	Nth-to-default baskets: combining default risk with correlation	225
9.1.1	Pricing the correlation factor	227
9.1.2	Hedging strategies using nth-to-default baskets	228
9.1.3	Hedging concentration risk	228

---

9.1.4	Hedging tail risks	229
9.1.5	Hedging idiosyncratic risk in a benign credit environment	229
9.2	Swaptions: adding a volatility risk component to default protection	230
9.2.1	Conventions	232
9.2.2	Default event	234
9.2.3	CDS option strategies	234
9.2.3.1	Development of a hedge strategy using swaptions	237
9.2.3.2	Long payer option	239
9.2.3.3	Payer spread	240
9.2.3.4	Payer spread 1x2	242
9.2.3.5	Long butterfly	242
9.2.4	Option Greeks	243
9.2.5	Conclusion	244
9.3	Cross asset hedging strategies	245
9.3.1	Selection criteria for macro hedges	245
9.3.2	Isolating sovereign risk	246
9.3.3	Equity versus debt hedge	247
9.3.4	Conclusion	249

	<i>Index</i>	255

# List of Tables

2.1	Parameters for limit risk measures	38
3.1	Types of stress tests	54
5.1	Schematic comparison of CDS hedge, CDS hedge with Hedge Accounting for Credit Risk applied and Financial Guarantee	132
5.2	Profit and loss effects from combined hedge and reinvestment strategies	136
6.1	Hedge eligibility criteria under Basel II	149
7.1	Overview of CDS credit events	178
7.2	Overview on restructuring credit event conventions	186
7.3	Recovery values from restructuring credit event Thomson	190
8.1	Comparison of sub-participations and CDSs	218
9.1	Expressing credit views with swaptions	230
9.2	Overview of default swaption characteristics	231
9.3	Stylized value at expiration and risk positioning of CDS swaptions	235
9.4	Change in market value of swaptions for a widening in the spread of the option underlying	243
9.5	Change in market value of swaptions for an increase in volatility of the underlying spread	243
9.6	Change in market value of swaptions for a decrease in the residual time to expiry of the swaption	243

# List of Figures

1.1	Performance of bank shares and market capitalization	6
1.2	Distribution of daily share price changes of Bank of America	7
1.3	TED spread, Europe	10
1.4	Dimensions of credit portfolio management	14
2.1	Credit risk strategy triangle	25
2.2	Concentration risk limit circle	42
3.1	Stylized cascading approach of pre-defined trigger levels and corresponding risk mitigating measures to counter a decline of the capital ratio	59
4.1	Business models of credit portfolio management	66
4.2	Portfolio management value creation levers	69
4.3	DAX index and IFO pan Germany business climate	72
4.4	The four phases of the business cycle	73
4.5	Monitor for real gross domestic product, Germany	74
4.6	Credit spreads versus Eurozone GDP growth	75
4.7	Full cycle approach to credit portfolio management	76
4.8	Flat loan margin versus increasing probability of default	82
4.9	Risk adjusted internal pricing	85
4.10	Cascading approach for transfer prices	86
4.11	Transfer price for loan which can be sold into secondary market	88
4.12	Components of hedge spread based transfer price	90
4.13	Determinants of loan income and risk transfer costs	91
4.14	Key ACPM mandate definition criteria	100
4.15	Combinations of portfolio management objectives with profit and loss implications and mitigants	101
4.16	Stylized organizational ACPM chart	105
5.1	Markit iTraxx Europe spreads	110
5.2	ENEL, E.ON and iTraxx 5YR CDS spreads	135
5.3	Correlation of daily P&L changes from hedge and investment under the DV01 neutral approach	137
5.4	Daily and cumulative P&L of the DV01 neutral hedge and reinvestment strategy	138
5.5	Correlation of daily P&L changes from hedge and investment under the Beta neutral approach	139
5.6	Daily and cumulative P&L of the Beta neutral hedge and reinvestment strategy	140

5.7	Correlation of daily P&L changes from hedge and investment under the notional neutral approach	141
5.8	Daily and cumulative P&L of the notional neutral hedge and reinvestment strategy	141
5.9	Correlation of daily P&L changes from hedge and investment under the cost neutral approach	142
5.10	Daily and cumulative P&L of the cost neutral hedge and investment strategy	143
6.1	Building blocks of capital optimization	147
6.2	Rating distribution of 125 iTraxx constituents (banks and non banks) as of December 2012	151
6.3	Credit spread distribution of 125 iTraxx constituents (banks and non banks) as of December 2012	153
6.4	Maturity mismatch adjusted credit protection value	155
III.1	Size of IRS, CDS and Equity Derivative markets	160
7.1	Breakdown of credit derivatives by type (as of April 2012)	167
7.2	Overview of credit derivative products	168
7.3	Key elements of a CDS trade confirmation	170
7.4	CDS Fixed coupon standards	171
7.5	Four steps of physical settlement after a credit event under the 2003 ISDA credit definitions	192
7.6	Standard and Poor's Global Speculative-grade default rate versus CDS Credit events and auctions	194
7.7	CDS auction process after a credit event	197
7.8	Activities and decisions to be taken after a credit event happened	202
7.9	Auction recoveries vs. final recoveries for sample set of senior unsecured bonds	204
7.10	Cascading approach to determine a CDS successor	206
8.1	S&P/LSTA U.S. Leveraged Loan 100 Index	208
8.2	Overview of European and North American CDS indices	220
8.3	Rating distribution of iTraxx Investmentgrade CDS Index (Europe) and CDX Investmentgrade CDS Index (North America) as of December 2012	221
8.4	Spread distribution of iTraxx Investmentgrade CDS Index (Europe) and CDX Investmentgrade CDS Index (North America) as of December 2012	221
9.1	Portfolio of equally weighted CDS versus nth-to-default basket structure	226
9.2	Quotes for iTraxx Main S17 3 months CDS options	233
9.3	Payoffs at expiration date for Payer and Receiver swaptions	236

---

9.4	VIX Index versus CDX Investmentgrade CDS Index (North America) as of December 2012	237
9.5	Daily spread changes of European iTraxx and frequency distribution	238
9.6	Profit and loss of long payer option and credit portfolio	239
9.7	CDS swaption payer spread	240
9.8	CDS swaption payer spread 1×2	241
9.9	CDS swaption butterfly	242
9.10	Spain 5 year CDS spreads versus IBEX performance (2010–2012)	247
9.11	JPMorgan stock price versus CDS spread	248
9.12	Intesa Sanpaolo stock price versus CDS spread	248
