Contents

<i>Contributor contact details</i>	xi
1 Introduction	1
<i>H. L. M. Lelieveld, Unilever R&D Vlaardingen, The Netherlands</i>	
Part I Hygiene regulation	3
2 The regulation of hygiene in food processing: an introduction ..	5
<i>R. Cocker, Cocker Consulting and Innovus BV, The Netherlands</i>	
2.1 Introduction	5
2.2 Risk management and HACCP	6
2.3 International hygiene regulation	10
2.4 European hygiene regulation	11
2.5 National hygiene regulation: the case of Scandinavia	18
3 Hygiene regulation in the EU	22
<i>M. Fogden, Meat and Livestock Commission, UK</i>	
3.1 Introduction	22
3.2 Hygiene regulation in the EU: key themes	23
3.3 Enforcement of hygiene regulations	27
3.4 The General Food Hygiene Directive (93/43/EEC)	30
3.5 Specific (vertical) hygiene directives applicable to particular foodstuffs	33
3.6 Case study: controversy over minced meat (and meat preparations)	38

3.7	Future trends	38
3.8	Sources of further information and advice	41
3.9	References and bibliography	42
4	Hygiene regulation in the United States	44
	<i>T. Gilmore, The Holly Group, USA</i>	
4.1	Introduction	44
4.2	The Food and Drug Administration (FDA)	45
4.3	Regulation in practice: the case of dairy processing	47
4.4	Inspection in the dairy industry	50
4.5	Regulation of particular processes	52
4.6	Regulation of equipment: the 3-A Sanitary Standards	53
4.7	Regulation of the meat and seafood industries	55
4.8	Trends in US regulation	56
4.9	Sources of further information and advice	57
4.10	Acknowledgement	57
Part II	Hygienic design	59
5	Sources of contamination	61
	<i>H. L. M. Lelieveld, Unilever R&D Vlaardingen, The Netherlands</i>	
5.1	Introduction	61
5.2	Physical contaminants	62
5.3	Chemical contaminants	64
5.4	Microbiological contamination	66
5.5	Controlling contamination: the case of <i>E. coli</i>	69
5.6	References	72
6	Hygienic plant design	76
	<i>G. Wierenga, Ingenieursbureau Het Noorden BV, The Netherlands and J. T. Holah, Campden and Chorleywood Food Research Association, UK</i>	
6.1	Introduction	76
6.2	The factory site	78
6.3	The factory building	81
6.4	General design issues for the factory interior	86
6.5	Walls	87
6.6	Ceilings	90
6.7	Floors	90
6.8	Drainage	94
6.9	Services	96
6.10	Internal barriers separating manufacturing processes	98
6.11	High-risk areas	101
6.12	References	104

7 Control of airborne contamination	106
<i>K. L. Brown, Campden and Chorleywood Food Research Association, UK</i>	
7.1 Introduction: why control of airborne contamination is important in food production	106
7.2 Sources of airborne contaminants	108
7.3 Dust control	110
7.4 Environmental air quality control	110
7.5 Process air control	116
7.6 Air disinfection systems	117
7.7 Future trends	118
7.8 Sources of further information and advice	118
7.9 References	119
8 Hygienic equipment design	122
<i>H. L. M. Lelieveld, M. A. Mostert and G. J. Curiel, Unilever R&D Vlaardingen, The Netherlands</i>	
8.1 Introduction: key criteria in hygienic design	122
8.2 Risk assessment in equipment design	124
8.3 Regulatory requirements for hygienic equipment design: the EU	125
8.4 Drainability	127
8.5 Materials of construction	130
8.6 Surface finish	131
8.7 Corners, crevices and dead spaces	131
8.8 Welds and joints	136
8.9 Fasteners	141
8.10 Seals	143
8.11 Shaft ends	147
8.12 Doors, covers and panels	149
8.13 Rims	150
8.14 Conveyor belts	151
8.15 Equipment controls and instrumentation	152
8.16 Equipment installation	158
8.17 Insulation and cladding	163
8.18 References	164
9 Equipment construction materials and lubricants	167
<i>M. Lewan, Materials Engineering Research Laboratory Ltd, UK</i>	
9.1 Introduction	167
9.2 Metals	168
9.3 Passivation of stainless steel	171
9.4 Plastics and composites	172
9.5 Elastomers	174

9.6	Lubricants	177
9.7	Other materials	178
9.8	References	178
10	Piping systems, seals and valves	179
	<i>F. Baumbach, APV Rosista GmbH, Germany and H. Hoogland, Unilever R&D Vlaardingen, The Netherlands</i>	
10.1	Introduction	179
10.2	Materials	181
10.3	Surfaces	182
10.4	Welding	183
10.5	Pipe couplings	183
10.6	Seals	185
10.7	Valves	187
10.8	Mixproof valves	189
10.9	Further reading	192
	Appendix A: Determination factors for water flow velocity (<i>c</i>) and frictional resistance (<i>h</i>) in straight pipelines per 100 m	194
	Appendix B: Pressure drop values for fittings in metre equivalent pipe lengths	196
11	Cleaning in place	197
	<i>F. A. Majoor, Unilever R&D Vlaardingen, The Netherlands</i>	
11.1	Introduction	197
11.2	Principles of CIP systems	198
11.3	Cleaning tanks	203
11.4	Avoiding product contamination	205
11.5	Types of CIP system	212
11.6	Centralised/decentralised CIP systems and automation	218
11.7	References	219
12	Verification and certification of hygienic design	220
	<i>H. L. M. Lelieveld and M. A. Mostert, Unilever R&D Vlaardingen, The Netherlands; and R. R. Maller, Pepsi Cola Company, USA</i>	
12.1	Introduction	220
12.2	Testing pasteurisability, sterilisability and bacterial tightness	221
12.3	Testing cleanability	222
12.4	Particular tests for cleanability	223
12.5	Certification of equipment in Europe: the EHEDG	227
12.6	Certification of equipment in the United States: the 3-A Symbol Council	229
12.7	References	231

Part III Hygiene practices	233
13 Cleaning and disinfection	235
<i>J. T. Holah, Campden and Chorleywood Food Research Association, UK</i>	
13.1 Introduction: principles	235
13.2 Cleaning chemicals	238
13.3 Disinfectants	241
13.4 Testing disinfectants	248
13.5 Water quality	249
13.6 Applying detergents and disinfectants	253
13.7 Other disinfection techniques	258
13.8 Sanitation programmes	260
13.9 Managing sanitation programmes	262
13.10 Assessing the effectiveness of a sanitation programme	266
13.11 References	272
14 Detecting taints from cleaning and disinfecting agents	279
<i>C. Olieman, NIZO Food Research, The Netherlands</i>	
14.1 Introduction	279
14.2 Cleaning and disinfecting agents	280
14.3 Testing the safety of cleaning and disinfecting agents	281
14.4 Testing cleaning and disinfecting agents for their capacity to cause taints	282
14.5 Detecting cleaning and disinfecting agents in rinse water	283
14.6 Detecting cleaning and disinfecting agents in food	283
14.7 Measurement of chloroform	284
14.8 Future trends	285
14.9 References	286
15 Personal hygiene	288
<i>J. T. Holah and J. Taylor, Campden and Chorleywood Food Research Association, UK</i>	
15.1 Introduction: sources of contamination	288
15.2 Direct and indirect routes of contamination	290
15.3 Controlling contamination: medical screening	293
15.4 Personal hygiene practices	294
15.5 Hand hygiene	297
15.6 Training	303
15.7 Control of indirect contamination from people	305
15.8 References	307

16 Hygiene and foreign bodies	310
<i>M. Edwards, Campden and Chorleywood Food Research Association, UK</i>	
16.1 Introduction	310
16.2 Management systems for preventing foreign body hazards ...	312
16.3 General methods for preventing the occurrence of foreign bodies	314
16.4 Detection systems for foreign bodies	321
16.5 Equipment for separation of foreign bodies	327
16.6 Future trends	331
16.7 Sources of further information and advice	333
16.8 Conclusion	333
16.9 References	334
17 Pest control: insects and mites	335
<i>C. H. Bell, Central Science Laboratory, UK</i>	
17.1 Introduction	335
17.2 The spread of pests	336
17.3 Physical control of pests	341
17.4 Chemical control of pests	353
17.5 Biological control of pests	362
17.6 Threats to successful control	364
17.7 Conclusion	366
17.8 References	366
