

Research Methods In Psychology

3rd American edition

**Paul C. Price, Rajiv Jhangiani,
i-Chant A. Chang, Dana C. Leighton,
and Carrie Cuttler**

Contents

About This Book	II
Acknowledgements	IV
Preface	V
Chapter 1: The Science of Psychology	
1.1 Methods of Knowing	7
1.2 Understanding Science	9
1.3 Goals of Science	14
1.4 Science and Common Sense	16
1.5 Experimental and Clinical Psychologists	19
Chapter 2: Overview of the Scientific Method	
2.1 A Model of Scientific Research in Psychology	23
2.2 Finding a Research Topic	26
2.3 Generating Good Research Questions	33
2.4 Developing a Hypothesis	37
2.5 Designing a Research Study	42
2.6 Analyzing the Data	46
2.7 Drawing Conclusions and Reporting the Results	48
Chapter 3: Research Ethics	
3.1 Moral Foundations of Ethical Research	52
3.2 From Moral Principles to Ethics Codes	58
3.3 Putting Ethics Into Practice	67
Chapter 4: Psychological Measurement	
4.1 Understanding Psychological Measurement	73
4.2 Reliability and Validity of Measurement	80
4.3 Practical Strategies for Psychological Measurement	86
Chapter 5: Experimental Research	
5.1 Experiment Basics	93
5.2 Experimental Design	98
5.3 Experimentation and Validity	105
5.4 Practical Considerations	109
Chapter 6: Nonexperimental Research	
6.1 Overview of Non-Experimental Research	119
6.2 Correlational Research	125
6.3 Complex Correlation	133
6.4 Qualitative Research	138
6.5 Observational Research	143
Chapter 7: Survey Research	
7.1 Overview of Survey Research	153
7.2 Constructing Surveys	156
7.3 Conducting Surveys	164
Chapter 8: Quasi-Experimental Research	
8.1 One-Group Designs	171
8.2 Non-Equivalent Groups Designs	176

Chapter 9: Factorial Designs	
9.1 Setting Up a Factorial Experiment	182
9.2 Interpreting the Results of a Factorial Experiment	187
Chapter 10: Single-Subject Research	
10.1 Overview of Single-Subject Research	197
10.2 Single-Subject Research Designs	200
10.3 The Single-Subject Versus Group “Debate”	209
Chapter 11: Presenting Your Research	
11.1 American Psychological Association (APA) Style	215
11.2 Writing a Research Report in American Psychological Association (APA) Style	223
11.3 Other Presentation Formats	237
Chapter 12: Descriptive Statistics	
12.1 Describing Single Variables	243
12.2 Describing Statistical Relationships	254
12.3 Expressing Your Results	263
12.4 Conducting Your Analyses	271
Chapter 13: Inferential Statistics	
13.1 Understanding Null Hypothesis Testing	276
13.2 Some Basic Null Hypothesis Tests	283
13.3 Additional Considerations	296
13.4 From the “Replicability Crisis” to Open Science Practices	304
Appendix	309
