Part 1 THE ROLE OF DESIGN AND TECHNOLOGY IN THE FOOD INDUSTRY

1 Design and technology	3
All is flowing: πάντα ῥεῖ	3
How design influences our lives: form and function	8
The HGTV effect	10
Design in the food industry	12
Reasonable price	15
Adapted for small families, households with smaller numbers of people	15
Safety	16
Easy to open	17
Easy to see	18
Easy understanding of label claims	19
Easy handling	19
The role of product design in the food industry	20
Conclusions	21
Topics for further discussion	22
References	22
2 Design: from object to process	23
The expanding role of design	23
Why now? Drivers of change = the industry shifts + design expands	24
New platforms / new options	25
Speed to market / direct to market / new retail models	26
Open innovation / systems innovation	27
Creative economy / sharing economy	28
Maker culture / hacker culture / DIY / new craft	28
3D Printing	29
Being design driven: icons at the intersection of business and design	30
The value of the designer: a new mindset	32

The era of the design entrepreneur	33
Design impact: making / meaning / transforming	35
Design as a process of exploration (making)	35
Design as a process of creating relevance (meaning)	36
Design as a catalyst for change (transforming)	37
The future of meaningful product experiences: design delivers	38
Creating meaningful food experiences	38
Conclusions	40
Topics for further discussion	41
References	42
3 How food companies use technology and design	43
Form and function in action	43
Importance of design in the consumer goods industry	46
The role of technology and design in packaging innovation and renovation	48
Food safety, quality & environment	48
Supply chain	53
Suppliers	54
Costs	54
Consumers	55
Customers	60
Manufacturing	62
Conclusions	63
Topics for further discussions	63
References	64
4 Design and technology in academia: a new approach	65
From the beginning to today	65
The sponsored project: redefining products, experiences, brands and systems	67
Design as process for exploration	68
Design as a process for creating relevance	70
Design as a process of transformation	74
The expanding role of design/business being design driven + design being business driven	76
From “multi-discipline” to “über-multi-discipline” and the future of “design +”	77
Preparing the next generation of innovators/the “experience portfolio”	80
New ventures in design education/from non-profit to for-profit	81
The future of design and technology in academia: new models/new schools/new programs	82
Conclusions	85
Topics for further discussion	86
References	87
5 Design and the business world	89
Design: the helper for business and technical	89
Design: the connector of business elements	91

The “n-dimensional design space” in the business environment	92
Typical and desirable business interactions inside today’s consumer goods industry	96
Design: the enabler for logistics and supply chain	98
Design as a counterfeit fighter	101
The way forward: “down-to-earth design”	104
The future: design is management	107
Conclusions	110
Topics for further discussion	111
References	111
6 The corporate reality in a changing world	113
The decision makers in our society: a “new order”	113
The decision makers and takers in the corporate environment	115
Some historic lessons in complexity building	116
The profit margin race	119
Venture capital (VC): decision makers become risk averters	121
Utopia: from old reality to a new reality?	123
Conclusions	130
Topics for further discussion	131
Reference	132
7 Design and technology: innovation is the connector	133
Design: beyond connecting business elements	133
How companies define their business strategies: a short historical perspective	137
From strategy to action	138
The Nestlé example	139
The Unilever example	139
The PepsiCo example	141
The General Mills example	141
The Kraft example	142
Design as an integral part of business plans and marketing strategies: a possible reality?	143
The elements of a typical business plan	143
Innovation as connector of technology and design	145
Innovation in design and technology can influence how the food industry operates	146
Examples from the Nestlé Company	147
Examples from P&G	149
Examples from the Unilever Company	150
How commitment to innovation can influence the corporate environment: a first glimpse	150
Conclusions	151
Topics for further discussion	152
References	153

Part 2 INNOVATION: THE MUCH TALKED ABOUT, YET NOT WELL UNDERSTOOD ELEMENT

8	Innovation understood	157
	Innovation and creativity: the four stages of value creation	157
	People and attitudes	159
	How to be an innovator in the food industry	162
	Innovations and inventions in food and beverages: a short historical overview	165
	Where and when does innovation begin?	169
	The people in the food industry	170
	Commitment to innovation	173
	Conclusions	174
	Topics for further discussion	175
	References	175
9	Nurturing the innovators	177
	“People are our most important assets”	177
	How the right people are best supported: define values	179
	Continuous learning	183
	How can design contribute to continuous learning?	184
	Supporting innovators in driving their innovations through complex organizations	186
	The secret of sharing	188
	Personal nurturing tools	190
	Conclusions	193
	Topics for further discussion	194
	References	195
10	The innovation tools	197
	From rituals to innovation tools	197
	The innovation environment	199
	Execution	200
	Quest	202
	Movie	203
	Fog	204
	From brainstorming to creative problem solving (CPS)	205
	The divergence—convergence pain	206
	<i>FastPack</i> : a brainstorming exercise specially designed for packaging development	208
	The <i>IdeaStore</i>	209
	Inside the box	213
	Conclusions	215
	Topics for further discussion	216
	References	217
11	From open innovation to partnerships	219
	From open innovation to partnerships: a logical transition	219
	The creation of the innovation partnership model	224

How to deal with intellectual property in innovation partnerships	230
Turning partnerships into successful and sustainable endeavors	232
The future of open innovation and innovation partnerships	233
Conclusions	235
Topics for further discussion	237
References	237
12 What can the food industry learn from Silicon Valley?	239
Introduction	239
Hi, I am a connections explorer	239
Six degrees of separation	240
The strength of weak ties	240
Formal approaches to innovation partnerships	242
Singularity University	242
Corporate venture groups and innovation labs	242
Bridge organizations	244
But how does somebody become a networker or connector or a connections explorer?	244
The power of networking: networking principles	246
Silicon Valley and its eco-system	246
What about food and tech incubators/accelerators/co-working spaces in the USA and the San Francisco Bay Area?	248
Food incubators and accelerators outside of Silicon Valley	249
What else does the food industry borrow from Silicon Valley?	250
More Examples	252
A food revolution beyond Silicon Valley	253
Funding good design is now officially mainstream	255
Who are the food and design start-up players?	258
Conclusions	258
Topics for further discussion	259
13 What was it all about? An attempt at a conclusion	261
A few moments in the life of Manny Middle	261
From field to fork	263
Manny Middle discovers the role of design	269
Minnie Middleton takes a closer look at the role of technology and discovers the concept of supplier partners	271
Minnie Middleton discovers the value of innovation in her company	272
Minnie Middleton and Manny Middle discover the power of networking and travel to Silicon Valley	273
Epilogue: the questionnaire	274
Feedback from the Unilever CEO	276
Other feedback, combined from several “voices” from the industry	278
<i>Index</i>	287
