Decision Making and Performance Evaluation Using Data Envelopment Analysis

 Springer

Contents

1	The Gemstone Example	1
1.1	Introduction	1
1.2	The Gemstone Example	1
1.3	Factors and the Cartesian Coordinate Plane	4
1.4	The Partially/Wholly Dominant Concept	7
1.5	The Rank of the Candidates	16
1.6	The Relative Score	22
1.7	The Unity Scale and the Unit Invariant Property	24
1.8	Conclusion	27
1.9	Exercises	32
2	Possibility and Practicability	33
2.1	Introduction	33
2.2	Possibility and Practicability	33
2.2.1	The Wholly Dominant Approach	34
2.2.2	The Convexity Approach	40
2.2.3	The Radiate Approach	46
2.2.4	The Mixed Approaches	48
2.2.5	The Other Approaches	58
2.3	Homogeneity and the Relative Score	59
2.3.1	A Philosophical Discussion	61
2.4	The Preplanned Purpose/Goal	62
2.5	Conclusion	65
2.6	Exercises	66
3	The Petroleum Example	69
3.1	Introduction	69
3.2	Petroleum Example	69
3.3	The Geometry Interpretation	72
3.4	The Practical Points	74
3.5	The Unit of Measurement	77

- 3.6 Unknown Units of Measurement 81
 - 3.6.1 The Statistical Measurement Approximations 82
 - 3.6.2 The Specified Division Measurement Approximation 92
 - 3.6.3 The Classifications of Weights 94
- 3.7 Conclusion 101
- 3.8 Exercise 103
- 4 The Optimization Approach 107**
 - 4.1 Introduction 107
 - 4.2 The Optimization Approach 107
 - 4.2.1 The Maximum Value of the Relative Scores 108
 - 4.2.2 The Microsoft Excel Solver Software 109
 - 4.2.3 The Microsoft Visual Basic Software 111
 - 4.2.4 The Minimum Value of the Relative Scores 112
 - 4.3 Homogeneity and the Relative Score 116
 - 4.4 Another View of the Petroleum Example 120
 - 4.5 Regulating the Amounts of Factors 129
 - 4.6 Conclusion 133
 - 4.7 Exercise 133
- 5 The Airport Example 135**
 - 5.1 Introduction 135
 - 5.2 The Airport Example 135
 - 5.3 The Wholly Dominant Approach 137
 - 5.4 The Convexity Approach 145
 - 5.5 The Partially Dominant Concept 150
 - 5.6 Unknown Units of Measurement 151
 - 5.6.1 The Extremum Measurement Approximation 151
 - 5.6.2 The Average Measurement Approximation 152
 - 5.6.3 The Specified Airport Measurement Approximation 152
 - 5.6.4 The Optimization Measurement Approximation 153
 - 5.6.5 Minimum Value of the Relative Scores 176
 - 5.7 Conclusion 181
 - 5.8 Exercises 182
- 6 The Delta Neighborhood 183**
 - 6.1 Introduction 183
 - 6.2 One Set of Weights 183
 - 6.3 Relationship Between Two Approaches 188
 - 6.4 Examining a Delta Neighborhood 192
 - 6.4.1 Introducing a Delta Neighborhood 192
 - 6.4.2 The Maximum Value of the Relative Scores 194
 - 6.4.3 The Dual Linear Programming of Form 3 199
 - 6.4.4 Introducing a New Measure 202
 - 6.5 Conclusion 211
 - 6.6 Exercises 212

- 7 Data Envelopment Analysis** 217
 - 7.1 Introduction 217
 - 7.2 Reestablishing the Introduced Phrases 217
 - 7.2.1 The Technical Efficiency Measurement 218
 - 7.2.2 Efficiency Measurement 220
 - 7.2.3 The Productivity Measurement 224
 - 7.3 Data Envelopment Analysis 227
 - 7.3.1 DEA Axioms 229
 - 7.3.2 DEA Models 232
 - 7.4 Conclusion 233
 - 7.5 Exercises 233
- 8 The Ratio of Output to Input Factors** 235
 - 8.1 Introduction 235
 - 8.2 Charnes, Cooper and Rhodes Model 235
 - 8.3 Banker, Charnes and Cooper Model 242
 - 8.4 CRS Output-Input Ratio Analysis 244
 - 8.5 VRS Output-Input Ratio Analysis 246
 - 8.6 Conclusion 247
 - 8.7 Exercises 248
- 9 Production Planning Problem** 251
 - 9.1 Introduction 251
 - 9.2 Twenty Fast-Food restaurants 251
 - 9.2.1 CCR Efficient Restaurants 252
 - 9.3 Idea 1: Overall Production Performance 257
 - 9.4 Idea 2: Max-Min Output-Input 268
 - 9.5 Applying Ideas 1 and 2 for the Chain Restaurants 275
 - 9.6 Conclusion 287
 - 9.7 Exercises 288
- 10 Context-Dependent DEA** 289
 - 10.1 Introduction 289
 - 10.2 Context-Dependent 289
 - 10.3 An Example of Twenty-Three Public Libraries in Tokyo 292
 - 10.4 Conclusion 301
 - 10.5 Exercises 301
- 11 Efficiency Change Over Different Times** 303
 - 11.1 Introduction 303
 - 11.2 The Basic Theory on the Malmquist Index 303
 - 11.3 The Component of the Malmquist Index 313
 - 11.4 A Computer Industry Example 325
 - 11.5 A Non-radial Malmquist Efficiency Index 330
 - 11.6 An Example of Three Major Chinese Industries 336
 - 11.7 Conclusion 355
 - 11.8 Exercises 356

- 12 Delta Neighborhood Extension 357**
 - 12.1 Introduction 357
 - 12.2 The Delta KAM 357
 - 12.3 KAM and Uncontrollable Factors 361
 - 12.4 KAM and the Production Tape 365
 - 12.5 An Improvement of KAM 369
 - 12.5.1 Solving KAM for a Request 371
 - 12.5.2 A Specified Request for KAM 376
 - 12.6 KAM Scores and Decomposition of Inefficiency 377
 - 12.7 Outliers and Numbers of Firms via Factors 383
 - 12.8 Conclusion 384
 - 12.9 Exercises 384
- References 387**
- Index 389**
