Contents

List of Contributors	ix
1. Key Drivers of Food Insecurity	1
<i>Helen Fyles and Chandra Madramootoo</i>	
1. Introduction	1
2. Food Prices	1
3. Rising Demand for Food	2
4. Climate Change	3
5. Availability of Natural Resources	8
6. Markets and Trade	11
7. Investments in the Agricultural Sector	11
8. Biofuel Production	12
9. Conclusions	14
References	14
Part One Emerging Technologies for Plant and Animal Food Security	21
2. Emerging Genetic Technologies for Improving the Security of Food Crops	23
<i>Jaswinder Singh, Simerjeet Kaur and Haritika Majithia</i>	
1. Introduction	23
2. Success Stories: The Green Revolution	26
3. Current Scenario: The Gene-Sequencing Revolution	27
4. Molecular and Genomic-Assisted Breeding	30
5. Genomics-Integrated Breeding Technologies	32
6. Implementation of Integrated Breeding Strategies for Food Security	35
References	36
3. Successful Technologies and Approaches Used to Develop and Manage Resistance against Crop Diseases and Pests	43
<i>G.L. Hartman, M.L. Pawlowski, H.-X. Chang and C.B. Hill</i>	
1. Introduction	43
2. Current Approaches to Increase Resistance Durability	47
3. Improvement of Crop Resistance with Genetic Transformation	51

4. Inducing Plant Defenses	54
5. Future Considerations	58
References	59
4. The Use of Technologies for Sufficient and Quality Animal-Food Production	67
<i>Kevin M. Wade</i>	
1. Introduction	67
2. The Need for Animal Products	67
3. Improved Animal Production Through Technology	73
4. The Challenges Associated with Using Improved Technologies	81
5. Future Trends	87
References	88
5. Aquaculture Technologies for Food Security	93
<i>David C. Little and Stuart W. Bunting</i>	
1. Introduction	93
2. Aquaculture, Fisheries, and Related Forms of Food Production	95
3. Key Change Drivers	98
4. Intensification: Options and Implications	99
5. Life Stage and Technological Choices: Many Opportunities for Juveniles, Fewer for Food Fish	102
6. Risk Management and Biosecurity for Animal and Environmental Health	103
7. Species or Strain Opportunities for Genetic Gain	105
8. Toward Specialization or Integration: Aquaculture at a Crossroads	107
9. Future Trends	109
References	110
Part Two Environmental and Policy Issues Affecting Food Security	115
6. Water Management	117
<i>Helen Fyles and Chandra Madramootoo</i>	
1. Introduction	117
2. Practices to Raise Water Use Efficiency (WUE)	119
3. Wastewater Use	124
4. Excess Water Management	125
5. Environmental Issues	126
6. Institutions and Governance	127
7. Conclusions	130
References	130

7. Reducing Postharvest Losses	135
<i>Marie-Josée Dumont, Valérie Orsat and Vijaya Raghavan</i>	
1. Introduction	135
2. Handling of Fresh Fruits and Vegetables	135
3. Storage of Fresh Fruits and Vegetables	138
4. Handling and Storage of Grains and Cereals	141
5. Quantitative and Qualitative Losses	146
6. Packaging and Distribution Chain	149
7. Conclusions	153
References	153
Index	157
