# Contents

Introduction.....	xxi
-------------------	-----

**CHAPTER 1 Physical Properties of Food Materials ..... 1**

1.1 Introduction .....	1
1.2 Mass, volume, density.....	2
1.3 Mechanical properties .....	2
1.3.1 Definitions.....	2
1.3.2 Rheological models.....	4
1.4 Thermal properties .....	5
1.5 Electrical properties .....	7
1.6 Structure .....	7
1.7 Water activity.....	10
1.7.1 The importance of water in foods .....	10
1.7.2 Water activity, definition, and determination.....	11
1.7.3 Water activity: Prediction .....	11
1.7.4 Water vapor sorption isotherms.....	13
1.7.5 Water activity: Effect on food quality and stability .....	17
1.8 Phase transition phenomena in foods .....	17
1.8.1 The glassy state in foods.....	17
1.8.2 Glass transition temperature .....	18
1.9 Optical properties .....	21
1.10 Surface properties .....	23
1.11 Acoustic properties .....	24
References.....	24

**CHAPTER 2 Fluid Flow..... 29**

2.1 Introduction .....	29
2.2 Elements of fluid mechanics.....	29
2.2.1 Viscosity.....	29
2.2.2 Fluid flow regimes .....	30
2.2.3 Typical applications of Newtonian laminar flow.....	32
2.2.4 Turbulent fluid flow.....	38
2.3 Flow properties of fluids.....	42
2.3.1 Types of fluid flow behavior .....	42
2.3.2 Non-Newtonian fluid flow in pipes.....	43
2.4 Transportation of fluids.....	45
2.4.1 Energy relations: The Bernoulli equation .....	45
2.4.2 Pumps: Types and operation.....	48

	2.4.3	Pump selection .....	56
	2.4.4	Ejectors.....	58
	2.4.5	Piping.....	59
<b>2.5</b>		Flow of particulate solids (powder flow) .....	60
	2.5.1	Introduction .....	60
	2.5.2	Flow properties of particulate solids .....	61
	2.5.3	Fluidization.....	67
	2.5.4	Pneumatic transport.....	70
	2.5.5	Flow of powders in storage bins.....	73
	2.5.6	Caking .....	74
		References.....	75
<b>CHAPTER 3</b>		<b>Heat and Mass Transfer .....</b>	<b>77</b>
<b>3.1</b>		Introduction .....	77
<b>3.2</b>		Basic relations in transport phenomena.....	77
	3.2.1	Basic laws of transport.....	77
	3.2.2	Mechanisms of heat and mass transfer.....	78
<b>3.3</b>		Conductive heat and mass transfer.....	78
	3.3.1	The Fourier and Fick laws.....	78
	3.3.2	Integration of Fourier's and Fick's laws for steady state conductive transport .....	79
	3.3.3	Thermal conductivity, thermal diffusivity and molecular diffusivity .....	81
	3.3.4	Examples of steady-state conductive heat and mass transfer processes .....	84
<b>3.4</b>		Convective heat and mass transfer .....	90
	3.4.1	Film (or surface) heat and mass transfer coefficients .....	90
	3.4.2	Empirical correlations for convection heat and mass transfer.....	93
	3.4.3	Steady-state interphase mass transfer.....	96
<b>3.5</b>		Unsteady state heat and mass transfer.....	98
	3.5.1	The second Fourier and Fick laws.....	98
	3.5.2	Solution of Fourier's second law equation for an infinite slab.....	100
	3.5.3	Transient conduction transfer in finite solids.....	101
	3.5.4	Transient convective transfer in a semi-infinite body .....	104
	3.5.5	Unsteady-state convective transfer .....	105
<b>3.6</b>		Heat transfer by radiation .....	105
	3.6.1	Interaction between matter and thermal radiation.....	106
	3.6.2	Radiation heat exchange between surfaces .....	107
	3.6.3	Radiation combined with convection .....	109

3.7	Heat exchangers .....	110
3.7.1	Overall coefficient of heat transfer.....	110
3.7.2	Heat exchange between flowing fluids .....	111
3.7.3	Fouling.....	114
3.7.4	Heat exchangers in the food process industry.....	115
3.8	Microwave and radio frequency (RF) heating .....	117
3.8.1	Basic principles of microwave and RF heating .....	119
3.9	Ohmic heating .....	120
3.9.1	Introduction .....	120
3.9.2	Basic principles .....	122
3.9.3	Applications and equipment .....	123
	References.....	124
<b>CHAPTER 4</b>	<b>Reaction Kinetics.....</b>	<b>127</b>
4.1	Introduction .....	127
4.2	Basic concepts.....	128
4.2.1	Elementary and non-elementary reactions .....	128
4.2.2	Reaction order .....	128
4.2.3	Effect of temperature on reaction kinetics .....	132
4.3	Kinetics of biological processes .....	134
4.3.1	Enzyme-catalyzed reactions.....	134
4.3.2	Growth of microorganisms .....	135
4.4	Residence time and residence time distribution.....	137
4.4.1	Reactors in food processing.....	137
4.4.2	Residence time distribution .....	138
	References.....	141
<b>CHAPTER 5</b>	<b>Elements of Process Control .....</b>	<b>143</b>
5.1	Introduction .....	143
5.2	Basic concepts.....	143
5.3	Basic control structures.....	144
5.3.1	Feedback control .....	145
5.3.2	Feed-forward control.....	145
5.3.3	Comparative merits of control strategies.....	146
5.4	The block diagram .....	146
5.5	Input, output and process dynamics .....	147
5.5.1	First-order response.....	148
5.5.2	Second-order systems.....	150
5.6	Control modes (control algorithms) .....	150
5.6.1	On–off (binary) control.....	151
5.6.2	Proportional (P) control .....	152

5.6.3	Integral (I) control.....	154
5.6.4	Proportional–integral (PI) control.....	154
5.6.5	Proportional–integral–differential (PID) control.....	154
5.6.6	Optimization of control.....	155
<b>5.7</b>	<b>Physical elements of the control system .....</b>	<b>156</b>
5.7.1	The sensors (measuring elements).....	156
5.7.2	The controllers .....	164
5.7.3	The actuators .....	164
	References.....	165
<b>CHAPTER 6</b>	<b>Size Reduction .....</b>	<b>167</b>
<b>6.1</b>	<b>Introduction .....</b>	<b>167</b>
<b>6.2</b>	<b>Particle size and particle size distribution.....</b>	<b>168</b>
6.2.1	Defining the size of a single particle.....	168
6.2.2	Particle size distribution in a population of particles; defining a “mean particle size”.....	169
6.2.3	Mathematical models of PSD .....	171
6.2.4	A note on particle shape .....	174
<b>6.3</b>	<b>Size reduction of solids: basic principles .....</b>	<b>175</b>
6.3.1	Mechanism of size reduction in solids .....	175
6.3.2	Particle size distribution after size reduction .....	177
6.3.3	Energy consumption .....	178
<b>6.4</b>	<b>Size reduction of solids: equipment and methods.....</b>	<b>180</b>
6.4.1	Impact mills.....	180
6.4.2	Pressure mills .....	181
6.4.3	Attrition mills .....	183
6.4.4	Cutters and choppers.....	185
6.4.5	The wheat milling process.....	189
	References.....	191
<b>CHAPTER 7</b>	<b>Mixing.....</b>	<b>193</b>
<b>7.1</b>	<b>Introduction .....</b>	<b>193</b>
<b>7.2</b>	<b>Mixing of fluids (blending) .....</b>	<b>193</b>
7.2.1	Types of blenders.....	193
7.2.2	Flow patterns in fluid mixing .....	195
7.2.3	Energy input in fluid mixing .....	196
7.2.4	Mixing time.....	200
<b>7.3</b>	<b>Kneading .....</b>	<b>200</b>
<b>7.4</b>	<b>In-flow mixing .....</b>	<b>203</b>
<b>7.5</b>	<b>Mixing of particulate solids .....</b>	<b>203</b>
7.5.1	Mixing and segregation .....	203

7.5.2	Quality of mixing: the concept of “mixedness”	204
7.5.3	Equipment for mixing particulate solids	206
<b>7.6</b>	<b>Homogenization</b>	<b>208</b>
7.6.1	Basic principles	208
7.6.2	Homogenizers	211
<b>7.7</b>	<b>Foaming</b>	<b>214</b>
	References	214
<b>CHAPTER 8</b>	<b>Filtration and Expression</b>	<b>217</b>
<b>8.1</b>	<b>Introduction</b>	<b>217</b>
<b>8.2</b>	<b>Depth filtration</b>	<b>218</b>
<b>8.3</b>	<b>Surface (barrier) filtration</b>	<b>220</b>
8.3.1	Mechanisms	220
8.3.2	Rate of filtration	221
8.3.3	Optimization of the filtration cycle	227
8.3.4	Characteristics of filtration cakes	227
8.3.5	The role of cakes in filtration	228
<b>8.4</b>	<b>Filtration equipment</b>	<b>229</b>
8.4.1	Depth filters	229
8.4.2	Barrier (surface) filters	230
<b>8.5</b>	<b>Expression</b>	<b>234</b>
8.5.1	Introduction	234
8.5.2	Mechanisms	235
8.5.3	Applications and equipment	237
	References	239
<b>CHAPTER 9</b>	<b>Centrifugation</b>	<b>241</b>
<b>9.1</b>	<b>Introduction</b>	<b>241</b>
<b>9.2</b>	<b>Basic principles</b>	<b>242</b>
9.2.1	The continuous settling tank	242
9.2.2	From settling tank to tubular centrifuge	244
9.2.3	The baffled settling tank and the disc-bowl centrifuge	247
9.2.4	Liquid–liquid separation	249
<b>9.3</b>	<b>Centrifuges</b>	<b>251</b>
9.3.1	Tubular centrifuges	251
9.3.2	Disc-bowl centrifuges	251
9.3.3	Decanter centrifuges	254
9.3.4	Basket centrifuges	254
<b>9.4</b>	<b>Cyclones</b>	<b>256</b>
	References	257

<b>CHAPTER 10</b>	<b>Membrane Processes .....</b>	<b>259</b>
10.1	Introduction .....	259
10.2	Tangential filtration .....	259
10.3	Mass transfer through MF and UF membranes .....	261
10.3.1	Solvent transport .....	261
10.3.2	Solute transport; sieving coefficient and rejection .....	263
10.3.3	Concentration polarization and gel polarization .....	264
10.4	Mass transfer in reverse osmosis .....	268
10.4.1	Basic concepts .....	268
10.4.2	Solvent transport in reverse osmosis .....	269
10.5	Membrane systems .....	272
10.5.1	Membrane materials .....	272
10.5.2	Membrane configurations .....	273
10.6	Membrane processes in the food industry .....	276
10.6.1	Microfiltration .....	276
10.6.2	Ultrafiltration .....	276
10.6.3	Nanofiltration and reverse osmosis .....	278
10.7	Electrodialysis .....	281
	References .....	282
<b>CHAPTER 11</b>	<b>Extraction .....</b>	<b>287</b>
11.1	Introduction .....	287
11.2	Solid–liquid extraction (leaching) .....	288
11.2.1	Definitions .....	289
11.2.2	Material balance .....	290
11.2.3	Equilibrium .....	290
11.2.4	Multi-stage extraction .....	290
11.2.5	Stage efficiency .....	294
11.2.6	Solid–liquid extraction systems .....	295
11.2.7	Effect of processing conditions on extraction performance .....	299
11.3	Supercritical fluid extraction .....	301
11.3.1	Basic principles .....	301
11.3.2	Supercritical fluids as solvents .....	302
11.3.3	Supercritical extraction systems .....	304
11.3.4	Applications .....	305
11.4	Liquid–liquid extraction .....	306
11.4.1	Principles .....	306
11.4.2	Applications .....	307
	References .....	307

<b>CHAPTER 12</b>	<b>Adsorption and Ion Exchange .....</b>	<b>311</b>
12.1	Introduction .....	311
12.2	Equilibrium conditions .....	312
12.3	Batch adsorption .....	315
12.4	Adsorption in columns.....	319
12.5	Ion exchange .....	320
12.5.1	Basic principles .....	320
12.5.2	Properties of ion exchangers.....	321
12.5.3	Water-softening using ion exchange .....	324
12.5.4	Reduction of acidity in fruit juices using ion exchange .....	325
	References.....	326
<b>CHAPTER 13</b>	<b>Distillation .....</b>	<b>329</b>
13.1	Introduction .....	329
13.2	Vapor–liquid equilibrium (VLA) .....	329
13.3	Continuous flash distillation .....	332
13.4	Batch (differential) distillation .....	335
13.5	Fractional distillation .....	337
13.5.1	Basic concepts.....	337
13.5.2	Analysis and design of the column .....	339
13.5.3	Effect of the reflux ratio .....	344
13.5.4	Tray configuration.....	344
13.5.5	Column configuration .....	345
13.5.6	Heating with live steam .....	345
13.5.7	Energy considerations .....	345
13.6	Steam distillation .....	346
13.7	Distillation of wines and spirits.....	348
13.8	Pervaporation .....	349
13.8.1	Basic principles .....	349
13.8.2	Pervaporation membranes.....	350
13.8.3	Applications .....	350
	References.....	351
<b>CHAPTER 14</b>	<b>Crystallization and Dissolution.....</b>	<b>353</b>
14.1	Introduction .....	353
14.2	Kinetics of crystallization from solutions .....	354
14.2.1	Nucleation .....	354
14.2.2	Crystal growth.....	357
14.3	Polymorphism in lipid crystals.....	361
14.4	Crystallization in the food industry .....	361

	14.4.1	Equipment .....	361
	14.4.2	Processes .....	361
<b>14.5</b>		Dissolution .....	368
	14.5.1	Introduction .....	368
	14.5.2	Mechanism and kinetics.....	368
		References.....	370
<b>CHAPTER 15</b>	<b>Extrusion .....</b>		<b>373</b>
<b>15.1</b>		Introduction .....	373
<b>15.2</b>		The single-screw extruder.....	375
	15.2.1	Structure .....	375
	15.2.2	Operation .....	376
	15.2.3	Flow models, extruder throughput.....	377
	15.2.4	Residence time distribution .....	380
<b>15.3</b>		Twin-screw extruders.....	381
	15.3.1	Structure .....	381
	15.3.2	Operation .....	381
	15.3.3	Advantages and shortcomings .....	384
<b>15.4</b>		Effect on foods.....	384
	15.4.1	Physical effects .....	384
	15.4.2	Chemical effect .....	385
<b>15.5</b>		Food applications of extrusion .....	386
	15.5.1	Forming extrusion of pasta .....	386
	15.5.2	Expanded snacks .....	387
	15.5.3	Ready-to-eat cereals.....	388
	15.5.4	Pellets .....	388
	15.5.5	Other extruded starchy and cereal products .....	389
	15.5.6	Texturized protein products.....	390
	15.5.7	Confectionery and chocolate .....	390
	15.5.8	Pet foods.....	391
		References.....	391
<b>CHAPTER 16</b>	<b>Spoilage and Preservation of Foods.....</b>		<b>395</b>
<b>16.1</b>		Mechanisms of food spoilage.....	395
<b>16.2</b>		Food preservation processes.....	395
<b>16.3</b>		Combined processes (the “hurdle effect”) .....	397
<b>16.4</b>		Packaging .....	397
		Additional Reading.....	397
<b>CHAPTER 17</b>	<b>Thermal Processing .....</b>		<b>399</b>
<b>17.1</b>		Introduction .....	399

17.2	The kinetics of thermal inactivation of microorganisms and enzymes.....	400
17.2.1	The concept of decimal reduction time.....	400
17.2.2	Effect of the temperature on the rate of thermal destruction/inactivation.....	403
17.2.3	Lethality of thermal processes.....	405
17.3	Optimization of thermal processes with respect to quality .....	407
17.4	Heat transfer considerations in thermal processing .....	409
17.4.1	In-package thermal processing .....	409
17.4.2	In-flow thermal processing .....	415
	References.....	419
<b>CHAPTER 18</b>	<b>Thermal Processes, Methods and Equipment.....</b>	<b>421</b>
18.1	Introduction.....	421
18.2	Thermal processing in hermetically closed containers.....	421
18.2.1	Filling the containers .....	421
18.2.2	Expelling air from the head-space.....	422
18.2.3	Sealing.....	425
18.2.4	Heat processing .....	425
18.3	Thermal processing in bulk, before packaging.....	433
18.3.1	Bulk heating—hot filling—sealing—cooling in container .....	433
18.3.2	Bulk heating—holding—bulk cooling—cold filling—sealing.....	433
18.3.3	Aseptic processing .....	434
	References.....	437
<b>CHAPTER 19</b>	<b>Refrigeration: Chilling and Freezing.....</b>	<b>439</b>
19.1	Introduction.....	439
19.2	Effect of temperature on food spoilage.....	440
19.2.1	Temperature and chemical activity .....	440
19.2.2	Effect of low temperature on enzymatic spoilage.....	443
19.2.3	Effect of low temperature on microorganisms .....	444
19.2.4	Effect of low temperature on biologically active (respiring) tissue.....	446
19.2.5	The effect of low temperature on physical properties .....	448
19.3	Freezing.....	448
19.3.1	Phase transition, freezing point .....	449

	19.3.2	Freezing kinetics, freezing time .....	452
	19.3.3	Effect of freezing and frozen storage on product quality .....	456
	<b>19.4</b>	Superchilling .....	458
		References.....	459
<b>CHAPTER 20</b>	<b>Refrigeration .....</b>		<b>461</b>
	<b>20.1</b>	Sources of refrigeration .....	461
	20.1.1	Mechanical refrigeration .....	461
	20.1.2	Refrigerants .....	467
	20.1.3	Distribution and delivery of refrigeration .....	468
	<b>20.2</b>	Cold storage and refrigerated transport.....	468
	<b>20.3</b>	Chillers and freezers .....	471
	20.3.1	Blast cooling .....	472
	20.3.2	Contact freezers.....	474
	20.3.3	Immersion cooling .....	475
	20.3.4	Evaporative cooling .....	475
	20.3.5	Pressure-shift freezing.....	477
		References.....	477
<b>CHAPTER 21</b>	<b>Evaporation.....</b>		<b>479</b>
	<b>21.1</b>	Introduction.....	479
	<b>21.2</b>	Material and energy balance.....	480
	<b>21.3</b>	Heat transfer.....	482
	21.3.1	The overall coefficient of heat transfer $U$ .....	483
	21.3.2	The temperature difference $T_S - T_C$ ( $\Delta T$ ).....	486
	<b>21.4</b>	Energy management .....	490
	21.4.1	Multiple-effect evaporation .....	490
	21.4.2	Vapor recompression .....	496
	<b>21.5</b>	Condensers .....	497
	<b>21.6</b>	Evaporators in the food industry .....	499
	21.6.1	Open pan batch evaporator .....	499
	21.6.2	Vacuum pan evaporator .....	499
	21.6.3	Evaporators with internal tubular heat exchangers .....	499
	21.6.4	Evaporators with external tubular heat exchangers .....	501
	21.6.5	Boiling film evaporators .....	501
	<b>21.7</b>	Effect of evaporation on food quality .....	505
	21.7.1	Thermal effects .....	505
	21.7.2	Loss of volatile flavor components .....	506
		References.....	509

<b>CHAPTER 22</b>	<b>Dehydration .....</b>	<b>511</b>
22.1	Introduction .....	511
22.2	Thermodynamics of moist air (psychrometry).....	512
22.2.1	Basic principles .....	512
22.2.2	Humidity.....	513
22.2.3	Saturation, relative humidity (RH) .....	514
22.2.4	Adiabatic saturation, wet-bulb temperature .....	514
22.2.5	Dew point.....	515
22.3	Convective drying (air drying).....	516
22.3.1	The drying curve.....	516
22.3.2	The constant rate phase.....	519
22.3.3	The falling rate phase .....	522
22.3.4	Calculation of drying time .....	524
22.3.5	Effect of external conditions on the drying rate .....	527
22.3.6	Relationship between film coefficients in convective drying.....	528
22.3.7	Effect of radiation heating .....	528
22.3.8	Characteristic drying curves .....	529
22.4	Drying under varying external conditions.....	530
22.4.1	Batch drying on trays.....	530
22.4.2	Through-flow batch drying in a fixed bed .....	532
22.4.3	Continuous air drying on a belt or in a tunnel .....	533
22.5	Conductive (boiling) drying .....	533
22.5.1	Basic principles .....	533
22.5.2	Kinetics.....	534
22.5.3	Systems and applications .....	535
22.6	Dryers in the food processing industry .....	538
22.6.1	Cabinet dryers .....	538
22.6.2	Tunnel dryers .....	540
22.6.3	Belt dryers .....	541
22.6.4	Belt-trough dryers .....	543
22.6.5	Rotary dryers.....	543
22.6.6	Bin dryers .....	543
22.6.7	Grain dryers.....	544
22.6.8	Spray dryers .....	545
22.6.9	Fluidized bed dryer .....	551
22.6.10	Pneumatic dryer .....	552
22.6.11	Drum dryers .....	552
22.6.12	Screw conveyor and mixer dryers.....	553
22.6.13	Sun drying, solar drying .....	553

22.7	Issues in food drying technology.....	555
22.7.1	Pre-drying treatments.....	555
22.7.2	Effect of drying conditions on quality .....	556
22.7.3	Post-drying treatments .....	557
22.7.4	Rehydration characteristics.....	558
22.7.5	Agglomeration.....	559
22.8	Energy consumption in drying .....	559
22.9	Osmotic dehydration.....	561
	References.....	562
<b>CHAPTER 23</b>	<b>Freeze Drying (Lyophilization) and Freeze Concentration .....</b>	<b>567</b>
23.1	Introduction.....	567
23.2	Sublimation of water.....	567
23.3	Heat and mass transfer in freeze drying.....	568
23.3.1	Heat and mass transfer mechanisms.....	568
23.3.2	Drying kinetics – simplified model.....	570
23.3.3	Drying kinetics – other models .....	574
23.4	Freeze drying in practice .....	574
23.4.1	Freezing.....	574
23.4.2	Drying conditions.....	574
23.4.3	Microwave freeze-drying.....	575
23.4.4	Freeze drying: commercial facilities .....	576
23.4.5	Freeze dryers .....	576
23.5	Freeze concentration.....	577
23.5.1	Basic principles .....	577
23.5.2	The process of freeze concentration.....	578
	References.....	580
<b>CHAPTER 24</b>	<b>Frying, Baking, Roasting .....</b>	<b>583</b>
24.1	Introduction.....	583
24.2	Frying.....	583
24.2.1	Types of frying.....	583
24.2.2	Heat and mass transfer in frying .....	584
24.2.3	Systems and operation .....	585
24.2.4	Health aspects of fried foods .....	586
24.3	Baking and roasting .....	586
	References.....	589
<b>CHAPTER 25</b>	<b>Chemical Preservation.....</b>	<b>591</b>
25.1	Introduction.....	591

25.2	Chemical control of microbial spoilage .....	591
25.2.1	Kinetics, dose–response function .....	591
25.2.2	Individual antimicrobial agents .....	594
25.3	Antioxidants .....	600
25.3.1	Oxidation and antioxidants in food .....	600
25.3.2	Individual food antioxidants .....	602
	References.....	602
<b>CHAPTER 26</b>	<b>Ionizing Irradiation and Other Non-Thermal Preservation Processes.....</b>	<b>607</b>
26.1	Preservation by ionizing radiations .....	607
26.1.1	Introduction .....	607
26.1.2	Ionizing radiations.....	607
26.1.3	Radiation sources .....	608
26.1.4	Interaction with matter.....	609
26.1.5	Radiation dose.....	611
26.1.6	Chemical and biological effects of ionizing irradiation .....	612
26.1.7	Industrial applications.....	614
26.2	High hydrostatic pressure (HHP) preservation .....	615
26.3	Pulsed electric fields (PEF) .....	616
26.4	Pulsed intense light .....	618
	References.....	618
<b>CHAPTER 27</b>	<b>Food Packaging .....</b>	<b>621</b>
27.1	Introduction.....	621
27.2	Packaging materials .....	622
27.2.1	Introduction .....	622
27.2.2	Materials for packaging foods .....	624
27.2.3	Transport properties of packaging materials.....	626
27.2.4	Optical properties.....	629
27.2.5	Mechanical properties.....	630
27.2.6	Chemical reactivity .....	631
27.3	The atmosphere in the package .....	632
27.3.1	Vacuum packaging.....	632
27.3.2	Controlled atmosphere packaging (CAP).....	633
27.3.3	Modified atmosphere packaging (MAP) .....	633
27.3.4	Active packaging.....	633
27.3.5	Intelligent packaging.....	634
27.4	Environmental issues .....	634
	References.....	635

<b>CHAPTER 28</b>	<b>Cleaning, Disinfection, Sanitation .....</b>	<b>637</b>
<b>28.1</b>	Introduction .....	637
<b>28.2</b>	Cleaning kinetics and mechanisms.....	638
28.2.1	Effect of the contaminant .....	638
28.2.2	Effect of the support .....	640
28.2.3	Effect of the cleaning agent.....	641
28.2.4	Effect of the temperature .....	642
28.2.5	Effect of mechanical action (shear).....	643
<b>28.3</b>	Kinetics of disinfection.....	643
<b>28.4</b>	Cleaning of raw materials.....	645
<b>28.5</b>	Cleaning of plants and equipment.....	646
28.5.1	Cleaning out-of-place (COP) .....	646
28.5.2	Cleaning in-place (CIP) .....	647
<b>28.6</b>	Cleaning of packages.....	648
<b>28.7</b>	Odor abatement.....	648
	References.....	649
	Appendix.....	651
	Food Science and Technology: International Series List.....	673
	Index .....	677
