Contents

<i>Preface to the Second Edition</i>	<i>v</i>
<i>Preface to the First Edition</i>	<i>vii</i>
1. Nature of Food Study	1
Aim of Study of Food Science	1
Food Science and Food Technology	2
Definitions	2
Specific Nutrients in Foods and Their Functions	4
Food Microbiology	5
Food Poisoning	6
Food Preservation	7
Points to Remember	8
Study Questions	9
2. Basic Chemistry of Foods	10
Atoms and Atomic Particles	10
Components of Atom	11
Molecules	12
Organic Chemistry	12
Hydrocarbons	13
Alcohols and Acids Occurring in Foods	14
Points to Remember	18
Study Questions	18
3. Food as a Source of Nutrients	19
Carbohydrates	19

Proteins 21
Oils and Fats 25
Minerals 26
Water 28
Vitamins 28
Points to Remember 35
Study Question 36

4. Basic Food Groups and their Nutrient Contribution 38

Food Guide for Selecting an Adequate Diet 40
Group 1: Cereals & Breads 41
Group 2: Protein Foods 43
Group 3: Protective Vegetables and Fruits 45
Group 4: Other Vegetables and Fruits 46
Group 5: Oils, Fats and Sugars 46
Nutrient Density 47
Practical Aspects of Food Selection 48
Points to Remember 49
Study Questions 49

5. Food Preparation and Processing Techniques 51

Reasons for Cooking Foods 51
Preliminary Treatment of Foods 52
Seasoning 53
Food Preparation Techniques 53
Choice of Fuel 55
Medium of Cooking 55
Water 56
Oil or Fat 57
Air (Dry Heat) 58
Microwave 59
Solar Cooker 60
Combination of Methods 60

Points to Remember	60
Study Questions	61
6. Effect of Preparation and Processing on Food Components	62
Carbohydrates	62
Proteins	63
Oils and Fats	64
Vitamins	64
Pigments	65
Flavour Components	66
Retention of Nutritive Value During Preparation	66
Effects of Cooking on Microbial Quality of Food	67
Points to Remember	67
Study Question	68
7. Food Acceptance and Sensory Evaluation of Foods	69
Colour in Food	69
Texture in Foods	70
Flavour in Food	71
Flavouring Substances	72
Sensory Evaluation of Foods and Food Products	73
Points to Remember	74
Study Questions	74
8. Water	75
Water Content in Foods	75
Role in Food Preparation	76
As a Cooking Medium	76
As a Solvent	76
Water Absorption	76
Water as a Leavening Agent	77
Keeping Quality of Foods	78
Texture and Consistency	78
Body Needs	78

Hard Water 79
Points to Remember 79
Study Questions 80

9. Carbohydrates in Foods **81**

Classification 82
Monosaccharides 82
Diasaccharides 84
Sugars 84
 Sources and Properties of Sugars 85
Manufacture of Sugar from Sugar Cane 85
Sugar Consumption and Health 86
Use of Sugar 86
Properties of Sugars 87
Adsorption and Impurities in the Solution 88
Manufactured Foods Containing Sugar 89
Use of High Fructose Corn Syrup (HFCS) in Place of Sugar 89
Starch 90
 Properties of Starch 91
 Preparation of Foods Containing Starch 91
Cereals 92
 Wheat Preparations 94
 Millets 95
 Buying and Storage of Cereals 97
 Processed Cereals Products 98
Points to Remember 98
Study Questions 99

10. Protein Foods of Plant and Animal Origin **100**

Dals and Pulses 100
 Nutritive Value 102
 Buying and Care 102
 Preparation of Dals and Pulses 104
 Methods of Preparation 104

Germination of Pulses	105
Toxic substances in Dals and Pulses	106
Nuts and Oil Seeds	106
Pumpkin Seeds, Cashew nut, Walnuts, Almonds, Pistachios	108
Buying and Care of Nuts and Oil Seeds	108
Milk and Milk Products	108
Composition of Milk	109
Nutritive Value	110
Care of Milk in the Home	113
Effect of Heat on Milk	113
Scum Formation	113
Eggs	115
Structure	116
Composition	116
Nutritive Value	117
Grading	117
Buying and Care	117
Storage	118
Method of Judging Quality and Freshness of Eggs	119
Effects of Cooking	119
Functions of Egg in Cookery	120
Fish	120
Poultry	121
Nutritive Value	122
Buying and Storage	122
Cooking	123
Meat	123
Variety of Meats Available	124
Structure of the Muscle	124
Postmortem Changes	125
Ways of Preserving Meat	126
Cooking Meat	126
Effect of Heat on Meat	126
Points to Remember	126
Study Questions	128

11. Oils and Fats	129
Composition and Classification	<i>131</i>
Selection and Buying of Oils and Fats	<i>133</i>
Nutritive Value and Digestibility	<i>134</i>
Physical and Chemical Properties	<i>134</i>
Refining of Crude Oils	<i>136</i>
Role in Cookery	<i>137</i>
As a Medium of Cooking	<i>137</i>
As a Shortening	<i>137</i>
As a Seasoning	<i>137</i>
Changes in Fat Used for Cooking	<i>138</i>
Factors Affecting Absorption of Fat During Cooking	<i>138</i>
Effect of Prolonged Heating on Nutritive Value of Fats and Oils	<i>138</i>
Changes in Fats During Storage	<i>139</i>
Prevention of Fat Spoilage	<i>140</i>
Hydrogenation	<i>140</i>
Points to Remember	<i>140</i>
Study Questions	<i>141</i>
12. Vegetables	143
Classification	<i>144</i>
Colour Pigments	<i>147</i>
Flavour	<i>147</i>
Effect of Heat on Vegetables	<i>149</i>
How to Minimize Nutritional Losses	<i>149</i>
Buying, Care and Storage	<i>151</i>
Salads	<i>152</i>
Fruits in Salads	<i>154</i>
Points to Remember	<i>154</i>
Study Questions	<i>154</i>
13. Fruits and Fruit Preparations	156
Composition	<i>156</i>
Serving of Fruits	<i>158</i>

Nutritional Contribution	159
Flavour Constituents	160
Ripening of Fruit	161
Preparation of Fruits	161
Points to Remember	162
Study Questions	162
14. Beverages—Tea, Coffee, Fruit Juices and Others	164
Tea	165
Coffee	166
Chocolate, Cocoa, or other Beverages	167
Chocolate	167
Soups	167
Water	168
Fruit Juices	168
Synthetic Fruit Flavoured Drinks	169
Carbonated Drinks	169
Alcoholic Beverages	169
Points to Remember	169
Study Questions	170
15. Spices and Flavouring Agents	171
Role in Cookery	172
Points to Remember	174
Study Questions	174
16. Food Preservation	175
Importance of Food Preservation	175
Food Spoilage	175
Microbial Spoilage	176
Spoilage by Enzymes	177
Spoilage by Insects	177
Food Preservation	178
Principles of Food Preservation	178

Methods of Food Preservation	180
Bacteriostatic Methods	180
Dehydration (removal of water)	180
Sun Drying	181
Smoking	181
Mechanical Drying	181
Addition of Salt or Sugar	181
Use of Oil and Spices	182
Use of Acid	182
Use of Chemical Preservatives	182
Use of Low Temperatures	183
Use of High Temperatures	184
Pasteurisation (Temperatures below 100 °C)	184
Boiling	185
Canning	185
Points to Remember	185
Study Questions	186

17. Home Scale Methods of Food Preservation **187**

Drying	187
Pickling	188
Jams, Jellies and Marmalades	189
Bottling Fruit Juices or Squashes	190
Freezing	191
Practical Work	192
Points to Remember	193
Study Questions	194

18. Food Sanitation and Hygiene **195**

Water	195
Potable Water	196
Sources of Contamination of Water	197
Treatment of Water	198
What you can do about pesticide residue	199

Food	199	
Food Handling	199	
Food Contamination	200	
Equipment	200	
Control of Insects and Rodents	201	
Practical Rules for Good Sanitation	202	
Laboratory Work	203	
Practical Work	203	
Points to Remember	203	
Study Questions	203	
19. Food Borne Diseases		204
Toxins from Plants	204	
Toxins from Animals	205	
Mycotoxins	206	
Toxic Agricultural Residues	207	
Poisoning by Chemicals	207	
Food Poisoning by Bacteria	209	
Food Infections	210	
Other Infections	210	
Points to Remember	211	
Study Questions	211	
20. Food Laws and Food Standards		212
Food Laws	212	
Prevention of Food Adulteration Act	213	
The Fruit Products Order	213	
Meat Products Order	213	
ISI Standards	214	
The Agmark Standard	215	
Export Inspection Council	215	
Standards of Weights and Measures	215	
Food Adulteration	215	
Common Adulterants and Their Ill-effects	216	

Incidental Adulterants	217
Metallic Contamination	217
Contamination by Pests and Pesticide Residues	218
Packaging Hazards	218
Health Hazards due to Consuming Exposed Snacks	218
Simple Physical Tests for Detection of Food Adulterants	219
Simple Laboratory Chemical Tests	219
Consumer Protection	220
Municipal Laboratories	220
Food and Drug Administration	221
The Central Food Testing Laboratory	221
Export Inspection Council Laboratory	221
Central Grain Analysis Laboratory	222
Voluntary Agencies	222
Quality Control Laboratories of Companies	222
Quality Control laboratories of Consumer Co-operatives	223
Private Testing Laboratories	223
Consumer Guidance Society	223
Points to Remember	224
Study Questions	224

<i>Appendix—Table of Abbreviations and Table of Equivalence</i>	225
<i>Further Reading</i>	226
