Contents

<i>List of contributors</i>	xiii
<i>List of abbreviations</i>	xv
Introduction	1
Part I General issues	
1 Defining functional foods	9
<i>M.B. Roberfroid, Université Catholique de Louvain, Brussels</i>	
1.1 Introduction	9
1.2 Functional foods: defining the concept	11
1.3 Functional food science	16
1.4 Communicating functional claims	19
1.5 Case studies	22
1.6 Food technology and its impact on functional food development	24
1.7 Future trends	25
1.8 References	25
2 EU legislation and functional foods: a case study	29
<i>P. Berry Ottaway, Consultant, Berry Ottaway and Associates Ltd, Hereford</i>	
2.1 Introduction	29
2.2 Product description	29
2.3 Product positioning in the European market	30
2.4 Product composition	30

2.5	Functional claims	36
2.6	Packaging	38
2.7	Labelling	39
2.8	Manufacture	40
2.9	References	40
3	US legislation and functional health claims	43
	<i>M.K. Schmidl and T.P. Labuza, University of Minnesota</i>	
3.1	Introduction	43
3.2	Definitions	44
3.3	Nutrient modification and specific nutrient claims	46
3.4	Disease-specific or disease-prevention (health) claims	47
3.5	The Food and Drug Administration Modernization Act 1997	55
3.6	Medical foods	56
3.7	The Dietary Supplement Health and Education Act 1994	57
3.8	The controversy over labeling	64
3.9	Advertising and the Federal Trade Commission	65
3.10	Future trends	66
3.11	Further reading	67
3.12	References	67
Part II	Functional foods and health	
4	Colonic functional foods	71
	<i>R.A. Rastall (University of Reading), R. Fuller (Russett House, Reading), H.R. Gaskins (University of Illinois, Champaign, Urbana) and G.R. Gibson (University of Reading)</i>	
4.1	Introduction	71
4.2	What are colonic functional foods?	72
4.3	How are colonic foods metabolised?	73
4.4	Probiotics	75
4.5	Prebiotics	77
4.6	Synbiotics	81
4.7	Health aspects of functional colonic foods	82
4.8	Host–microbe interaction	85
4.9	Conclusion	89
4.10	References	89
5	Coronary heart disease	97
	<i>J.A. Lovegrove and K.G. Jackson, University of Reading</i>	
5.1	Introduction	97
5.2	Coronary heart disease and risk factors	100
5.3	Relevant lipid particles	104
5.4	Diet and coronary heart disease: the evidence	111
5.5	Effects of probiotics on blood lipids: the evidence	118

5.6	The effects of prebiotics on coronary heart disease	124
5.7	The effects of synbiotics on coronary heart disease	130
5.8	Future trends	130
5.9	Sources of further information and advice	131
5.10	References	132
6	Anti-tumour properties	141
	<i>I.T. Johnson, Institute of Food Research, Norwich</i>	
6.1	Introduction	141
6.2	The nature of tumour growth	143
6.3	Models of carcinogenesis	145
6.4	Diet and gene interactions	146
6.5	Mechanisms of action: nutrients	148
6.6	Mechanisms of action: phytochemicals	153
6.7	Mechanisms of action: other factors	156
6.8	Conclusion: the role of functional food	159
6.9	Future trends	160
6.10	Sources of further information and advice	160
6.11	References	161
7	Functional foods and acute infections: probiotics and gastrointestinal disorders	167
	<i>E. Isolauri and S. Salminen, University of Turku</i>	
7.1	Introduction	167
7.2	The background	168
7.3	Probiotics and the immune system	172
7.4	Probiotic functional foods and the treatment of gastrointestinal disorders	175
7.5	Future trends	176
7.6	Sources of further information and advice	177
7.7	References	177
Part III Developing functional food products		
8	Maximising the functional benefits of plant foods	183
	<i>D.G. Lindsay, Institute of Food Research, Norwich</i>	
8.1	Introduction	183
8.2	The concept of functionality	184
8.3	Functional effects deliverable by plants	185
8.4	Plant sources of functional compounds	187
8.5	The delivery of functional effects	188
8.6	Enhancing functional effects	188
8.7	Factors affecting the intake of functional compounds	192
8.8	Enhancing macronutrient quality	192
8.9	Enhancing micronutrient quality	197

8.10	The effects of food processing	202
8.11	Future trends: the work of NEODIET	204
8.12	References	205
9	Developing functional ingredients: a case study	209
	<i>A.-S. Sandberg, Chalmers University of Technology, Gothenburg</i>	
9.1	Introduction: the nutritional properties of peas	209
9.2	Improving pea protein	212
9.3	Processing issues in improving pea protein	213
9.4	Adding improved protein to food products	215
9.5	Evaluating the functional and sensory properties of improved pea protein in food products	217
9.6	Future trends: the work of NUTRIPEA	221
9.7	Sources of further information and advice	224
9.8	References	228
10	Functional fats and spreads	233
	<i>E.A.M. de Deckere and P.M. Verschuren, Unilever Research, Vlaardingen</i>	
10.1	Introduction	233
10.2	Functional ingredients and chronic diseases: applications in fats and spreads	234
10.3	Fatty acids	234
10.4	Spreads containing fish oil	240
10.5	Modified fats and oils	241
10.6	Phytosterols	243
10.7	Antioxidants	245
10.8	Low (zero) fat spreads	247
10.9	Inulin	249
10.10	Calcium	249
10.11	Conclusions	250
10.12	References	250
11	Functional confectionery	259
	<i>E.F. Pickford and N.J. Jardine, Nestlé Product Technology Centre, York</i>	
11.1	Introduction	259
11.2	Types of functional confectionery	261
11.3	The current market in functional confectionery	261
11.4	The development and manufacture of functional confectionery products	268
11.5	Marketing and retailing functional confectionery	278
11.6	Summary	284
11.7	References	285

12 Probiotic functional foods	287
<i>T. Mattila-Sandholm and M. Saarela, VTT Biotechnology, Espoo</i>	
12.1 Introduction: the health benefits of probiotic foods	287
12.2 Selecting probiotic strains	292
12.3 Pilot testing in clinical human trials	297
12.4 Processing issues in developing probiotic foods	302
12.5 Future trends	303
12.6 Sources of further information and advice	305
12.7 References	306
13 Dietary fibre functional products	315
<i>F. Guillon (URPOI, Centre de Recherches INRA, Nantes), M. Champ (UFDNH, Centre de Recherches INRA, Nantes), and J.-F. Thibault (URPOI, Centre de Recherches INRA, Nantes)</i>	
13.1 Introduction	315
13.2 Defining dietary fibre	316
13.3 Sources of dietary fibre	321
13.4 Processing dietary fibre ingredients	329
13.5 Processing foods containing dietary fibre	337
13.6 The physiological effects of dietary fibre	340
13.7 Recommended intakes of dietary fibre	350
13.8 Conclusions and future trends	351
13.9 Bibliography	355
<i>Index</i>	365
